This is ridiculous.. The quality of our water service is very bad. Water is turned off without notice in the middle of taking a shower/cooking, washing dishes and on and on. When we talk to the people that's doing the work they say broken and damaged pipes. Now we're boiling water for days at a time. We buy water by the gallon to drink because the boiling water has a bad taste. Because of bad water conditions, **NO** increase until you fix the system, fix the 40+ "old" pipes!! Then let's talk more about your crazy increase with our utility bill!
Not griping or complaining, just stating facts.
