Subject: Septic to Sewer conversion Little Gasparilla Island

Dear Commissioners,

I spoke at the FPSC hearing and sent a letter in favor of septic to sewer conversion. I was shocked to hear that we were turned down. I do not think they understood that we were requesting septic to sewer. I live on LGI, and am a full time resident. This is our only home. No second home. We built our home and moved here from Hernando County. We had a smaller home on the island and decided to live out our retirement on LGI. So we sold our vacation home and built our new home. We moved in 2010. We had to put in an ATU, County permit #273187. When we moved in we had no idea what that meant until the County came to inspect our unit and I received a bill for inspection, The inspector explained everything to me, including his opinion, "that septic to sewer would most likely be in the near future for the barrier islands." He stated that 'it would be environmentally better for our ECO SYSTEM."

Currently, we pay the County for the permit and inspection, but they never come to inspect (we have video cameras) and we pay Martin Septic service, who do come out and inspect every 6 mo.

My concern is that currently, we only have ONE service provider, who will come out to the island to maintain and pump out our septic systems. I am asking the Board to please let us know

how this will be handled if Martin Septic decides not to service our Island any longer OR if we lose the barge service needed to get service trucks over to the island. Right now the barge service comes out of ELDREDS MARINA. THEY ARE CURRENTLY UNDER CONTRACT TO SELL THE MARINA. SO THIS COULD BE A BIG PROBLEM!

It is very disappointing to know, that presently there is a company who is willing and able to establish septic to sewer conversion, who has been turned down. I am deeply concerned that we will one day, unexpectedly, have a huge problem on our hands.

I requested that the County send their contingency plan for the Island regarding Sewer systems, maintaining and assuring barge service for their trucks. To date, we have received no reply.

We would feel much better knowing that our elected officials are preparing for the future of our barrier Islands and the surrounding waters.

Sincerely,
Karyn & Art Flatau
