**Subject:** RE: DOCKET #20200226-SU - Little Gasparilla Island Sewer

Good Morning Commissioners,

We wanted to express our gratitude for your great efforts and fair ruling regarding the LGI Central Sewage System Issue.

We also wanted to bring to your attention an article that was written in a local newspaper. The link to the article is below.

Also, we've attached a letter that we are posting to social media and a copy of it is being sent to the newspaper as well. We are very concerned and are trying to stay active on our part.

The question of central sewage systems on LGI, Palm Island comes into

## question after state entity says 'no' - Boca Beacon

The question of central sewage systems on LGI, Palm Island comes into question after state entity says 'no' BY MARCY SHORTUSE In a day and age of clean water being one of the top priorities of local, county, state and federal entities, it may come as a shock to you that three board members of an entity many have never heard of – the Florida Public Service Commission (PSC) – have ...

The article written in the Boca Beacon paper by Marcy Shortuse, dated August 26, 2022, regarding sewer on LGI and Palm Island, was written without true facts or environmental study results, but by mere conjecture. It shows a distorted view with an attempt to deceive. This misinformation is intended to deceive the uninformed public. We feel that our PSC Commissioners in Tallahassee were wrongly vilified by the article submitted to the paper.

The environmental studies show no cause for concern. Therefore, it is not about the environment. Rather, it's all about money (greed). The article submitted to the paper was done solely in the interest and financial gain of the proposed individual (company) that wants to install the sewer system on Little Gasparilla Island and other barrier islands. Why wasn't the actual source of the so-called "facts" identified? And where is the evidence to back up all the so-called "facts" that were published in the article?

Perhaps the home and property owners as taxpayers, whom this involves, should have a vote, or say in this matter, and not some outsider with ulterior motives. We understand if there would be an environmental issue which would involve the surrounding area, but the studies indicate that there is not.

Furthermore, these officials (PSC Commissioners from Tallahassee) came here and listened and saw the evidence presented to them. They ruled that there is no need for the proposed sewer system.

People, please get involved and tell our PSC Commissioners that you support their decision. It involves all of us who are home and property owners. What the individual (company) proposed for our island would not only be detrimental to us but would in time, under certain conditions, cause a very catastrophic environmental impact on our beautiful and pristine island paradise.

The proposed project is of financial interest to only one entity: the one who is proposing it.

Please email the following PSC Commissioners that you support the decision they made in the best interest of the environment and the people they represent:

1. Office of Commissioner Clark (Commissioner.Clark@psc.state.fl.us)
2. Office of Commissioner La Rosa (Commissioner.LaRosa@psc.state.fl.us)
3. Office of Commissioner Passidomo (Commissioner.Passidomo@psc.state.fl.us)

Also, keep in mind that the proposed project would surely cause considerable financial hardship on many, if not all of us.
