Good Afternoon, Christy Folk.

We will be placing your comments below in consumer correspondence in Docket No. 20220000, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

**Subject:** Ten Year Site Plan comments to be filed in Docket No. 20220000

Hello,

I am writing in opposition to the ten-year plans proposed by utilities including FPL that use unfounded claims about potential future extreme winter events to continue to prop up fossil gas that benefits industry executives while passing costs onto consumers. Utility companies should be heavily investing in energy efficiency, clean/renewable energy, and battery storage in order to lower rather than increase costs for consumers, as well as prepare for the much more likely events of increasingly intense hurricanes. As the state of Florida is one of the most vulnerable places to the currently ongoing climate crisis, utilities must recognize that continued investment in fossil fuels will lead to volatile fuel prices and stranded assets. The burden of higher costs should not be borne by consumers due to short-sighted utility investments that don't take into account the urgent need to rapidly decarbonize our society to prevent catastrophic climate impacts, not to mention the numerous benefits of investing in clean energy.

Please oppose any plans put forth by utilities that rely on unfounded claims as an excuse to continue to invest in fossil fuels at the expense of consumers. Thank you.
