Subject: No storm rate increases!

How do everyday residents and consumers get heard before the PSC? FPL is asking for a significant rate increase in April, citing storm recovery costs. They and their investors should be solely responsible for these costs - not the consumer! We live in Florida, and FPL's "investors" have invested in a state prone to hurricanes annually. Their rates - and their profit margins - should reflect that risk, and not become the problem of the customer when times get tough. Maybe they should insure themselves against storm costs. Please share this with every appointed member of the PSC - **vote down their request and tell them to manage their finances better.**
