Subject: Docket No. 20220001-EI: Reject the new electric rate hikes!

Commissioner Art Graham,

Docket No. 20220001-EI

Dear Commissioner,

I am writing as a concerned Florida resident and a Duke electricity customer. I received notification that Duke intends to increase rates for customers like me. I am urging you to reject these proposals and not increase our bills.

Just this past June I traveled up north to be with my ill mother. I was gone for 3 weeks. I set my a/c at 84 and unplugged all appliances, turned off the circuit breaker to the water heater, etc. My bill for that month was 15% higher than the highest month I've ever had in 7 years of living in Florida. That's unacceptable!

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic and now hurricane Ian. We are all inundated with price increases on everything from toilet paper and groceries to cell phone and cable monopolies.

I urge you to reject these rate increases at this time. Please put the hard working people of Florida first.

How many rate increases are you going to approve? When is enough enough? When will you stand up for your own mission of setting fair rates?

Sincerely,

Concerned Voter

Dawn Doucette Ellis

Commissioner Art Graham,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.

How many rate increases are you going to approve? When is enough enough? When will you stand up for your own mission of setting fair rates? I will have to go without electricity if it goes up another dollar! FPL makes enough money off of their customers, tell all the "big wigs" to take a pay cut, why should us seniors on a fixed income continue getting poorer and poorer!!
