Subject: FPL Bid to Increase Rates

To Whom it May Concern,

An email was sent out to FPL customers indicating that FPL has submitted a bid to your commission to increase the rates of their customers by a minimum of 10%.

As a concerned customer / permanent Florida resident, I'm writing your commission to vehemently request that this bid be denied. Brevard County is already paying 17% more than the national average in energy costs, and saw a significant increase over the past two years. An additional increase is pricing homeowners of their 4 walls of necessities. Continually approving these increases as a way for a corporation to "get healthy" from operating decisions made, is setting a dangerous precedent of continually increases annually. With hyper inflation, very quickly the residents of this state will be choosing between buying groceries for their families or keeping the lights on.

I request, as a resident of this state that your commission reject this request to raise energy prices.

Thank you for your time,
Jessica Gordon
