Subject: FPL Price Rate Increase Filing

I received a notice from FPL that they have filed for a rate increase due to the rising prices of Natural Gas.

In June 2022, Nat Gas Futures were at \$8.30 and today they hit a low of \$2.43. What are they talking about?

Nat Gas prices have been tumbling. A Utility like FPL should be able to hedge their prices in the futures markets to maintain stability.

Asking for a Rate Increase when Nat Gas prices have been in a free fall off the three year highs is ridiculous.

Sincerely,

J R Fishman
