COMPLAINT INFORMATION

Complaint: Delay in Service against Tampa Electric Company

Details:

I once again want to thank you for screwing over the Florida public. You have allowed TECO to charge more, increasing their investor returns far greater than ever before. The allowed extra "Storm Protection Charge" is just a money maker. TECO should have been reinvesting profits into the electrical grid for decades, but due to allowed mismanagement, they have not and now you allow them to "fix" their mistakes on the backs of Florida citizens. The only one benefiting from this is TECO. Less down time means more revenue. Fewer downed lines means less overtime and fewer linesmen. All of this increases their bottom line AND have you to thank for that. I am glad TECO is going "green", but at a huge expense to consumers. Multiple reports were completed and IGNORED by the commission against these rate increases. There is a special place in hell for people who put corporate greed over the well being of others and those who allow it. Making citizens choose between feeding their families or powering their homes while padding the bank accounts of corporate investors.
