BEFORE THE  
FLORIDA PUBLIC SERVICE COMMISSION

In the Matter of:

DOCKET NO. 20220001-EI

In re: Fuel and purchased power  
cost recovery clause with generating  
performance incentive factor.

\_\_\_\_\_ /

VOLUME 1  
PAGES 1 - 228

PROCEEDINGS: HEARING

COMMISSIONERS  
PARTICIPATING: CHAIRMAN ANDREW GILES FAY  
COMMISSIONER ART GRAHAM  
COMMISSIONER GARY F. CLARK  
COMMISSIONER MIKE LA ROSA  
COMMISSIONER GABRIELLA PASSIDOMO

DATE: Thursday, November 17, 2022

TIME: Commenced: 9:30 a.m.  
Concluded: 4:40 p.m.

PLACE: Betty Easley Conference Center  
Room 148  
4075 Esplanade Way  
Tallahassee, Florida

REPORTED BY: DEBRA R. KRICK  
Court Reporter

PREMIER REPORTING  
112 W. 5TH AVENUE  
TALLAHASSEE, FLORIDA  
(850) 894-0828

1 APPEARANCES:

2 MATTHEW R. BERNIER and STEPHANIE A. CUELLO,  
3 ESQUIRES, 106 East College Avenue, Suite 800,  
4 Tallahassee, Florida 32301; appearing on behalf of Duke  
5 Energy Florida, LLC (DEF).

6 MARIA JOSE MONCADA and DAVID LEE, ESQUIRES,  
7 Florida Power & Light Company, 700 Universe Boulevard,  
8 Juno Beach, Florida 33408-0420; appearing on behalf of  
9 Florida Power & Light Company (FPL).

10 BETH KEATING, ESQUIRE, Gunster Law Firm, 215  
11 South Monroe Street, Suite 601, Tallahassee, Florida  
12 32301; appearing on behalf of Florida Public Utilities  
13 Company (FPUC).

14 MALCOLM N. MEANS, J. JEFFREY WAHLEN and  
15 VIRGINIA PONDER, ESQUIRES, Ausley Law Firm, Post Office  
16 Box 391, Tallahassee, Florida 32302; appearing on behalf  
17 of Tampa Electric Company (TECO).

18 RICHARD GENTRY, PUBLIC COUNSEL; CHARLES J.  
19 REHWINKEL, DEPUTY PUBLIC COUNSEL; PATRICIA A.  
20 CHRISTENSEN and MARY A. WESSLING, ESQUIRES, OFFICE OF  
21 PUBLIC COUNSEL, c/o The Florida Legislature, 111 West  
22 Madison Street, Room 812, Tallahassee, Florida  
23 32399-1400; appearing on behalf of the Citizens of the  
24 State of Florida (OPC).

25

1 APPEARANCES CONTINUED:

2 JON C. MOYLE, JR. and KAREN A. PUTNAL,  
3 ESQUIRES, Moyle Law Firm, 118 North Gadsden Street,  
4 Tallahassee, FL 32301; appearing on behalf of Florida  
5 Industrial Users Group (FIPUG).

6 ROBERT SHEFFEL WRIGHT and JOHN T. LAVIA, III,  
7 ESQUIRES, Gardner, Bist, Bowden, Dee, LaVia, Wright,  
8 Perry and Harper, P.A., 1300 Thomaswood Drive,  
9 Tallahassee Beach, Florida 32308; appearing on behalf of  
10 Florida Retail Federation (FRF).

11 JAMES W. BREW and LAURA W. BAKER, Stone Law  
12 Firm, 1025 Thomas Jefferson Street NW, Suite 800 West  
13 Washington, DC 20007; appearing on behalf of Florida  
14 White Springs Agricultural Chemicals, Inc., d/b/a PCS  
15 Phosphate - White Springs (PCS).

16 PETER J. MATTHEIS, MICHAEL K. LAVANGA and  
17 JOSEPH R. BRISCAR, ESQUIRES, 1025 Thomas Jefferson  
18 Street, NW, Eighth Floor, West Tower, Washington, D.C.  
19 20007; appearing on behalf of Nucor Steel Florida, Inc.,  
20 (NUCOR).

21 SUZANNE BROWNLESS and RYAN SANDY, ESQUIRES,  
22 FPSC General Counsel's Office, 2540 Shumard Oak  
23 Boulevard, Tallahassee, Florida 32399-0850, appearing on  
24 behalf of the Florida Public Service Commission (Staff).

25

1 APPEARANCES CONTINUED:

2 KEITH C. HETRICK, GENERAL COUNSEL; MARY ANNE  
3 HELTON, DEPUTY GENERAL COUNSEL, Florida Public Service  
4 Commission, 2540 Shumard Oak Boulevard, Tallahassee,  
5 Florida 32399-0850, Advisor to the Florida Public  
6 Service Commission.

1 P R O C E E D I N G S

2 CHAIRMAN FAY: All right. I think everybody  
3 is setted in here for the 01 docket.

4 Commissioners, we will take up some of these  
5 issues, like I mentioned this afternoon, and just  
6 kind of where we land as to where we will work  
7 through tomorrow. I plan on working to, you know,  
8 normal business hour today to see what we can get  
9 through, and then we will -- we will set out the  
10 agenda for tomorrow.

11 So with that, Ms. Brownless, will you start us  
12 off with any preliminary matters that we may have?

13 MS. BROWNLESS: Yes, sir.

14 There are proposed Type 2 stipulations for all  
15 issues except Issues 3A, 8 through 10, 16, 18 and  
16 20. FPUC has all of its issues stipulated to with  
17 the exception of Issue 3A, which deals with its  
18 treatment of its 2022 fuel under-recovery  
19 \$15,143,447.

20 The issues for which there are proposed Type 2  
21 stipulations can be voted on today.

22 It is my understanding that OPC wishes to make  
23 an oral request for reconsideration of the  
24 Prehearing Officer's decision not to include its  
25 proposed Issues A and B. This decision is found on

1 page 60 of the prehearing order.

2 CHAIRMAN FAY: Okay. Why don't we go ahead  
3 and take that motion up now, then before we get  
4 into any of the testimony -- and, Ms. Brownless,  
5 it's OPC contested Issues A and B, is that correct?

6 MS. BROWNLESS: Yes, sir.

7 CHAIRMAN FAY: Okay. With that, then, Mr.  
8 Rehwinkel, we will give you some time to address  
9 the Commission. I know there probably will be  
10 parties that maybe will also want to address.  
11 Would five minutes be sufficient for you to  
12 present?

13 MR. REHWINKEL: Well, Mr. Chairman, I have two  
14 aspects of this. One is I need to state an  
15 objection. I made an objection at the prehearing,  
16 and I want to reiterate it. I want to move for  
17 reconsideration, but I will waive my opening if I  
18 can make my remarks here. I think it will still  
19 save time.

20 CHAIRMAN FAY: Okay. Just for clarity, your  
21 remarks will still deal with your objection to the  
22 exclusion of the two issues?

23 MR. REHWINKEL: It will -- that, and an  
24 objection to the hearing process itself. I need to  
25 state an objection for the record.

1           CHAIRMAN FAY: Okay.

2           MR. REHWINKEL: But I will do both of these in  
3           lieu of making any opening statement when it comes  
4           time for that.

5           CHAIRMAN FAY: Okay. Well, just for clarity,  
6           so essentially speaking to the A and B exclusion, I  
7           just view this as an opening statement. You will  
8           be speaking to it in your comments here.

9           MR. REHWINKEL: Yes.

10          CHAIRMAN FAY: And there is a second objection  
11          that you want to raise. If you could make sure  
12          there is clarity as to the two separate objections  
13          that you are bringing forward here. Because the A  
14          and B we have the information in front of us, but  
15          it sounds like, if you are raising a second one  
16          that hasn't been raised before, that we don't want  
17          to include that in your reconsideration vote here.  
18          It sounds like that would be essentially out of  
19          procedure, and I just want to make sure we don't  
20          exclude that objection.

21          MR. REHWINKEL: Okay. I think they are fairly  
22          well separated in my remarks.

23          CHAIRMAN FAY: Okay.

24          MR. REHWINKEL: But to understand, is it your  
25          decision that I can make both of those here, or you

1 just want to make sure that there is a --

2 CHAIRMAN FAY: There is clarity. Yeah. I  
3 mean, I would prefer if we went ahead and addressed  
4 the Issues A and B, and then went on from there and  
5 you can state your objection just as a preliminary  
6 matters just into the record for your procedure  
7 objection.

8 MR. REHWINKEL: Okay. I hadn't contemplated  
9 separating them, but let me -- let me make sure I  
10 start -- I handled the second one first.

11 CHAIRMAN FAY: And, Mr. Rehwinkel, I can give  
12 you a few minutes, but we can't -- we can't blur  
13 those two. I mean, a motion for reconsideration,  
14 you know, speaks strictly to that objection that  
15 the Commission excluded something and, therefore,  
16 unless you feel that they are just completely  
17 intertwined, I am going to need to you separate  
18 those.

19 MR. REHWINKEL: Well, there is interconnection  
20 to them, but I will -- I will make my motion for  
21 reconsideration, and then I would still require to  
22 be able to state an objection for the record.

23 CHAIRMAN FAY: Okay. That works. And do you  
24 need a few minutes or are you good to go?

25 MR. REHWINKEL: I'm ready to go.

1           CHAIRMAN FAY: Okay. Go ahead. You are  
2 recognized.

3           MR. REHWINKEL: Thank you. Thank you,  
4 Commissioners.

5           And we are asking the Commission to reconsider  
6 the ruling that's contained on page 60 of Order No.  
7 2022-3 -- 0390. Simply because the utilities have  
8 chosen to disregard -- well, let me start off by  
9 saying, the ruling struck the two issues that we  
10 asked the Commission to consider given the state of  
11 this record, and one was: What is the appropriate  
12 carrying cost, if any, for the 2022 under-recovery  
13 amount voluntarily deferred for recovery for the  
14 duration of the voluntary deferral period? And  
15 Issue B is: Over what period should 2022  
16 under-recoveries be collected, and at what carrying  
17 cost?

18           Simply because the companies have choose --  
19 chosen to disregard the intent and spirit of the  
20 midcourse correction rule and the Order  
21 Establishing Procedure in this docket that embodies  
22 the Commission policy and practice on how fuel  
23 costs are litigated and collected, we are being  
24 told now, because they made those choices, that we  
25 cannot have the Commission decide what the

1 appropriate period for recovery of a staggering  
2 amount of money should be, or what should be the  
3 carrying costs associated with it.

4 Meanwhile, in this same docket, as you just  
5 heard, the smallest utility in the state has at  
6 least included an amount of 2022 under-recoveries  
7 in its proposed factor, and they are attempting to  
8 assign both a recovery period and a carrying cost  
9 to the deferred portion of the balance.

10 In our view, there is a legal problem with the  
11 denial of our issues, and that is it is a violation  
12 of Sections 20.569(1) and 125.7(11)(b) Florida  
13 Statutes which afford the customer parties the  
14 opportunity to raise and contest all disputed  
15 issues of material fact.

16 The factors that affect what customers will  
17 pay are at issue in this docket, and they are  
18 directly influenced by the recovery period and the  
19 carrying costs associated with that balance.

20 We submit to you, Commissioners, that is error  
21 to let the utilities decide what you get to  
22 consider. It is arbitrary to take evidence on one  
23 company on these two elements while you are  
24 refusing to decide the issue for the others.

25 The fact that inconsistent results can occur

1           because of this duality is further reason why you  
2           should allow this issue and reconsider and reverse  
3           the decision on this point. So we ask that you  
4           decide to allow and consider and determine Issues A  
5           and B in this proceeding today.

6           So, Commissioners, that concludes my argument  
7           on reconsideration of those issues, and at the  
8           appropriate time, I can make my standing objection  
9           as well.

10           CHAIRMAN FAY: Okay. Why don't we -- you can  
11           go ahead and do that now, and then we will have Ms.  
12           Brownless get us in the right posture for the  
13           motion for reconsideration.

14           MS. HELTON: Mr. Chairman.

15           CHAIRMAN FAY: Yep.

16           MS. HELTON: You might want to go ahead and  
17           hear from the utilities now with respect to whether  
18           they have any response to Mr. Rehwinkel's motion --

19           CHAIRMAN FAY: Okay.

20           MS. HELTON: -- ore tenus motion.

21           CHAIRMAN FAY: Why don't we --

22           MS. HELTON: It looks like Mr. Brew has, yes,  
23           and the parties.

24           CHAIRMAN FAY: Yeah. No. So why don't we go  
25           ahead and have the parties provide their comments

1 on this motion, and I can start from the left and  
2 move right, and whoever wants to be included in  
3 that can, and then we will come back to you, Mr.  
4 Rehwinkel, to address that second objection.

5 Okay. So with that, Ms. Moncada, I would  
6 start with you.

7 MS. HELTON: Mr. Chairman, I think Mr. Brew  
8 might be aligned with Mr. Rehwinkel, so I think you  
9 would hear from him first and then hear from the  
10 utilities.

11 CHAIRMAN FAY: Okay.

12 MR. BREW: And where do you get that?

13 MS. HELTON: Oh, okay. Well --

14 CHAIRMAN FAY: Very judgmental of you, Mary  
15 Anne.

16 So we will start on the right here then and  
17 work our way, assuming that these -- the parties  
18 over here may align with that, and then we will  
19 have the utilities respond.

20 So go ahead, Mr. Brew.

21 MR. BREW: Thank you. Good afternoon,  
22 Commissioners.

23 I have one additional preliminary matter. On  
24 Issues 10 and 16 of the Prehearing Order, it was  
25 listed that PCS having no position, or no position

1 at this time. We actually corrected that he  
2 prehearing.

3 CHAIRMAN FAY: Okay. One second, Mr. Brew.  
4 So this is -- this is what I was trying to --

5 MS. HELTON: I'm sorry. I thought were you  
6 wanting to --

7 MR. BREW: No. No --

8 MS. HELTON: Oh --

9 MR. BREW: -- because I was going to talk  
10 about those issues, I wanted to make sure it was  
11 noted that our position was agreeing with OPC.

12 CHAIRMAN FAY: Okay. So we will go ahead and  
13 do that. But then as another preliminary matter,  
14 we will address this other issue that you are  
15 bringing up.

16 MR. BREW: Okay.

17 CHAIRMAN FAY: I'm in the sure what clarity  
18 needs to be done, but it sounds like it's a  
19 separate --

20 MR. BREW: It's just a minor administrative  
21 thing.

22 CHAIRMAN FAY: Okay. So -- yeah, go ahead,  
23 Ms. Brownless.

24 MS. BROWNLESS: Excuse me.

25 I think it would be clearer for the record,

1           now that we have Mr. Rehwinkel's statement with  
2           regard to his reconsideration of the ruling on  
3           Issues A and B, that we let all parties who wish to  
4           comment on that comment on that, and then we have a  
5           ruling -- then you can ask Mary Anne and I for our  
6           recommendation, if you wish, and then vote on that  
7           so we get that squared up, and then we will go  
8           forward with the preliminary matters that Mr. Brew  
9           has or --

10                   CHAIRMAN FAY: Or any other party at that  
11           time. Yeah, and that's what I was trying to do,  
12           but, Mary Anne, is there a reason you wanted to  
13           start over here first?

14                   MS. HELTON: I think that if any of the  
15           intervenors have a comment on Mr. Rehwinkel's  
16           motion for reconsideration, that they should go  
17           before the utilities so the utilities can respond  
18           in kind to all of the intervenors.

19                   CHAIRMAN FAY: Okay. I don't have an issue  
20           with that.

21                   Do you -- presuming that the intervenors on  
22           this side do have anything to weigh in on Mr.  
23           Rehwinkel's motion for reconsideration. You  
24           obviously don't have to.

25                   So we will start with Mr. Brew, you do have --

1 MR. BREW: Yes.

2 CHAIRMAN FAY: -- a comment on this. Okay.

3 Go ahead. You are recognized, and then I will work  
4 my way left.

5 MR. BREW: Thank you.

6 PCS strongly supports OPC's request to include  
7 Issues A and B. Very quickly, how the Commission  
8 chooses to recover the under-recoveries for 2022 is  
9 a core issue in this docket. There is no getting  
10 around it. It is directly stated in Issue 8: What  
11 is the appropriate amount of under-recovery for  
12 2022?

13 So to the extent that the answer is anything  
14 other than exactly what is shown on the utilities'  
15 exhibits, that issue is in play, as well as the  
16 appropriate carrying costs on any amounts that are  
17 not recovered now but would be recovered later.

18 So from our perspective, the issues that OPC  
19 raised are necessarily in play in order to decide  
20 what is amounts to a multi-billion dollar issue for  
21 the fuel docket.

22 Thank you.

23 CHAIRMAN FAY: Okay. Thank you.

24 Nucor.

25 MR. BRISCAR: Nucor just simply reiterates

1 OPC's position. We support their motion for  
2 reconsideration and inclusion of Issues A and B for  
3 consideration.

4 Thank you.

5 CHAIRMAN FAY: Okay. Thank you.

6 Mr. Wright.

7 MR. WRIGHT: Thank you, Mr. Chairman. Thank  
8 you again for indulging me to start at the  
9 beginning of this hearing.

10 Retail Federation supports OPC's motion for  
11 reconsideration. Very specifically, I agree with  
12 what Mr. Brew said. These are these issues because  
13 Issues 8, 9 and 10 remain live issues in this case.  
14 What's the amount of the 2022 under-recovery? What  
15 amount should be recovered? And what's the total  
16 amount of the dollars, the total dollars, that's  
17 Issue 10, that are to be recovered through the  
18 utilities' fuel charges in 2023? Those issues  
19 contemplate, and the FRF has taken clearly stated  
20 positions in our prehearing statement and as set  
21 forth in the Prehearing Order, that part of those  
22 costs should be recovered beginning in January of  
23 2023, which I will develop on cross-examination.

24 But these are live issues, and it's completely  
25 appropriate to address carrying costs, if any

1 amount of those are going to be. You know, you,  
2 the Commission, can ultimately say, no, we are not  
3 going to allow any of that, or we are not going to  
4 approve any recovery. But regardless, the issue of  
5 a carrying cost on anything that's going to be  
6 recovered, which is a live issue in his docket,  
7 should be addressed, and so since those three  
8 issues, 8, 9 and 10, are all live issues in the  
9 case, I really think that OPC's motion for  
10 reconsideration is well placed.

11 Thank you.

12 CHAIRMAN FAY: Great. Thank you, Mr. Wright.  
13 Mr. Moyle.

14 MR. MOYLE: Thank you. And a slightly  
15 different vantage point and perspective on this.

16 One of the things that FIPUG is keenly  
17 interested in obtaining in this fuel docket is  
18 information about what cost FIPUG members and other  
19 customers of the utilities are going to be  
20 confronting next calendar year. And, you know,  
21 that's important to businesses so that they can  
22 plan and know what their variable cost, a  
23 significant variable cost, the cost of energy is  
24 going to be; and I would respectfully say it's  
25 important for families to know that as well. And I

1 think that the two issues that OPC is seeking to  
2 put forward are relevant to that information. What  
3 are -- what are the carrying costs going to be, if  
4 any?

5 That's something that this -- this commission  
6 should consider. And then what period of time will  
7 they be asked to pay for this? I mean, it's a big  
8 difference, and I know there has been conversations  
9 amongst the Commission about what's the -- what's  
10 the right time period? Is it a year? Is it 18  
11 months? Is it two years?

12 And everyone is here. We got all the parties  
13 here. We are in November, you know, fast  
14 approaching Thanksgiving, and people need to have  
15 this information to be able to plan for what 2023  
16 looks like.

17 So that's, I think, not necessarily a legal  
18 argument, but a practical argument as to why we  
19 believe these issues should be allowed in, and  
20 questions asked along those lines for the purposes  
21 of getting good, valuable information that will be  
22 important, again, to my client and to other  
23 customers of the utilities.

24 Thank you.

25 CHAIRMAN FAY: Thank you, Mr. Moyle.

1 All right. Next we will go to the utilities.  
2 Ms. Moncada.

3 MS. MONCADA: Thank you. Good afternoon.

4 FPL agrees with Commissioner La Rosa's  
5 decision that was made and memorialized in the  
6 prehearing order, which is that OPC's Issues A and  
7 B are premature.

8 As to the legal argument that under 125.69 and  
9 125.7, OPC and the other intervenors have been  
10 deprived of the opportunity to explore these  
11 issues, I would say they haven't been denied of  
12 that opportunity because we haven't presented the  
13 issues yet.

14 We spent some time this morning in Docket 07  
15 hearing from OPC and from FIPUG that it's  
16 inappropriate to rule on cost recovery before costs  
17 are actually presented to the Commission, but now  
18 it seems that's exactly what they want here in the  
19 fuel docket.

20 We have the not -- FPL has not yet requested  
21 recovery of the 2022 under-recovery amount. We  
22 plan to make that filing in January. And at that  
23 time, we will present a plan that addresses the  
24 full amount. It will address the costs associated  
25 with it, and it will a plan for the time period

1 over which those costs will be recovered.

2 I also want to address really quickly a  
3 statement that was made that what we, FPL, have  
4 done in this docket is in violation of the Order  
5 Establishing Procedure. It is not.

6 The Order Establishing Procedure asked us to  
7 file our 2022 actual estimated true-up on  
8 July 27th, and we did that. We filed a calculation  
9 at that time. We support Commissioner La Rosa's  
10 order memorialized in the Prehearing Order that  
11 said Issues 3A and 3B are premature, and we think  
12 that that order should stand.

13 CHAIRMAN FAY: Okay. Thank you.

14 Mr. Bernier, you are recognized.

15 MR. BERNIER: Thank you, Mr. Chairman.

16 I don't want to, you know, reiterate every  
17 point Ms. Moncada made. I very much agree with it.  
18 I would also like to point out that I disagree that  
19 we violated either the spirit or the intent of  
20 the midcourse correction rule as we made a  
21 notification letter pursuant to 25-6.04242, and we  
22 explained why we didn't think a midcourse  
23 correction was practical at that time. That's  
24 explicitly what the rule allows us to do. And  
25 prior to today, really, nobody took any issue with

1           that. But other than that, I would just agree with  
2           Ms. Moncada's points.

3           Thank you.

4           CHAIRMAN FAY: Okay. Mr. Means, you are  
5           recognized for TECO.

6           MR. MEANS: I agree with the comments made by  
7           my colleagues for Florida Power & Light and Duke  
8           Energy Florida, and Tampa Electric supports  
9           Commissioner La Rosa's decision on this issue.

10          Thank you.

11          CHAIRMAN FAY: Okay. Thank you.

12          Ms. Keating.

13          MS. KEATING: No position.

14          CHAIRMAN FAY: Okay. All right. With that,  
15          Commissioners, I would like, Ms. Brownless, if you  
16          could weigh in kind of on the posture in that where  
17          we are at. I know there is a different legal  
18          standard for the motion for reconsideration than  
19          there is just taking up the issue originally. I  
20          guess, can you just, for the Commission, lay that  
21          out, and then if we have any questions specifically  
22          to that, you could answer those at that time?

23          MS. BROWNLESS: Yes, sir.

24          CHAIRMAN FAY: Okay.

25          MS. BROWNLESS: The standard for

1 reconsideration is whether there has been a mistake  
2 of fact or law, or whether the Prehearing Officer  
3 overlooked or failed to consider any argument  
4 presented.

5 Reading the language of the order on page 60,  
6 it's clear that the Prehearing Officer both  
7 understood and weighed all of the arguments  
8 presented by the Office of Public Counsel and the  
9 other intervenors, and found that it -- although  
10 these issues are relevant, when one is taking up  
11 the 2022 under-recovery and how these costs will be  
12 recovered from customers since FPL, Duke and TECO  
13 have not asked to recover those funds at this time,  
14 you are not denying OPC an opportunity to discuss  
15 that. You are simply deferring that until those  
16 matters are squarely put before the Commission in a  
17 petition for midcourse correction.

18 So we don't think the standard for  
19 reconsideration has been met and, therefore, we  
20 would recommend that the order issued by  
21 Commissioner La Rosa be approved?

22 CHAIRMAN FAY: Okay. And, Mary Anne, did you  
23 have anything you wanted to add?

24 MS. HELTON: No, sir?

25 CHAIRMAN FAY: Okay. Commissioners, with

1           that, we will take any questions or discussions on  
2           the item.

3           Commissioner Clark, you are recognized.

4           COMMISSIONER CLARK: I would just like to ask  
5           staff to clarify for me if this -- if denying the  
6           reconsideration would preclude any of the parties  
7           from crossing or arguing any points of the issues  
8           that are relevant to other issues that are -- that  
9           are still in play?

10          MS. BROWNLESS: No, sir. They can --

11          COMMISSIONER CLARK: So they -- you can --

12          MS. BROWNLESS: -- make all the arguments they  
13          wish to make on the issues that are there. In  
14          other words, on the issues that have been  
15          identified, 6, 9 --

16          COMMISSIONER CLARK: Okay.

17          MS. BROWNLESS: -- 8, 10.

18          COMMISSIONER CLARK: So the points can still  
19          be made? There is -- there will be no preclusion  
20          from making --

21          MS. BROWNLESS: They won't be precluded from  
22          making any argument about the issues that are still  
23          outstanding. And let me kind of explain what I am  
24          trying to get across here.

25          The companies that have not requested recovery

1 of 2022 under-recovery costs, fuel costs, that is a  
2 position, and that is a response to the appropriate  
3 issues, 8, 9, 10, the, what I would call, fallout  
4 issues, okay. So they can still make their  
5 arguments about that. They clearly believe those  
6 requests should have been made now, rather than,  
7 you know, delayed to some point in the future, and  
8 they can still say that. So they are not precluded  
9 from making any argument they would otherwise be  
10 able to make.

11 COMMISSIONER CLARK: Thank you.

12 CHAIRMAN FAY: Ms. Brownless, I will go to my  
13 colleagues if they have anything.

14 I understand the legal standard that we take  
15 the reconsideration motion up on, but just for  
16 clarity, if -- if within that decision, I am trying  
17 to have a better understanding if it is actually  
18 deferred. I mean, I see what you are saying, but  
19 if there is no filing by the utilities, do we know  
20 when it would come in? I mean, do we know when  
21 2022 it would come? I know FPL has stated that  
22 they will come in in January, but I didn't hear the  
23 other utilities' statement.

24 MS. BROWNLESS: One of the things that we will  
25 be doing today on cross-examination is developing

1           that information.

2           CHAIRMAN FAY: Okay. All right. And,  
3           Commissioner Passidomo, I just want to make sure we  
4           did not exclude you if you had any questions for  
5           our staff, or any comments on this issue.

6           MS. PASSIDOMO: I have no questions, Mr.  
7           Chairman.

8           CHAIRMAN FAY: Okay. With that,  
9           Commissioners, if there are any other questions, or  
10          comments, or discussion, I will take up a motion on  
11          this motion for reconsideration.

12          COMMISSIONER CLARK: Move the motion for  
13          reconsideration be denied, Mr. Chairman.

14          CHAIRMAN FAY: Okay. We have a motion denial  
15          on the motion for reconsideration. Do we have a  
16          second?

17          COMMISSIONER GRAHAM: Second.

18          CHAIRMAN FAY: Okay. We have a motion and a  
19          second.

20          All those Commissioner that support that motion  
21          say aye.

22          (Chorus of ayes.)

23          CHAIRMAN FAY: Those opposed? I will be opposing  
24          this.

25          Commissioner Passidomo?

1 MS. PASSIDOMO: I support the motion.

2 CHAIRMAN FAY: Okay. I show that motion  
3 denied.

4 Ms. Brownless, do we have other preliminary  
5 matters that we need to address?

6 MS. BROWNLESS: I believe that --

7 CHAIRMAN FAY: Mr. Brew.

8 MS. BROWNLESS: -- Mr. Jay Brew would like to  
9 have a preliminary matters.

10 MR. BREW: Yes, there is a clerical error in  
11 the Prehearing Order. PCS had corrected its  
12 positions on Issues 8 and 16 to agree with OPC, and  
13 it wasn't reflected in the final prehearing order.

14 CHAIRMAN FAY: It is reflected in the  
15 prehearing order?

16 MR. BREW: It is not.

17 CHAIRMAN FAY: It is not.

18 MS. BROWNLESS: No.

19 MR. BREW: It was discussed at the prehearing  
20 conference, and staff followed up the next -- or  
21 PCS followed up the next day. It just didn't make  
22 it into the final.

23 CHAIRMAN FAY: Okay. And repeat those for me,  
24 Mr. Brew.

25 MR. BREW: 10 and 16 --

1 CHAIRMAN FAY: Okay.

2 MR. BREW: -- should be agree with OPC instead  
3 of what is stated.

4 CHAIRMAN FAY: Okay. Great. Thank you.

5 MR. BREW: That's it. Thank you.

6 CHAIRMAN FAY: Okay.

7 MS. BROWNLESS: And, Mr. Brew, I apologize for  
8 that oversight.

9 CHAIRMAN FAY: All right. With that, parties  
10 do we have any other preliminary matters?

11 Ms. Brownless, you didn't have any others?

12 MR. REHWINKEL: Public Counsel has an  
13 objection to make for the record at whatever point  
14 in time its appropriate.

15 CHAIRMAN FAY: Okay. Let's go ahead and take  
16 that up now, Mr. Rehwinkel. This is the other  
17 objection you wanted to put on the record?

18 MR. REHWINKEL: It would be our standing  
19 objection to the hearing.

20 CHAIRMAN FAY: Okay. Go ahead. You are  
21 recognized.

22 MR. REHWINKEL: Thank you, Mr. Chairman.

23 The Public Counsel takes this opportunity to  
24 follow through on and continue with an objection to  
25 the process that is taking place in this docket

1           this year. The Public Counsel lodged its objection  
2           initially at the prehearing.

3           Commissioners, there is no rule that governs  
4           the fuel adjustment clause process that is by  
5           statute. There is, however, an OEP, order 020052  
6           or, Order Establishing Procedure, that requires on  
7           page 11 that the actual estimated true-up testimony  
8           be filed on July 27th.

9           That standard in that order does not mean that  
10          you just put some numbers in paper -- on paper and  
11          send it to Mr. Teitzman at the Clerk's Office. It  
12          is intended to put the dollars on the table so that  
13          they can be considered as part of the three-part  
14          process that has been the policy and practice of  
15          this commission from time in memorial, which I  
16          actually go back to the beginning of, at least for  
17          the annual fuel process.

18          The fact that there is not a rule does not  
19          mean that there are no standards, practices or  
20          policies that govern the fuel clause. The OEP  
21          embodies and manifests the practice and policy of  
22          this commission.

23          Florida Statute Section 120.68(7)(e)3 mandates  
24          that it is reversible error for the Commission to  
25          fail to adhere to your officially stated agency

1 policy or a prior agency practice. Order -- the  
2 OEP order embodies both your official agency  
3 policy, and it continues a prior agency practice.

4 Yes, that statute says that you must explain a  
5 deviation from these practices and policies, but  
6 that does not mean, and the Supreme Court has said,  
7 that just any old explanation will do being. The  
8 explanation must be rational.

9 There is no rational basis for the companies  
10 letting \$3.4 billion in fuel costs to stack up and  
11 imperil the well-being of customers, both personal  
12 and economic. Until this year, the annual fuel  
13 cost recovery process has been composed of a  
14 systematic ongoing final true-up, estimation  
15 true-up and projection process that is designed --  
16 designed to be implemented by policy and practice  
17 as objective, transparent and predictable.

18 The process that has occurred in 2022 in this  
19 case is akin to something out of the wild west,  
20 with little or no rules except for seemingly what  
21 is good for the companies but not necessarily for  
22 the customers.

23 The customers -- the companies have failed to  
24 follow the midcourse correction rule in the OEP  
25 issued in this docket. They have not, with respect

1 to the rule, demonstrated, which is what the rule  
2 requires. It doesn't say explain. It says,  
3 demonstrate that the midcourse corrections were not  
4 practical.

5 \$3.4 billion of piling up midcourse correction  
6 costs is significant, and it should require an  
7 enormous burden to overcome that it is not  
8 practical to put those costs where they belong,  
9 which is beginning to recover them.

10 The letters that you -- that you will see in  
11 this docket merely indicated on the face that  
12 volatility exists and the companies would monitor  
13 the market. This is not an adequate demonstration,  
14 and it falls short of a demonstration that does not  
15 comply with the rule's plain meaning and intent of  
16 the rule.

17 No rule waiver was sought in this case. No  
18 reconsideration of the OEP order was taken, and it  
19 became final before the first midcourse correction  
20 letter was filed on March 29.

21 The Public Counsel objects to the state of  
22 this docket and the failure of the companies to  
23 follow the OEP Commission policy and Commission  
24 practice. We ask --

25 So there is an enormous gap in the record in

1           this case, the missing 2022 under-recovery element  
2           called for in the OEP, Commission practice and  
3           commission policy. And that gap is the \$3.4  
4           billion that will presumably land on customers'  
5           bills, and land with a vengeance.

6           It is unfair to customers to put them in the  
7           untenable position of having to guess at their fuel  
8           factor that will have an enormous impact on the  
9           bill, and then for us to have to come to the  
10          Commission and ask that those costs be put on the  
11          customer's bill. It's just simply wrong.

12          This case here is largely about what  
13          customers' bills will be in January through  
14          December. Every dollar that has been deferred  
15          since what reasonably would have been the first  
16          opportunity to begin recovering them back in July,  
17          accrues a compounding carrying costs and piles up  
18          for increasing customer bills, especially if those  
19          will be recovered in a defined and confined period.

20          The numbers that are unspoken in this docket  
21          are enormous and unprecedented. Commission policy  
22          and practice require that they should have been  
23          parts of the overall determination of the factor  
24          for the entire year of 2023 in this docket.

25          Hearing new information sometime during this day or

1 tomorrow does not cure the problem. So our  
2 objection to this process has been stated.

3 Thank you. Thank you for the opportunity.

4 CHAIRMAN FAY: Yep. Thank you, Mr. Rehwinkel.

5 With that, Commissioners, we will move next to  
6 prefiled testimony for the excused witnesses.

7 Ms. Brownless, can we take care of them first,  
8 and then we will go on to exhibits and the opening  
9 statements, and then witness prefiled testimony?

10 MS. BROWNLESS: Yes, sir.

11 CHAIRMAN FAY: Okay.

12 MS. BROWNLESS: It's our understanding that  
13 the following witnesses have been excused and the  
14 prefiled testimony of Lewter-Jenkins, Salvarezza,  
15 McClay, Rote, Curtland, Deaton, Young, Napier,  
16 Cutshaw, Sizemore, Bokor, Smith and Heisey have  
17 been stipulated to by the parties. We would ask  
18 that the prefiled testimony of these witnesses,  
19 with the exception of Dean Curtland, be moved into  
20 the record at this time.

21 With regard to it with regard to Dean  
22 Curtland's prefiled testimony, his September 2nd,  
23 2022, testimony from page one, line one, to page  
24 three, line 16, should be placed into the record.  
25 Witness Curtland's April 1st, 2022, July 27th,

1           2022, September 2nd, 2022, testimony from line --  
2           from page three, line 16, to the end of the  
3           document, and September 27th, 2022, testimony,  
4           shall not be included per agreement of the parties  
5           as approved by Prehearing Order  
6           PSC-2022-3906-PHO-EI, issued November 14th, 2022.

7           CHAIRMAN FAY: Okay. Ms. Brownless, let me  
8           just make sure I at least have the excused  
9           witnesses here with the exceptions that you  
10          provided on the back end.

11          So we have Lewter-Jenkins, Salvarezza, McClay,  
12          Rote, Curtland, Deaton, Young, Napier, Cutshaw,  
13          Sizemore, Bokor, Smith, and Heisey; is that  
14          correct?

15          MS. BROWNLESS: Yes, sir. They have been  
16          stipulated to. My understanding they have been  
17          stipulated by the parties and excused.

18          CHAIRMAN FAY: Okay. If that's correct with  
19          the parties. Okay.

20          All right. With that, Ms. Brownless, we  
21          will -- without any objection to that, we will show  
22          that testimony entered into the record.

23          (Whereupon, prefiled direct testimony of Mary  
24          Ingle Lewter was inserted.)

25

**DUKE ENERGY FLORIDA, LLC****DOCKET NO. 20220001-EI****GPIF Schedules for  
January through December 2021****DIRECT TESTIMONY OF  
MARY INGLE LEWTER****March 16, 2022**

1 **Q. Please state your name and business address.**

2 A. My name is M. Ingle Lewter. My business address is 526 South Church  
3 Street, Charlotte, North Carolina 28202.

4

5 **Q. By whom are you employed and in what capacity?**

6 A. I am employed by Duke Energy Indiana, LLC (“DEI”) as Manager of Fuels  
7 and Fleet Analytics for Fuels and Systems Optimization. DEI and Duke  
8 Energy Florida, LLC (“DEF” or “Company”) are both wholly-owned  
9 subsidiaries of Duke Energy Corporation (“Duke Energy”).

10

11 **Q. Describe your responsibilities as Manager of Fuels and Fleet Analytics.**

12 A. As Manager of Fuels and Fleet Analytics for Fuels and Systems  
13 Optimization, I oversee the analysis and modeling of energy portfolios for  
14 Duke Energy Corporation’s regulated utility subsidiaries, including DEF, as

1 well as Duke Energy Carolinas ("DEC"), Duke Energy Progress, LLC  
2 ("DEP"), DEI, and Duke Energy Kentucky, Inc ("DEK"). My responsibilities  
3 include oversight of planning and coordination associated with economic  
4 system operations, including production cost modeling, outage coordination,  
5 dispatch pricing, fuel burn forecasting, position analysis, and commodities  
6 analytics.

7  
8 **Q. Please describe your educational background and professional**  
9 **experience.**

10 A. I earned a Bachelor of Science in Statistics from North Carolina State  
11 University in 1995. I have worked with Progress Energy (Carolina Power &  
12 Light) and Duke Energy combined since graduating from North Carolina  
13 State University in 1995. I started with Carolina Power & Light (CP&L) in the  
14 customer service area and then moved into payroll services in 1997. In 1999,  
15 I joined the Bulk Power Marketing Department as a Business Analyst and  
16 was responsible for data analysis, including load forecast metrics, external  
17 market tracking and unit commitment modeling. In 2000, I took the role of  
18 Power Scheduler and was responsible for scheduling, confirming and  
19 tagging all short-term physical power transactions. In 2005, I was promoted  
20 to Portfolio Analyst in the Portfolio Management group. In this role, I was  
21 responsible for the short-term seven-day unit commitment plan for Progress  
22 Energy Florida, which included load forecast development, generation  
23 scheduling, unit commitment and the fuel burn forecast. In 2008, I moved  
24 from the short-term seven-day unit commitment responsibilities to the mid-  
25 term forecasting role and was promoted to Senior Portfolio Analyst. In 2012,

1 I was promoted to Lead Fuels & Fleet Analyst when Progress Energy  
2 merged with Duke Energy. In these roles, I was responsible for the 5-year  
3 mid-term forecast for Duke Energy Carolinas and Duke Energy Midwest  
4 utilities, which are utilized for fuel planning, regulatory fuel filings, and budget  
5 development. In December 2019, I became the Manager of Fuels & Fleet  
6 Analytics, which is responsible for the mid-term forecast for all Duke Energy  
7 Jurisdictions (DEC, DEP, DEI, DEK, and DEF).

8  
9 **Q. What is the purpose of your testimony?**

10 A. The purpose of my testimony is to describe the calculation of DEF's  
11 Generating Performance Incentive Factor ("GPIF") reward/(penalty) amount  
12 for the period of January through December 2021. This calculation was  
13 based on a comparison of the actual performance of DEF's Seven (7) GPIF  
14 generating units for this period against the approved targets set for these  
15 units prior to the actual performance period.

16  
17 **Q. Do you have an exhibit to your testimony in this proceeding?**

18 A. Yes, I am sponsoring Exhibit No. \_\_\_\_\_ (MIL-1T), which consists of the  
19 schedules required by the GPIF Implementation Manual to support the  
20 development of the incentive amount. This 24-page exhibit is attached to  
21 my prepared testimony and includes as its first page an index to the contents  
22 of the exhibit.

23  
24  
25

1 **Q. What GPIF incentive amount has been calculated for this period?**

2 A. DEF's calculated GPIF incentive amount is a penalty of \$206,463. This  
3 amount was developed in a manner consistent with the GPIF  
4 Implementation Manual. Page 2 of my exhibit shows the system GPIF points  
5 and the corresponding reward/(penalty). The summary of weighted  
6 incentive points earned by each individual unit can be found on page 4 of  
7 my exhibit.

8  
9 **Q. How were the incentive points for equivalent availability and heat rate  
10 calculated for the individual GPIF units?**

11 A. The calculation of incentive points was made by comparing the adjusted  
12 actual performance data for equivalent availability and heat rate to the target  
13 performance indicators for each unit. This comparison is shown on each  
14 unit's Generating Performance Incentive Points Table found on pages 9  
15 through 15 of my exhibit.

16  
17 **Q. Why is it necessary to make adjustments to the actual performance  
18 data for comparison with the targets?**

19 A. Adjustments to the actual equivalent availability and heat rate data are  
20 necessary to allow their comparison with the "target" Point Tables exactly as  
21 approved by the Commission. These adjustments are described in the  
22 Implementation Manual and are further explained by a Staff memorandum,  
23 dated October 23, 1981, directed to the GPIF utilities. The adjustments to  
24 actual equivalent availability primarily concern the differences between  
25 target and actual planned outage hours, and are shown on page 7 of my

1 exhibit. The heat rate adjustments concern the differences between the  
2 target and actual Net Output Factor (NOF), and are shown on page 8. The  
3 methodology for both the equivalent availability and heat rate adjustments  
4 are explained in the Staff memorandum.

5  
6 In addition, the Bartow CC unit had data excluded during the period in which  
7 its steam turbine was in a planned outage. The Bartow CC unit has the  
8 capability to be operated in simple cycle mode while the steam turbine is in  
9 an outage. When operating in simple cycle mode, the unit's heat rate will  
10 deviate significantly from its normal range. DEF's heat rate target setting  
11 process for the Bartow CC unit excludes historical data from periods when  
12 the unit operated in simple cycle mode. From mid-October until mid-  
13 November 2021 the steam turbine was in a planned outage; during this  
14 period the Bartow CC unit was operated in simple cycle. To be consistent  
15 with the target setting process, simple cycle mode heat rate data was  
16 excluded from actuals for the purposes of calculating the heat rate for the  
17 Bartow CC in year 2021 during those times when the unit was being  
18 operated in simple cycle mode as the result of a planned outage.

19  
20 **Q. Have you provided the as-worked planned outage schedules for DEF's**  
21 **GPIF units to support your adjustments to actual equivalent**  
22 **availability?**

23 A. Yes. Page 23 of my exhibit summarizes the planned outages experienced  
24 by DEF's GPIF units during the period. Page 24 presents an as-worked  
25 schedule for each individual planned outage.

1 **Q. Does this conclude your testimony?**

2 **A. Yes.**

**IN RE: PETITION ON BEHALF OF DUKE ENERGY FLORIDA  
FOR  
FUEL AND CAPACITY COST RECOVERY  
FINAL TRUE-UP FOR THE PERIOD  
JANUARY THROUGH DECEMBER 2021**

**FPSC DOCKET NO. 20220001-EI**

**GPIF TARGETS AND RANGES FOR  
JANUARY THROUGH DECEMBER 2023**

**DIRECT TESTIMONY OF  
MARY INGLE JENKINS**

**September 2, 2022**

1 **Q. Please state your name and business address.**

2 A. My name is M. Ingle Jenkins. My business address is 526 South Church Street, Charlotte,  
3 North Carolina 28202.  
4

5 **Q. By whom are you employed and in what capacity?**

6 A. I am employed by Duke Energy Indiana, LLC (“DEI”) as Manager of Fuels and Fleet  
7 Analytics for Fuels and Systems Optimization. DEI and Duke Energy Florida, LLC  
8 (“DEF” or “Company”) are both wholly owned subsidiaries of Duke Energy Corporation  
9 (“Duke Energy”).  
10

11 **Q. What are your responsibilities in that position?**

12 A. As Manager of Fuels and Fleet Analytics for Fuels and Systems Optimization, I oversee  
13 the analysis and modeling of energy portfolios for Duke Energy Corporation’s regulated  
14 utility subsidiaries, including DEF, as well as Duke Energy Carolinas (“DEC”), Duke  
15 Energy Progress, LLC (“DEP”), DEI, and Duke Energy Kentucky, Inc (“DEK”). My

1 responsibilities include oversight of planning and coordination associated with economic  
2 system operations, including production cost modeling, outage coordination, dispatch  
3 pricing, fuel burn forecasting, position analysis, and commodities analytics.

4  
5 **Q. Please describe your educational background and professional experience.**

6 A. I earned a Bachelor of Science in Statistics from North Carolina State University in 1995.  
7 I have worked with Progress Energy (Carolina Power & Light) and Duke Energy combined  
8 since graduating from North Carolina State University in 1995. I started with Carolina  
9 Power & Light (CP&L) in the customer service area and then moved into payroll services  
10 in 1997. In 1999, I joined the Bulk Power Marketing Department as a Business Analyst  
11 and was responsible for data analysis, including load forecast metrics, external market  
12 tracking and unit commitment modeling. In 2000, I took the role of Power Scheduler and  
13 was responsible for scheduling, confirming, and tagging all short-term physical power  
14 transactions. In 2005, I was promoted to Portfolio Analyst in the Portfolio Management  
15 group. In this role, I was responsible for the short-term seven-day unit commitment plan  
16 for Progress Energy Florida, which included load forecast development, generation  
17 scheduling, unit commitment and the fuel burn forecast. In 2008, I moved from the short-  
18 term seven-day unit commitment responsibilities to the mid-term forecasting role and was  
19 promoted to Senior Portfolio Analyst. In 2012, I was promoted to Lead Fuels & Fleet  
20 Analyst when Progress Energy merged with Duke Energy. In these roles, I was responsible  
21 for the 5-year mid-term forecast for Duke Energy Carolinas and Duke Energy Midwest  
22 utilities, which are utilized for fuel planning, regulatory fuel filings, and budget  
23 development. In December 2019, I became the Manager of Fuels & Fleet Analytics, which

1 is responsible for the mid-term forecast for all Duke Energy Jurisdictions (DEC, DEP, DEI,  
2 DEK, and DEF).

3  
4 **Q. What is the purpose of your testimony?**

5 A. The purpose of my testimony is to provide a recap of actual reward / penalty for the period  
6 of January through December 2021 and outline the development of the Company's  
7 Generating Performance Incentive Factor ("GPIF") targets and ranges for the period  
8 January through December 2023. These GPIF targets and ranges have been developed  
9 from individual unit equivalent availability, average net operating heat rate targets, and  
10 improvement/degradation ranges for each of the Company's GPIF generating units, in  
11 accordance with the Commission's GPIF Implementation Manual.

12  
13 **Q. What GPIF incentive amount was calculated and reported in your March 16, 2022**  
14 **testimony for the period January through December 2021?**

15 A. DEF's calculated GPIF incentive amount for this period was a penalty of \$206,463. Please  
16 refer to my testimony filed March 16, 2022 for the details of how this incentive amount  
17 was calculated.

18  
19 **Q. Have there been any adjustments to the incentive amount filed in March?**

20 A. No.

1 **Q. Do you have an exhibit to your testimony?**

2 A. Yes. I am sponsoring Exhibit No. \_\_\_\_\_ (MIJ-1P), which consists of the GPIF standard  
3 form schedules prescribed in the GPIF Implementation Manual and supporting data,  
4 including outage rates, net operating heat rates, and computer analyses and graphs for each  
5 of the individual GPIF units. This exhibit is attached to my prepared testimony and  
6 includes as its first page an index to the contents of the exhibit.

7  
8 **Q. Which of the Company's generating units have you included in the GPIF program**  
9 **for the upcoming projection period?**

10 A. For the 2023 projection period, the GPIF program includes the following units: Bartow  
11 Unit 4, Citrus CC Unit 1, Citrus CC Unit 2, Crystal River Unit 4, and Hines Units 1  
12 through 4. Combined, these units account for 82% of the estimated total system net  
13 generation for the period. Citrus CC Units 1 and 2 have been included for the projection  
14 period since they now have sufficient performance history to use in setting targets and  
15 ranges for these units.

16  
17 **Q. Have you determined the equivalent availability targets and**  
18 **improvement/degradation ranges for the Company's GPIF units?**

19 A. Yes. This information is included in the GPIF Target and Range Summary on page 4 of  
20 my Exhibit No. \_\_\_\_ (MIJ-1P).

1 **Q. How were the equivalent availability targets developed?**

2 A. The equivalent availability targets were developed using the methodology established for  
3 the Company's GPIF units, as set forth in Section 4 of the GPIF Implementation Manual.  
4 This includes the formulation of graphs based on each unit's historic performance data for  
5 the four individual unplanned outage rates (i.e., forced, partial forced, maintenance, and  
6 partial maintenance outage rates), which in combination constitute the unit's equivalent  
7 unplanned outage rate ("EUOR"). From operational data and these graphs, the individual  
8 target rates are determined through a review of three years of monthly data points. The  
9 unit's four target rates are then used to calculate its unplanned outage hours for the  
10 projection period. When the unit's projected planned outage hours are taken into account,  
11 the hours calculated from these individual unplanned outage rates can then be converted  
12 into an overall equivalent unplanned outage factor ("EUOF"). Because factors are additive  
13 (unlike rates), the EUOF and planned outage factor ("POF") when added to the equivalent  
14 availability factor ("EAF") will always equal 100%. For example, an EUOF of 15% and  
15 POF of 10% results in an EAF of 75%. The supporting tables and graphs for the target and  
16 range rates are contained in pages 45-85 of my exhibit in the section entitled "Unplanned  
17 Outage Rate Tables and Graphs."

18  
19 **Q. Please describe the methodology utilized to develop the improvement/degradation**  
20 **ranges for each GPIF unit's availability targets?**

21 A. The methodology described in the GPIF Implementation Manual was used. Ranges were  
22 first established for each of the four unplanned outage rates associated with each unit. From  
23 an analysis of the unplanned outage graphs, units with small historical variations in outage

1 rates were assigned narrow ranges and units with large variations were assigned wider  
2 ranges. These individual ranges, expressed in term of rates, were then converted into a  
3 single unit availability range, expressed in terms of a factor, using the same procedure  
4 described above for converting the availability targets from rates to factors.

5  
6 **Q. Were adjustments made to historical unit availability to account for significant**  
7 **anomalies in historical performance?**

8 A. No.

9  
10 **Q. Have you determined the net operating heat rate targets and ranges for the**  
11 **Company's GPIF units?**

12 A. Yes. This information is included in the Target and Range Summary on page 4 of my  
13 Exhibit No. \_\_\_\_ (MIJ-1P).

14  
15 **Q. How were these heat rate targets and ranges developed?**

16 A. The development of the heat rate targets and ranges for the upcoming period utilized  
17 historical data from the past three years, as described in the GPIF Implementation Manual.  
18 A "least squares" procedure was used to curve-fit the heat rate data to a linear relationship  
19 with Net Operating Factor (NOF), and ranges at a 90% confidence level were also  
20 established assuming a normal distribution. The analyses and data plots used to develop  
21 the heat rate targets and ranges for each of the GPIF units are contained in pages 28-44 of  
22 my exhibit in the section entitled "Average Net Operating Heat Rate Curves."  
23

1 **Q. How were the GPIF incentive points developed for the unit availability and heat rate**  
2 **ranges?**

3 A. GPIF incentive points for availability and heat rate were developed by evenly spreading  
4 the positive and negative point values from the target to the maximum and minimum values  
5 in the case of availability, and from the neutral band to the maximum and minimum values  
6 in the case of heat rate. The fuel savings (loss) dollars were evenly spread over the range  
7 in the same manner as described for incentive points. The maximum savings (loss) dollars  
8 are the same as those used in the calculation of the weighting factors.

9  
10 **Q. How were the GPIF weighting factors determined?**

11 A. To determine the weighting factors for availability, a series of simulations was made using  
12 a production costing model in which each unit's maximum equivalent availability was  
13 substituted for the target value to obtain a new system fuel cost. The differences in fuel  
14 costs between these cases and the target case determine the contribution of each unit's  
15 availability to fuel savings. The heat rate contribution of each unit to fuel savings was  
16 determined by multiplying the BTU savings between the minimum and target heat rates (at  
17 constant generation) by the average cost per BTU for that unit. Weighting factors were  
18 then calculated by dividing each individual unit's fuel savings by total system fuel savings.

19  
20 **Q. What was the basis for determining the estimated maximum incentive amount?**

21 A. The determination of the maximum reward or penalty was based upon monthly common  
22 equity projections obtained from a detailed financial simulation performed by the  
23 Company's Corporate Model.

1

2 **Q. What is the Company's estimated maximum incentive amount for 2023?**

3 A. The estimated maximum incentive for the Company is \$25,485,802. The calculation of  
4 the estimated maximum incentive is shown on page 3 of my Exhibit No. \_\_\_ (MIJ-1P).

5

6 **Q. Does this conclude your testimony?**

7 A. Yes.

1                   (Whereupon, prefiled direct testimony of  
2 Anthony Salvarezza was inserted.)

**DUKE ENERGY FLORIDA, LLC****DOCKET NO. 20220001-EI****Fuel and Capacity Cost Recovery  
Actual True-Up for the Period  
January 2021 - December 2021****REDACTED  
DIRECT TESTIMONY OF  
Anthony Salvarezza****April 1, 2022**

1 **Q. Please state your name and business address.**

2 A. My name is Anthony Salvarezza. My business address is 299 First Ave North, St.  
3 Petersburg, Florida 33701.

4

5 **Q. By whom are you employed and in what capacity?**

6 A. I am employed by Duke Energy Florida, LLC (“DEF” or the “Company”) as General  
7 Manager Regional Services. DEF is a wholly owned subsidiary of Duke Energy  
8 Corporation (“Duke Energy”).

9

10 **Q. Describe your responsibilities as General Manager of Regional Services.**

11 A. As General Manager of Regional Services, I am responsible for leading and  
12 directing project engineering, project management, outage management, business  
13 planning and specialized maintenance in Regulated and Renewable Energy  
14 (“RRE”). I am responsible for safe, reliable, efficient, economic, environmental,  
15 and regulatory compliant maintenance activities through the development and  
16 implementation of processes and programs. Within this scope, I ensure longer term  
17 activities such as outage management, project scoping, planning, scheduling,  
18 execution, and turnover are managed consistently in accordance with the

1 established Project Management Center of Excellence (“PMCoE”) guidelines and  
2 a standardized set of methodologies and procedures. During non-outage periods, I  
3 am responsible for development and implementation of capital and O&M projects  
4 across DEF. My position is responsible for direct oversight and direction for 6 - 8  
5 direct reports and a regional organization of approximately 80 employees.

6 As Regional Services GM, I am also responsible for managing internal and external  
7 resources used in the project engineering, project management, outage management,  
8 and maintenance services provided to the DEF RRE group. Ultimately, I am  
9 responsible for securing, planning and execution of outages, projects, and plant  
10 maintenance on approximately 11,000 MWs of generation residing in the state of  
11 Florida.

12  
13 **Q. Please describe your educational background and professional experience.**

14 A. I have an Associate in Science electronics engineering, certification in distributed  
15 control system engineering, and a bachelor’s degree in business. In addition, I have  
16 44 years of related electric industry experience including numerous positions of  
17 increasing responsibility over my 44 years of employment with Duke Energy and its  
18 predecessors.

19  
20 **Introduction**

21 **Q. What is the purpose of your testimony?**

22 A. The purpose of my testimony is to explain the cause of the combustion turbine  
23 outages at the Bartow combined cycle plant, explain the Company’s response to the

**REDACTED**

1 outages and steps to mitigate the risk of further outages, and ultimately to explain  
2 how the Company has at all times acted reasonably and prudently.

3  
4 **Q. Please provide a summary of your testimony.**

5 A. My testimony explains the reasonableness and prudence of DEF's decisions and  
6 actions in relation to discovery of latent damage to the Bartow Combined Cycle  
7 ("Bartow CC") Combustion Turbine Generators ("CTGs") and the resulting outages,  
8 given the information known or reasonably knowable by DEF at the time those  
9 decisions were made and those actions were taken. Moreover, I explain how DEF  
10 prudently operated the CTGs at all times, including during the period when DEF  
11 now believes the damage to the units was initiated, and therefore that DEF's  
12 operation of the units did not initiate the damage to the units – a conclusion fully  
13 supported by the Original Equipment Manufacturer's ("OEM") root cause analysis.  
14 Finally, I explain that the CTG damage and outages currently at issue are completely  
15 unrelated to the Commission's previous determination of imprudence related to the  
16 operation of the Bartow Steam Turbine.

17 As I explain in detail below, as a result of standard maintenance testing, DEF first  
18 learned in March 2020 that one of the Bartow CTGs (Unit 4B) was damaged by  
19 [REDACTED] years earlier. Because the temperature  
20 alarms were never triggered, DEF could not have known of the issue during this  
21 period of operation, which ended after the OEM replaced a degraded component  
22 within the CTGs. During this period, DEF followed the OEM-provided operation

1 parameters and completed all OEM-recommended inspections and maintenance, and  
2 therefore did not cause the damage.

3 I also explain why DEF's decisions and actions with regard to addressing the  
4 likelihood, though not certainty, that similar damage had been initiated on the  
5 remaining units were both reasonable and prudent given the information available to  
6 DEF. Given the type and location of the damage, there was no non-destructive  
7 testing available that could have been performed to definitively confirm the  
8 existence of the suspected damage or when such damage, if present, would  
9 reasonably be expected to propagate to the point of failure. Given the limited  
10 information available to DEF and the limited options available, I explain that the  
11 Company's plan to mitigate against future damage, which was adjusted over time as  
12 more information came available, was reasonable and prudent.

13 Finally, I explain that there is no correlation from an engineering or operational  
14 standpoint between the outages at issue and the Commission's previous finding of  
15 imprudence related to a separate component of the Bartow plant.

16 In sum, under the well-known standard of what a reasonable utility manager would  
17 do given the facts and circumstances known or reasonably knowable at the time, my  
18 testimony demonstrates that DEF's decisions and actions have at all times been  
19 prudent and DEF should be permitted to recover the replacement power costs  
20 incurred.

21  
22 **Q. Are you sponsoring any exhibits?**

23 **A.** Yes, I am sponsoring the following exhibits:

- 1 • Exhibit No. \_\_ (AS-1), Root Cause Analysis (Confidential);
- 2 • Exhibit No. \_\_ (AS-2), Siemens Product Bulletin PB-08-5038-GN-EN-01
- 3 [REDACTED] (Confidential); and
- 4 • Exhibit No. \_\_ (AS-3), Siemens Product Bulletin PB3-13-0008-GN-EN-01
- 5 [REDACTED]
- 6 [REDACTED] (Confidential).

7 These exhibits are the property of Siemens Energy, Inc., and are designated as  
 8 proprietary and confidential by Siemens. Therefore, DEF is seeking confidentiality  
 9 to protect the third-party’s interest in these materials.

10

11 **Background**

12 **Q. Can you please provide a summary and timeline of events relating to the Bartow**  
 13 **CTG outages?**

14 A. Yes. The Bartow CC came online in summer 2009. There are four (4) Combustion  
 15 Turbines (“CT”) attached to Siemens model SGen6-1000A Combustion Turbine  
 16 Generators (“CTG”). During planned outages in fall 2012 and spring 2013, DEF  
 17 performed an inspection of the [REDACTED] consistent with guidance provided  
 18 by Siemens Product Bulletin PB-08-5038-GN-EN-01 (Exhibit No. \_\_ (AS-2)) and  
 19 later updated by PB3-13-0008-GN-EN-01 (Exhibit No. \_\_ (AS-3)). DEF discovered  
 20 the [REDACTED] were degraded and, consistent with the OEM’s guidance, contracted  
 21 with Siemens to install upgrades.

22 As I explain below, unbeknownst to DEF, operation of the CTGs with the degraded  
 23 [REDACTED] ultimately led to a series of outages impacting each of the CTGs: Unit 4B

1 in 2019 (extension of a planned outage), Unit 4A in 2021 (forced outage), Unit 4C  
2 in 2021 (forced outage), and Unit 4D in 2021 (planned outage).

3  
4 **Q. Can you please provide more detail regarding these outages?**

5 A. In late 2019, during a planned maintenance outage on Unit 4B CTG, the unit faulted  
6 during high potential (“hipot”) maintenance testing. The hipot test, which was  
7 conducted in accordance with Institute of Electrical and Electronics Engineers  
8 (“IEEE”) Standard 95 guidance with a target test voltage of 33 kV, revealed flaws  
9 in the insulation on stator bars T47 and T12. As a result of the root cause analysis  
10 (“RCA”) finalized in March 2020, DEF determined similar damage could eventually  
11 manifest itself at the remaining CTGs at an indeterminate point in the future. The  
12 RCA is discussed in detail below and attached as Exhibit No. \_\_ (AS-1).

13 In January 2021, the Unit 4A CTG experienced an in-service failure that DEF  
14 believed to be of the same cause. Later, in May 2021, the Unit 4C CTG likewise  
15 experienced a similar in-service failure. As a result, DEF accelerated the Unit 4D  
16 planned stator core rewind from 2022 to June 2021, eliminating the risk of an in-  
17 service failure on that unit.

18  
19 **Root Cause Analysis**

20 **Q. Did DEF perform Root Cause Analyses to determine the cause of these failures?**

21 A. No. DEF contracted with Siemens to prepare the RCA after the Unit 4B CTG failed  
22 the maintenance hipot testing mentioned above. Because DEF determined the  
23 RCA’s main contributor likely also applied to the other units, DEF determined a

# REDACTED

1 separate RCA was unnecessary when similar damage led to forced outages of Units  
2 4A and 4C. That is, the same equipment and operating conditions were present in  
3 all four CTGs for the same duration, and therefore the resulting damage discovered  
4 on Unit 4B was considered likely to develop on the other units at some unknown  
5 point in the future. However, it was also clear that the damage DEF suspected had  
6 been initiated, if it existed at all, had not propagated to the same degree on Units 4A,  
7 4C, and 4D at that time.<sup>1</sup>

8  
9 **Q. Please provide an overview of the Root Cause Analysis for the outages.**

10 A. The outages were caused by stator bar failures. Despite the fact the temperatures of  
11 the stator core windings never triggered the OEM established RTD alarm, the stator  
12 bar failures were most likely initiated by [REDACTED]  
13 [REDACTED]  
14 [REDACTED]. The RCA determined the “main contributor” to the [REDACTED]  
15 [REDACTED] was [REDACTED]  
16 [REDACTED] which led to a period  
17 of operation at higher temperature levels than the [REDACTED]. The units’  
18 normal load cycling [REDACTED]  
19 [REDACTED]  
20 [REDACTED]

---

<sup>1</sup> The other units had each recently underwent the same maintenance hipot test at the same voltage levels and passed without any findings or engineering concerns (Unit 4A, 2019; Unit 4C, 2018; and Unit 4D, 2019).

18  
19  
20  
21  
22

[REDACTED]

**Q. Can you please elaborate on the RCA findings?**

A. Yes. As mentioned above, in the fall 2019, in advance of return to service from a planned outage, maintenance high potential (hi-pot) testing on Unit 4B indicated stator winding faults on the CTG. Further investigation revealed two stator winding bars of two different phases had faulted to ground [REDACTED]

[REDACTED]  
Forensic analysis determined the [REDACTED]

[REDACTED]  
[REDACTED]

[REDACTED] Finally, the OEM established the “main contributor” to the [REDACTED] as [REDACTED]

[REDACTED]  
[REDACTED] Exhibit No. \_\_ (AS-1), p. 1.

What all this means is that the faulted stator bars resulted from [REDACTED]  
[REDACTED]

[REDACTED]. This failure mode naturally led to the question of what led to the relatively [REDACTED].

The OEM analyzed the operational life of the unit to confirm or refute as many as eleven (11) secondary level elements. Its review of data noted that the stator slot

1 temperatures dropped in early 2013, while the generator output (MW and MVAR)  
2 remained stable. It further found:

3 [REDACTED]  
4 [REDACTED]  
5 [REDACTED]  
6 [REDACTED]  
7 [REDACTED]  
8 [REDACTED]  
9 [REDACTED]  
10 [REDACTED].  
11 [REDACTED]

12 *Id.* at p. 20.

13 Thus, the OEM recognized that the [REDACTED] were a  
14 symptom of the degraded [REDACTED]. When the [REDACTED] were replaced with  
15 an upgrade, the operating temperature was reduced to the lower operating range  
16 while generator output remained consistent (i.e., the [REDACTED]  
17 were not a symptom of the units being run outside of the OEM’s established  
18 operating parameters). However, unbeknownst to DEF at the time, the [REDACTED]  
19 [REDACTED]  
20 [REDACTED]. *See id.*  
21 at p. 24.  
22

23 **Q. Why did the Company conclude that similar damage was likely to have**  
24 **occurred at the other Bartow CTGs?**

25 A. The Company reasoned that, because the other three (3) CTGs operated at similar  
26 temperatures for a similar period of time (prior to receiving the same upgrades), it

**REDACTED**

1 was likely that they had also suffered damage to the stator bars that would eventually  
2 require remediation – though it was unknown when that time would be.

3  
4 **Q. Did the stator winding temperatures observed during the 2009-2013 timeframe**  
5 **provide any basis for concern?**

6 A. No. The stator winding temperature is monitored by an RTD alarm that alerts the  
7 Company if the stator winding temperature exceeds the OEM recommended  
8 threshold. The OEM alarm is based on [REDACTED]  
9 [REDACTED], giving an alarm around [REDACTED] and unload at  
10 approximately [REDACTED], depending on specific ambient conditions on a particular day.  
11 It is important to note the alarm set-points allow for engineered operating margins  
12 built into generator design; for example, the alarm set-point of [REDACTED] is more than  
13 [REDACTED] below the IEEE-established failure point for Class F Insulation (the type of  
14 insulation at issue) of 311°F (155°C). The point being, given the information  
15 reasonably available to DEF during the 2009-2013 timeframe, according to the  
16 indicated stator RTD temperatures the insulation remained well below its  
17 temperature rating at all times. In fact, in 2013 when Siemens performed the [REDACTED]  
18 [REDACTED] replacement discussed above, it inspected the end windings and main leads  
19 and found no signs of over-heating.

20  
21 **Q. Has DEF's and the OEM's understanding of the actual operating temperatures**  
22 **experienced during the 2009-2013 timeframe changed?**

**REDACTED**

1 A. Yes, based on the findings of the RCA, the OEM and DEF now believe that the [REDACTED]

2 [REDACTED]

3 [REDACTED]

4 [REDACTED]

5 [REDACTED]

6 [REDACTED]. *See id.* at pp. 19-21, 23. However, as discussed above, because  
7 the Bartow CTGs never triggered the RTD alarms, and because those alarms were  
8 set at a point that provided approximately [REDACTED] of margin before reaching the  
9 insulation's IEEE-established temperature rating, DEF had no way of knowing the  
10 temperature likely exceeded the rating limit and no reason for concern or to seek  
11 comparison with the remainder of Siemens' fleet.

12  
13 **Q. Did DEF operate the Bartow CTGs within the operating parameters**  
14 **established by the OEM?**

15 A. Yes, at all times DEF operated the units consistent with the OEM's instructions as  
16 provided in the operating manual. DEF reviewed the units' operating history in Pi  
17 data from 2010 to the 2012/2013 outages when the [REDACTED] upgrade was performed.  
18 The data, which was sampled on an hourly basis, showed zero instances of operating  
19 the generators outside the OEM ratings as defined on the generator capability curve  
20 provided in that manual.

21 Specifically, the generators have a maximum capability of [REDACTED] MW and the  
22 operating history shows the maximum output of any of the four (4) generators was  
23 213 MW. At this output of 213 MW, the allowable reactive power (MVAR) rating

# REDACTED

1 is ■ MVAR - the maximum MVAR output actually generated across this time  
 2 period was 83 MVAR (as MW load decreases, the MVAR allowable increases). The  
 3 table below provides the maximum MW and both maximum and minimum MVAR  
 4 output of the four (4) CTGs over the period in question.  
 5

<i>Unit</i>	<i>Max MW</i>	<i>Max MVAR</i>	<i>Min MVAR</i>
<i>4A</i>	<i>211</i>	<i>80</i>	<i>-77</i>
<i>4B</i>	<i>209</i>	<i>71</i>	<i>-71</i>
<i>4C</i>	<i>210</i>	<i>77</i>	<i>-73</i>
<i>4D</i>	<i>213</i>	<i>83</i>	<i>-75</i>

6  
 7 Furthermore, the RCA shows that the OEM did not identify operation of the CTGs  
 8 outside of their preapproved operating parameters as the cause of the damage to Unit  
 9 4B. The RCA determined that the main contributing cause of the stator bar damage  
 10 was ■

11 ■ which led to increased ■  
 12 ■, but again, the OEM-established RTD temperature alarm was  
 13 never triggered. The RCA also shows that after the degraded ■ were  
 14 replaced in 2012 and 2013, the ■  
 15 ■ while the generator output (MW and MVAR) remained stable.  
 16 *See id.* at p. 20 & Fig. 16.

17 In short, DEF operated the CTGs within the OEM's defined operating parameters;  
 18 hence, DEF's operation was not the cause of ■ and

**REDACTED**

1           therefore not the cause of the damage to the units. Instead, the degraded [REDACTED],  
2           which DEF replaced in accordance with OEM recommendations once it discovered  
3           the issue, [REDACTED] and caused the [REDACTED].  
4

5           **DEF's Actions to Prudently Mitigate the Risk of Failure**

6           **Q.   What steps did DEF take to prudently manage the likelihood of damage at the**  
7           **remaining units?**

8           A.   Once DEF learned the cause of Unit 4B's damage and the likelihood that the  
9           remaining units may have experienced similar damage, the Company took several  
10          proactive steps to evaluate the remaining units, monitor unit operations to detect  
11          damage propagation (to the extent possible), and ultimately remediate the likelihood  
12          of damage to the remaining units. First, DEF reconfigured the Electromagnetic  
13          Signature Analysis ("EMSA") collars on Units 4A and 4C<sup>2</sup> to potentially identify  
14          insulation degradation during continued operation.<sup>3</sup> Second, DEF scheduled  
15          borescope inspections on Units 4A and 4C to look for any visual indications of  
16          buckled insulation.<sup>4</sup> Third, DEF issued procurement specifications in anticipation  
17          of a bid event for a spare set of stator bars to have on hand in case of an in-service  
18          failure or failed indicative testing of one of the remaining CTGs. Finally, DEF  
19          scheduled generator rewinds for the remaining units, notwithstanding that a rewind  
20          would not typically be required for thousands of equivalent operating hours.

---

<sup>2</sup> As noted above, Units 4A and 4D underwent hipot testing in spring and fall 2019, respectively, resulting in no negative findings or engineering concerns.

<sup>3</sup> DEF previously relocated the EMSA collars on Units 4B and 4D in fall 2019.

<sup>4</sup> Unit 4D was thoroughly inspected in fall 2019 (when the Unit 4B damage was discovered), so a borescope inspection was unnecessary.

22  
23

**Q. Why did DEF take these specific actions?**

A. As described above, each action DEF took was intended to reduce the risk exposure on the generators while continuing to provide a safe, reliable, and cost-effective power supply to DEF's customers. The EMSA collar relocation enhanced monitoring of the generator internals for signs of electrical abnormalities to provide a better understanding of internal generator health. The borescope inspections that were scheduled for spring 2021 planned outages were intended to specifically look for buckled insulation to assess risk on these units (although the ability to detect the buckling of insulation with a small borescope camera was not a proven method). The planned stator rewinds to replace the stator bars were significantly shortened (by over 10 years) since the RCA conclusions indicated the potential for a shortened life interval for the stator bar components within the generator.

**Q. Please explain the reconfigured EMSA collars on Units 4A and 4C.**

A. EMSA monitors electromagnetic interference that is emitted from a generator due to abnormalities. These abnormalities include, but are not limited to, partial discharge, corona, arcing, or gap discharges. While EMSA has been used for decades as a temporary measurement tool for motors, transformers, and generators, only more recently has the technology been applied in a permanent installation for continuous monitoring. When DEF first installed the radio frequency collars used to collect the electromagnetic signature for the Bartow generators, the collars were installed on the RTD wires consistent with industry practice at the time. More recent industry

1 research concluded that EMSA signals are much higher fidelity when the collars are  
2 installed on the Neutral Ground Cable, since this is a more direct measurement of  
3 electromagnetic signatures within the generator and does not rely as much on the  
4 radiated signal, which can be heavily affected by ambient readings. Due to these  
5 findings, DEF implemented a plan to relocate the EMSA collars from the RTD wires  
6 to the Neutral Ground Cable to improve the EMSA signals and monitor for arcing  
7 within the generator. The EMSA collars were relocated on Units 4B and 4D in fall  
8 2019 and on Units 4A and 4C in fall 2020.

9 EMSA is a dynamic and long-term trending tool for measuring slow degradation due  
10 to the long scan time and manual analysis methods used. The relocation of the collars  
11 was intended to ensure the inside of the generator was monitored as closely as  
12 possible to retain as much margin as possible given the risks identified. However,  
13 DEF recognized that EMSA would not typically detect cracks in insulation on a high  
14 voltage stator bar, as when insulation is breached the failure happens in milliseconds  
15 and not slowly over time. EMSA was a tool to enhance knowledge of generator  
16 internals, and not directly tied to detection and prevention of a stator bar failure that  
17 by its nature would be a rapidly progressing event.

18  
19 **Q. Please explain the Company's plan to rewind the remaining generators.**

20 A. As discussed above, after learning of the main contributing cause of failure as  
21 determined by the OEM's RCA, DEF scheduled each of the three remaining CTGs  
22 for a stator rewind during upcoming planned major outage windows. The stator  
23 rewind for Unit 4D was scheduled for the spring 2022 planned major outage, the

**REDACTED**

1 stator rewind for Unit 4A was scheduled for the fall 2023 planned major outage, and  
2 the stator rewind for Unit 4C was scheduled for the fall 2024 planned major outage.  
3 This schedule was intended to allow DEF to take advantage of previously scheduled  
4 outages in a measured cadence to avoid concurrent CTG outages (maximizing output  
5 from the remainder of the plant by allowing for operation in 3 on 1 configuration),  
6 to minimize the number of planned outages by performing multiple maintenance  
7 tasks during the same outages, and to provide time for the OEM to manufacture the  
8 stator bars and support the outages.

9 In an effort to prudently address and mitigate the risks to the other units suggested  
10 by the Unit 4B RCA, while also attempting to retain the benefits of Bartow's low-  
11 cost generation for customers by spacing the scheduling of planned major outages,  
12 DEF scheduled these stator rewinds to occur much earlier in the units' operating life  
13 than the Duke Energy fleet standard recommendation of [REDACTED] equivalent hours  
14 for this type of air-cooled unit. Specifically, Unit 4D was planned for a rewind at  
15 ~103,000 equivalent hours, Unit 4A at ~109,000 equivalent hours, and Unit 4C at  
16 ~116,000 equivalent hours.

17  
18 **Q. Was DEF able to maintain the schedule of proactive outages discussed above?**

19 A. No, Unit 4A experienced an unexpected in-service failure in January 2021 that  
20 required a forced outage lasting into April 2021; as discussed above, due to the  
21 nature of the suspected damage and the limitations on available testing, DEF could  
22 not have anticipated when such a failure may occur (if at all). As a result of this  
23 outage, DEF accelerated the scheduled Unit 4C planned outage up to fall 2023.

# REDACTED

1           However, shortly after Unit 4A's return to service, Unit 4C also experienced an in-  
2           service failure in May 2021.

3  
4           **Q. Did these unexpected occurrences further alter DEF's plan?**

5           A. Yes. Given the two in-service failures in a short period of time, DEF determined  
6           that this new information required a strategy shift. Therefore, the Company  
7           accelerated the planned outage of Unit 4D from spring 2022 to June 2021. DEF  
8           completed the stator rewinds and returned Units 4C and 4D to service in November  
9           and October 2021, respectively.

10  
11           **Q. You indicated that the two forced outages in a short period of time was "new  
12           information" that led to DEF's strategy change. Given that DEF determined  
13           in March 2020 that there was a likelihood of latent damage to the remaining  
14           units, how did the in-service failures constitute "new information"?**

15           A. The new information I was referring to is the speed at which the [REDACTED],  
16           which was thought but not definitively known to exist, was propagating on the  
17           remaining units notwithstanding operation within the OEM-provided parameters and  
18           the normal fleet operating temperatures. Recall that DEF became aware of the main  
19           contributing cause of the damage to Unit 4B in March 2020. At that time, the units  
20           had been operating for approximately seven (7) years after the [REDACTED] is  
21           believed to have occurred without an in-service failure known to have resulted from  
22           the damage identified in the RCA; that is, DEF had only its experience and did not  
23           have any means to formulate a trend or projection for when subsequent failures may

1 occur. At the time of the RCA conclusion in March 2020, DEF discussed the  
2 likelihood of failure with the OEM to gain a wider fleet perspective from the OEM  
3 fleet of similar generators, and the OEM did not have any specific fleet data or  
4 recommendation on likelihood or urgency of failure.

5 However, the in-service failure of Unit 4A followed shortly thereafter by Unit 4C  
6 provided new data points for the Company's risk analysis, which therefore led to the  
7 prudent decision to further accelerate the Unit 4D planned outage to June 2021,  
8 ~97,802 equivalent hours into its operational life.

9  
10 **Q. Given that Unit 4A failed in January 2021, would it have been possible for DEF**  
11 **to accelerate the planned outages at the remaining two units to avoid in-service**  
12 **failures?**

13 A. The only guaranteed way to avoid an in-service failure at the two remaining units  
14 would have been immediately removing them from service. To immediately remove  
15 the units from service would have meant the Bartow plant would have been operating  
16 in in 1 on 1 configuration until Unit 4A returned to service in April 2021, bringing  
17 the plant back to 2 on 1 configuration until Units 4C and 4D could be rewound. Of  
18 course, the timing of the return to service for these units would have been very  
19 uncertain, as the outage duration would have been dependent on the ability of the  
20 OEM to fabricate the new stator windings and provide the workforce to perform the  
21 actual rewind.

22 Another possibility would have been to remove one of the remaining CTGs from  
23 service when Unit 4A returned to service in April 2021. However, that may or may

1 not have avoided a future in-service failure – for example, DEF may have opted to  
2 take Unit 4D out of service in April (as it was the next planned outage), but we now  
3 know that Unit 4C failed in May so a forced outage on that unit would not have been  
4 avoided. Alternatively, DEF may have opted to take Unit 4C out of service  
5 reasoning that Unit 4D had a planned outage scheduled for Spring 2022 and thus less  
6 risk of an in-service failure; what we do not and cannot know is when (or if) Unit  
7 4D would have failed before the outage at Unit 4C could have been completed.

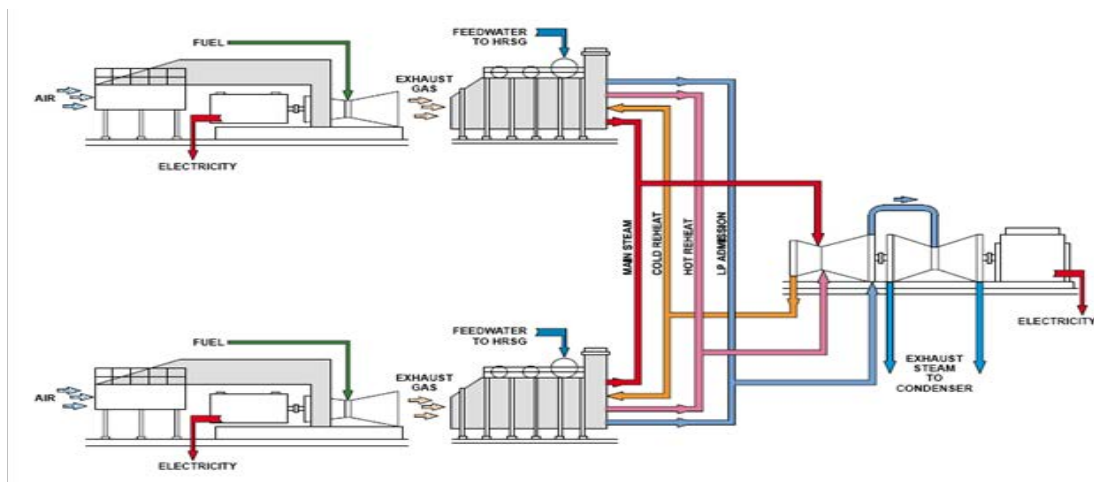

8 The point here is not to identify which of the alternative hypothetical scenarios may  
9 have been preferable, it is to underscore that any of the alternatives ultimately not  
10 selected carried its own set of risks and unknowns. For anybody to claim “what  
11 would have occurred had DEF chosen a different path” would be an exercise in  
12 conjecture or post hoc rationalization utilizing the benefit of hindsight, a luxury not  
13 available to utility managers at the time decisions must be made.

#### 14 **The Set-up of the Bartow Combined Cycle and Relationship between the CTGs and**

#### 15 **Steam Turbine**

16 **Q. Can you please explain how the Bartow Combined Cycle Plant is configured?**

17 **A.** Yes. At the Bartow Combined Cycle Plant, natural gas powers the four combustion  
18 turbines to turn four separate combustion turbine generators; this process creates  
19 excess steam which is then reheated and used to turn the steam turbine (“ST”), which  
20 then powers a steam turbine generator. Below is a diagram of a typical 2 on 1  
21 combined cycle. Though Bartow is a 4 on 1 combined cycle, the operational concept  
22 is the same with four (4) combustion turbines feeding one steam turbine.  
23

1

2

3

4 **Q. Are you familiar with the Commission's finding that DEF imprudently**  
 5 **operated the Bartow Steam Turbine from 2009 to 2012?**

6 A. Yes, I am aware of the Commission's determination, though I would also note that  
 7 the Company does not agree with that finding and it is currently under appeal at the  
 8 Florida Supreme Court.

9

10 **Q. Is the damage to Bartow's Combustion Turbine Generators related to the**  
 11 **Commission's previous determination regarding the Steam Turbine?**

12 A. No, the two are unrelated. The Commission's previous finding was premised on the  
 13 use of the ST in a 4 on 1 configuration (it was originally designed for 3 on 1  
 14 operation) resulting in the ST producing MWs in excess of its nameplate capacity  
 15 without the OEM's explicit approval of operation at that level. The previous case  
 16 had nothing at all to do with the CTGs and in fact the order does not even mention  
 17 the CTGs (other than in the context of Bartow being operated as a combined cycle

1 plant). Said differently, the prior order concerned operation of the Bartow Steam  
 2 Turbine and contained no discussion regarding the operation of the CTGs. In fact,  
 3 the Commission specifically noted “that this case is highly fact specific and for that  
 4 reason will have limited precedential value.”<sup>5</sup>

5  
 6 **Conclusion**

7 **Q. In your opinion, has DEF acted prudently?**

8 A. Yes. First, as I have explained above, the Company’s operation of the units did not  
 9 initiate the damage to the units, rather it was a function of [REDACTED] that  
 10 the Company simply could not have contemporaneously known about. When DEF  
 11 later determined the damage was likely present on the other units, it was confronted  
 12 with a lack of information about: a) whether the other units (or some subset of those  
 13 units) were actually damaged, and if so to what degree; and b) if the units were  
 14 damaged, at what point the damage would be identifiable via available testing or  
 15 when the units may experience a failure. Given this dearth of information, DEF  
 16 made the reasonable decision to continue operating the units (benefitting customers  
 17 by the continued generation of low-cost energy) and prudently took steps intended  
 18 to mitigate the risk of future in-service failure. What we now know, but could not  
 19 have known at the time, was the relatively short period in which the hypothesized  
 20 damage would manifest. As I have explained above, as the Company learned  
 21 additional facts, it prudently incorporated the new information into its analysis and  
 22 made reasonable adjustments where possible. When making operations decisions in

---

<sup>5</sup> Order No. PSC-2020-0368A-FOF-EI, at p. 22.

1 real-time, the Company does not have the benefit of hindsight and cannot make  
2 decisions based on unknown or unknowable information. When the Company's  
3 actions are evaluated based on the standard of what a reasonable utility manager  
4 would do given the facts as they were known or reasonably knowable, DEF acted  
5 prudently.

6  
7 **Q. Does that conclude your testimony?**

8 A. Yes.

9  
10

**IN RE: PETITION ON BEHALF OF DUKE ENERGY FLORIDA, LLC.  
FOR**

**FUEL AND CAPACITY COST RECOVERY  
FINAL TRUE-UP FOR THE PERIOD  
JANUARY THROUGH JULY 2022**

**FPSC DOCKET NO. 20220001-EI**

**DIRECT TESTIMONY OF  
James McClay**

**July 27, 2022**

**I. INTRODUCTION AND QUALIFICATIONS**

1 **Q. Please state your name and business address.**

2 **A.** My name is James McClay. My business address is 526 South Church Street,  
3 Charlotte, North Carolina 28202.

4  
5 **Q. By whom are you employed and in what capacity?**

6 **A.** I am employed by Duke Energy Carolinas (“DEC”), an affiliate company of Duke  
7 Energy Florida, LLC (“DEF”, “Petitioner” or “Company”) as the Managing Director  
8 Natural Gas Trading. I manage the Midwest financial activities, oil procurement and  
9 natural gas group procurement, scheduling and hedging activities in the Trading and  
10 Dispatch Section of the Fuels and Systems Optimization Department for the Duke  
11 Energy regulated generation fleet. This group is responsible for the financial hedging  
12 activities, oil procurement and natural gas procurement and scheduling needed to  
13 support the gas generation needs for Duke Energy Indiana, Duke Energy Kentucky,  
14 Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida.

15

16 **Q. Please describe your education background and professional experience.**

1 A. I received a Bachelor Degree in Business Administration majoring in Finance from  
2 St. Bonaventure University. I joined Progress Energy in 1998 as the Manager of  
3 Power Trading and held that position through early 2003 and then became the  
4 Director of Power Trading and Portfolio Management for Progress Energy Ventures  
5 through February 2007. From March 2007 through late 2008, I was the Director of  
6 Power Trading for Arclight Energy Marketing. From March 2009 through present  
7 I've been employed in various managerial roles at Progress Energy and Duke Energy  
8 overseeing Natural Gas and Oil trading, hedging procurement. Prior to my tenure  
9 with Duke Energy, I was employed for approximately 13 years in Capital Markets  
10 as a U.S. Government fixed income securities trader with various banks, and broker/  
11 dealers.

12  
13 **Q. What is the purpose of your testimony?**

14 A. While DEF does not currently propose to hedge, given feedback from customer  
15 interveners, the purpose of this testimony is to outline DEF's hedging objectives and  
16 activities for 2023 if it were ordered to begin hedging.

17  
18 **Q. Are you sponsoring any exhibits to your testimony?**

19 A. Yes, I am sponsoring the following exhibit:

- 20 • Exhibit No. \_\_\_ (JM-1P) – 2023 Risk Management Plan (*filed July 27, 2022*).

21  
22  
23 **Q. What are the objectives of DEF's hedging activities?**

1 A. The objectives of DEF's hedging program are to reduce fuel price volatility risk and  
2 provide greater cost certainty for DEF's customers.

3 **REDACTED**

4 **Q. Describe the hedging activities that the Company will execute for 2023.**

5 A. DEF is not proposing to implement hedging and outlined hedging activities. While  
6 DEF believes that hedging is a reasonable and prudent approach to mitigate price  
7 volatility, it understands that key consumer groups oppose hedging. Given this  
8 feedback from DEF's customers, DEF is proposing to continue the hedging  
9 moratorium through 2023. However, if the Commission decides that DEF should  
10 hedge, DEF is providing its 2023 Risk Management Plan to demonstrate how it  
11 would hedge if so ordered. If the 2023 Risk Management Plan is implemented, DEF  
12 would hedge a percentage of its projected natural gas burns utilizing approved  
13 financial agreements. With respect to hedging activity, natural gas represents the  
14 largest component of DEF's overall hedging activity given it is the largest fuel cost  
15 component. DEF's target hedging percentage ranges would be between ■ to ■  
16 percent of its forecasted calendar annual burns. Hedging in the ranges provided  
17 would allow DEF to monitor actual fuel burns, updated fuel forecasts, and make any  
18 adjustments as needed throughout the year. If hedging were to start in 2023 the Risk  
19 Management Plan outlines the activities DEF would implement to start its hedging  
20 program in 2023 without existing hedges in place and as the hedging program begins  
21 to mature it would take DEF all of 2023, 2024 and into the first half of 2025 to  
22 execute the layered hedging strategy and reach the minimum levels outlined in the  
23 Risk Management Plan.

1

2 **Q. What were the results of DEF's hedging activities for January through July**  
3 **2022?**

4 **A.** As approved by the Commission, DEF is currently under a moratorium on hedging  
5 and has not executed any financial hedges for any periods since October 21, 2016,  
6 and therefore does not have any hedges in place for 2022.

7

8 **Q. Does this conclude your testimony?**

9 **A.** Yes.

10

**IN RE: PETITION ON BEHALF OF DUKE ENERGY FLORIDA, LLC.  
FOR**

**FUEL AND CAPACITY COST RECOVERY  
FINAL TRUE-UP FOR THE PERIOD  
JANUARY THROUGH JULY 2022**

**FPSC DOCKET NO. 20220001-EI**

**DIRECT TESTIMONY OF  
James McClay**

**July 27, 2022**

**I. INTRODUCTION AND QUALIFICATIONS**

1 **Q. Please state your name and business address.**

2 **A.** My name is James McClay. My business address is 526 South Church Street,  
3 Charlotte, North Carolina 28202.

4  
5 **Q. By whom are you employed and in what capacity?**

6 **A.** I am employed by Duke Energy Carolinas (“DEC”), an affiliate company of Duke  
7 Energy Florida, LLC (“DEF”, “Petitioner” or “Company”) as the Managing Director  
8 Natural Gas Trading. I manage the Midwest financial activities, oil procurement and  
9 natural gas group procurement, scheduling and hedging activities in the Trading and  
10 Dispatch Section of the Fuels and Systems Optimization Department for the Duke  
11 Energy regulated generation fleet. This group is responsible for the financial hedging  
12 activities, oil procurement and natural gas procurement and scheduling needed to  
13 support the gas generation needs for Duke Energy Indiana, Duke Energy Kentucky,  
14 Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida.

15

16 **Q. Please describe your education background and professional experience.**

1 A. I received a Bachelor Degree in Business Administration majoring in Finance from  
2 St. Bonaventure University. I joined Progress Energy in 1998 as the Manager of  
3 Power Trading and held that position through early 2003 and then became the  
4 Director of Power Trading and Portfolio Management for Progress Energy Ventures  
5 through February 2007. From March 2007 through late 2008, I was the Director of  
6 Power Trading for Arclight Energy Marketing. From March 2009 through present  
7 I've been employed in various managerial roles at Progress Energy and Duke Energy  
8 overseeing Natural Gas and Oil trading, hedging procurement. Prior to my tenure  
9 with Duke Energy, I was employed for approximately 13 years in Capital Markets  
10 as a U.S. Government fixed income securities trader with various banks, and broker/  
11 dealers.

12  
13 **Q. What is the purpose of your testimony?**

14 A. While DEF does not currently propose to hedge, given feedback from customer  
15 interveners, the purpose of this testimony is to outline DEF's hedging objectives and  
16 activities for 2023 if it were ordered to begin hedging.

17  
18 **Q. Are you sponsoring any exhibits to your testimony?**

19 A. Yes, I am sponsoring the following exhibit:

- 20 • Exhibit No. \_\_\_ (JM-1P) – 2023 Risk Management Plan (*filed July 27, 2022*).

21  
22  
23 **Q. What are the objectives of DEF's hedging activities?**

1 A. The objectives of DEF's hedging program are to reduce fuel price volatility risk and  
2 provide greater cost certainty for DEF's customers.

3 **REDACTED**

4 **Q. Describe the hedging activities that the Company will execute for 2023.**

5 A. DEF is not proposing to implement hedging and outlined hedging activities. While  
6 DEF believes that hedging is a reasonable and prudent approach to mitigate price  
7 volatility, it understands that key consumer groups oppose hedging. Given this  
8 feedback from DEF's customers, DEF is proposing to continue the hedging  
9 moratorium through 2023. However, if the Commission decides that DEF should  
10 hedge, DEF is providing its 2023 Risk Management Plan to demonstrate how it  
11 would hedge if so ordered. If the 2023 Risk Management Plan is implemented, DEF  
12 would hedge a percentage of its projected natural gas burns utilizing approved  
13 financial agreements. With respect to hedging activity, natural gas represents the  
14 largest component of DEF's overall hedging activity given it is the largest fuel cost  
15 component. DEF's target hedging percentage ranges would be between ■ to ■  
16 percent of its forecasted calendar annual burns. Hedging in the ranges provided  
17 would allow DEF to monitor actual fuel burns, updated fuel forecasts, and make any  
18 adjustments as needed throughout the year. If hedging were to start in 2023 the Risk  
19 Management Plan outlines the activities DEF would implement to start its hedging  
20 program in 2023 without existing hedges in place and as the hedging program begins  
21 to mature it would take DEF all of 2023, 2024 and into the first half of 2025 to  
22 execute the layered hedging strategy and reach the minimum levels outlined in the  
23 Risk Management Plan.

1

2 **Q. What were the results of DEF's hedging activities for January through July**  
3 **2022?**

4 **A.** As approved by the Commission, DEF is currently under a moratorium on hedging  
5 and has not executed any financial hedges for any periods since October 21, 2016,  
6 and therefore does not have any hedges in place for 2022.

7

8 **Q. Does this conclude your testimony?**

9 **A.** Yes.

10

1                   (Whereupon, prefiled direct testimony of  
2 Charles R. Rote was inserted.)

24

25

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**  
2                   **FLORIDA POWER & LIGHT COMPANY**  
3                   **TESTIMONY OF CHARLES R. ROTE**  
4                   **DOCKET NO. 20220001-EI**  
5                   **MARCH 16, 2022**  
6  
7   **Q.    Please state your name and business address.**  
8    A.    My name is Charles R. Rote, and my business address is 700 Universe  
9            Boulevard, Juno Beach, Florida 33408.  
10 **Q.    By whom are you employed and in what capacity?**  
11 A.    I am employed by Florida Power & Light Company, as Business Services  
12          Director in the Power Generation Division.  
13 **Q.    Please summarize your educational background and professional**  
14 **experience.**  
15 A.    I graduated from DePauw University with a Bachelor's degree in Industrial  
16          Psychology in 1991. I subsequently earned a Master of Business  
17          Administration from Pace University in New York in 1994. I am a Certified  
18          Public Accountant in the state of New York. Prior to 1999, I held various  
19          auditing positions at Price Waterhouse LLP and Pfizer Inc. From 1999 to 2009,  
20          I worked for Rinker Materials (acquired by Cemex in 2008) in various audit,  
21          accounting and development capacities. I have been in my current role at FPL  
22          since 2009 where I have responsibility for all budgeting, forecasting, regulatory  
23          and internal controls activities for FPL's fossil and solar generating

1 assets. Since 2013, I have also overseen the preparation of the Generating  
2 Performance Incentive Factor (“GPIF”) filings including testimony, exhibits,  
3 audits and discovery.

4 **Q. What is the purpose of your testimony?**

5 A. The purpose of my testimony is to report the pre-consolidated Florida Power &  
6 Light Company’s (“FPL”) and pre-consolidated Gulf Power Company’s  
7 (“Gulf”) actual 2021 performance for Equivalent Availability Factors (“EAF”)  
8 and Average Net Operating Heat Rates (“ANOHR”) for the GPIF generating  
9 units and to calculate the resulting GPIF reward/penalties. I compared the  
10 performance of each unit to the targets approved in the final Commission Order  
11 No. PSC-2020-0439-FOF-EI issued November 16, 2020 for the period January  
12 through December 2021 and performed the reward/penalty calculations  
13 prescribed by the GPIF Manual. My testimony presents the results of these  
14 calculations: \$16,307,675 of fuel savings to FPL’s customers and \$2,341,814  
15 of fuel losses for Gulf’s customers, which result in a GPIF reward of \$8,151,853  
16 for FPL and a GPIF penalty of \$1,157,234 for Gulf. When combined, this  
17 represents a net of \$13,965,861 of fuel savings and a net reward of \$6,994,619.  
18 I have presented FPL units separately from Gulf units to align with pre-  
19 consolidation targets.

20 **Q. Have you prepared, or caused to have prepared under your direction,  
21 supervision, or control any exhibits in this proceeding?**

22 A. Yes. Exhibits CRR-1 and CRR-2 show the reward/penalty calculations for FPL  
23 and Gulf.

- 1 **Q. Please explain in general terms how the total FPL GPIF reward amount**  
2 **was calculated.**
- 3 A. The steps involved in making these calculations are provided in Exhibit  
4 CRR-1. Page 2 provides the overall GPIF performance of +3.9738 points or  
5 \$16,307,675 in fuel savings which represents a reward of \$8,151,853. Page 3  
6 provides the calculation of the maximum allowed incentive dollars as approved  
7 by Commission Order No. PSC-13-0665-FOF-EI issued December 18, 2013.  
8 The calculation of the system actual GPIF performance points is shown on  
9 page 4. This page lists each GPIF unit, the unit's weighting factors, and the  
10 associated GPIF unit points.
- 11
- 12 Page 5 shows the actual EAF and adjustments summary. This page lists each  
13 of the GPIF units, the targets, the adjusted actual EAF and the Generating  
14 Performance Incentive Points for each unit for availability as determined by  
15 interpolating from the tables shown on pages 8 through 20. These tables are  
16 based on the targets and target ranges previously approved by the Commission.
- 17
- 18 Continuing with Exhibit CRR-1, page 7 shows the adjustments to ANOHR.  
19 Columns 2 through 4 show the target heat rate formula, the actual net output  
20 factor ("NOF") and ANOHR for each GPIF unit. Since heat rate varies with  
21 NOF, it is necessary to determine both the target and actual heat rates at the  
22 same NOF. This adjustment provides a common basis for comparison purposes  
23 and is shown numerically for each GPIF unit in columns 5 through 8. Column

1 9 contains the Generating Performance Incentive Points as determined by  
2 interpolating from the tables shown on pages 8 through 20. These tables are  
3 based on the targets and target ranges previously approved by the Commission.

4 **Q. Please explain the primary reason FPL will receive a reward under the  
5 GPIF for the January through December 2021 period.**

6 A. The primary reason that FPL will receive a reward for the period is that adjusted  
7 actual EAF for eight out of the thirteen FPL GPIF units were better than their  
8 targets. In addition, five out of the thirteen FPL GPIF units operated with an  
9 adjusted actual ANOHR that was below the  $\pm 75$  Btu/kWh dead band.

10 **Q. Please summarize each nuclear unit's performance as it relates to the EAF.**

11 A. St. Lucie Unit 1 operated at an adjusted actual EAF of 88.9%, compared to its  
12 target of 80.6%. This results in +10.0 points, which corresponds to a GPIF  
13 reward of \$1,903,699.

14

15 St. Lucie Unit 2 operated at an adjusted actual EAF of 89.3%, compared to its  
16 target of 84.0%. This results in +10.0 points, which corresponds to a GPIF  
17 reward of \$1,407,260.

18

19 Turkey Point Unit 3 operated at an adjusted actual EAF of 84.5% compared to  
20 its target of 85.7%. This results in -4.00 points, which corresponds to a GPIF  
21 penalty of \$553,878.

22

1 Turkey Point Unit 4 operated at an adjusted actual EAF of 99.5% compared to  
2 its target of 93.6%. This results in +10.0 points, which corresponds to a GPIF  
3 reward of \$1,407,260.

4

5 In total, the nuclear units' EAF performance results in a net GPIF reward of  
6 \$4,164,341.

7 **Q. Please summarize each nuclear unit's performance as it relates to**  
8 **ANOHR.**

9 A. The St. Lucie Unit 1 adjusted actual ANOHR is 10,413 Btu/kWh compared to  
10 its target of 10,422 Btu/kWh. This ANOHR is within the  $\pm 75$  Btu/kWh dead  
11 band around the projected target; therefore, there is no GPIF reward or penalty.

12

13 The St. Lucie Unit 2 adjusted actual ANOHR is 10,307 Btu/kWh compared to  
14 its target of 10,297 Btu/kWh. This ANOHR is within the  $\pm 75$  Btu/kWh dead  
15 band around the projected target; therefore, there is no GPIF reward or penalty.

16

17 The Turkey Point Unit 3 adjusted actual ANOHR is 10,660 Btu/kWh compared  
18 to its target of 11,234 Btu/kWh. This ANOHR is better than the  $\pm 75$  Btu/kWh  
19 dead band around the projected target. This results in +10.0 points, which  
20 corresponds to a GPIF reward of \$414,383.

21

22 Turkey Point Unit 4 adjusted actual ANOHR is 10,476 Btu/kWh compared to  
23 its target of 10,888 Btu/kWh. This ANOHR is better than the  $\pm 75$  Btu/kWh

1 dead band around the projected target. This results in +10.0 points, which  
2 corresponds to a GPIF reward of \$322,070.

3

4 In total, the nuclear units' heat rate performance results in a net GPIF reward of  
5 \$736,453.

6 **Q. What is the total GPIF reward for FPL's nuclear units?**

7 A. \$4,900,794.

8 **Q. Please summarize the performance of FPL's fossil units.**

9 A. Regarding EAF performance, five of the nine fossil generating units performed  
10 better than their availability targets as shown on Exhibit CRR-1, page 5,  
11 resulting in a combined reward of \$1,239,866. The other four performed worse  
12 than their availability target as shown on Exhibit CRR-1, page 5, resulting in a  
13 penalty of \$515,722. Thus, the total FPL fossil units' EAF performance results  
14 in a net GPIF reward of \$724,144.

15

16 Regarding ANOHR, three of the nine FPL fossil units operated below the  
17  $\pm 75$  Btu/kWh dead band so they received a combined reward of \$2,526,915.

18 The other six operated with ANOHRs that were within the  $\pm 75$  Btu/kWh dead  
19 band so there were no incentive rewards or penalties. Thus, the total fossil unit  
20 heat rate performance results in a net GPIF reward of \$2,526,915.

21 **Q. What is the total GPIF reward/penalty for FPL's fossil units?**

1 A. The net GPIF fossil availability performance reward of \$724,144 plus the net  
2 GPIF heat rate fossil performance reward of \$2,526,915 results in a total GPIF  
3 reward for FPL's fossil units of \$3,251,059.

4 **Q. Please explain in general terms how the total Gulf GPIF penalty amount**  
5 **was calculated.**

6 A. The steps involved in making these calculations are provided in Exhibit CRR-2.  
7 Page 11 shows the EAF summary. This page lists each of the GPIF units, the  
8 targets, the adjusted actual EAF and the Generating Performance Incentive  
9 Points for each unit for availability as determined by interpolating from the  
10 tables shown on pages 34 through 38. These tables are based on the targets and  
11 target ranges previously approved by the Commission.

12  
13 Pages 19 through 23 show the adjustments to ANOHR. Since heat rate varies  
14 with NOF, it is necessary to determine both the target and actual heat rates at  
15 the same NOF. This adjustment provides a common basis for comparison  
16 purposes and is shown numerically for each GPIF unit.

17  
18 Page 26 shows the heat rate summary. This page lists each of the GPIF units,  
19 the targets, the adjusted actual ANOHR and the Generating Performance  
20 Incentive Points for each unit for heat rate as determined by interpolating from  
21 the tables shown on pages 34 through 38. These tables are based on the targets  
22 and target ranges previously approved by the Commission.

23

1 Page 28 shows the calculation of Gulf's penalty of \$1,157,234. Page 32  
2 provides the calculation of the maximum allowed incentive reward and penalty  
3 as approved by Commission Order No. PSC-13-0665-FOF-EI issued December  
4 18, 2013. Page 33 shows the calculation of the system actual -5.42 generation  
5 performance incentive points, and page 39 shows the calculation of \$2,341,814  
6 in fuel losses.

7 **Q. To recap, what is FPL and Gulf's combined total GPIF result for the**  
8 **period January through December 2021?**

9 A. The combined total GPIF result for the period January through December 2021  
10 is \$13,965,861 of fuel savings and a GPIF reward of \$6,994,619 as a result of  
11 the availability and efficiency of the combined GPIF generating units.

12 **Q. Does this conclude your testimony?**

13 A. Yes.

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                   **FLORIDA POWER & LIGHT COMPANY**

3                   **TESTIMONY OF CHARLES R. ROTE**

4                   **DOCKET NO. 20220001-EI**

5                   **SEPTEMBER 2, 2022**

6

7   **Q.    Please state your name and business address.**

8    A.    My name is Charles R. Rote, and my business address is 700 Universe Boulevard,  
9            Juno Beach, Florida 33408.

10 **Q.    By whom are you currently employed and in what capacity?**

11 A.    I am employed by Florida Power & Light Company (“FPL”) as the Business  
12           Services Director in the Power Generation Division of FPL, where I am  
13           responsible for budgeting, forecasting, regulatory reporting and financial internal  
14           controls for FPL’s fossil and solar generating assets.

15 **Q.    Have you previously filed testimony in this docket?**

16 A.    Yes, I have.

17 **Q.    What is the purpose of your testimony?**

18 A.    The purpose of my testimony is to present FPL’s generating unit equivalent  
19           availability factor (“EAF”) targets and average net operating heat rate  
20           (“ANOHR”) targets used in determining the Generating Performance Incentive  
21           Factor (“GPIF”) for the period January through December 2023.

1 **Q. Have you prepared, or caused to have prepared under your direction,**  
2 **supervision or control, any exhibits in this proceeding?**

3 A. Yes, I am sponsoring Exhibit CRR-3. This exhibit supports the development of  
4 the 2023 GPIF EAF and ANOHR targets. The first page of this exhibit is an  
5 index to its contents. All other pages are numbered according to the GPIF  
6 Manual as approved by the Commission.

7 **Q. Are you including the pre-consolidated Gulf Power Company (“Gulf”)**  
8 **generating units in your GPIF preparation?**

9 A. Yes, I am.

10 **Q. Do any generating units from Gulf qualify for GPIF when combined with the**  
11 **FPL units?**

12 A. No, they do not. According to the GPIF manual, in order to determine the units to  
13 be considered in the GPIF calculation, each generating unit is ranked from highest  
14 to lowest according to their estimated net generation for the projected period.  
15 When the estimated generation from the Gulf generating units is combined with  
16 FPL’s, they are fall outside the top 80% ranking of FPL’s and Gulf’s combined  
17 total forecasted system net generation as calculated pursuant to the GPIF manual.

18 **Q. Please summarize the 2023 system targets for EAF and ANOHR for the units**  
19 **to be considered in establishing the GPIF for FPL.**

20 A. For the period of January through December 2023, FPL projects a weighted  
21 system equivalent planned outage factor (“EPOF”) of 7.0% and a weighted  
22 system equivalent unplanned outage factor (“EUOF”) of 6.8% which yield a  
23 weighted system EAF target of 86.2%. The targets for this period reflect planned

1 refuelings for St. Lucie Unit 2, Turkey Point Unit 3 and Turkey Point Unit 4.  
2 FPL also projects a weighted system ANOHR target of 7,044 Btu/kWh for the  
3 period January through December 2023. These targets represent fair and  
4 reasonable values. Therefore, FPL requests that the targets for these performance  
5 indicators be approved by the Commission.

6 **Q. Have you established individual target levels of performance for the units to**  
7 **be considered in establishing the GPIF for FPL?**

8 A. Yes, I have. Exhibit CRR-3, pages 6 and 7, contains the information  
9 summarizing the individual targets and ranges for EAF and ANOHR for each of  
10 the 15 generating units that FPL proposes to be considered as GPIF units for the  
11 period January through December 2023. All of these targets have been derived  
12 utilizing the accepted methodologies adopted in the GPIF Manual.

13 **Q. Please summarize FPL's methodology for determining EAF targets.**

14 A. The GPIF Manual requires that the EAF target for each unit be determined as the  
15 difference between 100% and the sum of the EPOF and EUOF. The EPOF for  
16 each unit is determined by the duration and magnitude of the planned outage, if  
17 any, scheduled for the projected period. The EUOF is determined by the sum of  
18 the historical average equivalent forced outage factor and the historical equivalent  
19 maintenance outage factor. The EUOF is then adjusted to reflect recent or  
20 projected unit overhauls following the projection period.

21 **Q. Please summarize FPL's methodology for determining ANOHR targets.**

22 A. To develop the ANOHR targets, a set of curves that reflect historical ANOHR and  
23 unit net output factors are developed for each GPIF unit. The historical data is

1 analyzed for any unusual operating conditions and changes in equipment that  
2 affect the predicted heat rate. A regression equation is calculated and a statistical  
3 analysis of the historical ANOHR variance with respect to the best fit curve is  
4 also performed to identify unusual observations. The resulting equation is used to  
5 project ANOHR for the unit using the net output factor from the production  
6 costing simulation program, GenTrader. This projected ANOHR value is then  
7 used in the GPIF tables and in the calculations to determine the possible fuel  
8 savings or losses due to improvements or degradations in heat rate performance.  
9 This process is consistent with the GPIF Manual.

10 **Q. How did you select the units to be considered when establishing the GPIF for**  
11 **FPL?**

12 A. As mentioned before, in accordance with the GPIF Manual, the GPIF units  
13 selected are responsible for no less than 80% of the estimated system net  
14 generation. The estimated net generation for each unit is taken from the  
15 GenTrader model, which forms the basis for the projected levelized fuel cost  
16 recovery factor for the period. In this case, the 15 units which FPL proposes to  
17 use for the period January through December 2023 represent the top 80.2% of the  
18 total forecasted system net generation for this period including the Gulf  
19 generating units but excluding the Dania Beach Energy Center (“DBEC”). DBEC  
20 was declared to be in commercial operation status on May 31, 2022.  
21 Consequently, it was excluded from the GPIF calculation because there is  
22 insufficient historical data to include it. Consistent with the GPIF Manual, this

1 unit will be considered in the GPIF calculations once FPL has enough operating  
2 history to use in projecting future performance.

3 **Q. Do FPL's 2023 EAF and ANOHR performance targets as shown on Exhibit**  
4 **CRR-3 represent reasonable levels of generation availability and efficiency?**

5 A. Yes, they do.

6 **Q. Does this conclude your testimony?**

7 A. Yes, it does.

1                   (Whereupon, prefiled direct testimony of Dean  
2 Curtland was inserted.)

25

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**  
2                   **FLORIDA POWER & LIGHT COMPANY**  
3                   **TESTIMONY OF DEAN CURTLAND**  
4                   **DOCKET NO. 20220001-EI**  
5                   **SEPTEMBER 2, 2022**

6  
7   **Q.     Please state your name and address.**

8   A.     My name is Dean Curtland. My business address is 15430 Endeavor Drive, Jupiter,  
9           FL 33478.

10 **Q.    By whom are you employed and what is your position?**

11 A.     I am employed by Florida Power & Light Company (“FPL”) as Vice President of  
12         Nuclear.

13 **Q.    Have you previously filed testimony in this docket?**

14 A.     Yes.

15 **Q.    What is the purpose of your testimony?**

16 A.     My testimony presents and explains FPL’s projections of nuclear fuel costs for the  
17         thermal energy to be produced by our nuclear units measured in Million British  
18         Thermal Units or (“MMBtu”). Nuclear fuel costs were input values to the  
19         GenTrader model that is used to calculate the costs included in the proposed fuel  
20         cost recovery factors for the period January 2023 through December 2023. I am  
21         also supporting FPL’s projected 2023 incremental plant security and Fukushima-  
22         related costs. Finally, I address the 2022 outage event which occurred at the St.  
23         Lucie Plant.

24

**Nuclear Fuel Costs**

1  
2 **Q. What is the basis for FPL's projections of nuclear fuel costs?**

3 A. FPL's nuclear fuel cost projections are developed using projected energy  
4 production at its nuclear units and current operating schedules for the period  
5 January 2023 through December 2023.

6 **Q. Please provide FPL's projection for nuclear fuel unit costs and energy for the  
7 period January 2023 through December 2023.**

8 A. FPL projects the nuclear units will burn 296,609,866 MMBtu of energy at a cost  
9 of \$0.4777 per MMBtu for the period January 2023 through December 2023.  
10 Projections by nuclear unit and by month are listed in Schedule E-4 of Exhibit  
11 RBD-7, which is attached to FPL witness Deaton's testimony.

12

**Nuclear Plant Incremental Security Costs**

13  
14 **Q. What is FPL's projection of incremental security costs at its nuclear power  
15 plants for the period January 2023 through December 2023?**

16 A. FPL projects that it will incur \$34.1 million in incremental nuclear power plant  
17 security costs in 2023. The costs consist of \$6.0 million of capital expenditures and  
18 \$28.1 million of O&M expenses.

19 **Q. Please provide a brief description of the items included in incremental nuclear  
20 power plant security costs.**

21 A. The projection includes the additional costs incurred in maintaining a security force  
22 as a result of implementing the NRC's fitness-for-duty rule under 10 CFR Part 26,  
23 which strictly limits the number of hours that nuclear security personnel may work;  
24 additional personnel training; maintenance of the physical upgrades resulting from

1 implementing the NRC’s physical security rule under 10 CFR Part 73; and impacts  
2 of implementing the NRC’s cyber security rule under 10 CFR Part 73. It also  
3 includes force-on-force modifications at the St. Lucie and Turkey Point nuclear  
4 sites to effectively mitigate new adversary tactics and capabilities employed by the  
5 NRC’s Composite Adversary Force, as required by NRC inspection procedures.

6

7 **Fukushima-Related Costs**

8 **Q. What is FPL’s projection of Fukushima-related costs at its nuclear power**  
9 **plants for the period January 2023 through December 2023?**

10 A. FPL’s current projection of Fukushima-related costs for 2023 is approximately  
11 \$0.6 million in O&M expenses.

12 **Q. Please provide a brief description of the items included in this projection of**  
13 **Fukushima-related costs.**

14 A. The projection includes FPL’s share of costs incurred for equipment, storage,  
15 and transportation, to support the shared Regional Response Centers (a  
16 warehouse of off-site portable equipment shared by the industry).

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                   **FLORIDA POWER & LIGHT COMPANY**

3                   **TESTIMONY OF RENAE B. DEATON**

4                   **DOCKET NO. 20220001-EI**

5                   **APRIL 1, 2022**

6

7   **Q.    Please state your name, business address, employer and position.**

8    A.    My name is Renae B. Deaton. My business address is 700 Universe Boulevard,  
9           Juno Beach, Florida 33408. I am employed by Florida Power & Light Company  
10          ("FPL" or "the Company") as the Senior Director, Clause Recovery and Wholesale  
11          Rates, in the Regulatory & State Governmental Affairs Department.

12   **Q.    Please state your education and business experience.**

13   A.    I hold a Bachelor of Science in Business Administration and a Master of Business  
14          Administration from Charleston Southern University. I have over 30 years'  
15          experience in retail and wholesale regulatory affairs, rate design and cost of service.  
16          Since joining FPL in 1998, I have held various positions in the rates and regulatory  
17          areas. Prior to my current position, I held the positions of Senior Manager of Cost  
18          of Service and Load Research and Senior Manager of Rate Design in the Rates and  
19          Tariffs Department. In 2016, I assumed my current position, where my duties  
20          include providing direction as to the appropriateness of inclusion of costs through  
21          a cost recovery clause and the overall preparation and filing of all cost recovery  
22          clause documents including testimony and discovery. Prior to joining FPL, I was  
23          employed at the South Carolina Public Service Authority (d/b/a Santee Cooper) for

1           fourteen years, where I held a variety of positions in the Corporate Forecasting,  
2           Rates, and Marketing Department and in generation plant operations. As part of  
3           the various roles I have held with FPL, I have testified before this Commission on  
4           rate design and cost of service in base rate and clause recovery dockets. I have also  
5           testified before the Federal Energy Regulatory Commission supporting rates for  
6           wholesale power sales agreements and Open Access Transmission Tariffs.

7           **Q.    What is the purpose of your testimony in this proceeding?**

8           A.    The purpose of my testimony is to present the schedules necessary to support the  
9           actual Fuel Cost Recovery (“FCR”) Clause and Capacity Cost Recovery (“CCR”)  
10           Clause net true-up amounts for the period January 2021 through December 2021  
11           for pre-consolidated FPL and pre-consolidated Gulf Power Company (“Gulf”). If  
12           approved by the Commission at the 2022 hearing in this docket, these 2021 net true-  
13           up amounts will be included in the calculation of FPL’s 2023 FCR and CCR  
14           Factors.

15  
16           FPL’s 2021 FCR final net true-up is an under-recovery, including interest, of  
17           \$11,681,957 (Exhibit RBD-1, page 1) and Gulf’s 2021 FCR final net true-up is an  
18           over-recovery, including interest, of \$21,938,913 (RBD-3, page 1). FPL is  
19           requesting Commission approval to include the combined over-recovery amount of  
20           \$10,256,956 in the calculation of its 2023 FCR Factors.

21  
22           FPL’s 2021 CCR final net true-up is an over-recovery, including interest, of  
23           \$3,634,686 (Exhibit RBD-2, page 1) and Gulf’s 2021 CCR final net true-up is an

1 under-recovery, including interest, of \$3,937,996 (Exhibit RBD-4, page 1). FPL is  
2 requesting Commission approval to include the combined under-recovery of  
3 \$303,310 in the calculation of its 2023 CCR Factors.

4  
5 Finally, FPL is requesting Commission approval to include \$13,855,504 in the  
6 calculation of the FCR factors for the period January 2023 through December 2023,  
7 which represents FPL's share of the 2021 Asset Optimization Program gains  
8 described in the testimony of FPL witness Yupp and presented on page 1 of Exhibit  
9 GJY-1.

10 **Q. Have you prepared or caused to be prepared under your direction, supervision**  
11 **or control any exhibits in this proceeding?**

12 A. Yes, I have. Exhibits RBD-1 and RBD-2 contain the schedules supporting the  
13 calculation of the 2021 final net FCR and CCR true-up amounts for FPL and  
14 Exhibits RBD-3 and RBD-4 contain the schedules supporting the calculation of the  
15 2021 final net FCR and CCR true-up amounts for Gulf. In addition, FCR Schedules  
16 A1 through A12 for the January 2021 through December 2021 period for FPL and  
17 Gulf have been filed monthly with the Commission and served on all parties of  
18 record in this docket. Those schedules are incorporated herein by reference.

19 **Q. What is the source of the data you present?**

20 A. Unless otherwise indicated, the data are taken from the books and records of FPL  
21 and Gulf. The books and records are kept in the regular course of FPL's and Gulf's  
22 business in accordance with generally accepted accounting principles and practices,

1 and with the applicable provisions of the Uniform System of Accounts as  
2 prescribed by the Commission.

3  
4 **2021 FCR FINAL TRUE-UP CALCULATION– FPL**

5  
6 **Q. Please explain the calculation of FPL’s 2021 FCR net true-up amount.**

7 A. Exhibit RBD-1, pages 1 through 3 provide the calculation of the FCR net true-up  
8 for the period January 2021 through December 2021 for FPL, which is an under-  
9 recovery of \$11,681,957.

10  
11 Page 1 shows the actual end-of-period true-up under-recovery for the period  
12 January 2021 through December 2021 of \$597,548,321 on line 1. By Order No.  
13 PSC-2021-0460-PCO-EI, issued on December 15, 2021 in Docket No. 20210001-  
14 EI, the Commission approved FPL’s 2022 mid-course correction petition, which  
15 included a revised 2021 actual/estimated true-up under-recovery amount of  
16 \$585,866,364, which is shown on line 3. Line 1 less line 3 results in the final net  
17 true-up under-recovery for the period January 2021 through December 2021 of  
18 \$11,681,957 shown on line 5.

19  
20 The calculation of the FCR true-up amount for the period follows the procedures  
21 established by this Commission as set forth on Commission Schedule A2  
22 “Calculation of True-Up and Interest Provision.”

23

1 Page 2 shows the calculation of the FCR actual true-up by month for January 2021  
2 through December 2021.

3 **Q. Have you provided a schedule showing the variances between actual and**  
4 **revised actual/estimated FCR costs and applicable revenues for 2021?**

5 A. Yes. Exhibit RBD-1, page 4, (sum of lines 42 and 43) compares the actual end-of-  
6 period true-up under-recovery of \$597,548,321 (column 3) to the revised  
7 actual/estimated end-of-period true-up under-recovery of \$585,866,364 (column 4)  
8 resulting in a net under-recovery of \$11,681,957 (column 5). Exhibit RBD-1, page  
9 4 shows that the variance consists of a decrease in jurisdictional fuel costs of \$2.0  
10 million (line 41) combined with a decrease in revenues of \$13.7 million (line 36).

11 **Q. Please summarize the variance schedule on page 3 of Exhibit RBD-1.**

12 A. FPL previously projected jurisdictional total fuel costs and net power transactions  
13 to be \$3.448 billion for 2021 (Exhibit RBD-1, page 4, line 41, column 4). The  
14 actual jurisdictional total fuel costs and net power transactions for the 2021 period  
15 are \$3.446 billion (Exhibit RBD-1, page 4, line 41, column 3). The resulting  
16 jurisdictional total fuel costs and net power transactions are \$2.0 million, or 0.1 %  
17 lower than previously projected (Exhibit RBD-1, page 4, line 41, column 5).  
18 Jurisdictional fuel revenues net of revenue taxes for 2021 are \$13.7 million, or 0.5%  
19 lower than previously projected (Exhibit RBD-1, page 4, line 36, column 5).

20 **Q. Please explain the variances in jurisdictional total fuel costs and net power**  
21 **transactions.**

22 A. Below are the primary reasons for the \$2.0 million variance.

1 Fuel Cost of System Net Generation: \$23.9 million increase (Exhibit RBD-1, page  
2 3, line 2, column 5)

3 The table below provides the detail of this variance.

<b>Fuel Variance</b>	<b>Final True-up</b>	<b>Actual/Estimated True-up</b>	<b>Difference</b>
<b><u>Heavy Oil</u></b>			
Total Dollar	\$10,240,212	\$10,239,974	\$237
Units (MMBtu)	876,873	876,873	0
\$ per Unit	11.6781	11.6778	0.0003
Variance Due to Consumption			0
Variance Due to Cost			\$237
Total Variance			\$237
<b><u>Light Oil</u></b>			
Total Dollar	\$11,339,553	\$9,854,761	\$1,484,792
Units (MMBtu)	707,034	616,750	90,285
\$ per Unit	16.0382	15.9785	0.0597
Variance Due to Consumption			\$1,442,616
Variance Due to Cost			\$42,176
Total Variance			\$1,484,792
<b><u>Coal</u></b>			
Total Dollar	\$68,616,835	\$79,678,954	(\$11,062,119)
Units (MMBtu)	24,035,453	28,758,268	(4,722,815)
\$ per Unit	2.8548	2.7706	0.0842
Variance Due to Consumption			(\$13,085,244)
Variance Due to Cost			\$2,023,125
Total Variance			(\$11,062,119)
<b><u>Gas</u></b>			
Total Dollar	\$3,469,361,592	\$3,435,307,893	\$34,053,699
Units (MMBtu)	643,087,086	631,210,778	11,876,308
\$ per Unit	5.3949	5.4424	(0.0476)
Variance Due to Consumption			\$64,635,738
Variance Due to Cost			(\$30,582,039)
Total Variance			\$34,053,699
<b><u>Nuclear</u></b>			
Total Dollar	\$150,856,989	\$151,453,962	(\$596,973)
Units (MMBtu)	305,493,510	306,002,191	(508,681)
\$ per Unit	0.4938	0.4949	(0.0011)

Fuel Variance	Final True-up	Actual/Estimated True-up	Difference
Variance Due to Consumption			(\$251,769)
Variance Due to Cost			(\$345,204)
Total Variance			(\$596,973)
<b>Total</b>			
Total Dollar	\$3,710,415,180	\$3,686,535,544	\$23,879,636
Units (MMBtu)	974,199,956	967,464,859	6,735,097
Variance Due to Consumption			\$52,741,341
Variance Due to Cost			(\$28,861,705)
Total Variance			\$23,879,636

Note: The total fuel cost of system net generation, in the table above, for the 2021 final true-up does not tie to the amount provided on the 2021 final true-up E1b Schedule by \$250.00 due to minor adjustments that impacted A1/A2 and A3/A4 schedules that were previously filed for 2021. These adjustments were included on the impacted A-Schedules in the months in which they occurred.

1        Fuel Cost of Power Sold: \$17.0 million increase (Exhibit RBD-1, page 4, line 5,  
2        column 5)

3        The variance of \$16,950,643 for the Fuel Cost of Power Sold was primarily  
4        attributable to higher than projected economy power sales and higher than projected  
5        fuel costs for economy power sales. FPL sold 439,089 MWh more of economy  
6        power, resulting in a volume variance of \$10,467,567. In addition, the average unit  
7        fuel cost on economy power sales was \$2.00/MWh higher than projected, resulting  
8        in a cost variance of \$6,484,867. The combination of higher than projected  
9        economy power sales and higher than projected fuel costs on economy power sales  
10       resulted in a net variance for economy power sales of \$16,952,434. The remaining  
11       variance of \$1,791 was attributable to lower than projected St. Lucie Plant  
12       Reliability Exchange sales that were partially offset by higher than projected fuel  
13       costs on St. Lucie Plant Reliability Exchange sales.

1       Gains from Off-System Sales: \$9.0 million increase (Exhibit RBD-1, page 4, line  
2       6, column 5)

3       The variance for Gains from Off-System Sales was attributable to higher than  
4       projected economy power sales and higher than projected margins on economy  
5       power sales. FPL sold 439,089 MWh more of economy power, resulting in a  
6       volume variance of \$4,728,409. Margins on economy power sales averaged  
7       \$1.31/MWh higher than projected, resulting in a cost variance of \$4,244,570. The  
8       combination of higher economy power sales and higher margins on economy power  
9       sales resulted in a total variance for Gains from Off-System Sales of \$8,972,979.

10  
11       Variable Power Plant O&M Attributable to Off-System Sales: \$0.285 million  
12       increase (Exhibit RBD-1, page 4, line 13, column 5)

13       The variance of \$285,408 was attributable to higher than projected economy power  
14       sales.

15       **Q. What is the variance in retail (jurisdictional) FCR revenues?**

16       A. As shown on Exhibit RBD-1, page 4, line 36, actual 2021 jurisdictional FCR  
17       revenues, net of revenue taxes, are approximately \$13.7 million lower than the  
18       revised actual/estimated projection. This is primarily due to 189,217,636 kWh  
19       lower than projected jurisdictional sales (page 4, line 24, column 5) than the revised  
20       actual/estimated projection.

1 **Q. FPL witness Yupp calculates in his testimony that FPL is entitled to retain**  
2 **\$13,855,504 as its 60% share of 2021 Asset Optimization Program gains over**  
3 **the \$40 million threshold. When is FPL requesting to recover its share of the**  
4 **gains, and how will this be reflected in the FCR schedules?**

5 A. FPL is requesting recovery of its share of the 2021 Asset Optimization Program  
6 gains through the 2023 FCR factors, consistent with how gains have been recovered  
7 in prior years. FPL will include the approved jurisdictionalized gains amount in  
8 the calculation of the 2023 FCR factors and will reflect recovery of one-twelfth of  
9 the approved amount, net of revenue taxes, in each month's Schedule A2 for the  
10 period January 2023 through December 2023 as a reduction to jurisdictional fuel  
11 revenues applicable to each period.

12

13 **2021 CCR FINAL TRUE-UP CALCULATION - FPL**

14

15 **Q. Please explain the calculation of FPL's 2021 CCR net true-up amount.**

16 A. Exhibit RBD-2, page 1 provides the calculation of the CCR net true-up for the  
17 period January 2021 through December 2021, an over-recovery of \$3,634,686,  
18 which FPL is requesting to be included in the calculation of the CCR factors for the  
19 January 2023 through December 2023 period.

20

21 The actual end-of-period over-recovery for the period January 2021 through  
22 December 2021 of \$8,551,683 shown on line 4 less the actual/estimated end-of-  
23 period over-recovery for the same period of \$4,916,997 shown on line 8 that was

1 approved by the Commission in Order No. PSC-2021-0442-FOF-EI, results in the  
2 net true-up over-recovery for the period January 2021 through December 2021 of  
3 \$3,634,686 shown on line 10.

4 **Q. Have you provided a schedule showing the calculation of the 2021 CCR actual  
5 true-up by month?**

6 A. Yes. Exhibit RBD-2, pages 2 through 4, shows the calculation of the CCR true-up  
7 for the period January 2021 through December 2021 by month.

8 **Q. Is this true-up calculation consistent with the true-up methodology used for  
9 the FCR Clause?**

10 A. Yes. The calculation of the true-up amount follows the procedures established by  
11 this Commission set forth on Commission Schedule A2 “Calculation of True-Up  
12 and Interest Provision” for the FCR Clause.

13 **Q. Have you provided a schedule showing the variances between actual and  
14 actual/estimated capacity costs and applicable revenues for 2021?**

15 A. Yes. Exhibit RBD-2 pages 5 and 6 show the actual capacity costs and applicable  
16 revenues compared to actual/estimated capacity costs and applicable revenues for  
17 the period January 2021 through December 2021.

18 **Q. Please explain the variances related to capacity costs.**

19 A. As shown in Exhibit RBD-2, page 5, line 14, column 5, the variance related to total  
20 system capacity costs is a decrease of \$4.3 million or 1.8%. Below are the primary  
21 reasons for the decrease.

22

1 Transmission Revenues from Capacity Sales: \$2.4 million increase (Exhibit RBD-  
2 2, page 5, line 5, column 5)

3 Approximately \$363,000 of the total variance is attributable to higher than  
4 projected revenues from capacity premiums associated with power capacity sales.  
5 The remaining variance of approximately \$2,086,000 is attributable to higher than  
6 projected economy power sales which resulted in higher than projected  
7 transmission revenues from economy power sales. Higher revenues from capacity  
8 premiums, combined with higher transmission revenues from economy sales  
9 resulted in a total variance of \$2,449,311.

10  
11 Incremental Plant Security Costs – O&M: \$2.0 million decrease (Exhibit RBD-2,  
12 page 5, line 6, column 5)

13 The variance for incremental plant security is primarily attributable to: (1) lower  
14 Nuclear Regulatory Commission (“NRC”) fees than originally budgeted; (2) Force-  
15 on-force drill activities were minimized due to COVID, specifically contracted  
16 services were not needed to support these activities; and (3) deferral of work for the  
17 Control Center from 2021 to mid-2022.

18  
19 Incremental Nuclear NRC Compliance Costs (Fukushima) – O&M: \$0.1 million  
20 decrease (Exhibit RBD-2, page 5, line 8, column 5)

21 Incremental Nuclear NRC Compliance Costs were lower by \$114,429 due to costs  
22 being lower than originally budgeted.

23

1           Transmission of Electricity by Others: \$0.3 million increase (Exhibit RBD-2, page  
2           5, line 4, column 5)

3           The variance is due to higher than projected purchases of third-party transmission  
4           service used to facilitate economy power sales during the period.

5   **Q.    Please describe the variance in 2021 CCR revenues.**

6   A.    As shown on page 6, line 28, column 5, actual 2021 CCR revenues (net of revenue  
7           taxes), are \$1.1 million lower than projected in the actual/estimated true-up filing.

8   **Q.    Have you provided a schedule showing the actual monthly capacity payments**  
9           **by contract?**

10  A.    Yes. Schedule A12 consists of two pages that are included in Exhibit RBD-2 as  
11           pages 17 and 18. Page 17 shows the actual capacity payments for FPL's Purchase  
12           Power Agreements for the period January 2021 through December 2021. Page 18  
13           provides the short-term capacity payments for the period January 2021 through  
14           December 2021.

15  **Q.    Have you provided a schedule showing the capital structure components and**  
16           **cost rates relied upon by FPL to calculate the rate of return applied to all**  
17           **capital projects recovered through the FCR and CCR Clauses?**

18  A.    Yes. The capital structure components and cost rates used to calculate the rate of  
19           return on the capital investments for the period January 2021 through December  
20           2021 are included on page 19 of Exhibit RBD-2.

21

22

23

1                                   **2021 FCR FINAL TRUE-UP CALCULATION – GULF**

2

3   **Q.    Please explain the calculation of Gulf’s FCR net true-up amount.**

4    A.    Exhibit RBD-3, pages 1 and 2 provide the calculation of the FCR net true-up for  
5           the period January 2021 through December 2021, which is an over-recovery of  
6           \$21,938,913.

7

8           Page 1 shows the actual end-of-period true-up under-recovery for the period  
9           January 2021 through December 2021 of \$81,780,862 on line 2. On December 7,  
10          2021, the Commission approved FPL’s 2022 mid-course correction petition, which  
11          included a revised 2021 actual/estimated true-up under-recovery amount of  
12          \$103,719,775, which is shown on line 1. Line 2 less line 1 results in the final net  
13          true-up over-recovery for the period January 2021 through December 2021 of  
14          \$21,938,913 shown on line 3.

15

16          The calculation of the FCR true-up amount for the period follows the procedures  
17          established by this Commission as set forth on Commission Schedule A2  
18          “Calculation of True-Up and Interest Provision.”

19

20          Page 2 shows the calculation of the FCR actual true-up by month for January 2021  
21          through December 2021.

1 **Q. Have you provided a schedule showing the variances between actual and**  
 2 **revised actual/estimated FCR costs and applicable revenues for 2021?**

3 A. Yes. Exhibit RBD-3, page 3 reflects that Gulf's actual total fuel cost and net power  
 4 transactions expense was \$420,504,523, which is \$21,081,235 or 4.77% lower than  
 5 the revised actual/estimated amount of \$441,585,757 and jurisdictional fuel  
 6 revenues applicable to the period were \$338,003,815 which are \$832,824 or 0.25%  
 7 higher than the revised actual/estimated amount, which results in the \$21.9 million  
 8 variance.

9 **Q. Please explain the variances in jurisdictional total fuel costs and net power**  
 10 **transactions.**

11 A. Below are the primary reasons for the \$21.1 million variance.

12 Fuel Cost of System net Generation: \$35.3 million decrease (Exhibit RBD-3, page  
 13 3, line 1, column 4)

<b>Fuel Variance</b>	<b>2021 Final True-up</b>	<b>2021 Actual / Estimated</b>	<b>Difference</b>
<b><u>Oil - C.T</u></b>			
Total Dollar	\$4,527,501	\$4,483,618	43,883
Units	350,395	236,395	114,000
\$ per Units	12.921	18.967	(6.05)
Variance Due to Consumption			1,473,009
Variance Due to Cost			(1,429,127)
Total Variance			43,883
<b><u>Gas</u></b>			
Total Dollar	\$238,841,216	\$254,112,128	(15,270,912)
Units	53,567,757	55,544,838	(1,977,081)
\$ per Units	4.459	4.575	(0.12)

<b>Fuel Variance</b>	<b>2021 Final True-up</b>	<b>2021 Actual / Estimated</b>	<b>Difference</b>
Variance Due to Consumption			(8,815,162)

1 \*Note: B.L. - Boiler Lighter

2 Total Fuel Cost of Purchased Power: \$20.7 million increase (Exhibit RBD-3, page  
3 3, line 5, column 4)

4 Gulf Power's recoverable fuel cost of purchased power for the period was  
5 \$236,011,683 or 9.60% above the estimated amount of \$215,331,976. Total

1 megawatt hours of purchased power were 6,023,582 MWh compared to the  
2 estimate of 5,532,000 MWh or 8.89% above estimates. The resulting average fuel  
3 cost of purchased power was 3.918 cents per kWh or 0.66% above the estimated  
4 amount of 3.892 cents per kWh. The higher total fuel cost of purchased power is  
5 due to higher megawatt hours purchased by Gulf at a higher purchased power price  
6 per MWh than estimated.

7  
8 Total Fuel Cost & Gains on Power Sales: \$6.2 million increase (Exhibit RBD-3,  
9 page 3, line 4, column 4)

10 Gulf's recoverable fuel cost of power sold for the period is \$104,941,444 or 6.25%  
11 higher than the estimated amount of \$98,766,525. The total quantity of power sales  
12 was 2,902,207 MWh compared to Gulf's estimated sales of 3,165,494 MWh, or  
13 7.75% below estimates. The resulting average fuel cost of power sold was 3.594  
14 cents per kWh or 15.18% above the estimated amount of 3.120 cents per kWh.

15  
16 Stratified Revenue Credit: \$0.251 million increase (Exhibit RBD-3, page 3, line 3,  
17 column 4)

18 The higher fuel prices in November 2021 drove an increase stratified revenue credit  
19 for the year.

1 **Q. Has the benchmark level for gains on non-separated wholesale energy sales**  
2 **eligible for a shareholder incentive been updated for actual 2021 gains?**

3 A. No, this methodology is no longer applicable. As of January 1, 2022, Gulf no longer  
4 exists as a separate rate making entity. FPL and Gulf are one consolidated  
5 ratemaking entity.

6

7 **2021 CCR FINAL TRUE-UP CALCULATION – GULF**

8

9 **Q. Please explain the calculation of Gulf’s 2021 CCR net true-up amount.**

10 A. Exhibit RBD-4, page 1 provides the calculation of the CCR net true-up for the  
11 period January 2021 through December 2021, an under-recovery amount of  
12 \$3,937,996.

13

14 The actual end-of-period under-recovery for the period January 2021 through  
15 December 2021 of \$2,250,303 shown on line 2 less the actual/estimated end-of-  
16 period over-recovery for the same period of \$1,687,693 shown on line 1 that was  
17 approved by the Commission in Order No. PSC-2021-0442-FOF-EI, results in the  
18 net true-up under-recovery for the period January 2021 through December 2021 of  
19 \$3,937,996 shown on line 3. This under-recovery amount of \$3,937,996 will be  
20 included in the calculation of the 2023 CCR factors

1 **Q. Have you provided a schedule showing the calculation of the 2021 CCR actual**  
2 **true-up by month?**

3 A. Yes. Exhibit RBD-4, pages 3 and 4 provides the calculation of the CCR end-of-  
4 period true-up for the period January 2021 through December 2021 by month.

5 **Q. Is this true-up calculation consistent with the true-up methodology used for**  
6 **the FCR Clause?**

7 A. Yes. The calculation of the true-up amount follows the procedures established by  
8 this Commission set forth on Commission Schedule A2 “Calculation of True-Up  
9 and Interest Provision” for the FCR Clause.

10 **Q. Have you provided a schedule showing the variances between actual and**  
11 **actual/estimated capacity costs and applicable revenues for 2021?**

12 A. Yes. Exhibit RBD-4, page 2 shows the actual capacity costs and applicable  
13 revenues compared to actual/estimated capacity costs and applicable revenues for  
14 the period January 2021 through December 2021.

15

16 The actual total capacity payments for the period January 2021 through December  
17 2021, as shown on line 5 of page 2, was \$82,573,570. Gulf’s total estimated net  
18 purchased power capacity cost for the same period was \$83,699,220, as indicated  
19 on line 5 of Schedule CCE-1B the Exhibit RLH-3 filed July 27, 2021 in Docket No.  
20 20210001-EI. The difference between the actual net capacity cost and the estimated  
21 net capacity cost for the recovery period is \$1,125,649 or 1.34% less than the  
22 estimated amount. Jurisdictional capacity clause revenue for the period January  
23 2021 through December 2021, as shown on line 8 of page 2, was \$80,591,303 or

1           \$5,036,043 lower than the estimate of \$85,627,346. Jurisdictional capacity clause  
2           revenue and expense variances were less than one percent for the period.

3   **Q.   Does this conclude your testimony?**

4   A.   Yes.

**BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

**FLORIDA POWER & LIGHT COMPANY**

**TESTIMONY OF RENAE B. DEATON**

**DOCKET NO. 20220001-EI**

19  
20  
21  
22  
23

1 **Q. Please state your name, business address, employer and position.**

2 A. My name is Renae B. Deaton. My business address is 700 Universe Boulevard,  
3 Juno Beach, Florida 33408. I am employed by Florida Power & Light Company  
4 (“FPL” or “the Company”) as Senior Director, Clause Recovery and Wholesale  
5 Rates, in the Regulatory & State Governmental Affairs Department.

6 **Q. Have you previously testified in this docket?**

7 A. Yes.

8 **Q. What is the purpose of your testimony?**

9 A. The purpose of my testimony is to present the calculation of FPL’s Fuel Cost  
10 Recovery (“FCR”) Clause actual/estimated true-up amount and to present for  
11 Commission review and approval FPL’s Capacity Cost Recovery (“CCR”) Clause  
12 actual/estimated true-up amount for the period January 2022 through December  
13 2022.

14 **Q. Have you prepared or caused to be prepared under your direction, supervision  
15 or control any exhibits with your testimony?**

16 A. Yes, various schedules are included in Exhibits RBD-5 and RBD-6. Exhibit RBD-  
17 5 contains the FCR Schedules. These include Schedules E3 through E9 that provide  
18 revised estimates for the period July 2022 through December 2022. FCR Schedules  
19 A1 through A9 provide actual data for the period January 2022 through June 2022.  
20 The actual data was derived from the FCR A-Schedules A1 through A9 that are  
21 filed monthly with the Commission and served on all parties, which are  
22 incorporated herein by reference. The FCR schedules contained in Exhibit RBD-5

1 also provide the calculation of the actual/estimated true-up amount and  
2 actual/estimated variances for the period January 2022 through December 2022.

3  
4 Exhibit RBD-6 contains the CCR schedules, which provide the calculation of FPL's  
5 actual/estimated true-up amount and actual/estimated variances for the period  
6 January 2022 through December 2022.

7 **Q. What is the source of the actual data that you present by way of testimony or**  
8 **exhibits in this proceeding?**

9 A. Unless otherwise indicated, the actual data are taken from the books and records of  
10 FPL. The books and records are kept in the regular course of the Company's  
11 business in accordance with generally accepted accounting principles and practices,  
12 as well as the provisions of the Uniform System of Accounts as prescribed by this  
13 Commission.

14 **Q. Please describe the data that FPL has used as a comparison when calculating**  
15 **the FCR and CCR actual/estimated true-up amounts presented in your**  
16 **testimony.**

17 A. The FCR actual/estimated true-up calculation compares actual data for January  
18 2022 through June 2022 and revised estimates for July 2022 through December  
19 2022 to the data reflected in FPL's 2022 FCR midcourse correction approved by  
20 Order No. PSC-2021-0460-PCO-EI, issued on December 15, 2021.

21  
22 The CCR actual/estimated true-up calculation compares actuals for January 2022  
23 through June 2022 and revised estimates for July 2022 through December 2022 to

1 the data reflected in FPL's original projection for the period January 2022 through  
2 December 2022, which was filed on September 3, 2021 and approved by Order No.  
3 PSC-2021-0442-FOF-EI, issued on November 30, 2021.

4 **Q. Please explain the calculation of the interest provision that is applicable to the**  
5 **FCR and CCR true-up amounts.**

6 A. The calculation of the interest provision follows the methodology used in  
7 calculating the interest provision for all cost recovery clauses, as previously  
8 approved by this Commission. The interest provision is the result of multiplying  
9 the monthly average true-up amount for the twelve-month period by the monthly  
10 average interest rate. The average interest rate for the months reflecting actual data  
11 is developed using the AA financial 30-day rates as published on the Federal  
12 Reserve website on the first business day of the current month and the subsequent  
13 month divided by two. The average interest rate for the projected months is the  
14 actual rate published on the first business day in July 2022, which reflects the  
15 interest rate from the last business day in June 2022.

#### 16

17 **FUEL COST RECOVERY CLAUSE**

18

19 **Q. Have you provided a schedule showing the calculation of the FCR 2022**  
20 **actual/estimated true-up by month?**

21 A. Yes. Exhibit RBD-5, page 1 shows the calculation of the FCR actual/estimated  
22 true-up by month for the period January 2022 through December 2022.

1 **Q. Please explain the calculation of the FCR 2022 actual/estimated true-up**  
2 **amount.**

3 A. Exhibit RBD-5, page 1 shows the calculation of the FCR actual/estimated true-up  
4 amount. The actual/estimated true-up under-recovery for the period January 2022  
5 through December 2022, including interest, is \$1,658,287,443 (Exhibit RBD-5,  
6 page 1, lines 46 plus 47, column 15).

7 **Q. Were these calculations made in accordance with the procedures previously**  
8 **approved in predecessors to this Docket?**

9 A. Yes.

10 **Q. Have you provided a schedule showing the variances between the**  
11 **actual/estimated amounts and the midcourse correction amounts for 2022?**

12 A. Yes. Exhibit RBD-5, page 2 provides a variance calculation that compares the 2022  
13 actual/estimated period data by component to the same components from the 2022  
14 midcourse correction filing.

15 **Q. Please summarize the variance schedule on page 2 of Exhibit RBD-5.**

16 A. FPL's midcourse correction filing projected jurisdictional total fuel costs and net  
17 power transactions to be \$3.828 billion for 2022 (Exhibit RBD-5, page 2, line 47,  
18 column 4). The actual/estimated jurisdictional total fuel costs and net power  
19 transactions are now projected to be \$5.543 billion for that period (Exhibit RBD-5,  
20 page 2, line 47, column 3). The estimated variance is due to higher than projected  
21 costs combined with higher than projected sales and revenues. Jurisdictional total  
22 fuel costs and net power transactions are estimated to be \$1.715 billion, or 44.8%  
23 higher than the midcourse correction estimates (Exhibit RBD-5, page 2, line 47,

1 column 5), and jurisdictional fuel revenues applicable to the period, net of revenue  
 2 taxes are projected to be \$71.082 million, or 1.9% higher than the midcourse  
 3 correction estimates (Exhibit RBD-5, page 2, line 42, column 5). The net impact  
 4 due to the increase in jurisdictional fuel costs and the increase in jurisdictional fuel  
 5 revenues applicable to the period result in the actual/estimated true-up under-  
 6 recovery of \$1.648 billion (Exhibit RBD-5, page 2, line 54, column 5).

7 **Q. Please explain the variances in jurisdictional total fuel costs and net power**  
 8 **transactions.**

9 A. Below are the primary reasons for the \$1.715 billion variance in jurisdictional total  
 10 fuel costs.

11  
 12 Fuel Cost of System Net Generation - \$1.896 billion increase (Exhibit RBD-5, page  
 13 2, line 2, column 5)

14 The table below provides the detail of this variance.

Fuel Variance	2022 Actual/Estimated	2022 Original Projections	Difference
<b>Heavy Oil</b>

Variance Due to Cost			\$1,583,951,719
Total Variance			\$1,895,871,491

1

2

Fuel Cost of Stratified Sales - \$72.8 million increase (Exhibit RBD-5, page 2, line 4, column 5)

3

4

The variance for Fuel Cost of Stratified Sales is primarily attributable to significantly higher natural gas prices.

5

1 Fuel Cost of Power Sold - \$50.1 million increase (Exhibit RBD-5, page 2, line 5,  
2 column 5)

3 The variance of \$50,071,583 for the Fuel Cost of Power Sold is primarily  
4 attributable to higher than projected fuel costs on Associated Interchange and  
5 Economy Power Sales. The average unit fuel cost on Associated Interchange is  
6 now projected to be \$20.80/MWh higher than originally projected, resulting in a  
7 variance of nearly \$16.7 million. Similarly, the average unit fuel cost on economy  
8 power sales is now projected to be \$12.73/MWh higher than originally projected,  
9 resulting in a variance of roughly \$33.4 million. The increase in the fuel costs of  
10 power sold for both Associated Interchange and economy power sales has been  
11 driven by increasing fuel prices, particularly natural gas.

12  
13 Gains from Off-System Sales - \$14.9 million increase (Exhibit RBD-5, page 2, line  
14 6, column 5)

15 The variance for Gains from Off-System Sales is primarily attributable to higher  
16 than projected margins on economy power sales. FPL now projects that margins  
17 on economy power sales will be \$5.73/MWh higher than originally projected,  
18 resulting in a cost variance of \$14,317,018. In addition, FPL now projects to sell  
19 65,063 MWh more of economy power, resulting in a volume variance of \$606,801.  
20 The combination of higher margins on economy power sales and a higher volume  
21 of economy power sales results in a net variance for Gains from Off-System Sales  
22 of \$14,923,819.

23

1 Fuel Cost of Purchased Power - \$49.5 million increase (Exhibit RBD-5, page 2,  
2 line 7, column 5)

3 The variance of \$49,488,386 for the Fuel Cost of Purchased Power is primarily  
4 attributable to higher than projected costs associated with purchases from the  
5 Central Alabama (Shell) PPA and the Solid Waste Authority (“SWA”). FPL  
6 projects that purchases from the Central Alabama (Shell) PPA will be \$21.75/MWh  
7 higher than originally projected due to the increase in natural gas prices. FPL  
8 projects that purchases from SWA will be \$13.55/MWh higher than originally  
9 projected due to the overall increase in FPL’s system fuel costs, which serves as  
10 the basis for the energy payment.

11  
12 Energy Payments to Qualifying Facilities - \$6.4 million increase (Exhibit RBD-5,  
13 page 2, line 8, column 5)

14 The variance of \$6,353,054 for Energy Payments to Qualifying Facilities is  
15 primarily attributable to higher than projected fuel costs from As-Available Co-Gen  
16 facilities as a result of increased system fuel costs.

17  
18 Energy Cost of Economy Purchases - \$13.0 million increase (Exhibit RBD-5, page  
19 2, line 9, column 5)

20 The variance for the Energy Cost of Economy Purchases is primarily attributable  
21 to higher than projected costs for economy purchases. FPL now projects that the  
22 average cost of economy purchases will be nearly \$40/MWh higher than originally

1 projected as a result of an increase in prices in the power markets due to rising  
2 natural gas costs.

3  
4 Variable Power Plant O&M Avoided due to Economy Purchases - \$0.101 million  
5 decrease (Exhibit RBD-5, page 2, line 15, column 5)

6 The variance is attributable to lower than originally projected economy power  
7 purchases.

8  
9 **CAPACITY COST RECOVERY CLAUSE**

10  
11 **Q. Have you provided a schedule showing the calculation of the CCR 2022**  
12 **actual/estimated true-up by month?**

13 A. Yes. Exhibit RBD-6, page 1 provides the calculation of the CCR actual/estimated  
14 true-up by month for the period January 2022 through December 2022.

15 **Q. Please explain the calculation of the CCR 2022 actual/estimated true-up and**  
16 **the end-of-period net true-up amounts you are requesting this Commission to**  
17 **approve.**

18 A. Exhibit RBD-6, pages 4 and 5 shows the actual/estimated capacity costs and  
19 applicable revenues (January 2022 through June 2022 reflects actual data, while the  
20 data for July 2022 through December 2022 is based on updated estimates)  
21 compared to the original projection filing for the January 2022 through December  
22 2022 period. The CCR revenues are projected to be \$5.418 million (Exhibit RBD-  
23 6, page 5, line 29, column 5) higher than FPL's original projection filing.

1 Jurisdictional total capacity costs are estimated to be \$8.355 million higher than the  
2 original projection filing (Exhibit RBD-6, page 5, line 23, column 5). The \$8.355  
3 million under-recovery due to higher jurisdictional capacity costs and the \$5.418  
4 million increase in revenues, results in the 2022 actual/estimated true-up under-  
5 recovery amount of \$2.922 million including interest (Exhibit RBD-6, page 5, lines  
6 31 plus 32, column 5).

7  
8 As shown on Exhibit RBD-6, page 3, the 2022 end-of period net true up amount to  
9 be carried forward to the 2023 CCR factors is an under-recovery of \$3,225,380  
10 (line 16, column 15). This \$3,225,380 net under-recovery is comprised of the  
11 actual/estimated true-up under-recovery, including interest, of \$2,922,069 for the  
12 period January 2022 through December 2022 (lines 9 plus 10, column 15) and the  
13 2021 final net true-up under-recovery of \$303,311 (line 12, column 15). The  
14 \$303,311 final net true-up under-recovery consists of pre-consolidated FPL's 2021  
15 final net true-up over-recovery of \$3,634,686 and pre-consolidated Gulf's 2021  
16 final net true-up under-recovery of \$3,937,996.

17 **Q. Is this true-up calculation made in accordance with the procedures previously**  
18 **approved in predecessors to this docket?**

19 A. Yes.

20 **Q. Please explain the variances related to capacity costs.**

21 A. As shown in Exhibit RBD-6, page 4, line 16, column 5, total system capacity costs  
22 are estimated to be \$8,337,863 or 2.7% higher than projected in FPL's original

1 projection filing. Below are the primary reasons for the estimated \$8.338 million  
2 increase in total system capacity costs.

3  
4 Transmission of Electricity by Others - \$12.4 million increase (Exhibit RBD-6,  
5 page 4, line 4, column 5)

6 The variance for transmission of electricity by others is primarily due to  
7 transmission costs associated with the Central Alabama (Shell) PPA.  
8 Approximately \$8.75 million in projected transmission costs were inadvertently  
9 omitted from the original projections. Approximately \$3.20 million of the variance  
10 is due to higher costs than originally projected for the purchase of third-party  
11 transmission utilized to facilitate wholesale power activity during the period.

12  
13 Transmission Revenues from Capacity Sales - \$4.2 million increase (Exhibit RBD-  
14 6, page 4, line 5, column 5)

15 Approximately \$3.1 million of the total variance for transmission of revenues from  
16 capacity sales is attributable to higher revenues from capacity premiums associated  
17 with power capacity sales. Higher than originally projected transmission revenues  
18 from economy sales resulted in a variance of approximately \$1.1 million. Higher  
19 revenues from capacity premiums, combined with higher transmission revenues  
20 from economy sales resulted in a total variance of \$4,230,063.

21

22

23

1 IIC Payments/(Receipts) (Reserve Sharing and Santee Cooper) - \$1.7 million  
2 increase (Exhibit RBD-6, page 4, line 6, column 5)

3 The variance of approximately \$1.66 million for IIC Payments is primarily  
4 attributable to reserve sharing costs associated with Southern Company Pool  
5 activity, which were inadvertently omitted from the original capacity projections.  
6 These ongoing costs terminated in July 2022 when pre-consolidated Gulf assets  
7 were no longer managed by Southern Company.

8  
9 Incremental Plant Security Costs - O&M - \$4.6 million increase (Exhibit RBD-6,  
10 page 4, line 7, column 5)

11 The variance for incremental plant security O&M costs is primarily attributable to  
12 costs associated with the addition of automation and compliance assessments to  
13 security centers and ongoing maintenance at existing plants, which were  
14 inadvertently omitted from the 2022 original projections.

15  
16 Incremental Plant Security Costs – Capital - \$0.470 million decrease (Exhibit RBD-  
17 6, page 4, line 8, column 5)

18 The variance for incremental plant security capital costs is primarily attributable to  
19 the deferral into 2023 of costs associated with the replacement of security fencing  
20 at the St. Lucie Plant, due to resource limitations and supply chain issues.

21

1           Incremental Nuclear NRC Compliance Costs - O&M - \$0.096 million decrease  
2           (Exhibit RBD-6, page 4, line 9, column 5)

3           The variance for incremental nuclear NRC compliance O&M costs is primarily  
4           attributable to lower Fukushima emergency preparedness costs than originally  
5           projected. Additionally, one fewer Fukushima compliance-related leased truck at  
6           Turkey Point was required.

7

8           Incremental Nuclear NRC Compliance Costs – Capital - \$1.7 million decrease  
9           (Exhibit RBD-6, page 4, line 10, column 5)

10          The variance for incremental nuclear NRC compliance capital costs is primarily  
11          attributable to equipment retirements, which were not included in the original  
12          projections.

13   **Q.    Does this conclude your testimony?**

14    A.    Yes, it does.

**BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

**FLORIDA POWER & LIGHT COMPANY**

**TESTIMONY OF RENAE B. DEATON**

**DOCKET NO. 20220001-EI**

**JULY 27, 2022**

17  
18  
19  
20  
21  
22  
23

1 **Q. Please state your name, business address, employer and position.**

2 A. My name is Renae B. Deaton. My business address is 700 Universe Boulevard,  
3 Juno Beach, Florida 33408. I am employed by Florida Power & Light Company  
4 (“FPL” or “the Company”) as Senior Director, Clause Recovery and Wholesale  
5 Rates, in the Regulatory & State Governmental Affairs Department.

6 **Q. Have you previously testified in this docket?**

7 A. Yes.

8 **Q. What is the purpose of your testimony?**

9 A. The purpose of my testimony is to present the calculation of FPL’s Fuel Cost  
10 Recovery (“FCR”) Clause actual/estimated true-up amount and to present for  
11 Commission review and approval FPL’s Capacity Cost Recovery (“CCR”) Clause  
12 actual/estimated true-up amount for the period January 2022 through December  
13 2022.

14 **Q. Have you prepared or caused to be prepared under your direction, supervision  
15 or control any exhibits with your testimony?**

16 A. Yes, various schedules are included in Exhibits RBD-5 and RBD-6. Exhibit RBD-  
17 5 contains the FCR Schedules. These include Schedules E3 through E9 that provide  
18 revised estimates for the period July 2022 through December 2022. FCR Schedules  
19 A1 through A9 provide actual data for the period January 2022 through June 2022.  
20 The actual data was derived from the FCR A-Schedules A1 through A9 that are  
21 filed monthly with the Commission and served on all parties, which are  
22 incorporated herein by reference. The FCR schedules contained in Exhibit RBD-5

1 also provide the calculation of the actual/estimated true-up amount and  
2 actual/estimated variances for the period January 2022 through December 2022.

3  
4 Exhibit RBD-6 contains the CCR schedules, which provide the calculation of FPL's  
5 actual/estimated true-up amount and actual/estimated variances for the period  
6 January 2022 through December 2022.

7 **Q. What is the source of the actual data that you present by way of testimony or**  
8 **exhibits in this proceeding?**

9 A. Unless otherwise indicated, the actual data are taken from the books and records of  
10 FPL. The books and records are kept in the regular course of the Company's  
11 business in accordance with generally accepted accounting principles and practices,  
12 as well as the provisions of the Uniform System of Accounts as prescribed by this  
13 Commission.

14 **Q. Please describe the data that FPL has used as a comparison when calculating**  
15 **the FCR and CCR actual/estimated true-up amounts presented in your**  
16 **testimony.**

17 A. The FCR actual/estimated true-up calculation compares actual data for January  
18 2022 through June 2022 and revised estimates for July 2022 through December  
19 2022 to the data reflected in FPL's 2022 FCR midcourse correction approved by  
20 Order No. PSC-2021-0460-PCO-EI, issued on December 15, 2021.

21  
22 The CCR actual/estimated true-up calculation compares actuals for January 2022  
23 through June 2022 and revised estimates for July 2022 through December 2022 to

1 the data reflected in FPL's original projection for the period January 2022 through  
2 December 2022, which was filed on September 3, 2021 and approved by Order No.  
3 PSC-2021-0442-FOF-EI, issued on November 30, 2021.

4 **Q. Please explain the calculation of the interest provision that is applicable to the**  
5 **FCR and CCR true-up amounts.**

6 A. The calculation of the interest provision follows the methodology used in  
7 calculating the interest provision for all cost recovery clauses, as previously  
8 approved by this Commission. The interest provision is the result of multiplying  
9 the monthly average true-up amount for the twelve-month period by the monthly  
10 average interest rate. The average interest rate for the months reflecting actual data  
11 is developed using the AA financial 30-day rates as published on the Federal  
12 Reserve website on the first business day of the current month and the subsequent  
13 month divided by two. The average interest rate for the projected months is the  
14 actual rate published on the first business day in July 2022, which reflects the  
15 interest rate from the last business day in June 2022.

16  
17 **FUEL COST RECOVERY CLAUSE**

18  
19 **Q. Have you provided a schedule showing the calculation of the FCR 2022**  
20 **actual/estimated true-up by month?**

21 A. Yes. Exhibit RBD-5, page 1 shows the calculation of the FCR actual/estimated  
22 true-up by month for the period January 2022 through December 2022.

1 **Q. Please explain the calculation of the FCR 2022 actual/estimated true-up**  
2 **amount.**

3 A. Exhibit RBD-5, page 1 shows the calculation of the FCR actual/estimated true-up  
4 amount. The actual/estimated true-up under-recovery for the period January 2022  
5 through December 2022, including interest, is \$1,658,287,443 (Exhibit RBD-5,  
6 page 1, lines 46 plus 47, column 15).

7 **Q. Were these calculations made in accordance with the procedures previously**  
8 **approved in predecessors to this Docket?**

9 A. Yes.

10 **Q. Have you provided a schedule showing the variances between the**  
11 **actual/estimated amounts and the midcourse correction amounts for 2022?**

12 A. Yes. Exhibit RBD-5, page 2 provides a variance calculation that compares the 2022  
13 actual/estimated period data by component to the same components from the 2022  
14 midcourse correction filing.

15 **Q. Please summarize the variance schedule on page 2 of Exhibit RBD-5.**

16 A. FPL's midcourse correction filing projected jurisdictional total fuel costs and net  
17 power transactions to be \$3.828 billion for 2022 (Exhibit RBD-5, page 2, line 47,  
18 column 4). The actual/estimated jurisdictional total fuel costs and net power  
19 transactions are now projected to be \$5.543 billion for that period (Exhibit RBD-5,  
20 page 2, line 47, column 3). The estimated variance is due to higher than projected  
21 costs combined with higher than projected sales and revenues. Jurisdictional total  
22 fuel costs and net power transactions are estimated to be \$1.715 billion, or 44.8%  
23 higher than the midcourse correction estimates (Exhibit RBD-5, page 2, line 47,

1 column 5), and jurisdictional fuel revenues applicable to the period, net of revenue  
 2 taxes are projected to be \$71.082 million, or 1.9% higher than the midcourse  
 3 correction estimates (Exhibit RBD-5, page 2, line 42, column 5). The net impact  
 4 due to the increase in jurisdictional fuel costs and the increase in jurisdictional fuel  
 5 revenues applicable to the period result in the actual/estimated true-up under-  
 6 recovery of \$1.648 billion (Exhibit RBD-5, page 2, line 54, column 5).

7 **Q. Please explain the variances in jurisdictional total fuel costs and net power**  
 8 **transactions.**

9 A. Below are the primary reasons for the \$1.715 billion variance in jurisdictional total  
 10 fuel costs.

11  
 12 Fuel Cost of System Net Generation - \$1.896 billion increase (Exhibit RBD-5, page  
 13 2, line 2, column 5)

14 The table below provides the detail of this variance.

Fuel Variance	2022 Actual/Estimated	2022 Original Projections	Difference
<b>Heavy Oil</b>			
Total Dollar	\$79	\$0	\$79
Units (MMBTU)	6	0	6
\$ per Unit	13.8762	0.0000	13.8762

\$ per Unit	5.7319	4.0679	1.6640
Variance Due to Consumption			\$311,919,772
Variance Due to Cost			\$1,583,951,719
Total Variance			\$1,895,871,491

1

2

Fuel Cost of Stratified Sales - \$72.8 million increase (Exhibit RBD-5, page 2, line 4, column 5)

3

4

The variance for Fuel Cost of Stratified Sales is primarily attributable to significantly higher natural gas prices.

5

1 Fuel Cost of Power Sold - \$50.1 million increase (Exhibit RBD-5, page 2, line 5,  
2 column 5)

3 The variance of \$50,071,583 for the Fuel Cost of Power Sold is primarily  
4 attributable to higher than projected fuel costs on Associated Interchange and  
5 Economy Power Sales. The average unit fuel cost on Associated Interchange is  
6 now projected to be \$20.80/MWh higher than originally projected, resulting in a  
7 variance of nearly \$16.7 million. Similarly, the average unit fuel cost on economy  
8 power sales is now projected to be \$12.73/MWh higher than originally projected,  
9 resulting in a variance of roughly \$33.4 million. The increase in the fuel costs of  
10 power sold for both Associated Interchange and economy power sales has been  
11 driven by increasing fuel prices, particularly natural gas.

12  
13 Gains from Off-System Sales - \$14.9 million increase (Exhibit RBD-5, page 2, line  
14 6, column 5)

15 The variance for Gains from Off-System Sales is primarily attributable to higher  
16 than projected margins on economy power sales. FPL now projects that margins  
17 on economy power sales will be \$5.73/MWh higher than originally projected,  
18 resulting in a cost variance of \$14,317,018. In addition, FPL now projects to sell  
19 65,063 MWh more of economy power, resulting in a volume variance of \$606,801.  
20 The combination of higher margins on economy power sales and a higher volume  
21 of economy power sales results in a net variance for Gains from Off-System Sales  
22 of \$14,923,819.

23

1 Fuel Cost of Purchased Power - \$49.5 million increase (Exhibit RBD-5, page 2,  
2 line 7, column 5)

3 The variance of \$49,488,386 for the Fuel Cost of Purchased Power is primarily  
4 attributable to higher than projected costs associated with purchases from the  
5 Central Alabama (Shell) PPA and the Solid Waste Authority (“SWA”). FPL  
6 projects that purchases from the Central Alabama (Shell) PPA will be \$21.75/MWh  
7 higher than originally projected due to the increase in natural gas prices. FPL  
8 projects that purchases from SWA will be \$13.55/MWh higher than originally  
9 projected due to the overall increase in FPL’s system fuel costs, which serves as  
10 the basis for the energy payment.

11  
12 Energy Payments to Qualifying Facilities - \$6.4 million increase (Exhibit RBD-5,  
13 page 2, line 8, column 5)

14 The variance of \$6,353,054 for Energy Payments to Qualifying Facilities is  
15 primarily attributable to higher than projected fuel costs from As-Available Co-Gen  
16 facilities as a result of increased system fuel costs.

17  
18 Energy Cost of Economy Purchases - \$13.0 million increase (Exhibit RBD-5, page  
19 2, line 9, column 5)

20 The variance for the Energy Cost of Economy Purchases is primarily attributable  
21 to higher than projected costs for economy purchases. FPL now projects that the  
22 average cost of economy purchases will be nearly \$40/MWh higher than originally

1 projected as a result of an increase in prices in the power markets due to rising  
2 natural gas costs.

3  
4 Variable Power Plant O&M Avoided due to Economy Purchases - \$0.101 million  
5 decrease (Exhibit RBD-5, page 2, line 15, column 5)

6 The variance is attributable to lower than originally projected economy power  
7 purchases.

8  
9 **CAPACITY COST RECOVERY CLAUSE**

10  
11 **Q. Have you provided a schedule showing the calculation of the CCR 2022**  
12 **actual/estimated true-up by month?**

13 A. Yes. Exhibit RBD-6, page 1 provides the calculation of the CCR actual/estimated  
14 true-up by month for the period January 2022 through December 2022.

15 **Q. Please explain the calculation of the CCR 2022 actual/estimated true-up and**  
16 **the end-of-period net true-up amounts you are requesting this Commission to**  
17 **approve.**

18 A. Exhibit RBD-6, pages 4 and 5 shows the actual/estimated capacity costs and  
19 applicable revenues (January 2022 through June 2022 reflects actual data, while the  
20 data for July 2022 through December 2022 is based on updated estimates)  
21 compared to the original projection filing for the January 2022 through December  
22 2022 period. The CCR revenues are projected to be \$5.418 million (Exhibit RBD-  
23 6, page 5, line 29, column 5) higher than FPL's original projection filing.

1 Jurisdictional total capacity costs are estimated to be \$8.355 million higher than the  
2 original projection filing (Exhibit RBD-6, page 5, line 23, column 5). The \$8.355  
3 million under-recovery due to higher jurisdictional capacity costs and the \$5.418  
4 million increase in revenues, results in the 2022 actual/estimated true-up under-  
5 recovery amount of \$2.922 million including interest (Exhibit RBD-6, page 5, lines  
6 31 plus 32, column 5).

7  
8 As shown on Exhibit RBD-6, page 3, the 2022 end-of period net true up amount to  
9 be carried forward to the 2023 CCR factors is an under-recovery of \$3,225,380  
10 (line 16, column 15). This \$3,225,380 net under-recovery is comprised of the  
11 actual/estimated true-up under-recovery, including interest, of \$2,922,069 for the  
12 period January 2022 through December 2022 (lines 9 plus 10, column 15) and the  
13 2021 final net true-up under-recovery of \$303,311 (line 12, column 15). The  
14 \$303,311 final net true-up under-recovery consists of pre-consolidated FPL's 2021  
15 final net true-up over-recovery of \$3,634,686 and pre-consolidated Gulf's 2021  
16 final net true-up under-recovery of \$3,937,996.

17 **Q. Is this true-up calculation made in accordance with the procedures previously**  
18 **approved in predecessors to this docket?**

19 A. Yes.

20 **Q. Please explain the variances related to capacity costs.**

21 A. As shown in Exhibit RBD-6, page 4, line 16, column 5, total system capacity costs  
22 are estimated to be \$8,337,863 or 2.7% higher than projected in FPL's original

1 projection filing. Below are the primary reasons for the estimated \$8.338 million  
2 increase in total system capacity costs.

3  
4 Transmission of Electricity by Others - \$12.4 million increase (Exhibit RBD-6,  
5 page 4, line 4, column 5)

6 The variance for transmission of electricity by others is primarily due to  
7 transmission costs associated with the Central Alabama (Shell) PPA.  
8 Approximately \$8.75 million in projected transmission costs were inadvertently  
9 omitted from the original projections. Approximately \$3.20 million of the variance  
10 is due to higher costs than originally projected for the purchase of third-party  
11 transmission utilized to facilitate wholesale power activity during the period.

12  
13 Transmission Revenues from Capacity Sales - \$4.2 million increase (Exhibit RBD-  
14 6, page 4, line 5, column 5)

15 Approximately \$3.1 million of the total variance for transmission of revenues from  
16 capacity sales is attributable to higher revenues from capacity premiums associated  
17 with power capacity sales. Higher than originally projected transmission revenues  
18 from economy sales resulted in a variance of approximately \$1.1 million. Higher  
19 revenues from capacity premiums, combined with higher transmission revenues  
20 from economy sales resulted in a total variance of \$4,230,063.

21  
22  
23

1 IIC Payments/(Receipts) (Reserve Sharing and Santee Cooper) - \$1.7 million  
2 increase (Exhibit RBD-6, page 4, line 6, column 5)

3 The variance of approximately \$1.66 million for IIC Payments is primarily  
4 attributable to reserve sharing costs associated with Southern Company Pool  
5 activity, which were inadvertently omitted from the original capacity projections.  
6 These ongoing costs terminated in July 2022 when pre-consolidated Gulf assets  
7 were no longer managed by Southern Company.

8  
9 Incremental Plant Security Costs - O&M - \$4.6 million increase (Exhibit RBD-6,  
10 page 4, line 7, column 5)

11 The variance for incremental plant security O&M costs is primarily attributable to  
12 costs associated with the addition of automation and compliance assessments to  
13 security centers and ongoing maintenance at existing plants, which were  
14 inadvertently omitted from the 2022 original projections.

15  
16 Incremental Plant Security Costs – Capital - \$0.470 million decrease (Exhibit RBD-  
17 6, page 4, line 8, column 5)

18 The variance for incremental plant security capital costs is primarily attributable to  
19 the deferral into 2023 of costs associated with the replacement of security fencing  
20 at the St. Lucie Plant, due to resource limitations and supply chain issues.

21

1 Incremental Nuclear NRC Compliance Costs - O&M - \$0.096 million decrease  
2 (Exhibit RBD-6, page 4, line 9, column 5)

3 The variance for incremental nuclear NRC compliance O&M costs is primarily  
4 attributable to lower Fukushima emergency preparedness costs than originally  
5 projected. Additionally, one fewer Fukushima compliance-related leased truck at  
6 Turkey Point was required.

7  
8 Incremental Nuclear NRC Compliance Costs – Capital - \$1.7 million decrease  
9 (Exhibit RBD-6, page 4, line 10, column 5)

10 The variance for incremental nuclear NRC compliance capital costs is primarily  
11 attributable to equipment retirements, which were not included in the original  
12 projections.

13 **Q. Does this conclude your testimony?**

14 A. Yes, it does.

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                   **FLORIDA POWER & LIGHT COMPANY**

3                   **TESTIMONY OF RENAE B. DEATON**

4                   **DOCKET NO. 20220001-EI**

5                   **SEPTEMBER 2, 2022**

6

7   **Q.    Please state your name, business address, employer and position.**

8    A.    My name is Renae B. Deaton. My business address is 700 Universe Boulevard,  
9           Juno Beach, Florida 33408. I am employed by Florida Power & Light Company  
10          ("FPL" or "the Company") as the Senior Director, Clause Recovery and Wholesale  
11          Rates in the Regulatory & State Governmental Affairs Department.

12 **Q.    Have you previously testified in this docket?**

13 A.    Yes.

14 **Q.    What is the purpose of your testimony?**

15 A.    My testimony addresses the following subjects:

- 16           •    The Fuel Cost Recovery ("FCR") factors for the period January 2023  
17           through December 2023;
- 18           •    The calculation of the jurisdictional amount of FPL's portion of the 2021  
19           asset optimization gains to be recovered through the 2023 FCR factors;
- 20           •    The Capacity Cost Recovery ("CCR") factors for the period January 2023  
21           through December 2023; and

- 1           • Proposed cogeneration as-available energy (“COG-1”) tariff sheets, which  
2           reflect updated variable operation and maintenance expense and loss factors  
3           for the consolidated Company.

4   **Q. Have you prepared or caused to be prepared under your direction,**  
5   **supervision, or control any exhibits in this proceeding?**

6   A. Yes. They are as follows:

7   Exhibit RBD-7

- 8           • Schedules E1, E1-A, E1-C, E1-D, E1-E, E2, RS-1 Inverted Rate  
9           Calculation, and page 4, Asset Optimization Gains, which support the  
10          calculation of FCR factors for January 2023 through December 2023;  
11          • Schedule E10 presents the typical 1,000 kWh residential bill  
12          comparisons;  
13          • Schedule H1 presents the historical generating system data by fuel type;  
14          • Pages 9 through 13, which provide the 2023 Projected Energy Losses  
15          by Rate Class; and  
16          • Pages 165 through 168, which provide updated COG-1 tariff sheets

17   Exhibit RBD-8

- 18          • Pages 1 through 4 provide the calculation of 2023 CCR factors;  
19          • Pages 5 through 9 provide the calculation of depreciation and return on

6 COVID-19 regulatory asset;
- 7 • Page 14 provides the capital structure, components and cost rates relied  
8 upon to calculate the rate of return applied to capital investments  
9 included for recovery through the CCR Clause for the period January  
10 2023 through December 2023; and
- 11 • Pages 17 through 30 provide the calculations of stratified separation  
12 factors

13

14 **FUEL COST RECOVERY CLAUSE**

15 **Q. What adjustments are included in the calculation of the 2023 FCR factors**  
16 **shown on Schedule E1?**

17 A. The 2023 FCR factors include the following adjustments: (1) a consolidated 2021  
18 final true-up, which reflects the sum of the 2021 final true-ups for both pre-  
19 consolidated FPL and pre-consolidated Gulf Power Company (“Gulf”), (2) a  
20 consolidated 2021 Generating Performance Incentive Factor (“GPIF”), which  
21 reflects the sum of pre-consolidated FPL and Gulf GPIF results, (3) the  
22 jurisdictional amount associated with FPL’s share of the 2021 asset optimization gains

1 and (4) the cost associated with the projected 2023 Subscription Credit for the FPL  
2 SolarTogether Program.

3  
4 The consolidated final true-up amount to be included in the 2023 FCR factors is a  
5 \$10,256,384 over-recovery. The \$10,256,384 over-recovery, divided by the  
6 projected retail sales of 124,024,865 MWh for January 2023 through December  
7 2023, results in an offset of 0.0083 cents per kWh.

8  
9 The testimony of witness Charles R. Rote, filed on March 16, 2022, presents a GPIF  
10 reward of \$8,151,853 for pre-consolidated FPL and a penalty of \$1,157,234 for  
11 Gulf for the period ending December 2021. The total of these amounts, which  
12 represents a net reward of \$6,994,619, is reflected on line 37 of Schedule E1. This  
13 \$6,994,619 reward, divided by the projected retail sales of 124,024,865 MWh for  
14 January 2023 through December 2023, results in a charge of 0.0056 cents per kWh.

15  
16 FPL is including \$13,178,912 for the jurisdictional amount associated with its share  
17 of 2021 asset optimization gains in the calculation of its 2023 FCR factors, as  
18 shown on line 39 of Schedule E1. As presented and explained in the direct  
19 testimony and exhibits of witness Yupp filed on April 1, 2022 in this docket, FPL's  
20 activities under the asset optimization program in 2021 delivered \$63,092,506 in  
21 total gains. Of these total gains, FPL is allowed to retain \$13,855,504 (system  
22 amount) per Order No. PSC-13-0023-S-EI dated January 14, 2013 and Order No.  
23 PSC-16-0560-AS-EI dated December 15, 2016. FPL will reflect recovery of one-

1 twelfth of the approved jurisdictional amount of \$13,178,912, in each month's  
2 Schedule A2 for the period January 2023 through December 2023 as a reduction to  
3 jurisdictional fuel revenues applicable to each period. The calculation of the  
4 jurisdictional amount of the 2021 asset optimization gains is shown on page 4 of  
5 RBD-7. This \$13,178,912, divided by the projected retail sales of 124,024,865  
6 MWh for January 2023 through December 2023, results in a charge of 0.0106 cents  
7 per kWh.

8  
9 FPL has included \$143,020,130 associated with the projected 2023 Subscription  
10 Credit for the FPL SolarTogether Program, as shown on line 40 of Schedule E1.  
11 The Subscription Credit is based on the program's solar power plants' forecasted  
12 generation and the Subscription Credit rate as reflected in the SolarTogether tariff.  
13 This \$143,020,130, divided by the projected retail sales of 124,024,865 MWh for  
14 January 2023 through December 2023, results in a charge of 0.1153 cents per kWh.

15  
16 Schedule E2 provides the monthly FCR factors as well as the levelized FCR factor  
17 for 2023. Schedule E-1E provides the calculation of the 2023 FCR factors by rate  
18 group for each period.

19 **Q. Please explain the fuel cost of the stratified sales amount reflected on line 2 of**  
20 **Schedule E1.**

21 A. FPL has included a projected credit of \$100,205,117 associated with stratified  
22 wholesale power sales contracts in effect in 2023. The fuel costs of wholesale sales  
23 are normally included in the total cost of fuel and net power transactions used to

1 calculate the average system cost per kWh for fuel adjustment purposes. However,  
2 since the fuel cost of the stratified sales are not recovered on an average system cost  
3 basis, an adjustment has been made to remove these costs and the related kWh sales  
4 from the fuel adjustment calculation. This adjustment was performed in the same  
5 manner that off-system sales are removed from the calculation, consistent with  
6 Order No. PSC-97-0262-FOF-EI.

7  
8 **CAPACITY COST RECOVERY CLAUSE**

9 **Q. Have you prepared a summary of the requested CCR costs for the projected**  
10 **period January 2023 through December 2023?**

11 A. Yes. Pages 1 and 2 of Exhibit RBD-8 provide this summary. Total recoverable  
12 capacity costs for the period January 2023 through December 2023 are  
13 \$248,581,801 (page 2, line 33). This includes \$245,356,422 of 2023 projected  
14 jurisdictional capacity costs (page 2, line 28) and the net true-up under-recovery for  
15 2021 and 2022 of \$3,225,379 (page 2, line 31 plus line 32).

16 **Q. What adjustments are included in the calculation of the combined 2023 CCR**  
17 **factors included in Exhibit RBD-8?**

18 A. The total net true-up to be included in the 2023 CCR factors is an over-recovery of  
19 \$3,225,379, as shown on page 2, line 31 plus line 32. This over-recovery is  
20 comprised of: (1) 2021 pre-consolidated FPL final net true-up over-recovery of  
21 \$3,634,686; (2) 2021 Gulf final net true-up under-recovery of \$3,937,996, which  
22 were filed on April 1, 2022; and (3) the consolidated FPL 2022 actual/estimated  
23 true-up under-recovery of \$2,992,069 filed on July 27, 2022.

1 **Q. Please describe the Weighted Average Cost of Capital (“WACC”) that is used**  
2 **in the calculation of the return on the 2023 capital investments included for**  
3 **recovery.**

4 A. FPL calculated and applied a projected 2023 WACC consistent with the  
5 methodology established in Commission Order No. PSC-2020-0165-PAA-EU,  
6 Docket No. 20200118-EU, issued on May 20, 2022. The WACC was calculated  
7 using a 10.6% return on equity. This projected WACC is used to calculate the rate  
8 of return applied to the 2023 CCR capital investments. The projected capital  
9 structure, components and cost rates used to calculate the rate of return are provided  
10 on page 14 of Exhibit RBD-8.

11 **Q. Have you prepared a calculation of the allocation factors for demand and**  
12 **energy?**

13 A. Yes. Page 3 of Exhibit RBD-8 provides this calculation. The demand allocation  
14 factors are calculated by determining the percentage each rate class contributes to  
15 the monthly system peaks. The energy allocators are calculated by determining the  
16 percentage each rate class contributes to total kWh sales, as adjusted for losses.

17 **Q. What are the effective dates that FPL is requesting for the new FCR and CCR**  
18 **factors for 2023?**

19 A. FPL is requesting that FCR factors and CCR factors for the period January 2023  
20 through December 2023 become effective starting with meter readings made on  
21 January 1, 2023. These factors should remain in effect until modified by this  
22 Commission.

23

**PROPOSED 2023 RESIDENTIAL BILL**

1  
2 **Q. What is FPL’s proposed residential 1,000 kWh bill for the period January**  
3 **2023 through December 2023?**

4 A. The proposed residential 1,000 kWh bill for January through December 2023 for  
5 customers in the FPL’s peninsular service area is \$130.23. This proposed bill  
6 includes a base charge of \$80.73, an FCR charge of \$37.45, a CCR charge of \$2.12,  
7 an environmental cost recovery charge of \$3.12, a conservation cost recovery  
8 charge of \$1.22, a storm protection plan cost recovery charge of \$3.82, the  
9 transition rider credit of \$1.58 and the gross receipts tax and regulatory assessment  
10 fee of \$3.35. FPL’s proposed 2023 residential 1,000 kWh bill is provided on  
11 Schedule E-10, which is page 161 of Exhibit RBD-7.

12  
13 The proposed residential 1,000 kWh bill for January through December 2023 for  
14 customers in the NW Florida service area is \$160.43. This proposed bill includes  
15 the same base charge, FCR charge, CCR charge, environmental cost recovery  
16 charge, conservation cost recovery charge and a storm protection plan cost  
17 recovery charge as customers in peninsular Florida. The bill for customers in NW  
18 Florida will reflect a storm restoration charge of \$11.00, the transition rider  
19 surcharge of \$16.85, and the gross receipts tax and regulatory assessment fee of  
20 \$4.12. FPL’s proposed 2023 residential 1,000 kWh bill for customers in the NW  
21 Florida service area is provided on Schedule E-10, which is page 162 of Exhibit  
22 RBD-7.

23

- 1 **Q. Does this conclude your testimony?**
- 2 **A. Yes.**

1                   (Whereupon, prefiled direct testimony of  
2   Curtis D. Young was inserted.)

**BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

Docket No. 20220001-EI  
Fuel and Purchased Power Cost Recovery Clause  
Direct Testimony of  
Curtis Young  
(2021 Final True-Up)  
on behalf of  
Florida Public Utilities Company

1 Q. Please state your name and business address.

2 A. Curtis Young, 1635 Meathe Road, West Palm Beach, Florida 33411.

3 Q. By whom are you employed?

4 A. I am employed by Florida Public Utilities Company.

5 Q. Could you give a brief description of your background and business experience?

6 A. I am the Senior Regulatory Analyst for Florida Public Utilities Company. I have  
7 performed various accounting and analytical functions including regulatory filings,  
8 revenue reporting, account analysis, recovery rate reconciliations and earnings  
9 surveillance. I'm also involved in the preparation of special reports and schedules  
10 used internally by division managers for decision making projects. Additionally, I  
11 coordinate the gathering of data for the FPSC audits.

12 Q. What is the purpose of your testimony?

13 A. The purpose of my testimony is to present the calculation of the final remaining true-  
14 up amounts for the period January 2021 through December 2021.

15 Q. Have you included any exhibits to support your testimony?

16 A. Yes. Exhibit \_\_\_\_\_ (CDY-1 ) consists of Schedules A, E1-B and C-1 for the  
17 Consolidated Electric Division. These schedules were prepared from the records of  
18 the company.

1 Q. What has FPUC calculated as the final remaining true-up amounts for the period  
2 January 2021 through December 2021?

3 A. For the Consolidated Electric Division the final remaining true-up amount is an under  
4 recovery of \$6,047,784.

5 Q. How was this amount calculated?

6 A. It is the difference between the actual end of period true-up amount for the January  
7 through December 2021 period and the total true-up amount to be collected or  
8 refunded during the January - December 2022 period.

9 Q. What was the actual end of period true-up amount for January - December 2021?

10 A. For the Consolidated Electric Division it was \$3,790,314 under recovery.

11 Q. What was the Commission-approved amount to be collected or refunded during the  
12 January – December 2022 period?

13 A. A consolidated over-recovery of \$2,257,470 to be refunded.

14 Q. Were there any adjustments included in the Company's fuel true-up balance during  
15 2021?

16 A. Yes. In response to related Orders approved by the Commission, the Company was  
17 allowed to apply amounts derived from settlement agreements to reduce its existing  
18 fuel and purchased power cost recovery balance and further reduce its fuel cost  
19 recovery factors in subsequent years. Order No. PSC-2019-0010-AS-EI in Docket  
20 No. 20180048-EI granted the Company permission to apply some of the income tax  
21 benefits associated with the Tax Cuts and Jobs Act of 2017 towards reducing its fuel  
22 and purchased power cost recovery balance. The amount applied during 2021 totaled  
23 \$112,605.

1 Q. Does this conclude your direct testimony?

2 A. Yes, it does.

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                   DOCKET NO. 20220001-EI: Fuel and purchased power cost recovery clause with  
3   generating performance incentive factor.

4   Direct Testimony of Curtis D. Young (Estimated/Actual)

5   On Behalf of Florida Public Utilities Company

6   **Q.    Please state your name and business address.**

7   A.    My name is Curtis D. Young. My business address is 1635 Meathe Drive, West  
8           Palm Beach, Florida 33411.

9   **Q.    By whom are you employed?**

10 A.    I am employed by Florida Public Utilities Company (“FPUC” or “Company”)

11 **Q.    Describe briefly your education and relevant professional background.**

12 A.    I have a Bachelor of Business Administration Degree in Accounting from Pace  
13           University in New York City, New York. I am the Senior Regulatory Analyst for  
14           Florida Public Utilities Company. I have performed various accounting and  
15           analytical functions including regulatory filings, revenue reporting, account analysis,  
16           recovery rate reconciliations and earnings surveillance. I’m also involved in the  
17           preparation of special reports and schedules used internally by division managers for  
18           decision making projects. Additionally, I coordinate the gathering of data for the  
19           FPSC audits.

20 **Q.    Have you previously testified in this Docket?**

21 A.    Yes, I have.

22 **Q.    What is the purpose of your testimony at this time?**

23 A.    I will briefly describe the basis for the Company’s computations made in preparation

1 of the schedules being submitted in this docket.

2 **Q. Which of the Staff's schedules is the Company providing in support of this**  
3 **filing?**

4 A. I am attaching Schedules E1-A, E1-B, and E1-B1 as part of Exhibit CDY-2.  
5 Schedule E1-B shows the Calculation of Purchased Power Costs and Calculation of  
6 True-Up and Interest Provision for the period January 2022 – December 2022 based  
7 on 6 Months Actual and 6 Months Estimated data.

8 **Q. Were these schedules completed by you or under your direct supervision?**

9 A. The schedules were completed by me.

10 **Q. What was the final remaining true-up amount for the period January 2021 –**  
11 **December 2021?**

12 A. The final remaining true-up amount was an under-recovery of \$6,047,784.

13 **Q. What is the estimated true-up amount for the period January 2022 – December**  
14 **2022?**

15 A. The estimated true-up amount is an under-recovery of \$15,143,447.

16 **Q. What is the total true-up amount estimated to be collected, or refunded for the**  
17 **period January 2023 – December 2023?**

18 A. At the end of December 2022, based on six months actual and six months estimated,  
19 the Company estimates it will under-recover \$21,191,231 in purchased power costs,  
20 which will be refunded from January 2023 – December 2023.

21 **Q. In previous years FPUC explored other opportunities to provide power supply**  
22 **for its customers. Has FPUC continued to explore other opportunities?**

23 A. Yes. FPUC is continuing to look into other sources of power supply that will

1 provide low cost, resilient and reliable energy to its customers.

2 **Q. Would you please discuss the opportunities FPUC has been investigating?**

3 A. Yes. FPUC is continuing to explore both Solar Photovoltaic (solar) and Combined  
4 Heat and Power (CHP) technologies with the goal of providing low cost, resilient  
5 and reliable energy to customers. Solar opportunities are being explored in both the  
6 Northeast and Northwest Divisions and are under consideration at this time. In our  
7 Northeast Division, significant effort has been focused on the development of a  
8 second CHP on Amelia Island. This project will be similar in size and operation to  
9 the existing Eight Flags Energy project that began commercial operation in 2016.  
10 Amelia Island Energy (AIE), as it will be named, will be located approximately one  
11 mile from Eight Flags Energy at a separate mill on Amelia Island. This CHP will  
12 provide electrical energy to the FPUC grid and thermal energy in the form of  
13 steam/hot water to the mill. Preliminary engineering has been completed, operating  
14 agreements and air permitting has been completed at this time. AIE will provide low  
15 cost energy to our customers while improving the resiliency and reliability to the  
16 FPUC grid on Amelia Island.

17 **Q. Has the Company incurred any costs during the preliminary stages of this**  
18 **project?**

19 A. Yes, the Company has engaged the consulting firms of Pierpont and McLelland LLC  
20 and Sterling Energy Services LLC and well as the law firm of Gunster, Yoakley and  
21 Stewart PA for their experienced expertise in the aforementioned processes. The  
22 Company incurred approximately \$127,000 in the consulting and legal fees linked to  
23 this project in 2021 and another \$105,000 to date in 2022. We roughly estimate to

1 spend another \$116,000 by year-end.

2 **Q. When do you anticipate construction to begin on the AIE facility?**

3 A. It is anticipated that decisions can be finalized on these items later in 2022 with  
4 major items ordered in early 2023. Commercial operation should occur within 1.5  
5 years of ordering the major equipment.

6 **Q. Has the Company made any adjustments to its 2022 True-up computations?**

7 A. Yes, pursuant to Order No PSC-2021-0266-S-PU in Docket No. 20200195-PU and  
8 beginning January 2022, the Company has been adjusting its monthly fuel true-up  
9 calculation by the amortized amount of Covid-19 regulatory asset. The amount of the  
10 adjustment is approximately \$107,839 each month.

11 **Q. Does this conclude your testimony?**

12 A. Yes.

1                                    **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                    DOCKET NO. 20220001-EI: Fuel and purchased power cost recovery clause with  
3                                    generating performance incentive factor.

4                                    Direct Testimony of Curtis D. Young (Estimated/Actual)

5                                    On Behalf of Florida Public Utilities Company

6    **Q.    Please state your name and business address.**

7    A.    My name is Curtis D. Young. My business address is 1635 Meathe Drive, West  
8           Palm Beach, Florida 33411.

9    **Q.    By whom are you employed?**

10   A.    I am employed by Florida Public Utilities Company (“FPUC” or “Company”)

11   **Q.    Describe briefly your education and relevant professional background.**

12   A.    I have a Bachelor of Business Administration Degree in Accounting from Pace  
13           University in New York City, New York. I am the Senior Regulatory Analyst for  
14           Florida Public Utilities Company. I have performed various accounting and  
15           analytical functions including regulatory filings, revenue reporting, account analysis,  
16           recovery rate reconciliations and earnings surveillance. I’m also involved in the  
17           preparation of special reports and schedules used internally by division managers for  
18           decision making projects. Additionally, I coordinate the gathering of data for the  
19           FPSC audits.

20   **Q.    Have you previously testified in this Docket?**

21   A.    Yes, I have.

22   **Q.    What is the purpose of your testimony at this time?**

23   A.    I will briefly describe the basis for the Company’s computations made in preparation

1 of the schedules being submitted in this docket.

2 **Q. Which of the Staff's schedules is the Company providing in support of this**  
3 **filing?**

4 A. I am attaching Schedules E1-A, E1-B, and E1-B1 as part of Exhibit CDY-2.  
5 Schedule E1-B shows the Calculation of Purchased Power Costs and Calculation of  
6 True-Up and Interest Provision for the period January 2022 – December 2022 based  
7 on 6 Months Actual and 6 Months Estimated data.

8 **Q. Were these schedules completed by you or under your direct supervision?**

9 A. The schedules were completed by me.

10 **Q. What was the final remaining true-up amount for the period January 2021 –**  
11 **December 2021?**

12 A. The final remaining true-up amount was an under-recovery of \$6,047,784.

13 **Q. What is the estimated true-up amount for the period January 2022 – December**  
14 **2022?**

15 A. The estimated true-up amount is an under-recovery of \$15,143,447.

16 **Q. What is the total true-up amount estimated to be collected, or refunded for the**  
17 **period January 2023 – December 2023?**

18 A. At the end of December 2022, based on six months actual and six months estimated,  
19 the Company estimates it will under-recover \$21,191,231 in purchased power costs,  
20 which will be refunded from January 2023 – December 2023.

21 **Q. In previous years FPUC explored other opportunities to provide power supply**  
22 **for its customers. Has FPUC continued to explore other opportunities?**

23 A. Yes. FPUC is continuing to look into other sources of power supply that will

1 provide low cost, resilient and reliable energy to its customers.

2 **Q. Would you please discuss the opportunities FPUC has been investigating?**

3 A. Yes. FPUC is continuing to explore both Solar Photovoltaic (solar) and Combined  
4 Heat and Power (CHP) technologies with the goal of providing low cost, resilient  
5 and reliable energy to customers. Solar opportunities are being explored in both the  
6 Northeast and Northwest Divisions and are under consideration at this time. In our  
7 Northeast Division, significant effort has been focused on the development of a  
8 second CHP on Amelia Island. This project will be similar in size and operation to  
9 the existing Eight Flags Energy project that began commercial operation in 2016.  
10 Amelia Island Energy (AIE), as it will be named, will be located approximately one  
11 mile from Eight Flags Energy at a separate mill on Amelia Island. This CHP will  
12 provide electrical energy to the FPUC grid and thermal energy in the form of  
13 steam/hot water to the mill. Preliminary engineering has been completed, operating  
14 agreements and air permitting has been completed at this time. AIE will provide low  
15 cost energy to our customers while improving the resiliency and reliability to the  
16 FPUC grid on Amelia Island.

17 **Q. Has the Company incurred any costs during the preliminary stages of this**  
18 **project?**

19 A. Yes, the Company has engaged the consulting firms of Pierpont and McLelland LLC  
20 and Sterling Energy Services LLC and well as the law firm of Gunster, Yoakley and  
21 Stewart PA for their experienced expertise in the aforementioned processes. The  
22 Company incurred approximately \$127,000 in the consulting and legal fees linked to  
23 this project in 2021 and another \$105,000 to date in 2022. We roughly estimate to

1 spend another \$116,000 by year-end.

2 **Q. When do you anticipate construction to begin on the AIE facility?**

3 A. It is anticipated that decisions can be finalized on these items later in 2022 with  
4 major items ordered in early 2023. Commercial operation should occur within 1.5  
5 years of ordering the major equipment.

6 **Q. Has the Company made any adjustments to its 2022 True-up computations?**

7 A. Yes, pursuant to Order No PSC-2021-0266-S-PU in Docket No. 20200195-PU and  
8 beginning January 2022, the Company has been adjusting its monthly fuel true-up  
9 calculation by the amortized amount of Covid-19 regulatory asset. The amount of the  
10 adjustment is approximately \$107,839 each month.

11 **Q. Does this conclude your testimony?**

12 A. Yes.

1 of the schedules being submitted in this docket.

2 **Q. Which of the Staff's schedules is the Company providing in support of this**  
3 **filing?**

4 A. I am attaching Schedules E1-A, E1-B, and E1-B1 as part of Exhibit CDY-2.  
5 Schedule E1-B shows the Calculation of Purchased Power Costs and Calculation of  
6 True-Up and Interest Provision for the period January 2022 – December 2022 based  
7 on 6 Months Actual and 6 Months Estimated data.

8 **Q. Were these schedules completed by you or under your direct supervision?**

9 A. The schedules were completed by me.

10 **Q. What was the final remaining true-up amount for the period January 2021 –**  
11 **December 2021?**

12 A. The final remaining true-up amount was an under-recovery of \$6,047,784.

13 **Q. What is the estimated true-up amount for the period January 2022 – December**  
14 **2022?**

15 A. The estimated true-up amount is an under-recovery of \$15,143,447.

16 **Q. What is the total true-up amount estimated to be collected, or refunded for the**  
17 **period January 2023 – December 2023?**

18 A. At the end of December 2022, based on six months actual and six months estimated,  
19 the Company estimates it will under-recover \$21,191,231 in purchased power costs,  
20 which will be refunded from January 2023 – December 2023.

21 **Q. In previous years FPUC explored other opportunities to provide power supply**  
22 **for its customers. Has FPUC continued to explore other opportunities?**

23 A. Yes. FPUC is continuing to look into other sources of power supply that will

1 provide low cost, resilient and reliable energy to its customers.

2 **Q. Would you please discuss the opportunities FPUC has been investigating?**

3 A. Yes. FPUC is continuing to explore both Solar Photovoltaic (solar) and Combined  
4 Heat and Power (CHP) technologies with the goal of providing low cost, resilient  
5 and reliable energy to customers. Solar opportunities are being explored in both the  
6 Northeast and Northwest Divisions and are under consideration at this time. In our  
7 Northeast Division, significant effort has been focused on the development of a  
8 second CHP on Amelia Island. This project will be similar in size and operation to  
9 the existing Eight Flags Energy project that began commercial operation in 2016.  
10 Amelia Island Energy (AIE), as it will be named, will be located approximately one  
11 mile from Eight Flags Energy at a separate mill on Amelia Island. This CHP will  
12 provide electrical energy to the FPUC grid and thermal energy in the form of  
13 steam/hot water to the mill. Preliminary engineering has been completed, operating  
14 agreements and air permitting has been completed at this time. AIE will provide low  
15 cost energy to our customers while improving the resiliency and reliability to the  
16 FPUC grid on Amelia Island.

17 **Q. Has the Company incurred any costs during the preliminary stages of this**  
18 **project?**

19 A. Yes, the Company has engaged the consulting firms of Pierpont and McLelland LLC  
20 and Sterling Energy Services LLC and well as the law firm of Gunster, Yoakley and  
21 Stewart PA for their experienced expertise in the aforementioned processes. The  
22 Company incurred approximately \$127,000 in the consulting and legal fees linked to  
23 this project in 2021 and another \$105,000 to date in 2022. We roughly estimate to

1 spend another \$116,000 by year-end.

2 **Q. When do you anticipate construction to begin on the AIE facility?**

3 A. It is anticipated that decisions can be finalized on these items later in 2022 with  
4 major items ordered in early 2023. Commercial operation should occur within 1.5  
5 years of ordering the major equipment.

6 **Q. Has the Company made any adjustments to its 2022 True-up computations?**

7 A. Yes, pursuant to Order No PSC-2021-0266-S-PU in Docket No. 20200195-PU and  
8 beginning January 2022, the Company has been adjusting its monthly fuel true-up  
9 calculation by the amortized amount of Covid-19 regulatory asset. The amount of the  
10 adjustment is approximately **\$56,422** each month.

11 **Q. Does this conclude your testimony?**

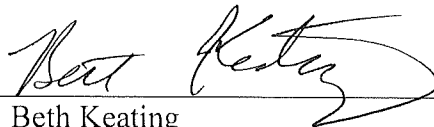

12 A. Yes.

**CERTIFICATE OF SERVICE**

I **HEREBY CERTIFY** that a true and correct copy of the foregoing Amended Direct Testimony (Estimated/Actual) of Curtis Young, has been furnished by Electronic Mail to the following parties of record this 5th day of August, 2022:

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**  
2           DOCKET NO. 20220001-EI: FUEL AND PURCHASED POWER COST RECOVERY  
3           CLAUSE WITH GENERATING PERFORMANCE INCENTIVE FACTOR

4                               2023 Projection Testimony of Michelle D. Napier

5   On Behalf of

6   Florida Public Utilities Company

7  
8           **Q.           Please state your name and business address.**

9           A.           My name is Michelle D. Napier. My business address is 1635 Meathe Drive,  
10                               West Palm Beach, FL 33411.

11           **Q.           By whom are you employed?**

12           A.           I am employed by Florida Public Utilities Company (“FPUC” or  
13                               “Company”) as Director, Regulatory Affairs.

14           **Q.           Could you give a brief description of your background and business  
15                               experience?**

16           A.           I received a Bachelor of Science degree in Finance from the University of  
17                               South Florida. I have been employed with FPUC since 1987. Over the  
18                               course of my employment at FPUC, I have performed various roles and  
19                               functions in accounting, including General Accounting Manager, before  
20                               moving to the regulatory department in 2011. As previously stated, I am  
21                               currently the Director, Regulatory Affairs and in this role, my responsibilities  
22                               include directing the regulatory activities for all regulated distribution  
23                               companies of Chesapeake Utilities Corporation. This includes regulatory  
24                               analysis and filings before the Florida Public Service Commission (“FPSC”

1 or “Commission”) for FPUC, FPUC-Indiantown, FPUC-Fort Meade, Florida  
2 Division of Chesapeake Utilities d/b/a (“CFG”), Peninsula Pipeline  
3 Company, as well as Delaware and Maryland Public Service Commissions.

4 **Q. Have you previously testified in this Docket?**

5 A. No, I have not but I have previously provided written, pre-filed testimony in a  
6 variety of the Company’s annual proceedings, including Dockets for the  
7 Purchased Gas Adjustment, Docket No. 20170003-GU; the Gas Reliability  
8 Infrastructure Program (GRIP) Cost Recovery Factors for FPUC and our  
9 sister company, CFG, Docket No. 20120036-GU; and the Swing Service Cost  
10 Recovery for FPUC and CFG, Docket No. 20170191-GU; the Limited  
11 Proceeding for Hurricane Michael, Docket No. 20190156; the Storm  
12 Protection Cost Recovery, Docket No. 20220010, as well as the Rate  
13 Proceeding, Docket No. 20220067.

14 **Q. What is the purpose of your testimony at this time?**

15 A. My testimony will establish the “true-up” collection amount, based on actual  
16 January 2022 through June 2022 data and projected July 2022 through  
17 December 2023 data to be collected or refunded during January 2023 –  
18 December 2023. My testimony will also summarize the computations that  
19 are contained in composite exhibit MDN-1 supporting the January through  
20 December 2023 projected levelized fuel adjustment factors for its  
21 consolidated electric divisions. Additionally, these factors include costs  
22 incurred as a result of the COVID-19 pandemic and deemed recoverable in  
23 terms of the settlement approved by Order No. PC-2021-0266-S-PU, as

1           amended, issued in Docket No. 20200194-PU. Finally, my testimony will  
2           propose that the Company be allowed to collect its 2022 true-up amount over  
3           a three-year period in order to mitigate the rate impacts to its customers.

4           **Q.       Were the schedules filed by the Company completed by you or under**  
5           **your direct supervision?**

6           A.       Yes, they were completed under my direction.

7           **Q.       Is FPUC providing the required schedules with this filing?**

8           A.       Yes. Included with this filing are the Consolidated Electric Schedules E1,  
9           E1A, E2, E7, E8, and E10. These schedules are included in my Exhibit  
10          MDN-1, which is appended to my testimony.

11          **Q.       Did you include costs in addition to the costs specific to purchased fuel in**  
12          **the calculations of your true-up and projected amounts?**

13          A.       Yes, included with our fuel and purchased power costs are charges for  
14          contracted consultants and legal services that are directly fuel-related and  
15          appropriate for recovery in the fuel and purchased power clause. FPUC  
16          engaged Sterling Energy Services, LLC. (“Sterling”) Christensen  
17          Associates Energy, LLC (“Christensen”), and Pierpont and McClelland  
18          (“Pierpont”) for assistance in the development and enactment of  
19          projects/programs designed to reduce their purchased power rates to its  
20          customers. The associated legal and consulting costs, included in the rate  
21          calculation of the Company’s 2023 Projection factors, were not included in  
22          expenses during the last FPUC consolidated electric base rate proceeding and  
23          are not being recovered through base rates.

1           Mr. Cutshaw addresses these project assignments more specifically in his  
2           testimony.

3           **Q.   Please explain how these costs were determined to be recoverable under the**  
4           **fuel and purchased power clause?**

5           A.   Consistent with the Commission's policy set forth in Order No. 14546, issued in  
6           Docket No. 850001-EI-B, on July 8, 1985, the other fuel related costs included in  
7           the fuel clause are directly related to purchased power, have not been recovered  
8           through base rates.

9           Specifically, consistent with item 10 of Order 14546, the costs the Company has  
10          included are fuel-related costs that were not anticipated or included in the cost  
11          levels used to establish the current base rates.  Similar expenses paid to  
12          Christensen and Associates associated with the design for a Request for  
13          Proposals of purchased power costs, and the evaluation of those responses, were  
14          deemed appropriate for recovery by FPUC through the fuel and purchased power  
15          clause in Order No. PSC-05-1252-FOF-EI, Item II E, issued in Docket No.  
16          050001-EI.  Additionally, in more recent Dockets Nos.20170001-EI, 20180001-  
17          EI, 20190001-EI, 20200001-EI, 20210001-EI and 20220001-EI, the Commission  
18          determined that many of the costs associated with the legal and consulting work  
19          incurred by the Company as fuel related, particularly those costs related to the  
20          purchase power agreement review and analysis, were recoverable under the fuel  
21          clause.  As the Commission has recognized time and again, the Company simply  
22          does not have the internal resources to pursue projects and initiatives designed to  
23          produce purchased power savings without engaging outside assistance for project  
24          analytics and due diligence, as well as negotiation and contract development

1 expertise. Likewise, the Company believes that the costs addressed herein are  
2 appropriate for recovery through the fuel clause.

3 **Q. Earlier in your testimony, you spoke of proposing that the Company be**  
4 **allowed to collect its 2022 total true-up over a three-year period. Could you**  
5 **elaborate further on that?**

6 A. The Company presently acknowledges that its 2022 true-up balance will  
7 substantially impact its customers' bills. Recent events, such as our nation's  
8 recovery from the pandemic and Russia's war against the Ukraine, have driven  
9 up natural gas prices by substantial measures. Given that natural gas is a key raw  
10 material for electric generation, it follows that FPUC's cost of purchased power  
11 would increase accordingly. FPUC's electric customers are already experiencing  
12 the bill impacts derived from the midcourse fuel rates that were effective as of  
13 August 1. Based on these events, FPUC is requesting approval to collect its 2022  
14 under-recovery balance, \$21,191,231 over the next three years and thereby  
15 include approximately \$7,063,744 of that amount in its 2023 electric fuel rate  
16 calculations.

17 **Q Why does the Company propose collecting this under-recovery over three**  
18 **years versus one year?**

19 A. The Company is concerned that this under-recovery was driven by the increase in  
20 natural gas prices as a result of unusual circumstances rather than simply  
21 inflationary or normal expense increases. As a result of this unusual natural gas  
22 price spike, the Company feels that customers should be allowed to pay this over  
23 three years rather than one year. Customers will see lower monthly bills and  
24 will be allowed to pay this over a three-year period.

1 Q. **If recovered over one year, what would a residential customer using 1,000**  
2 **KWH pay for the period January - December 2023 including base rates,**  
3 **conservation cost recovery factors, gross receipts tax and fuel adjustment**  
4 **factor and after application of a line loss multiplier?**

5 A. A residential customer using 1,000 KWH will pay **\$195.69**. This is an increase of  
6 **\$52.89** above the previous period.

7 Q. **Is there any other related change to the fuel projections as a result of the**  
8 **proposed three-year amortization of the fuel under-recovery?**

9 A Yes, The Company proposes, pending Commission approval, to apply the parent  
10 Company's projected short-term cost rate to the under recovered balance of fuel  
11 costs, rather than the prescribed non-financial commercial paper rates.

12 Q **Why is it appropriate to use the weighted average cost of short-term debt**  
13 **rather than the prescribed method.**

14 A Short-term interest rates have increased dramatically, and the current non-  
15 financial commercial paper rates do not allow the Company to recover its actual  
16 cost of debt on the outstanding under recovery fuel cost balance. The Company  
17 should not be overburdened or penalized by recovering the under-recovery  
18 balance over three years without the ability to collect its actual cost of debt on  
19 that outstanding balance.

20 Q. **How does the Company intend to apply the use of short-term cost rates in its**  
21 **current and future filings?**

22 A. The Company is presently calculating its 2023 Projection factors utilizing the  
23 traditional non-financial commercial paper interest rates. However, the Company  
24 is requesting to be allowed to submit the calculation of its monthly and annual

1 true-up and interest filings utilizing its short-term debt cost factor as an  
2 alternative towards mitigating the inherent burden of collecting its under-  
3 recovery over the extended period. The scheduling of this option would take  
4 place over the same three-year collection period of the outstanding true-up  
5 balance. If ever during that period the non-financial commercial paper rate  
6 surpasses the Company's short-term debt cost rate, the Company would then  
7 revert back to the traditional methodology for calculating the interest.

8 **Q. In addition to the fuel-related endeavors mentioned above, has the Company**  
9 **included any other costs in your projected amounts?**

10 **A.** Yes, the Company has also included costs related to the settlement agreement  
11 regarding COVID-19 regulatory asset in Docket No. 20200194 and approved in  
12 Order No. PSC-2021-0266-S-PU.

13 The settlement agreement, which was approved by the Commission on July 8,  
14 2021, allows Florida Public Utilities Company to recover \$2,085,759 of  
15 pandemic-related incremental expenses. Beginning with the factors established  
16 for the calendar year 2022, FPUC was allowed to amortize over two years and  
17 recover the allocated regulatory asset of approximately \$1,354,120 for the  
18 electric division, through the Fuel and Purchased Power Cost Recovery Clause  
19 mechanism. The annualized amount, \$677,060, is included among the  
20 Company's 2023 projected costs.

21 **Q. What are the final remaining true-up amounts for the period January –**  
22 **December 2021?**

23 **A.** The final remaining consolidated true-up amount was an under-recovery of  
24 \$6,047,784.

- 1       **Q.    What are the estimated true-up amounts for the period of January –**  
2       **December 2022?**
- 3       A.    There is an estimated consolidated under-recovery of \$15,143,447.
- 4       **Q.    Please address the calculation of the total true-up amount to be collected**  
5       **during the January - December 2023 year?**
- 6       A.    The Company has determined that at the end of December 2022, based on six  
7       months actual and six months estimated, we will have a consolidated electric  
8       under-recovery of \$21,191,231.
- 9       **Q.    What will the total consolidated fuel adjustment factor, excluding demand**  
10       **cost recovery, be for the consolidated electric division for the period?**
- 11       A.    The total fuel adjustment factor as shown on line 43, Schedule E-1 is **8.976¢** per  
12       KWH.
- 13       **Q.    Please advise what a residential customer using 1,000 KWH will pay for the**  
14       **period January - December 2023 including base rates, conservation cost**  
15       **recovery factors, gross receipts tax and fuel adjustment factor and after**  
16       **application of a line loss multiplier.**
- 17       A.    As shown on consolidated Schedule E-10 in Composite Exhibit Number CDY-3,  
18       a residential customer using 1,000 KWH will pay **\$172.89**. This is an increase of  
19       **\$30.09** above the previous period.
- 20       **Q.    Does this conclude your testimony?**
- 21       A.    Yes.

1                   (Whereupon, prefiled direct testimony of P.  
2 Mark Cutshaw was inserted.)

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION  
DOCKET NO. 20220001-EI  
FUEL AND PURCHASED POWER COST RECOVERY CLAUSE WITH GENERATING  
PERFORMANCE INCENTIVE FACTOR

2023 Projection Testimony of P. Mark Cutshaw  
On Behalf of  
Florida Public Utilities Company

1       **Q.     Please state your name and business address.**

2       A.     My name is P. Mark Cutshaw, 208 Wildlight Avenue, Yulee, Florida 32097.

3       **Q.     By whom are you employed?**

4       A.     I am employed by Florida Public Utilities Company (“FPUC” or “Company”).

5       **Q.     Could you give a brief description of your background and business  
6           experience?**

7       A.     I graduated from Auburn University in 1982 with a B.S. in Electrical Engineering.  
8           My electrical engineering career began with Mississippi Power Company in June  
9           1982. I spent nine years with Mississippi Power Company and held positions of  
10          increasing responsibility that involved budgeting, as well as operations and  
11          maintenance activities at various locations. I joined FPUC in 1991 as Division  
12          Manager in our Northwest Florida Division and have since worked extensively in  
13          both the Northwest Florida and Northeast Florida divisions. Since joining FPUC,  
14          my responsibilities have included all aspects of budgeting, customer service,  
15          operations and maintenance. My responsibilities also included involvement with  
16          Cost of Service Studies and Rate Design in other rate proceedings before the

1 Commission as well as other regulatory issues. During January 2020, I moved into  
2 my current role as Director, Generation Development.

3 **Q. Have you previously testified before the Florida Public Service Commission**  
4 **(“Commission”)?**

5 A. Yes, I’ve provided testimony in a variety of Commission proceedings, including the  
6 Company’s 2014 rate case, addressed in Docket No. 20140025-EI, rebuttal  
7 testimony in Docket No. 20180061-EI and numerous dockets for Fuel and  
8 Purchased Power Cost Recovery. Most recently, I provided testimony in Docket  
9 No. 20190156-EI, in the Limited Proceeding to recover storm cost caused by  
10 Hurricane Michael and in Docket Nos. 20220049 and 20220010, in the Storm  
11 Protection Plan and Cost Recovery.

12 **Q. What is the purpose of your direct testimony in this Docket?**

13 A. My direct testimony addresses several aspects of the purchased power cost for our  
14 FPUC electric customers. This includes activities to investigate the potential for  
15 reduced purchase power costs, execution/amendment of purchased power  
16 agreements with Gulf Power Company (“Gulf”)/Florida Power & Light (“FPL”),  
17 Combined Heat and Power (“CHP”) generation supply located on Amelia Island and  
18 investigation into the opportunities of energy provided from solar and battery  
19 installations.

20 **Q. Given the current natural gas market and uncertainty with future projections,**  
21 **will this have an impact on future purchased power cost projections?**

1       A.     Yes. Currently, all generation resources used by FPUC utilize natural gas as the fuel  
2             source for the generation of electricity which ties purchased power costs directly to  
3             the costs of natural gas. As natural gas prices continue to fluctuate, so will the  
4             purchased power prices include in the FPUC cost projections.

5       **Q.     What actions has FPUC taken to provide accurate cost projections given the**  
6             **uncertainty in the natural gas markets?**

7       A.     FPUC, being predominately a natural gas utility, has utilized information from both  
8             inside the company and other external sources to carefully investigate the future of  
9             the natural gas markets as well as other energy sources that may provide future  
10            benefits. It is apparent that many outside factors could quickly change current  
11            market projects, however, estimated natural gas costs were determined and utilized  
12            to determine purchased power costs for 2023.

13      **Q.     What other energy sources are being investigated and what are some of the**  
14            **benefits anticipated?**

15      A.     FPUC has been investigating and testing the use of Renewable Natural Gas (RNG)  
16            and Hydrogen as future fuel sources for generation assets. The markets for both  
17            RNG and Hydrogen are still developing, however, both have the potential to provide  
18            environmental benefits compared to existing fuel sources. Although there are  
19            currently some operational and cost challenges being addressed, it is critical that  
20            FPUC continue to be involved in the development and testing of these resources.

1       **Q.     What new opportunities has the Company implemented with the intent of**  
2       **achieving energy resiliency and reducing costs for its customers in its**  
3       **consolidated electric divisions?**

4       A.     The Company regularly pursues opportunities to achieve energy resiliency and  
5       reduced purchased power costs for the benefit of our customers. During 2018,  
6       FPUC began by executing a transmission interconnection agreement and a new  
7       purchased power agreement with Florida Power & Light (FPL) for our Northeast  
8       Florida Division. During 2019, a purchased power agreement with Gulf/FPL for  
9       our Northwest Florida Division was executed along with an amendment of the  
10      existing FPL purchased power agreement for our Northeast Florida Division.

11      **Q.     What is the status of the existing purchase power agreements in place with**  
12      **FPL?**

13      A.     The existing agreement for our Northwest Florida Division with FPL became  
14      effective January 1, 2020 and will continue in effect through December 31, 2026  
15      unless extended by FPUC. The existing agreement for our Northeast Florida  
16      Division with FPL which became effective January 1, 2018 was amended in 2019  
17      to continue in effect through the December 31, 2026 unless extended by FPUC.

18      **Q.     Are there other efforts underway to identify projects that will lead to lower cost**  
19      **energy for FPUC customers?**

20      A.     Yes. FPUC continues to work with consultants, as well as project developers, to  
21      identify new projects and opportunities that can lead to increased energy resiliency  
22      and reduced fuel costs for our customers. We also continue to analyze the feasibility

1 of energy production and supply opportunities that have been on our planning  
2 horizon for some time and noted in prior fuel clause proceedings, namely additional  
3 Combined Heat and Power (CHP) projects, potential Solar Photovoltaic (“PV”)  
4 projects and associated utility scale battery projects.

5 More specifically, Pierpont & McLelland has been engaged to perform analysis and  
6 provide consulting services for FPUC as it relates to the structuring of, and operation  
7 under, the Company’s power purchase agreements with the purpose of identifying  
8 measures that will minimize cost increases and/or provide opportunities for cost  
9 reductions. They have also been involved in the structuring of the most effective  
10 measures to ensure a reliable and resilient system on Amelia Island which may  
11 include additional transmission lines to the Island and using existing generation and  
12 the addition of natural gas fired generation. Locke Lord is a law firm with particular  
13 expertise in the regulatory requirements of the Federal Energy Regulatory  
14 Commission. Attorneys with the firm have provided legal guidance and oversight  
15 regarding the contracts and regulatory requirements for generation and transmission-  
16 related issues for the Northeast Florida Division. The Company’s in-house  
17 experience in these areas is limited; thus, without this outside assistance, the  
18 Company’s ability to pursue potential purchased power savings opportunities would  
19 be limited, as would its ability to properly evaluate proposals to meet our generation  
20 and transmission needs and ensure compliance with federal regulatory requirements.  
21 Sterling Energy and Christensen Associates have been involved to assist the  
22 Company in the most cost-effective means of incorporating additional energy

1 sources, such as power available from certain industrial customers, existing and new  
2 Combined Heat and Power (“CHP”) capability and improvements in the  
3 transmission system to Amelia Island to improve the reliability/resiliency on Amelia  
4 Island and further reduce the overall purchased power impact to all FPUC  
5 customers.

6 **Q. Can you provide additional information on these CHP projects?**

7 A. Yes. The success of the Eight Flags project has sparked interest in other CHP  
8 opportunities on Amelia Island. When coupled with industrial expansion in the area  
9 and the ability to do so within the context of the “Agreement” and “Amendment”  
10 with FPL, the already quantifiable benefits of the existing project has piqued the  
11 interest of others to contemplate partnering with a new CHP-based project on  
12 Amelia Island. Given that FPUC would again be the recipient of any power  
13 generated by such project, FPUC has been actively involved in the initial analysis,  
14 development and engineering of a possible new project located on Amelia Island.  
15 Significant efforts have continued to evaluate this CHP which, similar to Eight  
16 Flags, will be located on Amelia Island and would allow FPUC, along with  
17 transmission line upgrades, to provide additional reliability and resilience to its  
18 electricity supply for its customers on Amelia Island. This second CHP would  
19 provide competitively priced electricity for FPUC’s customers while providing high  
20 pressure steam and hot water to a local industrial customer which is a critical  
21 component of the local community. Preliminary engineering, financial modeling,  
22 operating agreements and Florida Department of Environmental Protection

1           permitting have been completed for this possible CHP unit. Although the final  
2           structure of the proposed CHP has not yet been finalized, when finalized FPUC  
3           anticipates purchased power agreements would be filed with the FPSC. Based upon  
4           approval of the purchased power agreements by the FPSC, construction would begin  
5           immediately on that project.

6           **Q. Can you provide additional information on the PV and battery projects you**  
7           **referenced above?**

8           A. Yes. FPUC is continuing analysis related to smaller PV systems within the FPUC  
9           electric service territory. Based on the results from the analysis, the economic  
10          feasibility of smaller PV installations has been difficult to achieve due to many  
11          different factors but work continues to investigate alternatives to improve the  
12          feasibility. At this time, FPUC is investigating opportunities involving larger PV  
13          installations which have proved to be more economically feasible. Not only will  
14          this increase the renewable energy available to FPUC, the cost is expected to  
15          complement the overall purchased power portfolio which will provide additional  
16          benefits to FPUC customers. The “Agreement” and the “Amendment” have  
17          provisions that allow for the development of PV installations by FPUC and provides  
18          for the possibility of a partnership between the parties that would allow for the  
19          development of a PV project.

20          Additionally, exploration into the inclusion of battery storage capacity in  
21          conjunction with the PV installation is being considered. These projects have been  
22          difficult to justify economically at this point but are still under consideration by

Docket No.20220001-EI

1 FPUC. Nonetheless, the potential benefits of the PV and battery projects under  
2 consideration will be continued.

3 **Q. Does this include your testimony?**

4 **A. Yes.**

1                   (Whereupon, prefiled direct testimony of M.  
2 Ashley Sizemore was inserted.)

**BEFORE THE  
FLORIDA PUBLIC SERVICE COMMISSION**

**DOCKET NO. 20220001-EI  
FUEL & PURCHASED POWER COST RECOVERY  
AND  
CAPACITY COST RECOVERY**

**2021 FINAL TRUE-UP  
TESTIMONY AND EXHIBITS**

**M. ASHLEY SIZEMORE**

**FILED: APRIL 1, 2022**

1                                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                                   **PREPARED DIRECT TESTIMONY**

3                                   **OF**

4                                   **M. ASHLEY SIZEMORE**

5  
6   **Q.**   Please state your name, address, occupation, and  
7           employer.

8  
9   **A.**   My name is M. Ashley Sizemore. My business address is 702  
10           N. Franklin Street, Tampa, Florida 33602. I am employed  
11           by Tampa Electric Company ("Tampa Electric" or "Company")  
12           in the position of Manager, Rates in the Regulatory  
13           Affairs department.

14  
15   **Q.**   Please provide a brief outline of your educational  
16           background and business experience.

17  
18   **A.**   I received a Bachelor of Arts degree in Political Science  
19           and a Master of Business Administration from the  
20           University of South Florida in 2005 and 2008,  
21           respectively. I joined Tampa Electric in 2010 as a  
22           Customer Service Professional. In 2011, I joined the  
23           Regulatory Affairs Department as a Rate Analyst. I spent  
24           six years in the Regulatory Affairs Department working on  
25           environmental and fuel and capacity cost recovery

1 clauses. During the last three years as a Program Manager  
2 in Customer Experience, I managed billing and payment  
3 customer solutions, products and services. I returned to  
4 the Regulatory Affairs Department in 2020 as Manager,  
5 Rates. My duties entail managing cost recovery for fuel  
6 and purchased power, interchange sales, capacity  
7 payments, and approved environmental projects. I have  
8 over ten years of electric utility experience in the areas  
9 of customer experience and project management as well as  
10 the management of fuel clause and purchased power,  
11 capacity, and environmental cost recovery clauses.

12  
13 **Q.** What is the purpose of your testimony?  
14

15 **A.** The purpose of my testimony is to present, for the  
16 Commission's review and approval, the final true-up  
17 amounts for the period January 2021 through December 2021  
18 for the Fuel and Purchased Power Cost Recovery Clause  
19 ("Fuel Clause") and the Capacity Cost Recovery Clause  
20 ("Capacity Clause"), as well as the Optimization  
21 Mechanism gain sharing allocation for the period.  
22

23 **Q.** What is the source of the data which you will present by  
24 way of testimony or exhibit in this process?  
25

1     **A.**    Unless otherwise indicated, the actual data is taken from  
2            the books and records of Tampa Electric. The books and  
3            records are kept in the regular course of business in  
4            accordance with generally accepted accounting principles  
5            and practices and provisions of the Uniform System of  
6            Accounts as prescribed by the Florida Public Service  
7            Commission ("Commission").

8

9     **Q.**    Have you prepared an exhibit in this proceeding?

10

11    **A.**    Yes. Exhibit No. MAS-1, consisting of five documents which  
12            are described later in my testimony, was prepared under  
13            my direction and supervision.

14

15    **Capacity Cost Recovery Clause**

16    **Q.**    What is the final true-up amount for the Capacity Clause  
17            for the period January 2021 through December 2021?

18

19    **A.**    The final true-up amount for the Capacity Clause for the  
20            period January 2021 through December 2021 is a recovery  
21            of \$0.

22

23    **Q.**    Please describe Document No. 1 of your exhibit.

24

25    **A.**    Document No. 1, page 1 of 4, entitled "Tampa Electric

1 Company Capacity Cost Recovery Clause Calculation of  
2 Final True-up Variances for the Period January 2021  
3 Through December 2021", provides the calculation for the  
4 final true-up of \$0. The actual capacity cost under-  
5 recovery, including interest, was \$39,496 for the period  
6 January 2021 through December 2021 as identified in  
7 Document No. 1, pages 1 and 2 of 4. This amount, less the  
8 \$25,180 actual/estimated under-recovery approved in Order  
9 No. PSC-2021-0442-FOF-EI issued on November 30, 2021,  
10 results in a final under-recovery of \$14,316. Tampa  
11 Electric included the actual under-recovery of \$39,496,  
12 to be recovered during the period of April 2022 through  
13 December 2022 in the company's Mid-Course Projection  
14 filed on January 19, 2022 and approved in Order No. PSC-  
15 2022-0122-PCO-EI issued March 18, 2022 in Docket No.  
16 20220001-EI. This results in a final net recovery of \$0  
17 for the period, as identified in Document No. 1, page 4  
18 of 4.

19  
20 **Fuel and Purchased Power Cost Recovery Clause**

21 **Q.** What is the final true-up amount for the Fuel Clause for  
22 the period January 2021 through December 2021?

23  
24 **A.** The final Fuel Clause true-up for the period January 2021  
25 through December 2021 is a recovery of \$0. The actual fuel

1 cost under-recovery, including interest, was \$72,171,466  
2 for the period January 2021 through December 2021. This  
3 \$72,171,466 amount, less the \$72,171,466 under-recovery  
4 included in the company's Mid-Course Projection approved  
5 in Order No. PSC-2022-0122-PCO-EI issued March 18, 2022  
6 in Docket No. 20220001-EI, results in a net recovery  
7 amount for the period of \$0.

8  
9 **Q.** Please describe Document No. 2 of your exhibit.

10  
11 **A.** Document No. 2 is entitled "Tampa Electric Company Final  
12 Fuel and Purchased Power Over/(Under) Recovery for the  
13 Period January 2021 Through December 2021." It shows the  
14 calculation of the final fuel net recovery of \$0.

15  
16 Line 1 shows the total company fuel costs of \$754,096,615  
17 for the period January 2021 through December 2021. The  
18 jurisdictional amount of total fuel costs is  
19 \$754,096,615, as shown on line 2. This amount is compared  
20 to the jurisdictional fuel revenues applicable to the  
21 period on line 3 to obtain the actual under-recovered fuel  
22 costs for the period, shown on line 4. The resulting  
23 \$116,436,212 under-recovered fuel costs for the period,  
24 adjustments, interest, true-up collected, and the prior  
25 period true-up shown on lines 5 through 8 respectively,

1 constitute the actual under-recovery amount of  
2 \$72,171,466 shown on line 9. The \$72,171,466 actual under-  
3 recovery amount less the \$72,171,466 under-recovery  
4 included in the company's Mid-Course Projection recovery  
5 amount to be recovered through the period April 2022  
6 through December 2022 and as filed on January 19, 2022,  
7 shown on line 10, results in a final net recovery amount  
8 of \$0 for the period January 2021 through December 2021,  
9 as shown on line 11.

10  
11 **Q.** Please describe Document No. 3 of your exhibit.

12  
13 **A.** Document No. 3 is entitled "Tampa Electric Company  
14 Calculation of True-up Amount Actual vs. Mid-course  
15 Estimates for the Period January 2021 Through December  
16 2021." It shows the calculation of the actual under-  
17 recovery compared to the estimate for the same period.

18  
19 **Q.** What was the total fuel and net power transaction cost  
20 variance for the period January 2021 through December  
21 2021?

22  
23 **A.** As shown on line A6 of Document No. 3, the fuel and net  
24 power transaction cost is \$76,942,490 more than the amount  
25 originally estimated.

1 Q. What was the variance in jurisdictional fuel revenues for  
2 the period January 2021 through December 2021?

3

4 A. As shown on line C3 of Document No. 3, the company  
5 collected \$5,068,888, or 0.8 percent greater  
6 jurisdictional fuel revenues than originally estimated.

7

8 Q. Please describe Document No. 4 of your exhibit.

9

10 A. Document No. 4 contains Commission Schedules A1 and A2  
11 for the month of December and the year-end period-to-date  
12 summary of transactions for each of Commission Schedules  
13 A6, A7, A8, A9, as well as capacity information on  
14 Schedule A12.

15

16 **Optimization Mechanism**

17 Q. Was Tampa Electric's sharing of Optimization Mechanism  
18 gains allocated in accordance with FPSC Order No.  
19 PSC-2017-0456-S-EI, issued in Docket Nos. 20170210-EI and  
20 20160160-EI, on November 27, 2017?

21

22 A. Yes. As shown in the testimony and exhibit of Tampa  
23 Electric witness John C. Heisey filed contemporaneously  
24 in this docket, the sharing of Optimization Mechanism  
25 gains was allocated in accordance with FPSC Order No.

1 PSC-2017-0456-S-EI. Total gains were \$13,439,732. Under  
2 the sharing mechanism, Tampa Electric customers receive  
3 \$8,619,866, and the company earned an incentive of  
4 \$4,819,866 as a result of the company's Optimization  
5 Mechanism activities during 2021. Customers received the  
6 gains from these transactions during 2021, and Tampa  
7 Electric requests Commission approval to collect the  
8 company's \$4,819,866 incentive in its 2023 fuel factors.

9  
10 **Q.** Does this conclude your testimony?

11  
12 **A.** Yes, it does.

**BEFORE THE  
FLORIDA PUBLIC SERVICE COMMISSION**

**DOCKET NO. 20220001-EI  
FUEL & PURCHASED POWER COST RECOVERY  
AND  
CAPACITY COST RECOVERY**

**ACTUAL/ESTIMATED TRUE-UP  
JANUARY 2022 THROUGH DECEMBER 2022**

**TESTIMONY AND EXHIBIT  
OF  
M. ASHLEY SIZEMORE**

**FILED: JULY 27, 2022**

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                                   **PREPARED DIRECT TESTIMONY**

3   **OF**

4   **M. ASHLEY SIZEMORE**

5   **Q.**   Please state your name, address, occupation, and  
6           employer.

7  
8   **A.**   My name is M. Ashley Sizemore. My business address is 702  
9           N. Franklin Street, Tampa, Florida 33602. I am employed  
10          by Tampa Electric Company ("Tampa Electric" or "company")  
11          in the position of Manager, Rates, in the Regulatory  
12          Affairs department.

13  
14   **Q.**   Please provide a brief outline of your educational  
15          background and business experience.

16  
17   **A.**   I received a Bachelor of Arts degree in Political Science  
18          and a Master of Business Administration degree from the  
19          University of South Florida in 2005 and 2008,  
20          respectively. I joined Tampa Electric in 2010 as a  
21          Customer Service Professional. In 2011, I joined the  
22          Regulatory Affairs Department as a Rate Analyst. I spent  
23          six years in the Regulatory Affairs Department working on  
24          environmental, fuel and capacity cost recovery clauses.  
25          During the last three years as a Program Manager in

1 Customer Experience, I managed billing and payment  
2 customer solutions, products and services. I returned to  
3 the Regulatory Affairs Department in 2020 as Manager,  
4 Rates. My duties entail managing cost recovery for fuel  
5 and purchased power, interchange sales, capacity  
6 payments, and approved environmental projects. I have  
7 over ten years of electric utility experience in the areas  
8 of customer experience and project management as well as  
9 the management of fuel and purchased power, capacity, and  
10 environmental cost recovery clauses.

11  
12 **Q.** What is the purpose of your direct testimony?

13  
14 **A.** The purpose of my testimony is to present, for Commission  
15 review and approval, the calculation of the January 2022  
16 through December 2022 fuel and purchased power and  
17 capacity actual/estimated true-up amounts to be recovered  
18 in the January 2023 through December 2023 projection  
19 period. My testimony addresses the recovery of the fuel  
20 and purchased power costs as well as capacity costs for  
21 the year 2022, based on six months of actual data and six  
22 months of estimated data. This information will be used  
23 in the determination of the 2023 fuel and purchased power  
24 and capacity cost recovery factors.

25

1 Q. Have you prepared an exhibit to support your direct  
2 testimony?

3

4 A. Yes, I have prepared Exhibit No. MAS-2, which consists of  
5 two documents. Document No. 1 includes schedules E1-A,  
6 E1-B, E-2, E-3, E-4, E-5, E-6, E-7, E-8, and E-9, which  
7 provide the actual/estimated fuel and purchased power  
8 cost recovery true-up amount for the period January 2022  
9 through December 2022. Document No. 2 provides the  
10 actual/estimated capacity cost recovery true-up amount  
11 for the period January 2022 through December 2022.

12

13 **Fuel and Purchased Power Cost Recovery Factors**

14 Q. What has Tampa Electric calculated as the estimated net  
15 true-up amount for the current period to be applied in  
16 the January 2023 through December 2023 fuel and purchased  
17 power cost recovery factors?

18

19 A. The estimated net true-up amount applicable for the period  
20 of January 2022 through December 2022 is an under-recovery  
21 of \$411,964,625.

22

23 Q. How did Tampa Electric calculate the estimated net true-  
24 up to be applied in the January 2023 through December  
25 2023 fuel and purchased power cost recovery factors?

1     **A.**    The net true-up amount to be recovered in 2023 does not  
2           include the final true-up amount for the period January  
3           2021 through December 2021 as this amount was returned to  
4           customers during 2022 in Tampa Electric's fuel mid-course  
5           factors effective April 2022 through December 2022, as  
6           approved in Order No. PSC-2022-0122-PCO-EI, issued March  
7           18, 2022, in Docket No. 20220001-EI. The actual/estimated  
8           true-up amount for the period January 2022 through  
9           December 2022 is included in the January 2023 through  
10          December 2023 fuel and purchased power cost recovery  
11          factors. This calculation is shown on Schedule E1-A of  
12          Exhibit No. MAS-2, Document No. 1.

13  
14     **Q.**    What did Tampa Electric calculate as the actual/estimated  
15          fuel and purchased power cost recovery amount for the  
16          period January 2022 through December 2022?

17  
18     **A.**    The actual/estimated 2022 fuel true-up amount is an under-  
19          recovery amount of \$437,178,107 for the January 2022  
20          through December 2022 period. The detailed calculations  
21          supporting the actual/estimated current period true-up is  
22          shown in Exhibit No. MAS-2, Schedule E1-B on Documents  
23          No. 1.

24  
25     **Q.**    What are the primary drivers of the expected 2022 fuel

1 under-recovery amount?

2

3 **A.** The primary reason for the expected 2022 under-recovery  
4 is a substantial increase in the price of natural gas,  
5 compared to the company's original 2022 mid-course  
6 projection.

7

8 **Capacity Cost Recovery Clause**

9 **Q.** What has Tampa Electric calculated as the estimated net  
10 true-up amount to be applied in the January 2023 through  
11 December 2023 capacity cost recovery factors?

12

13 **A.** The estimated net true-up amount applicable for January  
14 2022 through December 2022 is an over-recovery of  
15 \$3,967,826 as shown in Exhibit No. MAS-2, Document No. 2,  
16 page 1 of 4.

17

18 **Q.** How did Tampa Electric calculate the estimated net true-  
19 up amount to be applied in the January 2023 through  
20 December 2023 capacity cost recovery factors?

21

22 **A.** The net true-up amount to be recovered in the 2023  
23 capacity cost recovery factors includes the  
24 actual/estimated true-up amount for January 2022 and  
25 December 2022. The final 2021 true-up amount was included

1 in the company's mid-course capacity cost recovery  
2 factors effective April 2022 through December 2022, as  
3 approved in Order No. PSC-2022-0122-PCO-EI, issued March  
4 18, 2022, in Docket No. 20220001-EI.

5  
6 **Q.** What did Tampa Electric calculate as the actual/estimated  
7 capacity cost recovery true-up amount for the period  
8 January 2022 through December 2022?

9  
10 **A.** The actual/estimated true-up amount is an over-recovery  
11 of \$2,397,141 as shown on Exhibit No. MAS-2, Document  
12 No. 2, page 1 of 4.

13  
14 **Q.** What did Tampa Electric calculate as the net capacity  
15 cost recovery true-up amount for the period January 2022  
16 through December 2022?

17  
18 **A.** The net capacity cost recovery true-up amount for the  
19 period January 2022 through December 2022 is an over-  
20 recovery of \$3,967,826. This calculation is shown on  
21 Exhibit No. MAS-2, Document No. 2, page 1 of 4.

22  
23 **Q.** Does this conclude your direct testimony?

24  
25 **A.** Yes, it does.

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                                   **PREPARED DIRECT TESTIMONY**

3   **OF**

4   **M. ASHLEY SIZEMORE**

5   **Q.**   Please state your name, address, occupation, and  
6           employer.

7  
8   **A.**   My name is M. Ashley Sizemore. My business address is 702  
9           N. Franklin Street, Tampa, Florida 33602. I am employed  
10          by Tampa Electric Company ("Tampa Electric" or "company")  
11          in the position of Manager, Rates, in the Regulatory  
12          Affairs department.

13  
14   **Q.**   Please provide a brief outline of your educational  
15          background and business experience.

16  
17   **A.**   I received a Bachelor of Arts degree in Political Science  
18          and a Master of Business Administration degree from the  
19          University of South Florida in 2005 and 2008,  
20          respectively. I joined Tampa Electric in 2010 as a  
21          Customer Service Professional. In 2011, I joined the  
22          Regulatory Affairs Department as a Rate Analyst. I spent  
23          six years in the Regulatory Affairs Department working on  
24          environmental, fuel and capacity cost recovery clauses.  
25          During the last three years as a Program Manager in

1 Customer Experience, I managed billing and payment  
2 customer solutions, products and services. I returned to  
3 the Regulatory Affairs Department in 2020 as Manager,  
4 Rates. My duties entail managing cost recovery for fuel  
5 and purchased power, interchange sales, capacity  
6 payments, and approved environmental projects. I have  
7 over ten years of electric utility experience in the areas  
8 of customer experience and project management as well as  
9 the management of fuel and purchased power, capacity, and  
10 environmental cost recovery clauses.

11  
12 **Q.** What is the purpose of your direct testimony?

13  
14 **A.** The purpose of my testimony is to present, for Commission  
15 review and approval, the calculation of the January 2022  
16 through December 2022 fuel and purchased power and  
17 capacity actual/estimated true-up amounts to be recovered  
18 in the January 2023 through December 2023 projection  
19 period. My testimony addresses the recovery of the fuel  
20 and purchased power costs as well as capacity costs for  
21 the year 2022, based on six months of actual data and six  
22 months of estimated data. This information will be used  
23 in the determination of the 2023 fuel and purchased power  
24 and capacity cost recovery factors.

25

1 Q. Have you prepared an exhibit to support your direct  
2 testimony?

3

4 A. Yes, I have prepared Exhibit No. MAS-2, which consists of  
5 two documents. Document No. 1 includes schedules E1-A,  
6 E1-B, E-2, E-3, E-4, E-5, E-6, E-7, E-8, and E-9, which  
7 provide the actual/estimated fuel and purchased power  
8 cost recovery true-up amount for the period January 2022  
9 through December 2022. Document No. 2 provides the  
10 actual/estimated capacity cost recovery true-up amount  
11 for the period January 2022 through December 2022.

12

13 **Fuel and Purchased Power Cost Recovery Factors**

14 Q. What has Tampa Electric calculated as the estimated net  
15 true-up amount for the current period to be applied in  
16 the January 2023 through December 2023 fuel and purchased  
17 power cost recovery factors?

18

19 A. The estimated net true-up amount applicable for the period  
20 of January 2022 through December 2022 is an under-recovery  
21 of \$411,964,625.

22

23 Q. How did Tampa Electric calculate the estimated net true-  
24 up to be applied in the January 2023 through December  
25 2023 fuel and purchased power cost recovery factors?

1     **A.**    The net true-up amount to be recovered in 2023 does not  
2            include the final true-up amount for the period January  
3            2021 through December 2021 as this amount was returned to  
4            customers during 2022 in Tampa Electric's fuel mid-course  
5            factors effective April 2022 through December 2022, as  
6            approved in Order No. PSC-2022-0122-PCO-EI, issued March  
7            18, 2022, in Docket No. 20220001-EI. The actual/estimated  
8            true-up amount for the period January 2022 through  
9            December 2022 is included in the January 2023 through  
10           December 2023 fuel and purchased power cost recovery  
11           factors. This calculation is shown on Schedule E1-A of  
12           Exhibit No. MAS-2, Document No. 1.

13  
14     **Q.**    What did Tampa Electric calculate as the actual/estimated  
15            fuel and purchased power cost recovery amount for the  
16            period January 2022 through December 2022?

17  
18     **A.**    The actual/estimated 2022 fuel true-up amount is an under-  
19            recovery amount of \$437,178,107 for the January 2022  
20            through December 2022 period. The detailed calculations  
21            supporting the actual/estimated current period true-up is  
22            shown in Exhibit No. MAS-2, Schedule E1-B on Documents  
23            No. 1.

24  
25     **Q.**    What are the primary drivers of the expected 2022 fuel

1 under-recovery amount?

2

3 **A.** The primary reason for the expected 2022 under-recovery  
4 is a substantial increase in the price of natural gas,  
5 compared to the company's original 2022 mid-course  
6 projection.

7

8 **Capacity Cost Recovery Clause**

9 **Q.** What has Tampa Electric calculated as the estimated net  
10 true-up amount to be applied in the January 2023 through  
11 December 2023 capacity cost recovery factors?

12

13 **A.** The estimated net true-up amount applicable for January  
14 2022 through December 2022 is an over-recovery of  
15 \$3,967,826 as shown in Exhibit No. MAS-2, Document No. 2,  
16 page 1 of 4.

17

18 **Q.** How did Tampa Electric calculate the estimated net true-  
19 up amount to be applied in the January 2023 through  
20 December 2023 capacity cost recovery factors?

21

22 **A.** The net true-up amount to be recovered in the 2023  
23 capacity cost recovery factors includes the  
24 actual/estimated true-up amount for January 2022 and  
25 December 2022. The final 2021 true-up amount was included

1 in the company's mid-course capacity cost recovery  
2 factors effective April 2022 through December 2022, as  
3 approved in Order No. PSC-2022-0122-PCO-EI, issued March  
4 18, 2022, in Docket No. 20220001-EI.

5  
6 **Q.** What did Tampa Electric calculate as the actual/estimated  
7 capacity cost recovery true-up amount for the period  
8 January 2022 through December 2022?

9  
10 **A.** The actual/estimated true-up amount is an over-recovery  
11 of \$2,397,141 as shown on Exhibit No. MAS-2, Document  
12 No. 2, page 1 of 4.

13  
14 **Q.** What did Tampa Electric calculate as the net capacity  
15 cost recovery true-up amount for the period January 2022  
16 through December 2022?

17  
18 **A.** The net capacity cost recovery true-up amount for the  
19 period January 2022 through December 2022 is an over-  
20 recovery of \$3,967,826. This calculation is shown on  
21 Exhibit No. MAS-2, Document No. 2, page 1 of 4.

22  
23 **Q.** Does this conclude your direct testimony?

24  
25 **A.** Yes, it does.

BEFORE THE  
FLORIDA PUBLIC SERVICE COMMISSION

DOCKET NO. 20220001-EI  
FUEL & PURCHASED POWER COST RECOVERY  
AND  
CAPACITY COST RECOVERY

PROJECTIONS  
JANUARY 2023 THROUGH DECEMBER 2023

TESTIMONY AND EXHIBIT  
OF  
M. ASHLEY SIZEMORE

FILED: SEPTEMBER 2, 2022

TAMPA ELECTRIC COMPANY  
DOCKET NO. 20220001-EI  
FILED: 09/02/2022

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                                   **PREPARED DIRECT TESTIMONY**

3   **OF**

4   **M. ASHLEY SIZEMORE**

5  
6   **Q.**   Please state your name, address, occupation, and  
7           employer.

8  
9   **A.**   My name is M. Ashley Sizemore. My business address is 702  
10           N. Franklin Street, Tampa, Florida 33602. I am employed  
11           by Tampa Electric Company ("Tampa Electric" or "company")  
12           in the position of Manager, Rates in the Regulatory  
13           Affairs department.

14  
15   **Q.**   Have you previously filed testimony in Docket  
16           No. 20220001-EI?

17  
18   **A.**   Yes, I submitted direct testimony on April 1, 2022 and  
19           July 27, 2022.

20  
21   **Q.**   Has your job description, education, or professional  
22           experience changed since you last filed testimony in this  
23           docket?

24  
25   **A.**   No, they have not.

1 Q. What is the purpose of your testimony?

2

3 A. The purpose of my testimony is to present, for Commission  
4 review and approval, the proposed annual capacity cost  
5 recovery factors, and the proposed annual levelized fuel  
6 and purchased power cost recovery factors for January 2023  
7 through December 2023. I also describe significant events  
8 that affect the factors and provide an overview of the  
9 composite effect on the residential bill of changes in  
10 the various cost recovery factors for 2023.

11

12 Q. Have you prepared an exhibit to support your direct  
13 testimony?

14

15 A. Yes. Exhibit No. MAS-3, consisting of three documents,  
16 was prepared under my direction and supervision. Document  
17 No. 1, consisting of four pages, is furnished as support  
18 for the projected capacity cost recovery factors.  
19 Document No. 2, which is furnished as support for the  
20 proposed levelized fuel and purchased power cost recovery  
21 factors, includes Schedules E1 through E10 for January  
22 2023 through December 2023 as well as Schedule H1 for  
23 2020 through 2023. Document No. 3 provides a comparison  
24 of retail residential fuel revenues under the inverted or  
25 tiered fuel rate, which demonstrates that the tiered rate

1 is revenue neutral.

2

3 **Q.** Are you requesting Commission approval of the projected  
4 fuel and capacity cost recovery factors for the company's  
5 various rate schedules?

6

7 **A.** Yes.

8

9 **Q.** How were the fuel and capacity cost recovery clause  
10 factors calculated?

11

12 **A.** The fuel and capacity cost recovery factors were  
13 calculated as shown on Document Nos. 1 and 2. These  
14 factors were calculated based on the current approved rate  
15 design and schedules as set out in the 2021 Stipulation  
16 and Settlement Agreement approved by the Commission in  
17 Order No. PSC-2021-0423-S-EI on November 10, 2021 in  
18 Docket No. 20210034-EI.

19

20 **Capacity Cost Recovery**

21 **Q.** Are you requesting Commission approval of the projected  
22 capacity cost recovery factors for the company's various  
23 rate schedules?

24

25 **A.** Yes. The capacity cost recovery factors, prepared under

1 my direction and supervision, are provided in Exhibit No.  
 2 MAS-3, Document No. 1, page 3 of 4.

3  
 4 **Q.** What payments are included in Tampa Electric's capacity  
 5 cost recovery factors?

6  
 7 **A.** Tampa Electric is requesting recovery of capacity  
 8 payments for power purchased for retail customers,  
 9 excluding optional provision purchases for interruptible  
 10 customers, through the capacity cost recovery factors. As  
 11 shown in Exhibit No. MAS-3, Document No. 1, page 2 of 4,  
 12 Tampa Electric is refunding \$3,123,211 after  
 13 jurisdictional separation, prior year true-up, and  
 14 application of the revenue tax factor for estimated  
 15 expenses in 2023.

16  
 17 **Q.** Please summarize the proposed capacity cost recovery  
 18 factors by metering voltage level effective beginning in  
 19 January 2023 for which Tampa Electric is seeking approval.

20  
 21 **A.**

Rate Class and	Capacity Cost	Recovery Factor
<u>Metering Voltage</u>	<u>Cents per kWh</u>	<u>\$ per kW</u>
RS Secondary	-0.018	
GS and CS Secondary	-0.017	
GSD, SBD Standard		

1	Secondary	-0.06
2	Primary	-0.06
3	Transmission	-0.06
4	GSD Optional	
5	Secondary	-0.014
6	Primary	-0.014
7	Transmission	-0.014
8	GSLDPR/GSLDTPR/SBLDPR/SBLDTSU	-0.05
9	GSLDSU/GSLDTSU/SBLDSU/SBLDTSU	-0.04
10	LS1 Secondary	-0.003

11

12 These factors are shown in Exhibit No. MAS-3, Document  
13 No. 1, page 3 of 4.

14

15 **Q.** How does Tampa Electric's proposed average capacity cost  
16 recovery factor of (0.016) cents per kWh compare to the  
17 factor for April 2022 through December 2022?

18

19 **A.** The proposed capacity cost recovery factor of (0.016)  
20 cents per kWh beginning in January 2023 is 0.061 cents  
21 per kWh (or \$.61 per 1,000 kWh) less than the average  
22 capacity cost recovery factor of 0.045 cents per kWh for  
23 the April 2022 through December 2022 period.

24

25 **Fuel and Purchased Power Cost Recovery Factor**

1     **Q.**    What is the appropriate amount of the levelized fuel and  
2            purchased power cost recovery factor for the period  
3            beginning in January 2023?  
4

5     **A.**    The appropriate amount for the period beginning in January  
6            2023 is 4.832 cents per kWh before the application of the  
7            time of use multipliers for on-peak or off-peak usage.  
8            Schedule E1-E of Exhibit No. MAS-3, Document No. 2, shows  
9            the appropriate value for the total fuel and purchased  
10           power cost recovery factor for each metering voltage level  
11           as projected for the period January 2023 through December  
12           2023.  
13

14    **Q.**    Please describe the information provided on Schedule  
15            E1-C.  
16

17    **A.**    The Generating Performance Incentive Factor ("GPIF"),  
18            true-up factors, and Optimization Mechanism factor are  
19            provided on Schedule E1-C. Tampa Electric has calculated  
20            a GPIF reward of \$546,170 and an Optimization Mechanism  
21            gain of \$4,819,866, which is included in the calculation  
22            of the total fuel and purchased power cost recovery  
23            factors. In addition, Schedule E1-C indicates the net  
24            true-up for 2022 to be \$0.  
25

1     **Q.**    Do your 2023 factors include the projected under-recovery  
2           for 2022?

3

4     **A.**    No. Natural gas prices remain highly volatile, and the  
5           2022 under-recovery could change materially over the  
6           remainder of the calendar year. Consequently, the company  
7           did not include the currently projected under-recovery  
8           for 2022 in the factors for 2023.

9

10    **Q.**    Please describe the information provided on Schedule  
11           E1-D.

12

13    **A.**    Schedule E1-D presents Tampa Electric's on-peak and off-  
14           peak fuel adjustment factors for January 2023 through  
15           December 2023. The schedule also presents Tampa  
16           Electric's levelized fuel cost factors at each metering  
17           level.

18

19    **Q.**    Please describe the information presented on Schedule  
20           E1-E.

21

22    **A.**    Schedule E1-E presents the standard, tiered, on-peak, and  
23           off-peak fuel adjustment factors at each metering voltage  
24           to be applied to customer bills.

25

1 **Q.** Please describe the information provided in Document  
2 No. 3.

3

4 **A.** Exhibit No. MAS-3, Document No. 3 demonstrates that the  
5 tiered rate structure is designed to be revenue neutral  
6 so that the company will recover the same fuel costs as  
7 it would under the levelized fuel approach.

8

9 **Q.** Please summarize the proposed fuel and purchased power  
10 cost recovery factors by metering voltage level for the  
11 period beginning in January 2023.

12

13 <b>A.</b>	<b>Metering Voltage Level</b>	<b>Fuel Charge Factor</b>
		<b>(Cents per kWh)</b>
15	Secondary	4.832
16	Tier I (Up to 1,000 kWh)	4.525
17	Tier II (Over 1,000 kWh)	5.525
18	Distribution Primary	4.784
19	Transmission	4.735
20	Lighting Service	4.767
21	Distribution Secondary	5.179(on-peak)
22		4.683(off-peak)
23	Distribution Primary	5.127(on-peak)
24		4.636(off-peak)
25	Transmission	5.075(on-peak)

1 4.589(off-peak)

2

3 **Q.** How does Tampa Electric's proposed levelized fuel  
4 adjustment factor of 4.832 cents per kWh compare to the  
5 levelized fuel adjustment factor for the April 2022  
6 through December 2022 period?

7

8 **A.** The proposed fuel charge factor of 4.832 cents per kWh is  
9 0.706 cents per kWh (or \$7.06 per 1,000 kWh) higher than  
10 the average fuel charge factor of 4.126 cents per kWh for  
11 the April 2022 through December 2022 period.

12

13 **Wholesale Incentive Benchmark and Optimization Mechanism**

14 **Q.** Will Tampa Electric project a 2023 wholesale incentive  
15 benchmark that is derived in accordance with Order No.  
16 PSC-2001-2371-FOF-EI issued in Docket No. 20010283-EI?

17

18 **A.** No. Effective January 1, 2018, as authorized by FPSC Order  
19 No. PSC-2017-0456-S-EI, issued in Docket No. 20160160-EI  
20 on November 27, 2017, the company's Optimization  
21 Mechanism replaced the short-term wholesale sales  
22 incentive mechanism, and as a result no wholesale  
23 incentive benchmark is required for the 2023 projection.

24

25 **Cost Recovery Factors**

1 Q. What is the composite effect of Tampa Electric's proposed  
2 changes in its base, capacity, fuel and purchased power,  
3 environmental, and energy conservation cost recovery  
4 factors on a 1,000 kWh residential customer's bill?

5  
6 A. The composite effect on a residential bill for 1,000 kWh  
7 is an increase of \$14.20 in the period beginning January  
8 2023, when compared to the April 2022 through December  
9 2022 charges. These amounts are shown in Exhibit No. MAS-  
10 3, Document No. 2, on Schedule E10.

11

12 Q. When should the new rates take effect?

13

14 A. The new rates should take effect concurrent with meter  
15 readings for the first billing cycle for January 2023.

16

17 Q. Does this conclude your direct testimony?

18

19 A. Yes.

## CERTIFICATE OF REPORTER

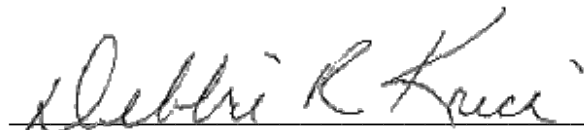

STATE OF FLORIDA     )  
COUNTY OF LEON     )

I, DEBRA KRICK, Court Reporter, do hereby certify that the foregoing proceeding was heard at the time and place herein stated.

IT IS FURTHER CERTIFIED that I stenographically reported the said proceedings; that the same has been transcribed under my direct supervision; and that this transcript constitutes a true transcription of my notes of said proceedings.

I FURTHER CERTIFY that I am not a relative, employee, attorney or counsel of any of the parties, nor am I a relative or employee of any of the parties' attorney or counsel connected with the action, nor am I financially interested in the action.

DATED this 28th day of November, 2022.

DEBRA R. KRICK  
NOTARY PUBLIC  
COMMISSION #HH31926  
EXPIRES AUGUST 13, 2024
