Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Gabriella Passidomo,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Miss Aleksandra Kaporovskaya

The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Mr Ronald Sonesen

Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Families like mine are having to make choices between paying our utility bills and paying for food. It's horrifying that FPL wants to increase rates even more than they have this past year alone, and for such a ridiculous reason too. Please don't let FPL continue to hurt Floridian families like this.

Sincerely,

Sincerely,
Ms. Ivanna Dalencon

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Gabriella Passidomo,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Mr. Andy Lynn

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Gabriella Passidomo,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up.

FPL's projections are going to make rate-payer's bills increase without ever realizing any benefits from the the proposed FPL investment. It is clear that this means FPL, a public corporation, will become wealthier without any benefits to the Florida rate-payers. Furthermore, such proposed FPL investments are not designed to meet our everyday Florida's energy needs. Instead FPL should directly increase investment in sustainable and hardened utility-scale Solar and Solar Storage, utility-scale Wind-power and incentivized Energy Efficiencies that help FPL rate-payers with the real weather risks we are facing, like extreme heat during the summer months instead of the "half-baked" schemes on the present docket, which is based on an unrealistic winter scenario and impracticably flies in the face of all science research knows about climate climate.

FPL is able to pass the full-cost of their projects, plus more new profit for new infrastructure, onto the ratepayers with PSC approval. My sense is you withheld such approval. You should not motivate FPL to build more gas-fired plants or build the wrong non-renewable energy technologies that are unsuitable to Florida's actual need.

FPL are already raising our bills higher and higher, a crushing burden on the Florida rate-payer. Please reject FPL's proposed site plan and urge them to invest in renewable technologies and efficiency programs that conserve resources, save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Mr. Michael Brower

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Gabriella Passidomo,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Ms. Michelle Mondragon

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Gabriella Passidomo,

I am writing to ask you to reject FPL's 10-year site plan. When Floridians are facing ever-increasing prices in every aspect of our lives and the immediate effects of climate change, it is completely inappropriate to grant their wish of millions of dollars in MORE dirty energy infrastructure. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Gabriella Passidomo,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Mr. Eric West

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

And, I am a shareholder of many stocks and bonds and I get the idea of shareholder return, however, on this issue, a company with a near full monopoly of the states power grid, if it needs to upgrade and improve or harden it's delivery equipment, that has to come out of profit dollars. I as a home owner must pay for my homes power distribution and so should FPL. It should not be billed to the end users of their product in this case. It should be explained to their shareholders that they need to use profit return dollars to strengthen their distribution equipment so they can continue to send power to all of Florida, and once done the shareholder returns will increase again. That make everyone involved with investing in FPL to have share the burden.

Sincerely,
Cel. Andre Ryland
