Subject: Energy companies.

Mr, Graham,

I ask that you please deny the petition from Florida Power & Light, Duke Energy Florida, and Tampa Electric Co. To increase prices. I have solar panels and this year my bill went from \$12 to \$32 because Duke energy now has a minimum bill of \$30. So I'm giving them \$18 for free on top of helping the power my neighbor when I send energy back to the grid that I sell to them only for half of the cost I buy it from them. So from all sides I'm losing. If it wasn't so expensive I would get batteries and get rid of Duke. Please help us with this increase prices that only benefit the shareholders and not floridians.

Thanks
Ana Esquivel

Subject: Docket No. 20220001-EI: Reject the new electric rate hikes!

Commissioner Art Graham,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.
