Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Mike La Rosa,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Mrs. Nikki Perez

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Mike La Rosa,

You MUST find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable! Please! We cannot live with more increases.

People will/have died! FPL's projections are not probable and this will have them increase our bills more, even before the heat of summer!

FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers.... this needs to stop! Amend the law for current times. Make them accountable. As you well know the current rules just motivate FPL to build unnecessary infrastructure They have already raised our bills higher than I've ever seen.

Stand with us!!!! Reject FPL's proposed site plan and insist they invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely needing your help,

Sincerely,
Mrs. Lisa Evers

Dear commissioner Mike La Rosa,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. I've lived in Florida since the end of 1989 and think Florida citizens are more concerned with extreme summer heat and hurricanes rather than long lasting extreme winter weather.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident.
