Subject: RE: Conservation goals for electric utilities

Good afternoon Phillip Woolley,

We will be placing your attached comments in consumer correspondence in Docket Number 20200181-EU, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you,

Hiep Nguyen
Commission Deputy Clerk I
Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399
Phone: (850) 413-6746

Subject: Conservation goals for electric utilities

Dear Clerk Of PSC,

I am writing to ask you to update the Public Service Commission's policies on energy conservation. The PSC currently uses a flawed and outdated method for determining the feasibility of conservation projects, leading to large amounts of wasted energy and higher bills for customers.

The "Rate Impact Measure" (RIM) test penalizes efficiency by treating it as a cost, due to reduced revenue for the utilities. Under such a test, conservation projects will never look good to the utilities.

In addition, utilities state that efficiency projects should bring a payback to the customer in less than two years, which is a completely unreasonable standard that eliminates a whole range of the most cost-effective ways to help customers reduce energy use. This has led to conservation goals of zero or near zero being proposed by multiple utilities.

I ask you to update your energy conservation standards and require utilities to help customers save energy and lower their bills.

Sincerely,
Mr. Phillip Woolley
7139 N 9th Ave Pensacola, FL 32504-6615 Phil@philwoolley.com

Hiep Nguyen
