Subject: Block FPL Rate Hikes on NWFL

Governor Desantis

The citizens of the less affluent NWFL are stilling recovery from the devastating impacts of Category 5 Hurricane Michael, and yet are paying the HIGHEST power rates of any FPL customers approved during the merger with Gulf Power. And NOW reports that the Florida Public Service Commission (PSC) will approve major increases in November for Hurricane Ian losses in SW Florida!

As the Senior Florida State Official that appoints and influences that decisions of the PSC, we ask that Recovering NWFL be spared any rate increases until the region can get back on it's feet. FPL has walled off the old Gulf Power customers are "FPL NWFL", so it would be easy to separate us from the coming rate increase.

Voters are suffering in the Panhandle, and will appreciate your action on our behalf.

Best Regards

Kevin C. Rose

Subject: Stop FPL increases to NW Florida

Dear Governor DeSantis,

NW Florida, a lower income, mostly rural, is targeted for over a billion in FPL increases!

This is another insane tactic to rip off FL residents in times of financial hardships, (thanks to the democrat's strategy to take everything out of the pockets of Americans for their own gain.)

Florida's seniors are struggling without consideration when puppet Biden is giving away the bank to foreign countries, illegals, and causing long time detrimental consequences to America and our allies.

The People must be heard, we've had enough with outrageous costs, ie: in home rentals, with no cap criteria placed on owners of rentals.

1. So many serious issues caused by Democrats!

2. Corporations making uncontrollable decisions that effect FL Americans. Like FPL!

3. Educators forced to teach our kids about transgender options before they learn their ABC's.

4. Seniors, (I'm 75) who built America for most of their life, struggling to eat and pay bills.

5. Homeless Americans hungry, turned away, without a Plan to help them recover or medical help.

I could on and on.

I have always voted for you. I'm hoping you run for President one day.

Thank you,
Patsy Rogers, Republican

Subject: Please stop the proposed FPL rate increase

Gov. DeSantis,

After FPL acquired Gulf Power, our electricity rates were raised and we are now paying more in NW FL for electricity than the rest of Florida serviced by FPL. This was approved by the Governor's appointed Public Service Commission. Now they are floating another \$1.1 Billion increase. No doubt they incurred significant Hurricane Ian expenses; however, shouldn't related increases be applied to the areas where those expenses were incurred? Our area sent crews and trucks to help out in South and Central Florida and we are already paying higher rates. Please intercede with your appointed Public Service Commission to prevent the proposed NW FL rate increase.

<https://www.miamiherald.com/news/business/article267991627.html>

SADLY this article could not do the math = FPL has 5.8 million customers / \$1.1 BN spread amongst us means a \$15 @ mo increase in electric bills IF approved for repayment in one year!

Over the next year would it not make far more "cents" to mandate FPL add another \$3 a month = so every customer has the SurgeShield to protect from the 14 million lightning strikes every year 'doing \$1,000's damage to vulnerable appliances' per their latest solicitation.

LETS me honest... that puck could have been installed in those new SmartMeters our govt subsidized \$hundreds of millions to save even more than that reading meters manually?

BOTH OSHA General Duty Clause and Consumer Product Safety Commission require vendors to provide latest technology available to provide a safe product. TIME is way past as JFK might have uddered between HollyWeird Starlets ... to get on with getting on!!

Most every FPL customer has lost sensitive appliances without such routinely normal technology smoothing sine waves and sending lightning waves to ground!!

GOV Rick's PSC member agreed with me it was vital... but claimed their are "other vendors" who can do so.... REALLY??

Jim Matthews

Tequesta, FL

PS: I held up giving you this suggestion to avoid any appearance of quid pro quo... by the DNC's CommieNaziRatBastards controlling our media!!

RE: FPSC Inquiry 1409048C

Dear Mr. Rose:

The Governor's office forwarded a copy of your email regarding potential Hurricane Ian recovery charges for Florida Power and Light Company (FPL) customers to the Florida Public Service Commission (FPSC). The FPSC regulates investor-owned electric, and natural gas utilities throughout the state, and investor-owned water and wastewater utilities in those counties which have opted to transfer jurisdiction to the FPSC. The FPSC has authority in the telephone industry which is limited to the Lifeline Assistance Program, Florida Relay Service, and pay telephone service. We appreciate the opportunity to respond directly to you.

FPL has not yet filed a petition with the Florida Public Service Commission to recover restoration costs for Hurricane Ian; therefore, there is no established docket on this matter. Your correspondence is important and will be filed with the FPSC's Clerks Office.

By Florida Statute, electric utilities are allowed to recover prudently incurred storm restoration costs. All utility petitions for storm cost recovery are carefully and thoroughly reviewed, including taking testimony and evidence that the Commission considers during a full evidentiary hearing. Only those costs deemed necessary and prudent by the Commission are allowed for recovery.

If you have any questions or concerns please contact Ms. Ellen Plendl at 1-800-342-3552 or by fax at 1-800-511-0809.

Sincerely,

Shonna McCray
Regulatory Program Administrator
Florida Public Service Commission
