Good Morning, William Irby.

We will be placing your comments below in consumer correspondence in Docket No. 20200226, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

Toni Hover

From: William Irby
175 N. Gulf Blvd
Palm Island FL

As a homeowner on Palm Island since January 1994 and a resident since August 1998 I want to thank you for your evaluation of the current proposal to install a waste water system on Palm Island. I am a participant in the PIE Batch Pump-Out program and have had good reviews to date on the condition of my system. We are in a HOA community of 12 private homes of which 2 have had their septic fields and tanks replaced and a third home is planned to be built with a new system. Also there are 5 new systems either in progress or completed along Gulf Blvd in our vicinity.

The impact of development of a waste water system on such a unique community as Palm Island with limited access with a ferry already heavily used would be devastating. Retrofit of a system which just removes waste water seems an unjustified hardship for the already built homes. Surely there's a better way to manage the effectiveness of existing technology without destroying our Island.

I encourage you to deny the Application for the Waste Water Permit.
Thank You.
