Subject: Docket No. 20220001-EI: Reject the new electric rate hikes!

Commissioner Andrew Fay,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.

Commissioner Andrew Fay,

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these outrageous rate increases at this time.

Tampa Electric Co. has reached a settlement that will raise customers' base electric rates over the next three years, though the utility agreed to shave more than \$100 million from its original proposal.

In 2021 Tampa Electric Just Had a rate increase!!! Typical residential customers would see bills in January that are 14 percent higher than current amounts if the settlement, which includes \$302 million in revenue increases, is approved by the Florida Public Service Commission.

Floridians cannot afford to have rates increased AGAIN! Everything is so high that soon we won't be able to live, have electric, or even eat!!! Stop this madness now!!

In 2021, TEC's net income was \$446 million, compared with \$424 million in 2020!!! Ludicrous to think that is not enough for them!!!

Subject: Docket No. 20220001-EI: Reject the new electric rate hikes!

Commissioner Andrew Fay,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.

Subject: Docket No. 20220001-EI: No new electric rate hikes!

Commissioner Andrew Fay,

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these outrageous rate increases at this time. They're nothing short of a hindrance to everyday Floridians.

Commissioner Andrew Fay,

Docket No. 20220001-EI

The monthly FPL electricity costs are ridiculous, double what I was paying a year ago with Gulf Power. Majority of families cannot afford current rates. A 15% increase in 2023 will result in an exorbitant amount of financial hardship for citizens in middle and low class socioeconomic classes.

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

TECO had a huge price increase in January 2022 and another increase this month. This is out of control and we Floridians can't afford it. Their record profits are supposed to be going to green energy to LOWER our rates, not raise them. STOP THIS MADNESS NOW!!!

I urge you to reject these rate increases at this time.
