Subject: Docket No. 20220001-EI: Reject the new electric rate hikes!

Florida Public Service Commission Clerk,

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke, FPUC, and Tampa Electric intend to increase rates for customers like me. I am urging you to reject these proposals and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases at this time.

How many rate increases are you going to approve? When is enough enough? When will you stand up for your own mission of setting fair rates?

We the people struggle enough to try and keep a roof over their heads and keep the power on but if people like this keep raising the rates then we will be sitting in the dark. A lot of people are on ssi or ssd and only get a little money. I wouldn't even make enough to cover the rent we pay and a high power bill on top of that. Its crazy that the government is trying to make the poor be homeless while they pocket thousands. It makes me sick that they are that greedy to take from us low income people to fill their pockets. What a shame to our government and all that's involved. God doesn't like ugly and the elites will pay one day and I hope I'm here to see it.
