Dear Governor DeSantis,

I am writing to you out of concern for the rising cost of living in Florida due to Biden's policies creating unmitigated inflation as well as the political climate overall. As you may know, many families in Florida, including my own, are now struggling to make ends meet with the prices of everything increasing lately yet our salaries are not keeping up with the increased cost of living here in Florida. And now, the two major electrical utility companies in Florida are looking to burden their customers with up to 20% rate hikes for electricity and using hurricane Ian as an excuse for doing so. We cannot afford this rate hike as we're already struggling to make ends meet and figuring out which bills to pay first. This is reminiscent of the time I lived in NY prior to moving to FL and Con Edison was practically given the green light to do as they pleased with energy rates and we had little to no say from us customers in terms of how it would impact us financially. I ask that your office work with FPL & Duke Energy and not allow them to impose such a shocking high rate increase on their customers given such harsh economic times.

Thank you.
