Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Gabriella Passidomo,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Mr. Jon Drossos

For once the PSC needs to NOT cave into the utility monopoly and do what is best for the consumer. I have seen again and again over the decades that this commission rubber stamp each and every request by these utility monopolies allowing them to increase their profits on the backs of their customers. Rarely does the consumer get a break. It is time that their investors bear the cost.

Dear Gabriella Passidomo,

Wild swings in temperatures and intensity of wind storms calls for energy conservation, not the costly generation of more energy. For my part, I have responded to this need by installing 20+ photovoltaic panels on my roof in addition to huge batteries for nighttime supply.

Florida Power and Light's (FPL) preferred 10-year site plan is unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs.
