Subject: Revoke FPL's charter

Dear Commissioner Graham,

I'm writing to urge you to begin an immediate investigation into Florida Power and Light in order to determine whether its charter to operate in the state of Florida should be revoked.

As you are surely aware, FPL CEO Eric Silagy stepped down suddenly after highly credible allegations of campaign finance violations, media manipulation, and the surveillance of critical journalists:

<https://www.npr.org/2023/01/25/1151453870/fpl-florida-power-ceo-eric-silagy>

To call this behavior un-democratic would be a massive understatement. FPL, it seems clear, is more than willing to violate the public trust, game the political system, and do anything and everything to increase its profits - all on the dime of ratepayers who have no choice but to pay them for their power.

A company so blatantly working against the public interest can no longer be allowed to do business in Florida.

Please take swift and sweeping action to investigate FPL and determine whether it is necessary to revoke their charter, as clearly seems to be the case.

Sincerely,

Ashley Bull

Good morning. It's National Anthem Day. Here's [a video](#) from earlier this year of Florida man Paul Wane shredding the song on an American Flag electric guitar before a Jacksonville Jaguars football game.

First Up

In their latest email, Team DeSantis is calling attention to the governor's Tuesday op-ed in The Wall Street Journal, "[Why I Stood Up to Disney.](#)" More to the point, they're calling out President Joe Biden's administration for not reading it.

"I have not read the op-ed and frankly, I don't plan to," the email says, quoting an unnamed "Biden official." The email does not explain where the quote came from. Nonetheless, it says if "the Biden team is this afraid of something, that's probably a clue that it's a good read."

The op-ed is a reprise of many of the governor's latest and greatest hits: It boosts his Parental Rights in Education Act, which "bans classroom instruction on sexuality and gender ideology in kindergarten through third grade and requires that sex instruction in other grades be age-appropriate."

It also slams environmental, social and governance – or ESG – investing practices and says “woke ideology is a form of cultural Marxism” before closing with his catchphrase, “we are the state where woke goes to die.” And of note, it’s strictly messaging: there’s no “Donate Now” button at the end.
