Subject: Docket No. 20200181; Put us on a path to lower power bills through energy efficiency

Dear Commissioner Andrew Fay,

My solar panels produce more energy every year than I consume. Last year Duke bought the extra energy from me for \$165. Then they sold it to my neighbor for \$350.

Can you explain why I need to pay a minimum bill for infrastructure on the 50 feet of cable that yields Duke a huge profit?

And why can't I install more than 10kW and participate in a Virtual Power Plant to do my part in helping the environment? The solar panels on my roof don't require any extra land to be cleared. But a utility solar farm destroys land that can be used to sequester carbon.

Maybe the PSC needs to have a Hippocratic Oath type of mission statement:

- "First, do no harm to the environment."
- "Second, do no harm to the citizen."

Sincerely,
Michael Barth
