**COMPLAINT INFORMATION**

Complaint: Other Complaints against Florida Power & Light Company  
Details:

Continuous price increases to rates that are already too high. Florida power and light recently replaced gulf power for electricity in my area. My power bill immediately jumped from around \$200 a month to \$260 a month. I recently just a got a letter in the mail about how they are going to increase the rates AGAIN this time another 8%. I also get letters in the mail all the time about how my meter box needs to be replaced and how much they want to charge me for it. Not to mention there's a huge push for solar power, yet if you get the panels installed on your roof, your insurance company can and many cases will drop you over it. For damage to the roof. Please stop allowing this company to raise the rates. The damage done to power infrastructure in parts of the state done by hurricanes shouldn't be the burden of the other customers. If my home has damage done to it, I don't go to my neighbors telling them to fix it just because they live next to me, I go to my insurance company. Please stop these rate hikes!

**Subject:** Rising energy cost.

I am letting you know from the start, that I am totally against raising my electric bill. Food is high enough right now people can barely afford healthy nutritious food. Gas has gone up; products have almost doubled. How are we to survive with a 20% raise on our power bill?? Please make note that I am totally against this rate increase. I am asking you to reconsider this decision.

Sincerely  
Theresa A. Moss
