COMPLAINT INFORMATION

Complaint: Improper Billing against Florida Power & Light Company

Details:

I would like to know why I am being charged for electricity that I do not use. It seems I am being penalized for having solar panels to save on electricity, even though I am making electricity for FPL who then sells it to other customers. I pay my fair share for the electricity I do use. FPL promotes adding to save electricity by buying energy efficient appliances, tuning down the A/C, and turning electricity off when not in use. By doing what FPL recommends you get charged for not using enough electricity. I guess the next charge we see in the near future will be non-use gas tax, because of all the electric cars on the road.

Please give a response to this short letter.
