Response requested? no
Comments:

Duke energy is filing a request to raise customers bills. I strongly disagree with this and implore PSC to deny this request and tell them they they need to make up the cost in other ways. 20% residential increase will hurt a lot of people during a rime of high inflation. Th energy company needs to do a better job like private sector companies of financially planning for these things and not raise costs when it will hurt people the most, which is what a lot of private companies do. They find alternate ways without a 20% raise in cost. Duke energy time and time again after storms put back up wooden poles instead of storm hardening with concrete and steel so they can get power back on quickly. They are constantly cutting costs and now want to raise rates again. Please deny this request from duke, people simply cannot afford it.
