Subject: Docket No. 20220001-EI: Reject the new electric rate hikes!

Commissioner Gabriella Passidomo,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.

Commissioner Gabriella Passidomo,

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to reject these proposals and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases at this time.

How many rate increases are you going to approve? When is enough enough? When will you stand up for your own mission of setting fair rates?

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to reject these proposals and not increase our bills.

There is no good reason for rates to increase as I am willing to explain. The justification I have heard is that gas is more expensive. The gas company can charge whatever they like; I am not their customer.

If gas is getting too pricey, there are a myriad of ways to produce electricity which now could be more economical than combusting natural gas.

It is the responsibility of the electric company to use ever improving technology to remain competitive rather than lazily passing on the cost to consumers and continuing to not improve.

The power companies in Florida should LAUGH when gas prices increase as we are the "sunshine state" I did my part and put panels on my roof. I will pay for that investment for years, and immediately I started getting a punitive bill despite producing more than I consume (roommate moved out) if they can't make a profit from me both paying them and providing them with electricity then the company desperately needs restructuring.
