Subject: Price Hikes with Duke Energy

I would like to file a complaint against Duke Energy. For the November 17th to December 17th billing cycle, they have doubled the fuel cost per kilowatt hours, thereby doubling their customer's bills.

The price of fuel has levelled and is nowhere near the almost \$4.00 per gallon we were paying over the summer. Yet, here we are. This is completely illogical.

Everyone who lives in Florida typically breathes a sigh of relief in the winter months when the AC is not running constantly. We are not in peak season and I am unable to afford my power bill. What is going to happen in our peak months of July and August?? Please look into this issue.

Sincerely,

Rosemarie Lewis
