Subject: Senior Citizen Feedback

Chairman Andrew Giles Fay & FPSC Colleagues, www.fpsc.gov

Good Day !

Ref : Senior Citizen Pertinent Feedback . Docket # 20210015 FPL Account # 26582 57510 FPSC Inquiry # 1398580C FPSC Tracking No's 187688 187738

FPL Minimum Rate Charge ? : (Innocent Victim Of Circumstance Scenario)

As a well versed, and also intelligent Senior Citizen, and also US Navy Veteran I still cannot fathom as to how the FPSC members could of granted a rate increase to FPL that monetarily penalizes individuals such as myself

primarily due to my Lower Monthly KWH usage ? (45 to 55 KWH)

FPL instead of praising, commending, congratulating, or even rewarding me for my diligent effort, and also sacrifice has chosen instead to monetarily penalize me instead ?

Where is The Basic PR, and also Loyal customer incentive FPL ?

What Is Wrong With The FPSC ?

FPL has chosen instead to deliberately mislead the FPSC, and to also plea their case based on their faulty infrastructure, lack of accountability, and greediness, when in fact they should also be held fully accountable for their

dishonesty as well.

I have been a loyal customer of FPL since the year 1976, and I have always paid my electrical bill on time.

I also suffer from PTSD, and Tinnitus. Single Household, and Living on a Fixed Income. Note : No AC in my home, and No Hot Water Heater. (I Go To The Gym- Etna Medicare- Silver Sneakers)

In Summation :

I sincerely hope that my pertinent feedback will serve as a wake up call for the FPSC, as I am most assuredly not a Happy Camper . (Hello Florida Governor Ron DeSantis ?)

Thank You.

Sincerely,

Michael J. Walsh (82 Years Young)

US Navy Veteran 1957-1963 ADR2 (Member I.D. 1194721044)

Hollywood, Fl.

Subject: We Can't Afford Higher Rates from FPL

Chairman Gary Clark,

I am writing as a concerned Florida resident and customer of Florida Power & Light (FPL). I received notification that FPL intends to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to find work.

I urge you to reconsider this rate increase.

Subject: Punishment for homeowner solar investment

The Florida Public Service Commission should be ashamed.

Global warming is no longer a theory - it's a fact, and it is clearly made worse by burning of fossil fuels, as most power generating plants do. The need for environmentally neutral ways to generate power is critical, if earth is to avoid catastrophic warming. To date, the most feasible of those are wind and solar. I have installed solar panels on my roof, which has significantly reduced my power consumption from Florida Power & Light. Although I am pretty healthy, at my age (80) I am unlikely to ever fully recover the cost of installation. I did it because I believed it was the right thing to do, for the people, for the country, and for the planet.

What the Florida Public Service Commission (Andrew Giles Fay, Art Graham, Gary F Clark, Mike La Rosa, & Gabrielle Passidomo) felt was the right thing to do was to financially punish those whose power bills do not exceed \$25 / month by letting FPL and other power utilities to arbitrarily add a base charge of \$25 / month to their bills. So as of my June bill, for the four or five months of the year that my solar panels are most effective, I am forced to make an involuntary donation of \$100 or more to FPL.

The following notice was slipped into my June bill, in very small print.

"A new minimum base bill of \$25, which was approved by the Florida Public Service Commission, is now in effect for metered residential customers whose monthly base electric service costs fall below \$25."

Lawyers can hash out whether this is legal; it is certainly morally wrong. The Public Service Commission should be encouraging, rather than punishing, homeowner investment in solar power.
