Governor Ron DeSantis,

I am upset and frustrated that FPL, Duke and Florida's other utility companies are asking for yet another rate hike to pad their very high profits. Floridians cannot afford to keep hemorrhaging money for basic necessities. Just because utilities dump millions into campaigns should not mean that they can rob Floridians blind. Please fight back against utility rate hikes.

RE: FPSC Inquiry 1410453C

Dear Ms. Schaff:

The Governor's office forwarded a copy of your email regarding Florida Power & Light Company (FPL), Duke Energy Florida (DEF), Tampa Electric Company (TECO) and Florida Public Utilities (FPU) to the Florida Public Service Commission (FPSC). The FPSC regulates investor-owned electric, and natural gas utilities throughout the state, and investor-owned water and wastewater utilities in those counties which have opted to transfer jurisdiction to the FPSC. The FPSC has authority in the telephone industry which is limited to the Lifeline Assistance Program, Florida Relay Service, and pay telephone service. We appreciate the opportunity to respond directly to you.

FPL, DEF, TECO and FPU are in the process of their proposed annual fuel cost adjustment. The fuel adjustment charge recovers the actual expenses associated with securing and processing fuel necessary to run the power plants used to generate electricity. Fuel rates mirror rising and falling fuel costs as reflected in the international marketplace. The revenue generated by the fuel adjustment charge does not add to the profit of the utility companies, but goes to pay fuel suppliers and transporters. The cost of fuel is shown as a separate cents per kilowatt-hour charge, and fuel costs are not contained in any other charge on a customer's bill.

Each year, utilities file their projected fuel expenses for the upcoming calendar year. The Florida Public Service Commission (FPSC), along with the Office of Public Counsel and other consumer representatives closely examine the fuel costs requested by the utilities. Public hearings are held annually to set the fuel factors for the next year. Since rates are set on projected costs, at the end of the year, the costs are "trued-up" or compared to the audited actual expenses incurred by the utility. If the utility recovered more than its actual costs, the amount of over-recovery is used to reduce the next year's costs. If the utility under-recovered (costs were higher than expected) that deficit is likewise rolled into the next year. The fuel cost adjustment is recognized by virtually all state commissions, by the Federal Energy Regulatory Commission, and is also used by most municipal electric utilities and rural electric cooperatives.

Fuel costs for FPL were set by the FPSC during the November 2021 cost recovery clause hearing. By Florida Statute and established Commission policy, electric utilities may recover certain expenses from customers through cost recovery charges adjusted annually by the FPSC. Cost recovery is allowed on fuel and purchased power, capacity, conservation, and environmental requirements. Utilities may not, however, earn a profit on fuel charges.

On November 17, and November 18, 2022, held the first set of hearings to determine the 2023 fuel adjustment charges. On December 6, 2022, the FPSC will conduct the next hearing to determine the 2023 fuel adjustment charges. You may watch the hearings live or afterwards by using the following link:

<http://www.floridapsc.com/agendas/audiovideo/index.aspx>

Thank you for sharing your views. We will add your comments to the correspondence side Docket No. 20220001-EI regarding the utilities' petitions for the fuel cost adjustment.

If you have any questions, please contact Ms. Ellen Plendl at 1-800-342-3552 or by fax at 1-800-511-0809.

Sincerely,

Shonna McCray
