Subject: Florida Power and Light Activities in NW Florida

Dear Anyone,

As a resident of Florida, I am asking that the commission peruse incentives or penalties against Florida Power and Light for continued underwhelming support for North West Florida residents.

Given we had no choice in the matter of FPL taking control of our power and increased cost of electricity, I am petitioning the commission to either incentivize them to increase the services provided by FPL to NW Florida residents. This includes grants or rebates to improve efficiency, offer the same services as other residents outside of NW Florida such as the EV charging packages.

It is apparent, when comparing Duke Energy with FPL, residents without a choice are at a complete disadvantage.

The commission should hold these companies accountable, if the State wishes to continue with a franchise scheme of control.

Thanks for listening,

Mike Yoder
