Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Art Graham,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Mr. Gregory Barton

And, I am a shareholder of many stocks and bonds and I get the idea of shareholder return, however, on this issue, a company with a near full monopoly of the states power grid, if it needs to upgrade and improve or harden it's delivery equipment, that has to come out of profit dollars. I as a home owner must pay for my homes power distribution and so should FPL. It should not be billed to the end users of their product in this case. It should be explained to their shareholders that they need to use profit return dollars to strengthen their distribution equipment so they can continue to send power to all of Florida, and once done the shareholder returns will increase again. That make everyone involved with investing in FPL to have share the burden.

Sincerely,
Cel. Andre Ryland

For once the PSC needs to NOT cave into the utility monopoly and do what is best for the consumer. I have seen again and again over the decades that this commission rubber stamp each and every request by these utility monopolies allowing them to increase their profits on the backs of their customers. Rarely does the consumer get a break. It is time that their investors bear the cost.

Dear commissioner Art Graham,

Wild swings in temperatures and intensity of wind storms calls for energy conservation, not the costly generation of more energy. For my part, I have responded to this need by installing 20+ photovoltaic panels on my roof in addition to huge batteries for nighttime supply.

Florida Power and Light's (FPL) preferred 10-year site plan is unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Art Graham,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Mr. Kevin Bickers
