Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Mike La Rosa,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Miss Marcela Tellez

Dear commissioner Mike La Rosa,

ENOUGH ALREADY! How can you, members of the PSC, be blinded to what the entire NW Florida pans handle folks are experiencing with their bills? Double kWh being billed when they have shut off breakers and living uncomfortably just to be able to pay a power bill!!!! Please heed all the complaints and comments that have poured in since this hostage situation occurred back late last year.

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

My thermostat stays on reasonable settings throughout the year; typically 77 degrees during the summer and 68 during the winter. However, I continue to see my bill increase. It's very frustrating to be paying more despite there being no appreciable change in consumption to be barely comfortable in my home.

Sincerely,

Sincerely,
Mr. Daniel Traylor
