VOLUME 10 - PAGES 1824 - 2093

PROCEEDINGS: HEARING

COMMISSIONERS
PARTICIPATING: CHAIRMAN ANDREW GILES FAY
COMMISSIONER ART GRAHAM
COMMISSIONER GARY F. CLARK
COMMISSIONER MIKE LA ROSA
COMMISSIONER GABRIELLA PASSIDOMO

DATE: Friday, September 15, 2023

TIME: Commenced: 9:00 a.m.
Concluded: 12:54 p.m.

PLACE: Betty Easley Conference Center
Room 148
4075 Esplanade Way
Tallahassee, Florida

REPORTED BY: DEBRA R. KRICK
Court Reporter

APPEARANCES: (As heretofore noted.)

1 P R O C E E D I N G S

2 CHAIRMAN FAY: All right. Good morning.
3 Everyone. I would ask you to take your seats. We
4 will get started this morning with our two
5 witnesses and see where we end up on a time
6 perspective.

7 I was going to take up any preliminary
8 matters. I can start over here with you, Mr.
9 Rehwinkel or Ms. Wessling, and work our way down if
10 there is anything that we need to discuss or
11 address before we get back into Mr. Richard's
12 cross.

13 MR. REHWINKEL: None from the Public Counsel.
14 We would just like to thank you for your patience
15 last night, and I am glad you had us get this over
16 with. Thank you.

17 CHAIRMAN FAY: Yeah. Great. Thank you.
18 Mr. Moyle.

19 MR. MOYLE: Thank you, Mr. Chairman. We do
20 have a couple of preliminary matters.

21 I want it start by thanking you and the staff
22 and the parties for accommodating me last evening.
23 I appreciate it.

24 Secondly, we've had some discussions with PGS
25 with respect to certain issues, and we have come to

1 a change of position on certain issues that I
2 wanted to make the Commission aware and indicate
3 that it should set them up for a Type 2
4 Stipulation, because we are going to change our
5 position to no position. And those issues are 58
6 through 70, with the exception of 66. 66 was
7 already the subject of a stipulation, and these are
8 cost of service issues. I have been in discussions
9 with the company, and I think that positions them
10 for approval of a Type 2 Stipulation. So that was
11 the other preliminary matter that I had.

12 CHAIRMAN FAY: Okay. Great.

13 So then just confirmation with the other
14 parties, you are agreeing with Type 2, Mr. Moyle,
15 you are the only other party, is that correct,
16 before we take those up for a vote?

17 MR. REHWINKEL: We will facilitate a Type 2
18 Stipulation on that.

19 CHAIRMAN FAY: Okay.

20 MR. WAHLEN: Yes, sir. Thank you, Mr.
21 Chairman.

22 Just for clarification, though, three or four
23 of those issues are kind of fallout issues, so when
24 he is stipulating to the issue, if it's a fallout
25 issue, it's like what are the rates going to be

1 after the revenue requirement. He is not agreeing
2 to our revenue requirement or our rates as
3 proposed. He is agreeing to the fallout --

4 CHAIRMAN FAY: Okay.

5 MR. WAHLEN: -- calculation. But with all of
6 that, we are very happy to have the stipulation,
7 and it will simplify the briefing and everything.

8 CHAIRMAN FAY: Okay. Great. And, Mr. Sandy,
9 so if we -- based on what Mr. Wahlen just mentioned
10 on the record, if we go ahead and take those up as
11 Type 2 stipulations, with the understanding that,
12 just like Mr. Wahlen said, they are not taking the
13 position of that number, but in there is fallout,
14 that seems appropriate to me if we want to take the
15 ones that are fallout separately and not take them
16 up as Type 2, if you have any concerns on that,
17 then I would be happy to do so, but I am
18 comfortable just voting them in as a block since
19 we've got clarity.

20 MR. SANDY: I would say, Mr. Chair, in the
21 sake of clarity, if we put a pin in those, make
22 sure there is agreement on which issues are fallout
23 issues and then we can set those aside. And then
24 all the other issues can be stipulated to and then
25 voted to on the record. I think we can resolve

1 that no later than the end of this hearing so that
2 it's ready for a vote, and then that way there is
3 clarity on the record.

4 CHAIRMAN FAY: Okay. That works. So then we
5 will let you kind of keep working on it, and then
6 as -- we will take it up at the appropriate time,
7 because it doesn't need to be taken up right now,
8 and then we will keep going on Mr. Richard. And
9 then once you guys feel comfortable as to how you
10 would like to present it for us, then the
11 Commission can take a vote on those.

12 MR. SANDY: Thank you, sir.

13 MR. WAHLEN: For whatever it's worth, Ms.
14 Draper give us a list to the issues she thought
15 were fallout, and we agree with those, so thank
16 you.

17 CHAIRMAN FAY: Okay. Great. We will just
18 make sure we are all on the same page before
19 taking a vote on those.

20 Seeing any other preliminary matters, seeing
21 none. Mr. Moyle, we will move to you for your
22 cross for Mr. Richard whenever you are ready.

23 MR. MOYLE: Thank you, Mr. Chairman.

24 EXAMINATION

25 BY MR. MOYLE:

1 Q Good morning, Mr. Richard.

2 A Good morning.

3 Q You were here late last night. I hope you
4 rested well.

5 A I rested well. Thank you.

6 Q I am going to have a handful of questions
7 about some of the topics that you previously have
8 provided some testimony about with your conversation
9 with Mr. Rehwinkel with Office of Public Counsel.

10 You were shown a deposition yesterday of a Mr.
11 O'Connor that took place a few years ago, and you were
12 asked about the Blue Marlin project and a couple of
13 other projects.

14 With respect to the Blue Marlin project, that
15 was a project that you all, in the last rate case, were
16 putting forward. You were asking the Commission to
17 provide rates for you in the test year at the time, and
18 the Blue Marlin project, as we sit here today, is really
19 no closer to be completed than it was back at the time
20 of that deposition, is that right?

21 A That's correct.

22 Q Okay. And Mr. Rehwinkel asked you some other
23 questions about capital projects being delayed. You
24 would agree, as an engineer, and as someone who is
25 responsible for all these projects, that things happen

1 **and projects do get delayed, correct?**

2 A Sure, so -- yes. And as we think about our
3 business, we have very different types of projects
4 within our overall capital program. You know, we have
5 the residential customers who want gas service for their
6 home, and we have the commercial customers who want gas
7 service for their restaurant, the hotel, and then we
8 have the larger projects that are typically to serve
9 single customers, large volume, very complex projects in
10 terms of commercial arrangements.

11 And so in those three classes of types of
12 projects, there will be some projects that are delayed
13 because the customer has other commercial arrangements
14 that they are trying to finalize, and they may or may
15 not have them finalized. So there is puts and takes
16 within a year, and our responsible is to manage that
17 overall capital program.

18 **Q And there is also big projects that you had**
19 **said, well, maybe the customer has some changes; but**
20 **there is also situations where you have sourcing issues,**
21 **or you need to change a design that are on your end as**
22 **well that result in delays, correct?**

23 A We've had examples where we've looked at a
24 project. I mentioned Dade City yesterday, where the
25 circumstances around this change, the pandemic was a

1 global event that impacted us in many different ways,
2 and on that particular project, labor costs, land costs,
3 supply of certain materials, supply of -- or the cost of
4 steel, for example, changed dramatically. And so we
5 paused to make sure we had the project properly
6 budgeted, again, to make sure we are doing the right
7 thing in terms of advancement in that project, and then
8 advanced the project in due course.

9 So to answer your question, it would be, yes,
10 depending on what's happening around us.

11 **Q And you responded to an earlier question that**
12 **you have familiarity with regulatory policy in a broad,**
13 **you know, context.**

14 **Wouldn't you agree that with respect to what**
15 **you are asking the Commission do here, to set rates,**
16 **that it's fundamentally fair that if you are in asking**
17 **for rates to be increased because of certain capital**
18 **projects that are going to be in effect in the upcoming**
19 **year, that those projects should go into service in that**
20 **upcoming year? I mean, that's representation that's**
21 **being made here with the evidence, here's our capital**
22 **plan, here's when we expect this to come in, and from a**
23 **regulatory context, you asking them, based on**
24 **projections, to go ahead and approve rates; is that**
25 **right?**

1 A Yes, based on our plan. And we've presented
2 it in the materials and the evidence and the depositions
3 of you're capital program, our capital forecasts and our
4 plans moving forward based on the needs of our customer,
5 based on the needs of our system, to make that we have a
6 reliable, safe system, and that we serve a customer who
7 want our product.

8 **Q And in any other business context, other than**
9 **in a regulatory context that we are talking about, if**
10 **someone has a commercial relationship where they say, I**
11 **would like to get a thousand widgets, and I am going to**
12 **pay you now, and the widget manufacturer says, I am**
13 **going to get those thousand widgets to you within the**
14 **next six months, and then something happens and the**
15 **widgets don't come for two years, that would be kind of**
16 **a fundamental breach of that understanding, would it**
17 **not?**

18 A I am not sure I follow, but as -- you know, as
19 I think about the function of engineering, construction
20 and technology, commercial arrangements kind of fall in
21 two buckets. One is our typical residential and
22 commercial customers, which is straightforward. It's
23 repetitive. It's high volume. And then there are those
24 larger projects that have agreements, perhaps with a
25 single party.

1 Lew Rutkin, in our gas supply and development
2 team, or business development team, would be the person
3 to speak with those arrangements. We work with his team
4 to provide estimates, to make sure that we build a
5 quality asset, that is safe, reliable and meets the
6 customer's needs.

7 **Q Yeah. My question may not have been**
8 **formulated the right way.**

9 **When you are in your everyday life and you go**
10 **buy a product, you typically pay money and then you got**
11 **the product, right? I mean, it's almost a realtime**
12 **transaction?**

13 A That's correct.

14 **Q And in situations -- I mean, it's not really**
15 **typical for you to go in and go, here, I am going to**
16 **prepay -- start prepaying on something that if you say I**
17 **want it this week, and then it comes two years from now,**
18 **that's not going to typically work for you from a**
19 **personal standpoint or a business standpoint, correct?**

20 A I am not sure what your question is trying to
21 ask. There is services that you prepay, cell phone
22 bills, perhaps you prepay, I am not --

23 **Q Yeah. I guess -- you are aware that as part**
24 **of the case here, you all are asking for a lot of**
25 **capital dollars, correct?**

1 A Yeah. We have a capital program that will
2 serves the needs of our customers to ensure that we have
3 a safe and reliable system.

4 Q And what's the total dollar amount of your
5 capital program that you are asking the Commission to
6 set rates on, as we sit here today, if you know off the
7 top of urban head?

8 A I don't on the top of my head. I am not --

9 Q You can ballpark it.

10 A It's in the \$300 million range.

11 Q Okay. And so to the extent that some of the
12 projects take longer than others, isn't it -- isn't it
13 fair, from your perspective, to have some type of a
14 adjustment, or a safety valve, that to the extent
15 projects take longer, that ratepayers aren't paying for
16 them if there are delays?

17 A I am not sure what you mean by a safety valve.
18 But I will say, from my perspective, being responsible
19 to not only estimate, but also execute our capital
20 program, it's our job to manage the envelope of capital
21 projects.

22 So in some cases, capital projects will have
23 changes to them in terms of schedule and budget, but we
24 have an envelope of projects that we need manage. And
25 as we have demonstrated over the last five years, we are

1 working on our processes to make that better, and that's
2 a job that's never done. We will continue to look for
3 opportunities to make that better. We are on a positive
4 trend. For 2023, we will execute our capital program
5 very close to budget. And for 2024, there is no reason
6 to think that we will not.

7 **Q Very close to budget.**

8 A It's -- we are in the ninth month of the year.
9 As we forecast out the rest of the year, we are a few
10 million dollars projected over, and we are managing that
11 envelope to try to bring it to budget.

12 **Q Right. There were -- and we talked about this**
13 **in your deposition. There were a number of projects**
14 **that were delayed that had a substantial impact on your**
15 **capital budget forecast compared to actuals, correct?**

16 A We have one project that we mentioned
17 yesterday with a single customer that has had a one-year
18 delay that we also mentioned yesterday.

19 **Q So I guess -- I guess when you said -- you**
20 **said -- I used the phrase like a relief valve or**
21 **something. You are aware that Mr. Kollen has suggested**
22 **that there be an adjustment, that this commission make**
23 **an adjustment of approximately 10 percent of your**
24 **capital budget, to say, you know, this will give you a**
25 **little room in the event that things don't come on when**

1 **planned, you are aware of that, correct?**

2 A I am aware of the testimony that he has filed,
3 yes.

4 Q Okay. You were asked some questions about
5 SeaCoast, and I know -- you have engineers that do work
6 for SeaCoast, correct?

7 A That's correct.

8 Q Okay. And with respect to the business, the
9 PGS business, there are a number of large customers,
10 isn't it true about 50 percent of the business of PGS is
11 derived from providing natural gas to power plants?

12 A No, I don't think -- it depends on how you
13 look at it. I am sure number of customers with very
14 different volumes in terms of therms that they consume
15 would be very different. So offhand, I can't say that
16 it's 50 percent because it depends on which metric you
17 are using.

18 Q That's fair, because an apartment complex --
19 you have a lot more apartment complexes than power
20 plants. I was talking in terms of therms.

21 A Generally speaking, power plants are very
22 large therm users. That's correct.

23 Q Okay. And presently, PGS serves Tampa
24 Electric, is that right?

25 A We serve some Tampa Electric power plants,

1 correct.

2 Q And you also serve JEA, is that right,
3 Jacksonville Electric Authority?

4 A Yes.

5 Q And you serve Seminole?

6 A SeaCoast serves Seminole. And I am not sure
7 if PGS has an asset that serves other power plants. I
8 am not sure.

9 Q You have some Florida municipal power agency
10 clients that you serve that are -- have power plants, is
11 that right?

12 A I am not sure from a customer perspective.

13 Q Okay. Yeah. So the -- why the distinction
14 with respect to Seminole, and with SeaCoast serving that
15 as compared to the JEA service and the Tampa Electric
16 service?

17 A We have four SeaCoast assets. All of them
18 were put in service before my time. It's a niche
19 market, and so at the time it was deemed to be best
20 served by SeaCoast. I can't speak to the
21 decision-making at that point in time.

22 And I mentioned earlier, our gas supply and
23 development team, our business development team would be
24 the best people to ask about how they characterized a
25 project, and whether or not it's a PGS asset or a

1 SeaCoast asset.

2 Q Okay. And I am going to keep my conversation
3 here relatively brief and at a high level, but with
4 respect to SeaCoast, it's a separate corporate entity,
5 correct?

6 A That's correct.

7 Q Right. And in the natural gas business, this
8 is something that is not unusual. There are other
9 companies that have regulated LDCs, like PGS, and also
10 have lightly regulated entities like SeaCoast, is that
11 right?

12 A I am not sure I can speak to the market in
13 general. I can speak to Florida. And in Florida, there
14 were others who are structured this way that have a
15 non-rate regulated entity as well as regulated -- rate
16 regulated entities.

17 Q Okay. And the key issue, I guess, for the
18 Commission as it relates to that, is just as part of
19 their role is to make sure that costs are allocated
20 properly when things are done in the SeaCoast entity,
21 and you use a Massachusetts allocation model, is that
22 right?

23 A That's correct.

24 Q Okay.

25 A And also we direct charge.

1 **Q** You had used the phrase RRE yesterday, and I
2 want to just have a quick conversation with you about
3 that. What, again, is RRE?

4 A Reliability, resiliency and efficiency.

5 **Q** And with respect to your business going
6 forward, do any of those categories capture efforts to
7 provide more renewable natural gas?

8 A No. RRE projects are mostly our team
9 evaluating the system as it evolves. So customers come
10 on, customers come off. We have -- it's an
11 ever-changing and dynamic system, and we are always
12 looking at our models to ensure that it is going to be
13 reliable to see if there is any parts of our system
14 that, perhaps, are experiencing low pressures that we
15 may have to build up to look at whether or not there are
16 safety concerns on our system, so we work very closely
17 with Tim O'Connor's team to get that information into
18 our system, so that from a sustainability perspective,
19 or RRE perspective, that we have, you know, we make the
20 right investments in our system to make sure that it
21 continues to be safe and reliable.

22 **Q** Mr. Rehwinkel shared a sheet with you that had
23 a lot of your engineer employees on it. Are some of
24 your engineer employees responsible for understanding
25 kind of the composition of natural gas? And that's a

1 very broad question.

2 Where I want to go is with respect to
3 renewable natural gas, is it materially different from
4 gas that is extracted, say, from the Gulf of Mexico?

5 A I can speak to what we do to the gas. I can't
6 speak to whether or not it's different than gas that
7 comes from a traditional well.

8 Gas that comes from a renewable energy source,
9 whether it's a landfill, a dairy farm or a wastewater
10 treatment facility, it needs to be conditioned. It's
11 coming from, you know, whether it's cow manure or
12 garbage, and so we need to make sure that it's of proper
13 quality in order to put and inject into the pipeline
14 system, because our users, whether it's someone in their
15 stove, or a power plant in their generator, they need to
16 make sure that we have -- that they have consistent
17 fuel.

18 And so part of our renewable energy project is
19 to clean up the gas, usually called conditioning
20 equipment. And then gas chromatographs, which is
21 equipment that makes sure that gas is of a certain spec
22 before it's injected into the system.

23 Q Okay. And part of that, I mean, I am not
24 going to delve into this, but the additional treatment,
25 and the conditioning that has to be done, I mean, the

1 **renewable natural gas typically has a higher cost than**
2 **traditional natural gas is that right?**

3 A I am not sure, because I can't speak to the
4 conditioning that happens in a geological well. I am
5 assuming that geological natural gas also needs to be
6 treated, but that's outside my area of expertise. When
7 we get it, it's already conditioned.

8 Q So at a cocktail party, and somebody says, oh,
9 you are in the natural gas business. Is renewable
10 natural gas the same price as regular natural gas, how
11 do you answer that?

12 A I wouldn't be the one to answer that. But I
13 would say, natural gas -- renewable natural gas is
14 really cool. We are taking cow poop and we are making
15 energy with it. So we are taking a source of methane
16 that's being emitted in the atmosphere, we are putting
17 it into our pipeline system, sourced locally in Florida,
18 to power peoples' homes, to power power plants, I mean,
19 from that that's perspective is how I would answer at a
20 cocktail party.

21 Q Well, given the earliness of the hour, I am
22 going to leave how do you it alone. Thank you for your
23 time.

24 CHAIRMAN FAY: All right. Staff?

25 MR. THOMPSON: No questions from staff.

1 CHAIRMAN FAY: Commissioners?

2 All right. Redirected?

3 MS. PONDER: Yes, just a little bit.

4 FURTHER EXAMINATION

5 BY MS. PONDER:

6 Q Mr. Richard, when did you come into your
7 current role?

8 A September of last year, of 2022.

9 Q Okay. At that time, was the capital budgeting
10 process reliable?

11 A Yes.

12 Q And have you made improvements to that
13 process?

14 A We have.

15 Q Since you have come into your role, you have
16 made improvements?

17 A Yes.

18 Q Did Peoples spend its capital budget in 2022?

19 A We spent a little bit more than what we had
20 budgeted, so, yes, we did.

21 Q Okay. And I believe you spoke with Mr. Moyle
22 regarding how the company is on track to spend its
23 capital budget a little over, is that -- was that your
24 testimony, is that correct, for 2023?

25 A That is correct, for '23.

1 **Q And what is the goal for your capital budget**
2 **in spending?**

3 A We are serving customers, and so there is a
4 customer need, and we get projects from both our gas
5 supply and development team and our residential and
6 commercial team. We make projections or estimates on
7 what capital needs to be spent to meet that requirement.
8 You know, it's very fortunate that customers want
9 natural gas. And we also have to look at our system to
10 make sure that we are putting the right dollars at work
11 to continue to make sure that we have a safe and
12 reliable system. And so the goal ultimately is to
13 deliver on those estimates, deliver on that capital
14 budget that we put together every year.

15 **Q Thank you.**

16 MS. PONDER: Mr. Chairman, we would ask that
17 Exhibits 16 and 28 be moved into the record,
18 please.

19 CHAIRMAN FAY: Okay. Show Exhibits 16 and 28
20 without objection entered into the record.

21 (Whereupon, Exhibit Nos. 16 & 28 were received
22 into evidence.)

23 CHAIRMAN FAY: OPC?

24 MR. REHWINKEL: If you give me just a second,
25 Mr. Chairman, I have got -- we would move 205

1 through 217.

2 CHAIRMAN FAY: Okay. That's what I have. 205
3 through 217 without objection. Okay. Show those
4 entered into the record.

5 (Whereupon, Exhibit Nos. 205-217 were received
6 into evidence.)

7 CHAIRMAN FAY: All right.

8 MS. PONDER: May Mr. Richard be excused?

9 CHAIRMAN FAY: Yes. Mr. Richard, thank you
10 again for your time.

11 THE WITNESS: Thank you.

12 (Witness excused.)

13 CHAIRMAN FAY: All right. Next we will move
14 into our last witness, witness Ms. Parsons. Ms.
15 Ponder, whenever you are ready.

16 MR. WAHLEN: While she's getting situated. I
17 found Ms. Draper's list of fallout issues and just
18 have shared those with Mr. Moyle and staff. She
19 identified Issue 60, 61, 69 and 70 as fallout
20 issues, and we agree with that. I think Mr. Moyle
21 does too.

22 CHAIRMAN FAY: Okay. In agreement?

23 MR. MOYLE: Yes.

24 CHAIRMAN FAY: All right. Commissioners, I
25 will take up a motion to approve stipulations for

1 Items 58, 59, 62, 63, 64, 65, 67 and 68.

2 COMMISSIONER CLARK: Move approval, Mr.
3 Chairman.

4 CHAIRMAN FAY: That's -- one second, I
5 apologize. I took a longer pause than I wanted to,
6 with the idea that there will be fallout in Issues
7 61 -- 60, 61, 69 and 70.

8 Commissioner Clark, you have a motion?

9 COMMISSIONER CLARK: Move approval, Mr.
10 Chairman.

11 COMMISSIONER PASSIDOMO: Second.

12 CHAIRMAN FAY: A motion and a second.

13 All that approve say aye.

14 (Chorus of ayes.)

15 CHAIRMAN FAY: Okay. Show those stipulations
16 and the fallout approved at this time.

17 MR. WAHLEN: Thank you very much.

18 CHAIRMAN FAY: Okay. All right. With that,
19 PGS, you are welcome to begin with your witness.

20 MR. WAHLEN: Thank you.

21 Whereupon,

22 RACHEL B. PARSONS

23 was called as a witness, having been first duly sworn to
24 speak the truth, the whole truth, and nothing but the
25 truth, was examined and testified as follows:

1 EXAMINATION

2 BY MR. WAHLEN:

3 Q Ms. Parsons, were you sworn?

4 A Yes, I was.

5 Q Thank you.

6 Would you state your full name for the record?

7 A Rachel Parsons.

8 Q And who is your employer, and what's your
9 business address?

10 A It's TECO Peoples Gas, 702 North Franklin
11 Street, Tampa, Florida, 33602.

12 Q And did you prepare and cause to be filed in
13 this docket, on April 4th, 2023, prepared direct
14 testimony consisting of 80 pages?

15 A I did.

16 Q And did you prepare and cause to be filed in
17 this docket on July 20th, prepared rebuttal testimony
18 consisting of 53 pages?

19 A I did.

20 Q And did you prepare and cause to be filed
21 revisions to your page one of your prepared direct
22 testimony on July 21st?

23 A Yes.

24 Q Other than that revision, do you have any
25 additions or corrections to your prepared direct or

1 **rebuttal testimony?**

2 A No, I do not.

3 Q **With those revisions, and the one filed on --**
4 **well, with the revision filed on June 21st, if I were to**
5 **ask you the questions contained in your prepared direct**
6 **testimony and rebuttal testimony today, would your**
7 **answers be the same?**

8 A Yes, they would.

9 MR. WAHLEN: Mr. Chairman, Peoples requests
10 that the prepared direct and rebuttal testimony of
11 Ms. Parsons, as updated on June 21st, be inserted
12 into the record as though read.

13 CHAIRMAN FAY: Okay. Show direct and rebuttal
14 inserted as though read.

15 MR. WAHLEN: Thank you.

16 (Whereupon, prefiled direct testimony of
17 Rachel B. Parsons was inserted.)

18

3 **OF**

4 **RACHEL B. PARSONS**

5
6
7 **POSITION, QUALIFICATIONS, AND PURPOSE**

8 **Q.** Please state your name, address, occupation and employer.

9
10 **A.** My name is Rachel B. Parsons. My business address is 702 North
11 Franklin Street, Tampa, Florida 33602. I am employed as the
12 Head of Financial Performance of Peoples Gas System, Inc.
13 ("Peoples" or the "company").

14
15 **Q.** Please describe your duties and responsibilities in that
16 position.

17
18 **A.** I am responsible for maintaining the financial books and
19 records of the company and for determining and implementing
20 accounting policies and practices for Peoples, which includes
21 general accounting, regulatory accounting, and financial
22 reporting. I am also responsible for short-term budgeting and
23 forecasting activities within the company.

24
25 **Q.** Please provide a brief outline of your educational background

1 and business experience.

2
3 **A.** I graduated from the University of South Florida in 2003 with
4 a Bachelor of Accounting degree and in 2005 with a Master of
5 Accountancy degree. Prior to joining TECO Energy, Inc. ("TECO
6 Energy"), I worked for Seminole Electric Cooperative, Inc. In
7 2006, I joined TECO Energy and have held various roles with
8 increasing responsibility including the Director, Business
9 Planning for Peoples. I am a Certified Public Accountant in
10 the State of Florida, and I have served in my current position
11 as Vice President, Finance and Planning of Peoples since June
12 2021.

13
14 **Q.** What are the purposes of your prepared direct testimony in
15 this proceeding?

16
17 **A.** The purposes of my prepared direct testimony are to:
18 (1) Support the company's proposal to use the 2024 projected
19 test year for ratemaking purposes.
20 (2) Support the calculation and adjustments used in
21 determining the company's test year revenue requirement. I
22 present the calculation of the test year revenue deficiency
23 and explain the primary factors since Peoples' last general
24 base rate proceeding necessitating a base rate increase.
25 (3) Support the methodology for transferring Cast Iron / Bare

1 Steel Replacement ("CI/BSR") rider revenue requirements to
2 base rates.

3 (4) Discuss the company's budget process used to develop the
4 financial projections for the test year.

5 (5) Support the calculation, accounting treatments and
6 adjustments used in determining the company's test year net
7 operating income. I describe provisions from the company's
8 Stipulation and Settlement Agreement approved by the Florida
9 Public Service Commission ("Commission") in Order No. PSC-
10 2020-0485-FOF-GU, issued December 10, 2020, in Docket Nos.
11 20200051-GU, 20200166-GU, and 20200178-GU ("2020 Agreement"),
12 included as Document No. 10 of my exhibit, and discuss the
13 company's proposals to continue abiding by those provisions
14 in this general base rate proceeding, including:

15 (a) regulatory accounting treatments and adjustments
16 impacting Peoples' revenue requirement calculation, including
17 a proposed increase to the company's annual storm expense
18 accrual; and

19 (b) the mechanism for addressing potential changes in
20 corporate income tax rates.

21 (6) Discuss the company's base revenue forecasts.

22 (7) Discuss the company's Operations and Maintenance ("O&M")
23 expense. I discuss how inflation and customer growth are
24 reflected in the company's O&M expense budget and for
25 computing the Commission's O&M Benchmark. I discuss

1 affiliate transactions and the reasonableness of costs
2 allocated from affiliates. I discuss trending factors
3 impacting O&M expense as well as expense drivers not trended.
4 I support the reasonableness of the 2024 projected test year
5 O&M expense.

6 (8) Support the calculation and adjustments used in
7 determining the company's 2024 projected test year rate base.

8 (9) Discuss the company's capital structure, cost-of-capital
9 and income taxes.

10 (10) Explain Peoples' proposed true up mechanism to
11 incorporate the company's actual cost of its inaugural long-
12 term debt issuances into a one-time true up of its approved
13 revenue requirements and base rates through a limited
14 proceeding.

15
16 **Q.** Please describe your exhibit supporting your prepared direct
17 testimony.

18
19 **A.** Exhibit No. RBP-1 was prepared under my direction and
20 supervision. The contents of my exhibit were derived from the
21 business records of the company and are true and correct to
22 the best of my information and belief. My exhibit consists of
23 10 documents, as follows:

24
25 Document No. 1 List of MFR schedules Sponsored or Co-

1		Sponsored by Rachel B. Parsons
2	Document No. 2	CI/BSR Revenue Requirements Transferred
3		to Base Rates
4	Document No. 3	Revenue Summary
5	Document No. 4	Operations & Maintenance Expense Summary
6	Document No. 5	2024 O&M Benchmark Comparison by Function
7	Document No. 6	2023 and 2024 Capital Budget
8	Document No. 7	Storm Reserve Analysis and 2022 Study
9	Document No. 8	Calculation of Internal Revenue Code
10		Required Deferred Income Tax Adjustment
11	Document No. 9	2024 projected test year Reconciliation
12		of Capital Structure to Rate Base
13	Document No. 10	2020 Agreement

14

15 **Q.** Are you sponsoring any of Peoples' Minimum Filing Requirement
16 ("MFR") Schedules?

17

18 **A.** Yes. I am sponsoring or co-sponsoring the MFR schedules listed
19 in Document No. 1 of my exhibit. The contents of these MFR
20 schedules were based on the business records of the company
21 maintained in the ordinary course of business and are true
22 and correct to the best of my information and belief.

23

24 **PROJECTED TEST YEAR**

25 **Q.** What test year does the company propose to use in this

1 proceeding?

2

3 **A.** The company has selected the twelve-month period ending
4 December 31, 2024, as the projected test year for Peoples'
5 petition to modify its base rates and charges. Calendar year
6 2024 is appropriate for use as the test year since it is
7 representative of Peoples' projected revenues and projected
8 cost of service, capital structure and rate base required to
9 provide safe, reliable, and cost-effective service to its
10 customers during the period when the company's new rates will
11 be in effect. The company's proposed 2024 projected test year
12 is more representative of the company's operations when its
13 proposed rate will be in effect than a historic test year.

14

15 **Q.** When does the company propose that its new base rates be
16 effective?

17

18 **A.** Peoples proposes the new base rates should be effective for
19 the first billing cycle of January 2024.

20

21 **Q.** What is the historic base year in this proceeding?

22

23 **A.** The historic base year is the 12-months ended December 31,
24 2022. All data related to this historical base year is
25 historical data taken from the books and records of the

1 company, which are kept in the regular course of the company's
2 business in accordance with Generally Accepted Accounting
3 Principles ("GAAP") and provisions of the Federal Energy
4 Regulatory Commission ("FERC") Uniform System of Accounts
5 prescribed by the Commission.

6
7 **2024 REVENUE REQUIREMENT**

8 **Q.** What is the base revenue increase requested by Peoples?
9

10 **A.** The company seeks a net incremental base revenue increase of
11 \$127.7 million. Additionally, the company seeks to transfer
12 approximately \$11.6 million of revenue requirements related
13 to CI/BSR investments into base rates and to reset the CI/BSR
14 surcharge, as discussed later in my testimony. The total
15 \$139.3 million revenue increase is necessary to allow Peoples
16 to: (i) continue to provide safe and reliable natural gas
17 distribution service at customer service levels the company's
18 customers have come to expect from Peoples; (ii) maintain the
19 company's financial integrity and access to reasonably priced
20 debt capital while funding the company's future investments
21 to serve customers; and (iii) have the opportunity to earn a
22 fair return on its investment. The company's proposed revenue
23 increase is based on a midpoint return on equity of 11.00
24 percent, with an overall return of 7.42 percent on its 2024
25 average rate base of approximately \$2,366.8 million.

1 Q. Why is Peoples seeking rate relief at this time?

2

3 A. By 2024, the company's existing base rates will not generate
4 sufficient revenues to allow the company to safely and
5 reliably serve its customers and provide an opportunity to
6 achieve a reasonable return on its capital investments.

7

8 Q. What was Peoples' earned return on equity ("ROE") for 2022
9 and what is its projected ROE for 2023?

10

11 A. The ROE reflected on the company's December 2022 Earnings
12 Surveillance Report was 9.25 percent and its projected ROE
13 for 2023 is 7.83 percent, which is below the 8.90 percent
14 bottom of the company's Commission-authorized ROE range.
15 Company witness Helen J. Wesley explains how the company has
16 prepared its 2023 budget and is managing its operations in
17 her prepared direct testimony.

18

19 Q. What is Peoples' projected ROE in the 2024 projected test
20 year without rate relief?

21

22 A. If the CI/BSR revenue requirement is not transferred from the
23 CI/BSR rider to base rates, the company projects to earn a
24 ROE of 2.53 percent in 2024. However, with the proposed
25 transfer of the CI/BSR revenue requirement, the company

1 projects an ROE of 1.85 percent. These returns are far below
2 both the Commission's approved 9.90 percent midpoint ROE from
3 the company's last general base rate proceeding and the
4 company's proposed 11.00 percent ROE for this proceeding, as
5 supported in the direct testimony of company witness Dylan W.
6 D'Ascendis.

7
8 **Q.** Can you explain the calculation for determining the December
9 31, 2024, projected test year revenue requirement and revenue
10 deficiency?

11
12 **A.** Yes. The derivation of the company's projected 2024 revenue
13 deficiency is summarized in MFR schedule G-5. The 2024 revenue
14 deficiency is determined by multiplying the projected test
15 year rate base by the proposed overall rate of return to
16 arrive at the net operating income ("NOI") required. The
17 difference between the required NOI and the forecasted
18 projected test year NOI results in the NOI deficiency. The
19 NOI deficiency is then multiplied by the NOI Multiplier, which
20 accounts for income tax gross ups, bad debt expense, and
21 regulatory assessment fees, to determine the forecasted base
22 revenue deficiency.

23
24 **Q.** What is the NOI Multiplier being used to determine the revenue
25 deficiency?

1 **A.** The NOI Multiplier proposed in this case is 1.3500 as shown
2 on MFR schedule G-4. The NOI Multiplier reflects the corporate
3 federal income tax rate of 21.0 percent and the Florida
4 corporate tax rate of 5.5 percent. In addition, the NOI
5 Multiplier incorporates a bad debt rate of 0.2805 percent and
6 the regulatory assessment fee rate of 0.5 percent.

7
8 **Q.** What are the primary drivers of the revenue deficiency in the
9 2024 projected test year relative to 2021, the test year used
10 for setting current base rates?

11
12 **A.** The primary causes of the revenue deficiency are summarized
13 as follows:

14 (1) capital investments supporting customer and associated
15 system growth, maintaining, and enhancing system reliability,
16 safety, and customer service;

17 (2) growth in O&M expenses;

18 (3) the change in weighted average cost of capital;

19 (4) taxes and other items; and

20 (5) revenue growth being outpaced by the increase in revenue
21 requirements.

22
23 These causes include CI/BSR revenue requirements being
24 transferred from rider to base rates.

25

1 The dollar amount associated with these causes are summarized
2 as follows:

3		
4	Increased Capital Revenue Requirements	\$92.9 million
5	Increased O&M Expense	\$35.3 million
6	Change in Weighted Average Cost of Capital	\$35.2 million
7	Taxes and Other	\$21.6 million
8	Growth in Revenue	<u>(\$45.7)million</u>
9	Total	\$139.3 million

10 Less:

11	Transfer of CI/BSR Revenue Requirements	<u>(\$11.6)million</u>
12	Total	\$127.7 million

13
14 **Q.** Please explain how the \$92.9 million of Increased Capital
15 Revenue Requirements was calculated.

16
17 **A.** The \$92.9 million Increased Capital Revenue Requirements
18 includes three components: (i) rate base return of \$49.2
19 million (\$830.0 million increase in average adjusted rate
20 base multiplied by the 5.93 percent cost of capital approved
21 by the Commission in 2021); (ii) depreciation expense of \$33.1
22 million (includes impact of new depreciation rates of \$7.8
23 million); and (iii) higher property taxes of \$10.6 million.
24 The \$830.0 million increase in average adjusted rate base is
25 the increase from the 2021 Commission-approved amount of

1 \$1,536.8 million to the \$2,366.8 million in the projected
2 2024 projected test year.

3

4 **Q.** Please explain how the \$35.3 million of increased O&M expense
5 was calculated.

6

7 **A.** This amount was calculated as the difference between the
8 company's 2021 adjusted O&M expense from \$115.5 million, as
9 reported in the company's December 2021 Earnings Surveillance
10 Report, and the projected 2024 O&M expense total of \$150.8
11 million as shown on MFR schedule G-2, page 1. I used the
12 December 2021 Earnings Surveillance Report adjusted O&M
13 expense of \$115.5 million in this calculation, because the
14 2020 Agreement only specified the approved 2021 required
15 return and not the components included in determining the
16 2021 adjusted NOI.

17

18 **Q.** Please explain how the \$35.2 million of Change in Weighted
19 Average Cost of Capital was calculated.

20

21 **A.** This amount was calculated as the company's 2024 13-month
22 average adjusted rate base of \$2,366.8 million multiplied by
23 1.49 percent, which is the difference between the 5.93 percent
24 overall rate of return in the cost of capital in the 2020
25 Agreement and the company's proposed overall rate of return

1 of 7.42 percent for the 2024 projected test year.

2
3 **Q.** Please explain how the \$21.6 million in the Taxes and Other
4 category was calculated.

5
6 **A.** The \$21.6 million in the Taxes and Other category includes
7 four components: (i) a reduction of \$16.1 million adjusted
8 income taxes; (ii) an increase of \$36.1 million to the NOI
9 multiplier; (iii) a \$2.9 million increase in taxes other than
10 income excluding property tax; and (iv) other changes (\$1.3
11 million reduction).

12
13 The \$16.1 million reduction in the adjusted income taxes is
14 the difference between the adjusted current and deferred
15 income taxes in the company's December 2021 Earnings
16 Surveillance Report (\$19.2 million) and the comparable amount
17 in the 2024 projected test year (\$3.1 million as shown on MFR
18 schedule G-2, page 1).

19
20 The \$36.1 million increase to the NOI multiplier is the
21 difference between the NOI Deficiency (\$103.2 million) and
22 the Revenue Deficiency (\$139.3 million) shown on MFR schedule
23 G-5.

24
25 The \$2.9 million increase in taxes other than income is the

1 difference between the adjusted taxes other than income
2 amount in 2021 (\$18.2 million) and the comparable amount in
3 the 2024 projected test year (\$31.7 million as shown on MFR
4 schedule G-2, page 1), less the \$10.6 million increase in
5 property taxes mentioned above.

6
7 The other changes reduction of \$1.3 million includes changes
8 in gains and losses on disposition of plant or property
9 included in adjusted NOI, and the difference in the December
10 2021 Earnings Surveillance report and the approved required
11 return included in the 2020 Agreement.

12
13 **Q.** Please explain how the \$45.7 million Growth in Revenue was
14 calculated.

15
16 **A.** This was calculated as the difference between adjusted
17 Operating Revenues of \$300.4 million in the company's
18 December 2021 Earnings Surveillance Report and adjusted
19 Operating Revenues of \$346.1 million in the projected 2024
20 projected test year (as shown on MFR schedule G-2, page 1).
21 Further detail regarding the 2021 and 2024 adjusted Operating
22 Revenues are shown on Document No. 3 of my exhibit. This \$45.7
23 million of revenue growth will not be sufficient to keep pace
24 with the other factors increasing the company's revenue
25 requirement.

1 **CAST IRON/ BARE STEEL REPLACEMENT RIDER PROPOSAL**

2 **Q.** Does the company propose to transfer the projected 2024 CI/BSR
3 revenue requirements to base rates?

4
5 **A.** Yes. The company proposes using the same methodology approved
6 by the Commission in the 2020 Agreement. Effective January
7 1, 2024, the company has reflected the transfer of gross
8 plant, accumulated depreciation, and construction work in
9 progress to rate base for the amounts related to the
10 cumulative CI/BSR eligible investments made from January 1,
11 2021 (the reset date from the company's prior rate proceeding)
12 through December 31, 2023. The net book value of the CI/BSR
13 investments accumulated in the rider during that period is
14 projected to be approximately \$93.3 million. In addition,
15 effective January 1, 2024, the company included the related
16 depreciation, property tax expense, and return on the rate
17 base in the calculation of the 2024 projected test year base
18 rate revenue requirement. As shown in Document No. 2 of my
19 exhibit, the amount of CI/BSR transferred revenue
20 requirements to base rates is \$11.6 million.

21
22 **Q.** Does the company's CI/BSR proposal in this case change the
23 basic operation of the CI/BSR program?

24
25 **A.** No. Although the company proposes to reset the CI/BSR

1 surcharge to zero, the CI/BSR program will continue until all
2 eligible infrastructure replacements have been made.
3 Therefore, eligible pipe replacement investments budgeted for
4 2024 and their related costs have been reflected as
5 recoverable through the reset CI/BSR in 2024. Consistent with
6 the terms of Commission Order No. PSC-2012-0476-TRF-GU,
7 issued on September 18, 2012, which established the program
8 for accelerating replacement of cast iron bare steel pipe,
9 the company has excluded the first \$1.0 million of capital
10 expenditures for replacements in 2024 from recovery through
11 the CI/BSR surcharge. Therefore, the first \$1.0 million has
12 been included in rate base for the 2024 projected test year.

13
14 **Q.** Does the company propose to maintain the true up process
15 articulated in the 2020 Agreement related to the transferred
16 CI/BSR revenue requirements?

17
18 **A.** Yes. Consistent with the Commission approved process in the
19 in the 2020 Agreement, the company proposes that any true up
20 be included in the company's subsequent normal CI/BSR annual
21 true-up filing in September 2024.

22
23 **BUDGET PROCESS**

24 **Q.** How did the company prepare the 2024 projected test year
25 financial data?

1 **A.** Peoples' 2024 projected test year was developed using the
2 same process used to develop the company's annual budgets,
3 including capital expenditure and income statement forecasts.
4 The generation of the budget is an integrated process that
5 results in a complete set of budgeted financial statements,
6 including income statement, balance sheet and statement of
7 cash flows. The 2024 balance sheet was budgeted by starting
8 with the December 31, 2022, actual balances. Balance sheet
9 accounts were then budgeted by either forecasting monthly
10 balances based on past trends or using the forecasted monthly
11 income statement activity, depending on the type of account.
12 Once the balance sheet and income statement were constructed,
13 the company generated a statement of cash flows. This
14 statement determined the company's capital structure funding
15 requirements by showing its needs from short-term debt draws,
16 long-term debt issuances and equity infusions.

17
18 **Q.** What are the major components of the projected 2024 budgeted
19 balance sheet?

20
21 **A.** The largest component of the 2024 budgeted balance sheet is
22 the net utility plant. Net plant balances reflect the
23 property, plant and equipment already invested as well as the
24 capital expenditures included in the company's 2023 and 2024
25 capital budget. The other major components of the 2024 balance

1 sheet and rate base are the accumulated provision for
2 depreciation of plant-in-service and the accounts that make
3 up the allowance for working capital. I will discuss rate
4 base and how these components make up the company's 2024
5 projected test year rate base later in my direct testimony.
6

7 **Q.** What are the major components of the company's projected 2024
8 budgeted income statement and what testimony supports these
9 budgeted components?
10

11 **A.** The major components of the income statement include
12 revenues, as well as O&M expense, depreciation, property tax
13 and income tax expenses.
14

15 The 2024 base revenues are primarily supported by input
16 provided by company witnesses Lew Rutkin Jr. and Eric Fox. I
17 explain how these inputs were used to calculate base revenues.
18 Witness Rutkin and I describe expected revenues related to
19 new Renewable Natural Gas ("RNG") facilities. Witness Rutkin
20 also supports the 2024 off-system sales margin. My direct
21 testimony summarizes total operating revenues included in the
22 2024 projected test year NOI.
23

24 The components of the company's 2024 O&M expenses are
25 supported by my direct testimony and the direct testimony of

1 company witnesses Timothy O'Connor, Christian C. Richard,
2 Donna L. Bluestone, and Karen K. Sparkman. My direct testimony
3 summarizes the total 2024 O&M expense.

4
5 I also explain how the company incorporated recommendations
6 from company witness Dane A. Watson's depreciation study in
7 determining the projected 2024 projected test year
8 depreciation expense.

9
10 Finally, I discuss how property tax expense and income taxes
11 were budgeted.

12
13 **Q.** How was the 2024 budgeted income statement developed?

14
15 **A.** The 2024 budgeted income statement was prepared by Peoples'
16 Finance department under my direction and supervision. The
17 Finance department assembled forecasted data prepared by
18 numerous team members and consultants who specialize in
19 different areas of operations. The company applied the same
20 accounting principles, methods and practices that the company
21 employs for its historical data to its forecasted data to
22 prepare the 2024 budgeted income statement.

23
24 The 2024 forecasted income statement was developed using all
25 forecasted revenues and other types of income, largely base

1 revenues and the revenues from the cost recovery clauses. The
2 2024 income statement also contains projections for off-
3 system sales and other operating revenues such as
4 miscellaneous service revenues and revenue related to
5 Compressed Natural Gas ("CNG") stations and RNG facilities.

6
7 To complete the income statement, all operating expenses were
8 accumulated including O&M expense, depreciation expense and
9 property taxes. Interest expense and interest income, as well
10 as all below-the-line items were also considered. Once all
11 pre-tax components were determined, income taxes were
12 calculated to determine final net income. The company's Board
13 of Directors approved Peoples' 2024 budget in March 2023.

14
15 **Q.** How did the company prepare the 2024 projected test year O&M
16 expense budget?

17
18 **A.** The company developed its 2024 projected test year O&M expense
19 budget using its detailed cost center level approach, which
20 covers all operational areas, corporate departments, and
21 intercompany O&M expense charges for shared services provided
22 by Tampa Electric Company ("Tampa Electric") and Emera
23 Incorporated. ("Emera"). The company budgeted O&M expenses
24 by resource type (payroll, benefits, materials and supplies,
25 outside services, etc.). The company budgeted payroll

1 expenses by position and allocated those payroll costs
2 between O&M, capital expenditures, clause recoverable and
3 charges to affiliates as appropriate. The company budgeted
4 other resource types by cost center based on projected
5 activity levels and requirements. To project O&M expense for
6 2024, the company applied a salary and wages increase to
7 payroll costs and a general inflation rate to other resource
8 types as appropriate along with expected customer growth. I
9 describe these trending factors later in my direct testimony.
10 As discussed in witness Bluestone's direct testimony, the
11 2024 cost projections for actuarial based items such as the
12 company's pension and post-retirement benefits expense were
13 provided by the company's external actuarial firm, Mercer.

14
15 Prior to finalizing the 2024 O&M budget, Peoples' senior
16 management team reviewed all new labor positions and non-
17 labor resource additions being proposed for alignment with
18 overall company objectives and strategic initiatives.

19
20 **Q.** Is the company proposing new depreciation rates in this
21 proceeding to be effective in the 2024 projected test year?

22
23 **A.** Yes, the 2020 Agreement directed the company to file a
24 depreciation study no more than one year nor less than 90
25 days before the filing of its next general rate proceeding,

1 such that the proposed depreciation rates can be considered
2 contemporaneously with the company's next general rate
3 proceeding. Peoples filed a depreciation study with the
4 Commission on December 28, 2022, in Docket No. 20220219-GU
5 and proposed the new depreciation rates be effective as of
6 January 1, 2024. The proposed new depreciation rates are
7 supported by the direct testimony of witness Watson.

8
9 **Q.** Were there any updates to the proposed rates in the
10 Depreciation Study filed on December 28, 2022?

11
12 **A.** Yes, as discussed in witness Watson's direct testimony, the
13 proposed depreciation rates included in the Depreciation
14 Study filed in December 2022 were subsequently updated to
15 reflect actual plant in service, retirements, and accumulated
16 depreciation balances as of December 31, 2022, and revised
17 forecast for 2023 and 2024 as reflected in the company's MFR's
18 ("Updated Study"). The Updated Study was necessary to align
19 the plant and accumulated depreciation balances in the study
20 with the 2024 projected test year rate base in this rate
21 proceeding. The difference between the 2024 projected test
22 year depreciation expense included in the company's MFR
23 schedules and the 2024 depreciation expense calculated using
24 the rates in the December 28 filing is approximately \$60,000,
25 which is small compared to the company's total proposed 2024

1 depreciation and amortization expense of \$91.2 million.

2

3 **Q.** How did the company forecast depreciation expense for the
4 2024 projected test year?

5

6 **A.** The company calculated the test year depreciation expense by
7 applying the Updated Study's new proposed depreciation rates
8 to the 2024 monthly balances of plant-in-service.

9

10 **Q.** Please discuss how 2024 property tax expense was budgeted.

11

12 **A.** Property tax expense represents payments made by the company
13 to county governments for ad valorem taxes. The projected
14 expense is a function of forecasted tax rates and the
15 projected values that will be used by the counties to assess
16 the company's plant assets. As investment in assets grows,
17 property tax expense also grows. As a result, the company
18 projects that ad valorem property taxes in its base rate
19 revenue requirements will grow from \$13.9 million in 2021
20 (actual) to roughly \$24.5 million in 2024.

21

22 **Q.** Please discuss how income taxes were budgeted.

23

24 **A.** Income tax expense for the test year was computed on a stand-
25 alone basis consistent with the company's last general base

1 rate proceeding and long-standing Commission practice.
2 Projected total income tax expense is a function of forecasted
3 taxable income coupled with the Internal Revenue Service
4 ("IRS") and Florida state tax rules expected to be in place
5 during the test year. As discussed later in my direct
6 testimony, all NOI and capital structure amounts reflect
7 reasonable budget projections, consistent regulatory
8 treatments, and compliance with the normalization
9 requirements of the Internal Revenue Code ("IRC").
10

11 **NET OPERATING INCOME**

12 **Q.** What is the company's projected test year 2024 NOI without
13 rate relief?
14

15 **A.** As shown on MFR schedule G-2, page 1, the company projects
16 its 2024 adjusted NOI to be approximately \$72.3 million.
17

18 **Q.** What accounting treatments or adjustments to the budgeted
19 income statement were made to determine the 2024 projected
20 test year NOI?
21

22 **A.** The company made adjustments consistent with the Commission's
23 rules and previous Commission directives and policies from
24 Peoples' prior base rate proceedings, including the 2020
25 Agreement.

1 **Q.** Please describe the 2020 Agreement accounting treatments and
2 adjustments the company believes continue to be fair to
3 customers and should be consistently applied to determine the
4 company's 2024 projected test year NOI.

5
6 **A.** First, the company agreed to a parent debt adjustment to its
7 income tax expense in the amount of \$2,099,000, which was
8 based on the capital structure of Emera. The company proposes
9 to follow the same methodology in the 2024 projected test
10 year. As reflected in MFR schedule C-26, the proposed parent
11 debt adjustment for 2024 projected test year is \$3,084,000.

12
13 Second, the company increased its Manufactured Gas Plant
14 ("MGP") environmental remediation annual amortization expense
15 to \$1.0 million. The \$1.0 million was determined to be an
16 appropriate amount to be included in annual revenue
17 requirements to accommodate the remaining environmental
18 remediation costs and related costs already expended but not
19 recovered from customers in base rates. As of January 1, 2024,
20 the expected balance of the MGP related regulatory assets is
21 \$18.2 million and the company proposes to continue the
22 inclusion of \$1.0 million of MGP amortization expense in its
23 2024 revenue requirements.

24
25 Third, the company increased its annual storm reserve accrual

1 to \$380,000, which was based on a 10-year history of actual
2 storm costs under the Incremental Cost and Capitalization
3 Approach ("ICCA") methodology. Although the accrual was
4 increased in 2021, the ICCA storm costs related to Hurricane
5 Ian and Hurricane Nicole have exhausted the company's storm
6 reserve. As of December 31, 2022, the storm reserve is
7 reflected on the company's books as a regulatory asset balance
8 of \$746,638. In lieu of requesting Commission approval for a
9 storm surcharge, as the company did with Hurricane Michael,
10 the company proposes to increase its annual storm reserve
11 accrual in this general rate proceeding to \$500,000.

12
13 Fourth, the company was allowed to use reserve accounting for
14 its Transmission Integrity Management Program ("TIMP")
15 spending and record a levelized annual expense in the amount
16 of \$1,437,475. Any difference between the actual cumulative
17 spending and cumulative expense accrual was to be reflected
18 as a regulatory asset or liability, as appropriate. The basis
19 for this adjustment was the projected volatility in annual
20 TIMP related spending from year to year depending on timing
21 of required transmission pipeline inspections. By January 1,
22 2024, the company projects that a regulatory asset of \$683,712
23 will be recorded on Peoples' books in accordance with the
24 2020 Agreement, reflecting cumulative TIMP costs from 2021 to
25 2023 of \$4,996,137 and cumulative accruals during that period

1 of \$4,312,425.

2
3 With TIMP spending volatility projected to continue, the
4 company proposes to continue reserve accounting treatment and
5 accrue a levelized TIMP expense, with any difference between
6 the actual cumulative spending and cumulative expense accrual
7 continuing to be reflected as a regulatory asset or liability.
8 Summing the \$2,312,000 of projected TIMP costs over the 2024-
9 2026 period and the projected regulatory asset balance of
10 \$683,712 as of January 1, 2024, results in a total of
11 \$2,995,712. Using the total of \$2,995,712 spread over a three-
12 year period, the company proposes a levelized accrual expense
13 of \$998,571 starting in the 2024 projected test year revenue
14 requirements, which is a decrease of \$438,904 from the 2020
15 Agreement.

16
17 Fifth, the company was allowed to record non-capitalizable
18 software implementation costs as a regulatory asset and
19 amortize the costs over a five-year period. As of December
20 31, 2022, the actual amount of non-capitalizable software
21 implementation costs recorded as a regulatory asset is
22 \$468,318. The projected cumulative amount of non-
23 capitalizable software implementation costs through 2024 is
24 \$773,018. In the 2024 projected test year, the company
25 proposes to continue the accounting treatment for non-

1 capitalizable software implementation costs and amortize the
2 associated regulatory asset over a five-year period. The 2024
3 projected test year reflects \$154,604 (\$773,018 over five
4 years) of annual amortization of the regulatory asset
5 associated with non-capitalizable software implementation
6 costs.

7
8 Sixth, the company was required to amortize its rate case
9 expense over a three-year period. In determining the 2024
10 projected test year NOI, the company also proposes to use a
11 three-year amortization period of rate case expense.

12
13 **Q.** Is an annual storm expense accrual of \$500,000 reasonable?

14
15 **A.** Yes. The proposed increase in the annual accrual to \$500,000
16 is based on (i) a 10-year history of ICCA storm costs updated
17 through 2022 as shown in Document No. 7 of my exhibit, which
18 is the same methodology used in determining the storm reserve
19 accrual included in the 2020 Agreement, and (ii) the 2022
20 Storm Damage Self-Insurance Reserve Study filed with the
21 Commission in 2022 ("2022 Study"), which is also included in
22 Document No. 7 to my exhibit.

23
24 The 2022 Study assumed the current annual reserve accrual of
25 \$380,000 and determined Peoples expected annual storm cost to

1 be \$364,000 with a 22 percent chance of exceeding \$400,000 in
2 any year. After completion of the 2022 Study, Peoples
3 distribution system was impacted by Hurricane Ian on
4 September 28, 2022, and Hurricane Nicole on November 10, 2022.
5 The 10-year analysis included in Document No. 7 of my exhibit
6 includes the 2022 ICCA cost of Hurricane Ian and Nicole that
7 are still under review.

8
9 **Q.** What level of rate case expense and amortization does the
10 company propose in this case?

11
12 **A.** As reflected in MFR schedule C-13, the company has projected
13 \$3.25 million of rate case expense. Using a proposed three-
14 year amortization period results in \$1,082,603 of annual
15 amortization expense. The estimated \$3.25 million of rate
16 costs reflects the assumption that the full general rate
17 proceeding process will be conducted, whereas in the
18 company's prior general rate proceeding a settlement was
19 reached before the Commission hearing, which saved the
20 company considerable rate case expense. The company believes
21 that this level of rate case expense is reasonable given the
22 size of the company, the complexity of this case, its need
23 for support from outside attorneys and consultants, and the
24 current legal uncertainty surrounding whether and how
25 contested cases can be settled and approved by the Commission.

1 **Q.** Please describe the Tax Reform provisions in the 2020
2 Agreement.

3
4 **A.** The 2020 Agreement included a provision to address potential
5 changes in the rate of taxation of corporate income -
6 increases or decreases - by federal or state taxing
7 authorities ("Tax Reform"). Section 8, paragraphs (a)-(f) of
8 the 2020 Agreement set forth processes that would go into
9 effect should Tax Reform be enacted that address: (1)
10 quantifying the impact of such Tax Reform on the company's
11 NOI; (2) impacts from a tax rate decrease; (3) impacts from
12 a tax rate increase; and (4) the treatment of excess
13 accumulated deferred income taxes ("ADIT").

14
15 **Q.** Is the company proposing to continue the Tax Reform provisions
16 of the 2020 Agreement as part of this base rate proceeding?

17
18 **A.** Yes. The company proposes that the Commission approve, as
19 part of this proceeding, the continued use of the Tax Reform
20 provisions contained in Section 8, paragraphs (a)-(f), of the
21 2020 Agreement. While the company does not have a specific
22 expectation that Tax Reform will occur after this proceeding
23 is complete, the company believes the processes outlined in
24 these provisions will allow the company and the Commission to
25 efficiently address Tax Reform should it occur and believes

1 that these provisions continue to be in the best interest of
2 the customers and the company.

3
4 **Q.** Was Tax Reform enacted following Commission approval of the
5 2020 Agreement?

6
7 **A.** Yes. The Florida corporate income tax rate changed from 4.458
8 percent to 3.535 percent for 2021 and then back to 5.5 percent
9 for taxable years beginning on or after January 1, 2022 (the
10 "State Tax Rate Change"). Peoples used the 2021 and 2022
11 Forecasted Earnings Surveillance Reports to calculate the
12 impact of the tax rate change and petitioned the Commission
13 to allow the adjusted NOI impacts on annual revenue
14 requirements to be offset and addressed in the company's
15 CI/BSR. In Order No. PSC-2022-0134-PAA-GU ("2022 State Tax
16 Order") issued on April 11, 2022 in Docket No. 20220018-GU,
17 the Commission approved the company's proposal to pass a net
18 revenue requirement increase of \$253,079 through the CI/BSR.

19
20 **Q.** How did the State Tax Rate Change impact the company in 2023?

21
22 **A.** For 2023, the NOI and revenue requirement is impacted by the
23 same tax rate increase that impacted its 2022 NOI. This tax
24 rate increase triggers Section (8), paragraph (d) of the 2020
25 Agreement, which requires the company to "defer the revenue

1 requirement impacts to a regulatory asset." Accordingly, the
2 company recorded a regulatory asset of approximately \$1.2
3 million for the 2023 revenue requirement impacts and is
4 seeking recovery of this regulatory asset in this general
5 base rate proceeding. The company's calculation of the 2023
6 NOI impact is consistent with the 2021 and 2022 NOI impact
7 calculations contained within the 2022 State Tax Order.
8

9 **Q.** Over what period is the company proposing to amortize the
10 \$1.2 million regulatory asset related to the 2023 NOI impact?
11

12 **A.** The company proposes to amortize the \$1.2 million regulatory
13 asset over a three-year period, resulting in a 2024 projected
14 test year revenue requirement increase of approximately
15 \$400,000. Section 8, paragraph (d) of the 2020 Agreement
16 provides that such regulatory asset may be considered for
17 "prospective recovery" in the company's next base rate
18 proceeding, and the proposed three-year recovery period is
19 consistent with the length of term of the 2020 Agreement.
20

21 **Q.** How did the State Tax Rate Change impact the company's ADIT?
22

23 **A.** As a result of the 5.5 percent state tax rate increase, and
24 in accordance with Rule 25-14.013(4), Florida Administrative
25 Code, the company performed the required revaluation of its

1 ADIT. This reevaluation created deficient deferred taxes of
2 approximately \$4.6 million, which Peoples recorded as a
3 credit to ADIT with a corresponding debit to a regulatory
4 asset. Establishing a regulatory asset related to the tax
5 reform revaluation of ADIT and resulting "Excess or Deficient
6 Deferred Taxes" conforms with Section 8 of the 2020 Agreement.
7

8 **Q.** Does the company seek to recover the \$4.6 million regulatory
9 asset related to the deficient deferred taxes in this base
10 rate proceeding?
11

12 **A.** Yes. Section 8, paragraph (e) of the 2020 Agreement provides
13 that "if the cumulative net regulatory asset or liability is
14 less than \$10 million, the flow-back period will be five
15 years." Thus, the company seeks recovery of the \$4.6 million
16 regulatory asset over a five-year period in conformity with
17 the 2020 Agreement. The 2024 projected test year revenue
18 requirement is increased by approximately \$900,000 due to the
19 flow back to customers of the deficient deferred tax.
20

21 **Q.** What impact does the proposed depreciation rates in the
22 Updated Study supported by Watson have on the 2024 projected
23 test year depreciation expense?
24

25 **A.** The company proposes that its new depreciation rates be placed

1 in effect as of January 1, 2024, consistent with its proposal
2 for the effective date of the new customer rates and charges
3 resulting from this case. Based on this proposal, the impact
4 of the new depreciation rates on the 2024 projected test year
5 NOI is an increase in depreciation expense of approximately
6 \$7.8 million. This amount excludes the impact of vehicle
7 related depreciation that is charged through a transportation
8 cost allocation to O&M expense and capital expenditures,
9 which is an additional \$0.8 million.

10
11 **Q.** Has the company had any gains or losses on the disposition of
12 plant or property that is being amortized in the 2024
13 projected test year?

14
15 **A.** Yes. As shown on MFR schedule C-16, the company had three
16 transactions resulting in a net gain on disposition of plant
17 or property. As shown on MFR schedule G-2, page 1, the
18 company has included \$495,917 of amortized net gain on sale
19 in the 2024 projected test year. The net gain on sale of plant
20 or property is being amortized over a four-year period in
21 accordance with page 7 of Commission Order No. 2003-0038-FOF-
22 GU, issued on January 6, 2003, in Docket No. 20020384-GU.

23
24 **Q.** What amount of off-system sales margin did the company include
25 in the 2024 projected test year to determine NOI?

1 **A.** As supported by company witness Rutkin, the company has
2 budgeted approximately \$2.5 million of off-system sales
3 ("OSS") net revenues in 2024. This assumes retaining the
4 sharing mechanism that has been in place since its 2008 base
5 rate proceeding, with 25 percent of OSS net revenues being
6 retained by the company and 75 percent going to offset
7 expenses recovered through the Purchased Gas Adjustment
8 ("PGA") clause.

9
10 **Q.** Does the company have any other new sources of operating
11 revenue included in the 2024 projected test year?

12
13 **A.** Yes. As explained in the direct testimony of witness Rutkin,
14 Peoples has invested in the Alliance Dairies RNG project that
15 creates environmental credits that can be sold to third
16 parties. The projected environmental credits of \$5.7 million
17 from the Alliance Dairies RNG project have been included as
18 a source of Other Revenue for the company and are included in
19 MFR schedule G-2, page 8, line number 256. In addition, the
20 Alliance Dairies RNG project assets have been included in the
21 projected 2024 projected test year rate base and the related
22 operating expenses have been included in the determination of
23 NOI.

24
25 **Q.** Does the company expect that the Alliance Dairies RNG project

1 operating revenues will support the related revenue
2 requirements?

3

4 **A.** Yes. The Alliance Dairies RNG project related operating
5 revenues included in the 2024 projected test year do support
6 the related 2024 revenue requirements.

7

8 **Q.** Are there any other RNG facility related revenues included in
9 Other Revenue in MFR schedule G-2, page 8?

10

11 **A.** Yes. There is approximately \$4.0 million of RNG tariff revenue
12 included in Other Revenue on MFR schedule G-2, page 8 that is
13 related to the Brightmark RNG facility, which is discussed in
14 the direct testimony of witness Rutkin. This RNG facility is
15 effectively being leased to Brightmark under the company's
16 RNG tariff over a 15-year term starting in 2023 and the
17 related revenues are being recorded in FERC Account 412,
18 Revenues from gas plant leased to others. On December 15,
19 2022, the company petitioned the Commission to establish a
20 depreciation rate with a 15-year life for the Brightmark
21 assets. That petition was assigned Docket No. 20220212-GU.
22 Witness Watson explains why the company's proposed
23 depreciation rate for the Brightmark assets is reasonable in
24 his prepared direct testimony.

25

1 **BASE REVENUE**

2 **Q.** How did the company develop the 2024 base revenue forecasts
3 for residential and small commercial customer classes?

4
5 **A.** The base revenues were developed using a model with inputs
6 from witness Fox. The inputs to this model were:

7
8 1. The most recent approved tariff rate schedules of customer
9 charges and per-therm distribution charges;

10 2. Forecasted customers from the regression models discussed
11 in witness Fox's prepared direct testimony;

12 3. Forecasted therms-per-customer from the regression models
13 discussed in witness Fox's prepared direct testimony;

14 4. Forecasted customers and therms from non-regression
15 techniques discussed in witness Fox's prepared direct
16 testimony; and

17 5. Billing determinate allocation factors.

18
19 The revenue model inputs one through four are discussed
20 further in witness Fox's direct testimony. The fifth input,
21 the billing determinant factors, represent the percentage of
22 customers and therms to allocate to each rate schedules.

23
24 The Residential class has 10 rates schedules: Residential
25 Service (RS) 1-3; Residential General Service (RGS) 1-3;

1 Natural Choice Transportation Residential General Service
2 (GST) 1-3; and Residential Standby Generator (RS-SG). The
3 Small Commercial class has eight rates schedules: Small
4 General Service (SGS); Natural Choice Transportation Small
5 General Service (SGTS); General Service (GS) 1-3; and Natural
6 Choice Transportation General Service (GST) 1-3.

7
8 Once the customers and therm consumption were allocated to
9 all the rate schedules, the customer charges and distribution
10 per-therm charges were applied and totaled to arrive at base
11 revenues.

12
13 **Q.** How did the company develop billing determinant allocation
14 factors for each service area?

15
16 **A.** The first step was to calculate the historical factors (e.g.,
17 the percentage of total residential class customers that are
18 in the RS1 rate schedule, RS2, etc.).

19
20 Next, the trend in these percentages was analyzed for each
21 rate schedule in each service area. The trend was extended
22 into the future based on average change rates. For example,
23 if the historical trend was declining percentages, the
24 projected year continued the decline based on the historical
25 rate of change.

1 Q. How did the company develop the 2024 base revenue forecasts
2 for larger commercial and industrial classes?

3

4 A. Revenues for the larger commercial and industrial classes
5 were forecasted at the customer level as discussed in witness
6 Rutkin's prepared direct testimony.

7

8 Q. What are total base revenues in the 2024 projected test year
9 based on current rates?

10

11 A. Based on current rates, base revenues are expected to be
12 approximately \$325.0 million in the 2024 projected test year.
13 Document No. 3 of my exhibit shows base revenues by customer
14 class, OSS margin and other operating revenues included in
15 adjusted NOI for years 2021 through 2024.

16

17 Q. Are the company's forecasts of 2024 base revenues are
18 appropriate and reasonable?

19

20 A. Yes. The customer and them forecasts for residential and
21 small commercial customers are reasonable as discussed in
22 witness Fox's prepared direct testimony. The residential and
23 small commercial billing determinates are reasonable and the
24 tariff rates are accurately applied in the revenue model. The
25 customer specific usage and revenue forecasts for the larger

1 commercial and industrial customers are based on customer
2 specific evaluations and are reasonable. Therefore, the
3 forecasts of base revenues in the 2024 projected test year
4 are appropriate and reasonable.

5
6 **OPERATIONS & MAINTENANCE EXPENSE**

7 **Q.** What functions comprise Peoples' O&M expense and what
8 witnesses are supporting the company's O&M expense?

9
10 **A.** Peoples classifies its O&M expense into FERC designated
11 functions including Distribution, Customer Accounts, Sales
12 and Administrative and General ("A&G") Expense. In addition,
13 the company has O&M expenses related to FERC accounts 413 and
14 407 that the company designates as "Other" O&M expense.

15
16 Peoples' Distribution and other O&M expense related to its
17 leased CNG station and Alliance Dairies RNG project plus a
18 portion of A&G expenses are supported by direct testimony
19 from witnesses O'Connor and Richard.

20
21 Customer Accounts and Sales O&M expense is supported by direct
22 testimony from witness Sparkman.

23
24 A&G costs classified in FERC account 926 (Employee pension
25 and benefits) and FERC Account 920 (Administrative & General

1 Salaries) are supported by witness Bluestone in her direct
2 testimony.

3
4 My direct testimony primarily supports the company's
5 remaining A&G O&M expenses (including affiliate charges), bad
6 debt expense and FERC account 407 regulatory debits and
7 credits.

8
9 **Q.** Has Peoples analyzed overall O&M expense since the last
10 general base rate proceeding in comparison to the 2022
11 historical base year?

12
13 **A.** Yes, we have analyzed the company's 2022 historical base year
14 O&M expense using the "O&M benchmark" approach the Commission
15 uses to analyze the growth of adjusted O&M expense as compared
16 to customer-growth and the CPI inflationary measures
17 published by the U.S. Bureau of Labor Statistics.

18
19 The adjusted O&M expense for the 2022 historic base year was
20 \$122.4 million, which is \$18.2 million below a calculated
21 benchmark of \$140.6 million. The favorable variance amounts
22 by functional area are detailed on MFR schedule C-34. The
23 favorable variance compared to the benchmark reflects the
24 company's efforts in 2022 to contain costs and slow the
25 decline of its ROE in an environment that included 40-year

1 high inflation and strong demand for natural gas service with
2 customer growth at nearly 5 percent. I demonstrate that the
3 company's proposed 2024 O&M expense levels are below the 2024
4 benchmark later in my direct testimony.

5
6 **Q.** How did Peoples develop its 2023 and 2024 O&M expense budget?
7

8 **A.** The company prepared its 2023 and 2024 O&M expense budgets
9 using the detailed annual income statement budget process I
10 described earlier in my direct testimony. In addition to its
11 detailed O&M expense budget, and as shown in MFR schedule G-
12 2, pages 12 through 19, the company calculated 2023 and 2024
13 O&M expenses by FERC account using the "trending methodology"
14 prescribed by the Commission, adjusting for certain items
15 where trend factors did not capture the projected changes in
16 O&M expense. The comparison of the two O&M methodologies is
17 shown on Document No. 4 of my exhibit.
18

19 **Q.** How does the detailed 2023 and 2024 O&M budget compare with
20 the trended FERC O&M budget data on MFR schedule G-2, pages
21 12-19?
22

23 **A.** There are only small differences. As shown in Document No. 4
24 of my exhibit, the difference or unreconciled amount between
25 the detailed 2023 and 2024 O&M budgets and the 2023 and 2024

1 FERC O&M budget data on MFR schedule G-2, page 18b is
2 approximately \$48,000 and \$11,000, respectively. Relative to
3 total 2024 O&M expense of \$151.0 million, this is a difference
4 of less than 0.1 percent. The differences are reflected as a
5 line item labeled "Unreconciled budget items" in FERC Account
6 930.2 on MFR schedule G-2, page 18a. As a result of reflecting
7 the small unreconciled budget items in FERC account 930.2,
8 the total FERC O&M calculated using trending on MFR schedule
9 G-2 for 2023 and 2024 equals the detailed 2023 and 2024 O&M
10 budgets, or approximately \$130.0 million for 2023 and \$151.0
11 million for 2024.

12
13 **Q.** What trending factors were used in Schedule G-2, pages 12-19
14 to develop the 2023 and 2024 O&M expense amounts?
15

16 **A.** Consistent with the company's prior rate proceedings, Peoples
17 used the trending factors of payroll only, customer-growth
18 plus inflation, and inflation only. For inflation, the
19 company used Moody's Analytics 2023 and 2024 forecast for the
20 CPI-U, which was 2.8 percent and 2.2 percent for 2023 and
21 2024, respectively, as compared to the 40-year high inflation
22 rate experienced in 2022 of 8.0 percent as shown on MFR
23 schedule C-37. In addition, as discussed in the direct
24 testimony of company witness Dr. Richard K. Harper, inflation
25 has been persistently high, and the labor market has remained

1 very tight despite the Federal Reserve's efforts to moderate
2 them by raising interest rates. The company used a 5.0 percent
3 annual increase for 2023 and 2024 payroll or labor cost
4 trending, which is supported by the direct testimony of
5 witness Bluestone.

6
7 **Q.** What inflation assumptions were used to forecast O&M expenses
8 for 2023 and 2024?

9
10 **A.** The company used Moody's inflation forecast of 2.8 percent
11 and 2.2 percent for 2023 and 2024, respectively.

12
13 **Q.** Did Moody's change its inflation forecast for 2023 and 2024
14 since Peoples prepared its 2023 and 2024 budgets?

15
16 **A.** Yes. Moody's most recent projections for CPI-U for 2023 and
17 2024 have increased to 3.6 percent and 2.4 percent,
18 respectively. Consistent with Moody's recent increase in its
19 CPI-U forecast, the State's National Economic Estimating
20 Conference recently increased their 2023 and 2024 CPI-U
21 forecast from 3.3 percent and 1.9 percent (July 2022) to 4.0
22 percent and 2.3 percent (February 2023), respectively.
23 Peoples has not updated its 2023 and 2024 O&M expense budgets
24 to reflect these higher inflation indices, so the lower
25 inflation indices used by Peoples for 2023 and 2024, and the

1 expense levels trended using the lower indices, can be
2 considered conservative.

3
4 **Q.** Does Peoples' 2023 and 2024 O&M expenses include affiliate
5 charges from Tampa Electric and Emera?

6
7 **A.** Yes. Peoples' O&M expense includes charges for various shared
8 services provided by Tampa Electric. These shared service
9 costs are included in A&G FERC account 930.2 on MFR schedule
10 G-2, page 18a. The services received are primarily corporate
11 shared services consisting of information technology,
12 telecommunications, payroll processing, team member benefits,
13 treasury, tax support, legal services, risk management, real
14 estate, regulatory support, procurement, facility services
15 and rent. Expenses are charged to Peoples at cost pursuant to
16 the TECO Energy Cost Allocation Manual.

17
18 Costs are either charged as direct costs charged to an
19 affiliate ("Direct Charges"); indirect costs for services
20 assessed to more than one affiliate using one or more formulas
21 for assessment ("Assessed Charges"); or allocated to multiple
22 affiliates ("Allocated Charges") using a variant of the
23 Modified Massachusetts Method ("MMM"). This MMM for Allocated
24 Charges has been consistently applied since Peoples became
25 part of TECO Energy in 1997 and is consistent with the

1 methodology employed during the company's last several base
2 rate proceedings. No cost is allocated or assessed twice to
3 any affiliate. The methodology for allocating the costs for
4 shared services to Peoples in the 2023 and 2024 budgets is
5 consistent with the methodology used in 2022 actual costs.

6
7 **Q.** What are the amounts of MMM Allocated Charges received by
8 Peoples in the 2022 historical base year and 2024 budget?

9
10 **A.** As shown in Document No. 4 of my exhibit, Peoples received
11 \$4.06 million of MMM Allocated Charges in 2022, as compared
12 to \$4.18 million MMM Allocated Charges budgeted for 2024,
13 which is an increase reflecting the company's 2023 and 2024
14 budget inflation assumptions discussed earlier in my direct
15 testimony. The 2024 amount is a small increase over the 2022
16 amount and is reasonable.

17
18 **Q.** Are there any other charges received from Tampa Electric?

19
20 **A.** Yes. Peoples is charged a fee related to the depreciation
21 expense allocated from Tampa Electric for usage of shared
22 software systems. The charge is reflected in the accounting
23 records of Peoples as an O&M "asset-usage fee".

24
25 The largest asset usage fee received from Tampa Electric is

1 the company's shared SAP customer relationship management and
2 billing system ("CRMB"). Although the CRMB system is shared
3 with Tampa Electric, all of the asset is recorded on Tampa
4 Electric's books and Peoples is charged an asset-usage fee
5 for using the system to manage Peoples' customer accounts.
6 Peoples' portion of the depreciation expenses is based on the
7 approximate ratio of Peoples customers to the total Peoples
8 and Tampa Electric combined customers.

9
10 The asset-usage fee related to the CRMB system is charged to
11 FERC account 903. The CRMB asset-usage fee was approximately
12 \$2.2 million in 2022 and is budgeted to be approximately \$2.3
13 million in 2024. Asset-usage fees related to shared systems
14 other than CRMB are charged to A&G FERC account 930.2 and are
15 projected to increase from \$0.9 million in 2022 to \$1.2
16 million in 2024. The asset usage fees for 2024 from Tampa
17 Electric are only slightly higher than the actual amounts in
18 2022 and are reasonable.

19
20 **Q.** Does the company receive charges from its indirect owner,
21 Emera?

22
23 **A.** Yes. The company directly receives Assessed Charges from
24 Emera for certain corporate and strategic support services,
25 shared subscriptions, shared software license fees, and

1 charges for certain Emera executives' participation on the
2 company's Board of Directors. The corporate support includes
3 Sarbanes-Oxley compliance oversight, safety oversight, cyber
4 & general security oversight, environmental policy and
5 programs governance, and corporate-wide human resource and
6 health promotion initiatives. In addition to the direct
7 Assessed Charges from Emera, Peoples receives Allocated
8 Charges from Emera for corporate governance and strategic
9 support. Charges are also received from Emera for seconded
10 team members working directly for Peoples.

11
12 **Q.** What are the total Assessed Charges and Allocated Charges
13 received from Emera in the 2022 historical base year and the
14 2024 projected test year?

15
16 **A.** The amount of Assessed Charges and Allocated Charges from
17 Emera is approximately \$0.7 million in both the 2022
18 historical base year and the 2024 projected test year. All
19 costs received by Peoples from Emera are included in A&G FERC
20 account 930.2 on MFR schedule G-2, page 18a. The 2024
21 projected amount is reasonable.

22
23 **Q.** Will the 2023 Transaction described in the direct testimony
24 of witness Wesley have a material impact on the level of
25 affiliate and parent costs allocated or otherwise assigned to

1 Peoples in the 2024 projected test year?

2

3 **A.** Except for a slight increase in independent auditor expenses,
4 Peoples does not expect the 2023 Transaction to have a
5 material impact on the level of affiliate and parent costs
6 allocated or otherwise assigned to Peoples in the 2024
7 projected test year.

8

9 **Q.** Did Peoples make an adjustment to allocate Peoples' A&G
10 expenses for 2024 between the utility and any non-utility
11 affiliates?

12

13 **A.** Yes. Consistent with the company's prior base rate
14 proceeding, Peoples charges a portion of its corporate A&G
15 expenses to its non-utility affiliates. The A&G charges from
16 Peoples to the non-utility affiliates are based on budgeted
17 expense for the year and are determined based on an allocation
18 methodology using net revenues, payroll, and gross plant in
19 service, in order to calculate a weighted average allocation
20 factor for each entity. Because the A&G charges to the non-
21 utility affiliates are reflected as credits in the actual
22 per-books expenses, no further adjustment is required. MFR
23 schedule C-6 shows the amount of A&G (and other) expenses
24 that have been allocated.

25

1 **Q.** You mentioned that certain O&M expense items were not
2 projected using the trending factors. How are those items
3 reflected on Schedule G-2, pages 12-19?
4

5 **A.** Replacement of vacant positions and adding new positions are
6 reflected on "Payroll not trended" lines on MFR schedule G-
7 2, pages 12-19. In addition, certain non-payroll related O&M
8 expense items do not follow the inflation and customer growth
9 trend factors. In those cases, the company used the "Other
10 not trended" lines on MFR schedule G-2, pages 12-19 to reflect
11 O&M expense amounts for items that were not calculated using
12 a trending factor.
13

14 **Q.** What is the impact on 2023 and 2024 O&M expenses from adding
15 replacement and new payroll positions at Peoples?
16

17 **A.** As shown on MFR schedule G-2, page 18b, the "Payroll not
18 trended" total O&M expense that reflects the replacement and
19 added PGS payroll positions in 2023 and 2024 is approximately
20 \$1.55 million and \$7.66 million, respectively. As reflected
21 in the detail by FERC account on MFR schedule G-2, pages 19c-
22 19e, this represents 90 positions to be filled by the end of
23 2023, largely in November, and another 64 positions to be
24 filled in 2024. The payroll costs for many of these positions
25 are not all charged to O&M expense and the O&M expense impact

1 per headcount added can vary greatly depending on the
2 position. These positions are discussed further by the
3 witnesses indicated on MFR schedule G-2, pages 19c-19e.
4

5 **Q.** Does filling some of these payroll positions at Peoples have
6 any offsetting reductions in 2024 O&M expense levels?
7

8 **A.** Yes. As an example, the new supply chain related positions at
9 Peoples replace some of the procurement services previously
10 provided by Tampa Electric. In the 2024 projected test year,
11 the procurement allocation from Tampa Electric is budgeted to
12 decrease by over \$450,000 from 2022 historical base year
13 costs, which is reflected in the Other not trended amount for
14 FERC account 930.2 and discussed in direct testimony of
15 witness Richard. In addition, in the distribution operations
16 area, some of the new positions added will offset contractor
17 costs, which is reflected in the Other not trended amount for
18 FERC account 874 and discussed in direct testimony of witness
19 O'Connor.
20

21 **Q.** Has the company included a listing of the "Other not trended"
22 items included in MFR schedule G-2, pages 12-19?
23

24 **A.** Yes. Consistent with the listing of Payroll not trended items,
25 the company has included a listing of the Other not trended

1 items by account in MFR schedule G-2, page 19b. The name of
2 the witnesses supporting each Other not trended item in direct
3 testimony is indicated on MFR schedule G-2, page 19b.

4
5 **Q.** Please summarize the components of the O&M expense increase
6 from the adjusted 2022 base year to 2024 projected test year
7 reflected on MFR schedule G-2, pages 12-19.

8
9 **A.** The primary components of the \$28.4 million increase in O&M
10 expense from the adjusted 2022 base year to the 2024 projected
11 test year on MFR schedule G-2, pages 12-19 are as follows:

12

13	Payroll	
14	(trended 5.0 percent/5.0 percent)	\$4.6 million
15	Inflation	
16	(trended 2.80 percent/2.20 percent)	2.5 million
17	Customer Growth	
18	(trended 3.81 percent/3.23 percent)	2.0 million
19	Position replacements and additions	7.7 million
20	Alliance RNG Project (direct budget)	4.0 million
21	Other not trended (direct budget)	<u>7.5 million</u>
22	Total	\$28.4 million

23

24 **Q.** Please explain the "not trended" O&M expense items on MFR
25 schedule G-2, pages 19b-19e that are assigned to you.

1 **A.** Below is a description by FERC account of the not trended O&M
2 expense items I am supporting.

3
4 FERC Account 904 - Uncollectible Accounts - The 2024 bad debt
5 expense of approximately \$1.6 million was based on the four-
6 year average write-off percentage. This approach is
7 consistent with that used in the company's last general base
8 rate proceedings.

9
10 FERC Account 912 - Demonstrating and Selling Expenses - The
11 Other not-trended amount reflects the cost of marketing
12 services provided to Peoples by its subsidiary TECO Partners,
13 Inc.

14
15 FERC Account 920 - Administrative and General Salaries - As
16 shown on MFR schedule G-2, page 19e, eight positions and
17 approximately \$770,000 of O&M expense are related to
18 additional labor resources needed in the finance area. Three
19 of the eight positions fill vacancies. The Treasury Analyst
20 position is needed to support new requirements related to
21 Peoples' independent financings that are discussed in witness
22 Kenneth D. McOnie's direct testimony. The Manager, Commercial
23 Investments and Analyst positions are needed to provide
24 financial and project evaluation support to the opportunities
25 being explored by the company's Gas Supply and Development

1 team to add large customers to the system and increase RNG
2 and LNG related revenues. The two Co-Op positions provide the
3 company a potential pipeline of talent for filling entry level
4 finance positions and developing future leaders.

5
6 FERC Account 921 - Office Supplies and Expense - The not
7 trended increases in this account from 2022 to the 2024
8 projected test year of approximately \$1.15 million is related
9 to expected increases in team member expenses and office
10 supplies expense related to the additional positions listed
11 on MFR schedule G-2, page 19c-19e.

12
13 FERC Account 922 - Administrative expense transferred - The
14 budgeted amount of A&G expense transferred to construction
15 costs in 2024 is equal to the \$11.0 million transferred in
16 2022.

17
18 FERC Account 923 - Outside Service Employed - The Other not
19 trended decrease in this account from 2022 to 2024 of about
20 \$270,000 is primarily driven by \$772,000 of legal expenses
21 incurred in 2022 that are not expected to be incurred in 2024
22 and lower strategy consulting costs in 2024 compared to 2022.
23 These decreases are partially offset by increased financial
24 statement audit fees associated with Peoples' independent
25 financing efforts discussed in witness McOnie's direct

1 testimony, and higher information technology ("IT")
2 contractor costs in 2024 related to Peoples' work and asset
3 management system discussed in witness Richard's direct
4 testimony.

5
6 FERC Account 924 - Property Insurance - The Other not trended
7 for this account includes the expense recognition for storm
8 costs. As discussed earlier in my direct testimony, the
9 company is proposing to increase the annual accrual for the
10 storm reserve from \$380,000 to \$500,000 in the 2024 projected
11 test year.

12
13 FERC Account 925 - Injuries and Damages - Injuries and Damages
14 ("I&D") expense includes the liability insurance premium
15 costs and the self-insured or deductible component of legal
16 claims, including adjustments to the I&D reserve for the self-
17 insured portion of claims incurred but not paid. Legal fees
18 related to claims and a portion of the company's damage
19 prevention efforts are also included in FERC account 925.
20 Regarding general-liability exposure, the company maintains
21 a \$1 million self-insurance or deductible limit.

22
23 To determine the claims and related legal expenses in the
24 2023 and 2024 budgets, the company factored in the past five
25 years' actual I&D-related expense activity included in FERC

1 account 925. Over this period, the dollar value of claims
2 incurred, legal expenses and I&D reserve adjustments have
3 fluctuated significantly, so an approximate average over the
4 five-year period was determined. The 2024 budget for I&D-
5 related expense is approximately \$0.5 million lower than 2022
6 actuals due to a higher-than-average amount of expense
7 recognition in 2022, which was primarily due to settlement of
8 I&D claims recognized in legal expenses are offset by
9 associated reductions in the I&D reserve.

10
11 The 2024 budgeted insurance costs included in FERC account
12 925 were based on premium estimates from the company's outside
13 insurance broker, Marsh. Marsh's estimates reflect continued
14 increases in insurance premiums due to tight insurance market
15 conditions resulting from deteriorating industry claims
16 experience and Peoples' own claims experience. In December
17 2021, the company increased its total liability insurance
18 limits of coverage from \$355 million to \$400 million. This
19 increase and other prior increases in coverage limits have
20 been made in response to the higher frequency of severe
21 industry loss events. Marsh's estimates for total insurance
22 premiums and fees reflects an increase from approximately
23 \$6.0 million in 2022 to \$7.0 million and \$7.9 million in 2023
24 and 2024, respectively.

25

1 FERC Account 928 - Regulatory Commission Expense - The non-
2 trended increases in this account from 2022 to the 2024
3 projected test year of approximately \$0.7 million is related
4 to the higher rate case expense projected for this general
5 base rate proceeding as compared to the lower amount related
6 to the settled prior base rate proceeding, which I discussed
7 earlier in my direct testimony.

8
9 FERC Account 930.2 - Miscellaneous General Expense - This
10 account includes the cost of labor and expenses incurred in
11 connection with the general management of the utility not
12 provided for elsewhere, including general expenses which
13 apply to the utility as a whole. As previously mentioned,
14 this includes shared services and overhead allocations from
15 Tampa Electric and Emera.

16
17 The increase in account 930.2 Other not trended of
18 approximately \$4.6 million is primarily due to the addition
19 of \$4.0 million of O&M expense related to the Alliance Dairies
20 RNG project discussed in the direct testimony of witness
21 O'Connor, and higher software maintenance costs discussed in
22 witness Richard's direct testimony. The remaining Other not
23 trended increases from 2022 to 2024 relate to (i) increased
24 financial credit rating fees associated with Peoples'
25 independent financing efforts discussed in direct testimony

1 of witness McOnie, (ii) amortization of the previously
2 discussed non-capitalizable software implementation cost
3 related regulatory asset authorized by the Commission in the
4 2020 Agreement, and (iii) higher non-CRMB asset usage fees.
5 These increases are partially offset by lower legal expenses
6 expected in 2024 as compared to 2022 and decreases in
7 procurement shared services costs from Tampa Electric, which
8 witness Richard also explains in his direct testimony.

9
10 FERC Account 407 - Regulatory Debits and Credits - As
11 discussed earlier in my direct testimony, the state Tax Reform
12 impacted Peoples' NOI in 2022 and 2023. The company used
13 account 407.4 Regulatory Credits in those years to neutralize
14 the state Tax Reform impacts on NOI. Starting in 2024, the
15 company proposes to recover the approximate \$1.2 million
16 regulatory asset related to 2023. The NOI impact of the state
17 Tax Reform over three years is reflected in account 407.3
18 Regulatory Debits. The FERC account 407 amounts related to
19 state Tax Reform are reflected as an "Other Expense" in O&M
20 and are included in determining the company's NOI.

21
22 **Q.** Have you performed any analysis to support the reasonableness
23 of the 2024 projected test year O&M expense?

24
25 **A.** Yes. As shown in Document No. 5 of my exhibit, I have

1 calculated an O&M benchmark comparison by function for 2024
2 using the Commissions methodology applied on MFR schedules C-
3 34 and C-37 that consider customer growth and inflation. In
4 other words, I performed the same calculations as those MFR
5 schedules, but I did so through 2024 using the company's 2023
6 and 2024 budget assumptions for customer growth and
7 inflation. The resulting O&M compound multiplier through 2024
8 is 1.4792 and the 2024 O&M benchmark is \$158.4 million, which
9 is \$7.4 million higher than the company's 2024 adjusted O&M
10 of \$151.0 million. This supports that the company's 2024 O&M
11 expense levels are reasonable.

12
13 **RATE BASE**

14 **Q.** What is the company's 2024 projected test year 13-month
15 average adjusted rate base?

16
17 **A.** Peoples' 13-month average adjusted rate base for the 2024
18 projected test year is projected to be \$2,366.8 million as
19 detailed on page 1 of MFR schedule G-1. This amount reflects
20 the transfer of approximately \$93.3 million of projected net
21 CI/BSR investments as of December 31, 2023, into rate base
22 effective January 1, 2024.

23
24 **Q.** How did the company forecast the 2024 projected test year
25 balances for utility plant and CWIP?

1 **A.** The company began with December 31, 2022 actual balances and
2 projected forward using the company's detailed 2023 and 2024
3 capital expenditures budget. The company forecasted plant
4 retirements and removal costs were projected based on
5 historical trends.

6
7 **Q.** Please explain how Peoples determines its capital expenditure
8 budgets.

9
10 **A.** Peoples generally separates its capital into two categories:
11 (1) specific major projects and (2) recurring expenditures.
12 Normal recurring expenditures are those routine capital costs
13 required to provide service to new customers as well as costs
14 associated with the replacement and/or relocation of existing
15 facilities and equipment. Specific projects generally
16 represent major projects with costs in excess of \$500,000.

17
18 As discussed in the direct testimony of witness Richard,
19 recurring capital expenditures related to adding customers to
20 the system are budgeted based on projected customer growth
21 and recent cost per unit trends. This includes projected
22 capital spending for items such as new revenue mains, meter
23 sets and services lines. Recurring capital expenditures for
24 routine maintenance capital and recurring general plant
25 additions are trended using recent actual spending data.

1 Q. Does the company classify the capital spending based on the
2 objective?

3

4 A. Yes. Peoples classifies capital spending as (1) growth, (2)
5 reliability, resiliency, and efficiency ("RRE"), or (3)
6 legacy integrity projects. In addition, with the approval by
7 the Commission to accrue Allowance for Funds Used During
8 Construction ("AFUDC") starting in 2019, the company also
9 identifies AFUDC-eligible projects.

10

11 Q. Did the company's Board of Directors approve the capital
12 expenditure budgets?

13

14 A. Yes. The company's 2023 and 2024 capital budgets were approved
15 by the company's Board of Directors in March 2023.

16

17 Q. What is the amount of the company's 2023 and 2024 capital
18 budgets used to produce the 2024 projected test year rate
19 base?

20

21 A. The \$397.1 million 2023 capital budget is reflected on MFR
22 schedule G-1, page 23, as the sum of the total Construction
23 Costs of \$384.1 million and Cost of Removal of \$13.0 million.

24

25 The \$362.4 million 2024 capital budget is reflected on MFR

1 schedule G-1, page 26, as the sum of the total Construction
2 Costs of \$349.4 million and Cost of Removal of \$13.0 million.

3
4 A summary of the 2023 and 2024 capital budgets is shown in
5 Document No. 6 of my exhibit. These capital budgets are
6 explained and supported in the direct testimony witnesses
7 O'Connor, Richard, Rutkin and Sparkman. Including the 2022
8 base year capital investment of approximately \$325 million
9 and the 2023 and 2024 capital budgets, Peoples expects to
10 make over \$1.0 billion in capital expenditures since its last
11 general rate proceeding in 2020.

12
13 **Q.** Have there been any major changes in large projects since the
14 2023 and 2024 capital expenditure budgets were prepared?

15
16 **A.** Yes. When the budget was prepared there was uncertainty around
17 timing of the FGT to Jacksonville Export Facility project,
18 which was budgeted to be under construction starting in 2023
19 and going into service in 2025. As discussed in direct
20 testimony of witness Rutkin, this complex project will not be
21 constructed as described above. As shown on Document No. 6 of
22 my exhibit, this very large project is AFUDC eligible. Since
23 it is AFUDC eligible and will go into service after the 2024
24 projected test year, this project is not included in adjusted
25 rate base, as discussed later in my direct testimony, and

1 does not impact our projected 2024 adjusted NOI.

2

3 **Q.** How did the company project the test year balances for
4 accumulated depreciation in 2023 and 2024?

5

6 **A.** The company started with the actual accumulated provision for
7 depreciation balances as of December 31, 2022. The projected
8 provision for depreciation expense was added and projected
9 retirements and costs of removal were subtracted from the
10 starting accumulated provision for depreciation balances. The
11 projected provision for depreciation expense through December
12 31, 2023, is based on the company's current depreciation rates
13 approved by the Commission in the 2020 Agreement. The
14 projected provision for depreciation expense from January 1,
15 2024 through December 31, 2024 is based on the company's
16 proposed depreciation rates determined in the updated
17 depreciation study supported by company witness Watson. The
18 projected retirements from plant-in-service, and costs of
19 removal are based on the forecast amount for 2023 and 2024
20 based on historical trends. The test year accumulated
21 depreciation reflects recognition of \$34 million of
22 theoretical excess depreciation reserves as permitted by the
23 2020 Agreement. In 2022, the company recognized \$14.4 million
24 as a credit and the remaining \$19.6 million is projected to
25 be credited in 2023.

1 Q. What amount of working capital allowance did the company
2 include in rate base for the 2024 projected test year?

3
4 A. As shown on MFR schedule G-1, Page 1, the company request a
5 net negative \$28.0 million in working capital allowance for
6 the 2024 projected test year.

7
8 Q. What methodology did the company use to calculate this level
9 of working capital?

10
11 A. Working capital was developed using the balance sheet method
12 which has been accepted by the Commission for many years. The
13 various components that make up working capital were
14 projected using a variety of methods described in MFR schedule
15 G-6, pages 2 and 3.

16
17 Q. Please describe how the company prepared the 2024 projected
18 test year balance sheet.

19
20 A. The company employed the same process used in developing its
21 annual budgeted balance sheet. These methods are described on
22 an account-by-account basis in MFR schedule G-6. The company
23 began with actual December 31, 2022, account balances and
24 projected individual line items through the projected test
25 year. The company trended balance sheet accounts, including

1 Accounts Receivable, Accounts Payable, and Unbilled Revenues,
2 using known patterns of activity that occur in the normal
3 course of business.

4
5 **Q.** How did the company forecast regulatory clause accounts -
6 Unrecovered Gas Costs, CI/BSR, and Conservation Cost Recovery
7 - for the 2024 projected test year?

8
9 **A.** The company forecasted the 2024 13-month average balances by
10 rolling forward the detailed projections for the 2023
11 balances and targeting near zero balances by year-end 2024.
12 The 2023 detailed projections reflect the company's updated
13 cost projections and Commission approved rates.

14
15 **Q.** How did the company treat clause over/under recoveries in
16 calculating the projected 2024 allowance for working capital?

17
18 **A.** The company's energy conservation cost recovery clause and
19 competitive rate adjustment are projected to be under-
20 recovered during 2024. In accordance with Commission
21 guidelines, the under-recovery was deducted from working
22 capital as an adjustment. The company's PGA clause and CI/BSR
23 were projected to have no under or over-recovery in the test
24 year.

25

1 Q. Are there any other noteworthy adjustments being made to the
2 company's balance sheet to determine adjusted rate base?

3

4 A. Yes. The company has removed from rate base CWIP balances
5 that earn AFUDC.

6

7 **CAPITAL STRUCTURE, COST-OF-CAPITAL AND INCOME TAXES**

8 Q. What are the components of the company's capital structure?

9

10 A. The components of the company's total capital structure are
11 equity, short- and long-term debt, customer deposits, ADIT,
12 and investment tax credits ("ITC"). As discussed later in my
13 direct testimony, beginning in 2023, ITCs are a new component
14 of the company's capital structure because the company has
15 invested in a qualified RNG facility.

16

17 Q. What is the company's 2024 proposed cost-of-capital?

18

19 A. As detailed in MFR schedule G-3, page 2, the company's
20 proposed cost-of-capital is 7.42 percent. The 7.42 percent
21 proposed cost-of-capital is based on a return on equity of
22 11.00 percent, which is supported by witness D'Ascendis and
23 investor sources' capital structure ratio of 54.7 percent
24 equity and 45.3 percent total debt. The proposed cost-of-
25 capital reflects short-term debt costs of 4.85 percent and

1 long-term debt costs of 5.54 percent, which are supported by
2 company witness McOnie. The proposed cost-of-capital also
3 includes customer deposits at a cost of 2.53 percent, ADIT at
4 zero cost and ITC at weighted cost of investor sources of
5 capital of 8.49 percent.

6
7 **Q.** How does the company's proposed 54.7 percent equity ratio
8 compare with the allowed capital structure in Peoples' last
9 general base rate proceeding?

10
11 **A.** The proposed capital structure equity ratio of 54.7 percent
12 from investor sources is consistent with the Commission
13 approved capital structure in Peoples last general base rate
14 proceeding in 2020. The company proposes to continue the terms
15 of the 2020 Agreement stating that a 54.7 percent equity ratio
16 (investor sources with any difference to actual equity ratio
17 spread ratably over long-term and short-term debt) shall be
18 used for all purposes, including cost recovery clauses,
19 earnings surveillance reporting, and the calculation of the
20 company's AFUDC rate and associated amounts of AFUDC.

21
22 **Q.** Given the company's proposed capital structure of 54.7
23 percent equity, what equity infusions from TECO Energy will
24 be necessary in 2023 and 2024?

25

1 **A.** The company's 2023 and 2024 budgeted equity infusions are
2 \$135.0 million and \$140.0 million, respectively. These equity
3 infusions are the result of the company's planned capital
4 structure needs based on its expenditures and business
5 requirements and maintaining the targeted equity ratio of
6 54.7 percent, as discussed in witness McOnie's direct
7 testimony.

8
9 **Q.** What debt issuances are forecasted to occur in 2023 and 2024?
10

11 **A.** As discussed in witness McOnie's direct testimony, the
12 company's forecasted debt issuances are \$825 million and \$100
13 million for 2023 and 2024, respectively. In addition to
14 issuing its first independent long-term debt, the 2023 budget
15 assumes Peoples will establish its own short-term revolving
16 credit facility on September 30, 2023. With the debt issuance
17 and new credit facility, Peoples forecasts that it will repay
18 the intercompany debt with Tampa Electric that is discussed
19 in witness McOnie's direct testimony. The intercompany debt
20 agreement with Tampa Electric was entered into on January 1,
21 2023, with interest rates based on the same rates included in
22 the \$570 million allocation of Tampa Electric long-term debt
23 as of December 31, 2022 (including unamortized discounts) and
24 Tampa Electric's prevailing short-term debt interest rates
25 during 2023. Peoples' accounting for the components of the

1 intercompany debt with Tampa Electric will be recorded in
2 FERC account 223 Advances from Associated Companies, account
3 226 Unamortized Discount on Long-Term Debt, and account 233
4 Notes Payable to Associated Companies.

5
6 **Q.** How did the company reconcile the 2024 projected test year
7 capital structure to 2024 projected test year rate base?
8

9 **A.** The reconciliation of the 2024 projected test year rate base
10 to the 2024 projected test year capital structure is shown on
11 Document No. 9 of my exhibit. Rate base adjustments discussed
12 earlier require associated adjustments to capital structure
13 to keep the two in sync.
14

15 First, the company adjusted certain rate base items to
16 specific capital structure items to which they are
17 specifically related. These "specific adjustments" include
18 property held for future use, investments in subsidiaries and
19 non-utility adjustments to rate base (each a specific
20 adjustment to equity).
21

22 Second, some items were first specifically adjusted to ADIT
23 for direct impacts and the remainder were adjusted over
24 investor sources of capital or pro-rata over all sources of
25 capital. Specific adjustments to ADIT were made for the

1 competitive rate adjustment receivable and unamortized rate
2 case expense due to their immediate deferred income tax
3 impacts. The company used the same approach for CI/BSR assets
4 because the replacement of legacy pipe is a deductible repair
5 and maintenance cost when placed in service under IRC Section
6 162.

7
8 Third, the under-recovery balance related to energy
9 conservation was removed from short-term debt because this is
10 the component of the capital structure that is impacted by
11 the shortfall between the conservation expense incurred and
12 the conservation revenues collected.

13
14 Fourth, the CWIP on projects deemed eligible to accrue AFUDC
15 was excluded from rate base and was adjusted on a pro-rata
16 basis over all sources of capital.

17
18 Finally, the remaining items were adjusted on a pro-rata basis
19 over investor sources.

20
21 **Q.** Did the company make any capital structure adjustment to
22 Deferred Taxes to comply with the Internal Revenue Code
23 ("IRC")?

24
25 **A.** Yes. The company adjusted deferred income taxes in the capital

1 structure to reflect the IRC normalization adjustment
2 required when a utility taxpayer uses a projected test period
3 for ratemaking purposes. This adjustment reduced ADIT with an
4 offset applied to investor sources of capital on a pro-rata
5 basis. This adjustment is necessary to state the projected
6 2024 ADIT balance, which is treated as a zero-cost capital
7 source, at the level required to comply with the forecast
8 test period requirements as set forth in U.S. Treasury
9 Regulation Section 1.167(1)-1.

10
11 The ADIT balances on MFR schedule G-1, page 8 are based on a
12 13-month average of projected balances. However, the IRC
13 requirements in this situation require a specific computation
14 to determine the maximum amount of ADIT to be treated as zero-
15 cost capital in the cost of capital calculation. The specific
16 computation is shown on Document No. 8 of my exhibit as a
17 reduction to deferred taxes in the amount of \$2,619,279, which
18 is included in the specific adjustment on MFR schedule G-3,
19 page 2. This adjustment is only required for accumulated
20 deferred income taxes recorded in Account 282, net of the FAS
21 109 component, because this account includes the deferred
22 taxes governed by the IRS normalization rules.

23
24 **Q.** Please explain the new ITC element of the company's 2023 and
25 2024 capital structure.

1 **A.** The Inflation Reduction Act of 2022 ("IRA") was signed into
2 law on August 16, 2022. The IRA expanded the definition of
3 qualified energy property to include, among others, qualified
4 biogas property. Peoples' investment in the Alliance Dairies
5 RNG project meets the definition of a qualified biogas
6 property so it is eligible for a 30 percent ITC. The dollar
7 amount of the ITC projected for 2023 when the project goes in
8 service is approximately \$3.3 million. Generally, the ITC
9 would be amortized over the regulatory life of the asset,
10 however, due to the company's projected taxable loss
11 positions in 2023 and 2024, and under the IRS normalization
12 rules, the ITC amortization is deferred until the company can
13 offset its tax payable with the credit.

14
15 **Q.** Do these adjustments to rate base and capital structure impact
16 NOI?

17
18 **A.** Yes. After all these adjustments were made, income tax expense
19 was adjusted to reflect the appropriate amount of interest
20 expense based on the amount and cost of debt in the capital
21 structure that was synchronized to the rate base. This
22 interest synchronization adjustment is shown on Document No.
23 9 of my exhibit.

24
25 **Q.** Please explain how the company calculated income tax expense

1 and deferred taxes for the 2024 projected test year.

2
3 **A.** Consistent with the company's prior rate proceedings and
4 long-standing Commission precedent, the company computed its
5 2024 projected test year income tax expense on a stand-alone
6 basis. Peoples projected total income tax expense was based
7 on its projected taxable income and the federal and state
8 income tax laws, regulations, and rules expected to be in
9 place during the 2024 projected test year.

10
11 As shown in MFR schedule G-2, page 30, income tax expense was
12 calculated using the federal and state rates expected to be
13 in effect for the 2024 projected test year of 21 percent and
14 5.5 percent, respectively. As previously discussed, we
15 computed all NOI and capital structure amounts using
16 consistent regulatory treatments and in compliance with the
17 normalization requirements of the IRC.

18
19 The company computed deferred taxes and the related
20 accumulated deferred income tax based on the projected book-
21 tax temporary differences for the 2024 forecasted period. We
22 also included the forecasted flow back of excess and deficient
23 deferred taxes in our tax expense calculation and calculated
24 the flow-back period consistent with the company's last
25 general base rate proceeding and the terms of the 2020

1 Agreement.

2

3 **Q.** Does Peoples file a consolidated United States income tax
4 return with other Emera companies?

5

6 **A.** Yes. Peoples Gas System, Inc. is a wholly owned subsidiary of
7 TECO Gas Operations, Inc., which is a wholly owned subsidiary
8 of TECO Energy, Inc., which is a wholly owned subsidiary of
9 Emera United States Holdings, Inc. ("EUSHI"), which is a
10 wholly owned subsidiary of Emera Incorporated. Peoples and
11 other TECO Energy companies file United States income tax
12 returns on a consolidated basis with EUSHI. Peoples does not
13 expect being included in a consolidated tax return will cause
14 any benefit or detriment to Peoples or its customers in the
15 2024 projected test year.

16

17 **Q.** Did Peoples make a parent company debt adjustment in
18 determining its 2024 revenue requirement as contemplated in
19 Rule 25-14.004 (F.A.C.)?

20

21 **A.** Yes. As shown in MFR schedule C-26, Peoples calculated a
22 parent debt adjustment of approximately \$3.1 million using
23 the capital structure of Emera. The company calculated this
24 adjustment consistent with the methodology used in the 2020
25 Agreement. This adjustment decreased the company's 2024

1 revenue requirement.

2

3 **LONG-TERM DEBT RATE TRUE-UP MECHANISM**

4 **Q.** Please summarize the Long-Term Debt Rate True-Up ("LTDR True-
5 Up") mechanism being proposed by the company.

6

7 **A.** As discussed in the direct testimony of witness McOnie,
8 Peoples will be seeking its own financing based on its own
9 business risk profile and credit rating. Subject to market
10 conditions and the credit rating process, the timing of the
11 inaugural long-term financings is expected to occur in 2023
12 but may be completed after the Commission has rendered its
13 decision on this general rate proceeding. With the potential
14 uncertainty surrounding the cost of Peoples' inaugural long-
15 term debt and the significance it has in determining the test-
16 year required rate of return, the company proposes a true-up
17 mechanism to allow for a one-time adjustment to base rates
18 reflecting its actual inaugural long-term debt cost in
19 determining the 2024 projected test year revenue
20 requirements. If needed, this mechanism would provide
21 assurance that the new 2024 base rates would be adjusted to
22 reflect the appropriate required rate of return, which is
23 fair to both customers and the company. For example, if
24 interest rates end up being lower, then this mechanism would
25 allow for a prompt and efficient reduction to customers'

1 bills.

2

3 **Q.** How would the LTDR True-Up be calculated?

4

5 **A.** First, if Peoples completes its expected inaugural long-term
6 financings ("Inaugural Debt Issuance") prior to the final
7 hearing in this case, the company will be able to update its
8 proposed debt rate with the actual. If the Inaugural Debt
9 Issuance occurs after the final hearing, then a new 13-month
10 average long-term cost rate would be calculated as shown in
11 MFR schedule G-3, page 3. As shown on MFR schedule G-3, page
12 3, Peoples budget projects that the Inaugural Debt Issuance
13 will be an \$825 million issuance on September 30, 2023. The
14 new calculation of 2024 projected test year average long-term
15 debt cost rate would be updated to reflect the Inaugural Debt
16 Issuance principal and components of annual cost. Any change
17 in the Inaugural Debt Issuance principal amount assumed in
18 the Commission approved cost of long-term debt would be offset
19 by an adjustment to the assumed Commission approved 2024 debt
20 issuance such that the 2024 total 13-month average principal
21 amount does not change.

22

23 Second, an adjustment would be made to replace the Commission
24 approved long-term debt cost rate used in determining the
25 company's approved weighted cost of capital (as calculated in

1 MFR schedule G-3, page 2) with the new weighted average long-
2 term cost rate factoring in the known Inaugural Debt Issuance
3 principal and cost components. The resulting adjusted
4 weighted cost of capital (also referred to as required rate
5 of return) would then be carried over to update the Commission
6 approved calculation of the test year revenue deficiency, as
7 calculated in MFR schedule G-5. Finally, the resulting
8 adjusted revenue deficiency would be compared to the
9 Commission approved revenue deficiency. The decrease or
10 increase in the revenue deficiency would be passed on to
11 customers through a limited-proceeding filing.

12
13 **Q.** How soon after the Inaugural Debt Issuance would the one-time
14 LTDR True-Up adjustment to base rates be applied?

15
16 **A.** Peoples would quantify the LTDR True-Up impact to revenue
17 requirements as described above and neutralize the impact
18 through a one-time adjustment to base rates within 120 days
19 after the company completes the Inaugural Debt Issuance. For
20 the time period between Commission approved new base rates
21 going into effect (first billing cycle in January 2024) and
22 implementation of the LTDR True-Up adjusted base rates, the
23 company will defer the impact of the LTDR True-Up to the
24 balance sheet for refund or collection through the CI/BSR in
25 the subsequent year.

1 Q. After determining the amount of the LTDR True-Up, how does
2 the company propose to change base rates?

3
4 A. The company proposes to ratably change base rates across all
5 customer classes consistent with the method approved by the
6 Commission in Order No. PSC-2018-0501-S-GU, issued on October
7 18, 2018 in Docket No. 20180044-GU, which changed Peoples'
8 base rates due to impacts of the Tax Cuts and Jobs Act of
9 2017.

10

11 Q. If the LTDR True-Up is not a significant amount, does the
12 company have an alternative proposal for flowing the change
13 to customers?

14

15 A. Yes, if the annual amount of the LTDR True-Up is less than
16 \$500,000, then the company will defer the impact of the LTDR
17 True-Up to the balance sheet for collection or refund through
18 the CI/BSR in the subsequent year and will continue that
19 process annually until the company's next subsequent base
20 rate proceeding or other base rate adjustment being made
21 through a limited proceeding.

22

23 **SUMMARY**

24 Q. Please summarize your prepared direct testimony.

25

1 **A.** I have discussed the company's decision to use a 2024
2 projected test year. I presented the calculation and
3 adjustments used in determining the company's 2024 projected
4 test year revenue requirement, as well as the methodology for
5 transferring CI/BSR revenue requirements to base rates. I
6 discussed the 2023 and 2024 budgeting process used to develop
7 the operating and capital expenditures necessary to safely
8 and reliably serve Peoples' customers. I supported and
9 discussed the company's Net Operating Income, Base Revenue,
10 O&M Expense, Rate Base, Capital Structure, Cost-Of-Capital
11 and Income Taxes. I also explained Peoples' proposed true up
12 mechanism to incorporate the company's actual cost of its
13 inaugural long-term debt issuances. In explaining the
14 calculation of the company's 2024 projected test year revenue
15 requirements, I discussed the adjustments and regulatory
16 accounting treatments being carried forward from the 2020
17 Agreement and prior rate proceedings.

18
19 There is a significant revenue deficiency in the 2024
20 projected test year due to projected revenue levels, combined
21 with a 40-year high inflation environment, continued
22 investments in the gas distribution system to respond to
23 statewide growth and construction as well as to maintain
24 reliability, resiliency and meet strong demand for natural
25 gas, and the expiring ability under the 2020 Agreement to

1 defer depreciation costs.

2

3 Without rate relief, the company's ROE and financial
4 integrity will weaken to unsustainable levels. For 2024,
5 without rate relief the company's ROE would be 1.85 percent.
6 This is significantly below the bottom of Peoples' current
7 allowed ROE range.

8

9 Therefore, Peoples is requesting a base revenue increase of
10 \$139.3 million or an incremental amount of \$127.7 million
11 after considering the transfer of \$11.6 million related to
12 CI/BSR. The financial basis for this revenue requirement is
13 a weighted average cost-of-capital of 7.42 percent, which
14 includes an 11.00 percent ROE and a financial equity ratio of
15 54.7 percent. The requested base revenue increase is
16 critically important to enable the company to maintain its
17 financial integrity and support the growth of Florida while
18 continuing to provide safe, reliable, responsible, and
19 efficient service and to meet customer expectations.

20

21 **Q.** Does this conclude your prepared direct testimony?

22

23 **A.** Yes, it does.

1 (Whereupon, prefiled rebuttal testimony of
2 Rachel B. Parsons was inserted.)

BEFORE THE
FLORIDA PUBLIC SERVICE COMMISSION

DOCKET NO. 20230023-GU

PETITION FOR RATE INCREASE
BY PEOPLES GAS SYSTEM, INC.

REBUTTAL TESTIMONY AND EXHIBIT
OF
RACHEL B. PARSONS

1 **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2 **REBUTTAL TESTIMONY**

3 **OF**

4 **RACHEL B. PARSONS**

5
6 **Q.** Please state your name, address, occupation and employer.

7
8 **A.** My name is Rachel B. Parsons. My business address is 702 North
9 Franklin Street, Tampa, Florida 33602. I am employed by
10 Peoples Gas System, Inc. ("Peoples" or the "company") as the
11 Head of Financial Performance.

12
13 **Q.** Are you the same Rachel B. Parsons who filed direct testimony
14 in this proceeding?

15
16 **A.** Yes, I am.

17
18 **Q.** Have your title and duties and responsibilities changed since
19 the company filed your prepared direct testimony on April 4,
20 2023?

21
22 **A.** Yes. Effective June 7, 2023, my title changed to Head of
23 Financial Performance. The company filed a revised version of
24 the first page of my prepared direct testimony on June 21,
25 2023. That document reflects my revised duties and

1 responsibilities.

2

3 **Q.** What are the purposes of your rebuttal testimony?

4

5 **A.** My rebuttal testimony serves four general purposes.

6

7 First, I will address the accounting and ratemaking issues
8 identified by witness Lane Kollen in his testimony filed on
9 June 22, 2023 by the Office of Public Counsel ("OPC"). In the
10 process, I will address the depreciation proposals by OPC
11 witness David Garrett reflected in the revenue requirement
12 calculations presented by witness Kollen. I disagree with
13 OPC's accounting and ratemaking proposals, but I conceptually
14 agree with one of them and have included it in the company's
15 revised revenue requirement presented with this testimony.

16

17 Second, I will provide information on five accounting and
18 ratemaking issues arising from the company's responses to
19 OPC's discovery requests and proposed by OPC at the informal
20 issue identification meeting coordinated by the Staff of the
21 Florida Public Service Commission ("FPSC" of "Commission") on
22 June 23, 2023. OPC has indicated it may propose adjustments
23 to the company's proposed 2024 revenue requirement increase
24 for those issues, so I will address them in a way that informs
25 the Commission's consideration of them.

1 Third, I will comment on witness Kollen's quantification of
2 adjustments and recommendations made by witness Garrett.

3
4 Finally, I will present the company's revised revenue
5 increase request that corrects certain errors identified
6 since we filed our case on April 4, 2023, updates information
7 on certain budgeted expense amounts that change the company's
8 test year revenue requirements, and reflects the Commission
9 Staff's audit findings plus other adjustments to base rate
10 recoverable O&M expense proposed by OPC that the company does
11 not contest. Taking into consideration these three categories
12 of adjustments, the company has revised its requested net
13 revenue requirement increase downward from \$127,624,042 to
14 \$124,942,677. This revised request does not include the
15 \$11,647,804 of Cast Iron/Bare Steel Rider revenues the
16 company proposes to move from the rider to base rates.

17
18 **Q.** Have you prepared an exhibit supporting your rebuttal
19 testimony?

20
21 **A.** Yes. Exhibit No. RBP-2, entitled "Rebuttal Exhibit of Rachel
22 B. Parsons," was prepared by me or under my direction and
23 supervision. The contents of this exhibit were derived from
24 the business records of the company, and are true and correct
25 to the best of my information and belief. My rebuttal exhibit

1 consists of the following nine documents:

- 2 Document No. 1 Revised Revenue Requirements
3 Document No. 2 Account 921 Average Increase
4 Document No. 3 Historical Storm Costs in 2024 Dollars
5 Document No. 4 RNG Revenue Requirement & Cost Recovery
6 Document No. 5 Capital Expenditure Analysis
7 Document No. 6 Dec. 31, 2023 Depreciation Study Impact
8 Document No. 7 Revision to SeaCoast Overhead Allocation
9 Document No. 8 Vehicle Retirement Impact on NOI and Rate
10 Base
11 Document No. 9 Discovery Responses and Other
12 Referenced Documents

I.

Kollen's Proposed Adjustments

- Q. How will you address the accounting and ratemaking issues raised in sections II, III, and IV of witness Kollen's testimony?
- A. Witness Kollen proposes 12 adjustments to the company's proposed 2024 net operating income ("NOI"), four adjustments to the company's proposed 2024 rate base, and four adjustments to the company's proposed 2024 capital structure and rate of return.

1 Seven of his NOI adjustments reflect OPC's proposals on
2 discrete NOI issues. I will address those issues first.

3
4 One of his proposed rate base adjustments reflects OPC's
5 position on the company's forecasted capital expenditures and
6 plant additions in 2023 and 2024. I will address that as a
7 discrete issue, even though it factors into his proposed
8 overall capital structure adjustment.

9
10 One of his proposed NOI adjustments and one of his rate of
11 return adjustments reflect OPC's position on the 2023
12 Transaction, so I will address those adjustments together.

13
14 Four of his proposed NOI adjustments, three of his rate base
15 adjustments, and one of his capital structure adjustments
16 reflect OPC's positions on the company's depreciation study,
17 proposed depreciation rates, and test year depreciation
18 expense, so I will address those issues as a group.

19
20 His remaining capital structure and rate of return
21 adjustments reflect witness Garrett's proposed return on
22 equity and synchronize the company's capital structure with
23 OPC's proposed adjusted rate base amounts. I will address
24 both of those issues near the end of this section of my
25 rebuttal testimony.

1 A. Discrete NOI Issues

2 1. *General*

3 **Q.** Witness Kollen states that Peoples' budgets were not
4 developed in the normal course of the company's budgeting
5 process and that the forecast for 2024 was developed to
6 support the requested rate increase and that they incorporate
7 assumptions and methodologies biased upward to the company's
8 requested increase. Do you agree with these statements?

9
10 **A.** No. The timing of the preparation of our 2024 budget was
11 adjusted to meet the schedule for filing this rate case;
12 however, that change was a practical necessity of filing a
13 rate case with a forecasted test year. The company developed
14 its 2024 budget using its normal budgeting processes and the
15 company's Board of Directors approved the budget before the
16 company filed this rate case. The company's 2024 budget
17 assumptions properly reflect the company's evaluation of
18 resources needed to provide safe and reliable gas
19 distribution services on a sustainable basis to customers and
20 to meet future demand for natural gas across Florida.

21
22 **Q.** In OPC witness Kollen's testimony, he states there is evidence
23 that the last base rate proceeding reflected excessive
24 operating expenses and overstated its revenue requirement. Do
25 you agree there is evidence the company included excessive

1 operating expenses in the last base rate proceeding and the
2 implication that it has also done so in this proceeding?

3
4 **A.** No. Although the company's actual O&M expense for 2021 was
5 lower than the requested O&M expense in the 2021 rate filing,
6 the actual 2021 results were lower and largely driven by COVID
7 pandemic impacts. Through 2020 and 2021, COVID significantly
8 impacted our customers and altered the company's expense
9 profile as many team members shifted to working remotely. In
10 2022, the impacts of COVID began to abate, and the company's
11 operations and maintenance expenses returned closer to normal
12 and historic levels. The impact of COVID on the company's
13 operations in 2021 was unique and unprecedented. Witness
14 Kollen's attempt to draw conclusions about 2024 using 2021
15 budget variances is misplaced.

16
17 *2. Staffing*

18 **Q.** Witness Kollen proposes to reduce the company's test year
19 payroll and related expenses by \$9.686 million, which would
20 entirely eliminate the company's forecasted staffing
21 increases. Do you agree with this adjustment?

22
23 **A.** No. The company has justified its forecasted staffing
24 increases for 2023 and 2024 in: (a) my direct and rebuttal
25 testimony; (b) response to several interrogatories including

1 but not limited to OPC's First Set of Interrogatories No. 13
2 (see Document No. 9 to my Exhibit RBP-2, pages 1-6) and OPC's
3 Fourth Set of Interrogatories Number 201 (see Document No. 9
4 to my Exhibit RBP-2, page 7); (c) the prepared direct
5 testimonies of Helen J. Wesley, Timothy O'Connor, Christian
6 C. Richard, and Donna L. Bluestone; and (d) the rebuttal
7 testimony of witnesses O'Connor, Richard and Bluestone. The
8 company asserts it has proven the need for its forecasted new
9 team members based on the growth of its system and increased
10 work activity, the majority of which is non-discretionary.
11 Therefore, witness Kollen's proposed staffing adjustment to
12 remove all positions forecasted to be added in 2023 and 2024
13 should be rejected.

14
15 **Q.** Does the company need the new administrative and general
16 employees forecasted in the finance area to be hired in 2023
17 and 2024?

18
19 **A.** Yes. Peoples witness Bluestone discusses administrative and
20 general staffing in her rebuttal testimony, but I will explain
21 the Finance staffing.

22
23 Three of the eight finance positions were replacement
24 positions and have already been hired, and the remaining five
25 positions are necessary to support the financial needs of the

1 business.

2

3 Peoples needs the Treasury Analyst position to support new
4 requirements related to Peoples' independent financings
5 associated with the 2023 transaction and will replace support
6 currently being provided by Tampa Electric. Peoples needs the
7 Manager, Commercial Investments and Analyst positions to
8 provide financial and project evaluation support to the
9 opportunities being explored by the company's Gas Supply and
10 Development team to serve large commercial and industrial
11 customer demand rising from increased decarbonization
12 requirements. The team members filling these positions will
13 also support enhanced financial profitability analysis to
14 ensure appropriate revenue projections and rate analysis. The
15 two co-op positions will provide the company with a cost-
16 effective way to provide a potential pipeline of talent for
17 filling entry level finance positions and developing future
18 leaders.

19

20 **Q.** If the Commission concludes that some of the added positions
21 should be removed from the test year revenue requirements,
22 how do you propose that those adjustments be made?

23

24 **A.** Each position the company proposes to be added over the years
25 2023 and 2024 should be evaluated by the Commission on its

1 individual justification and need to support the growth and
2 increased activity of Peoples' distribution system. Through
3 the company's combined testimony and interrogatory responses,
4 we believe we have provided proof of our careful consideration
5 and justifications for each position. In MFR G-2, pages 19c-
6 19e, the company has specifically detailed the labor cost for
7 each proposed position being added in 2023 and 2024. In
8 addition, in response to OPC's Fourth Set of Interrogatories
9 No. 202 (see Document No. 9 to my Exhibit RBP-2, pages 8-10),
10 the company provided in electronic format the support file
11 "OPC Fourth IRR No. 202.xlsx" that includes the tab "IRR 202
12 Detail" that details the 2024 test year labor O&M expense,
13 benefits O&M expense and payroll tax for each individual
14 position being added. If the Commission decides to remove
15 certain added positions from the test year revenue
16 requirement, it need not resort to the broad-brush approach
17 advocated by OPC. Rather, it can individually remove the
18 related labor and benefits O&M expense and payroll tax for
19 each position as appropriate to adjust NOI by using the
20 detailed information by position included in the file "OPC
21 Fourth IRR No. 202.xlsx" tab "IRR 202 Detail".

22
23 However, we believe we have provided proof of careful
24 consideration and evaluation of each position and that OPC
25 witness Kollen has not provided commensurate rationale to

1 warrant removal of all positions.
2

3 3. *Office Supplies and Expenses for Employee Additions*

4 **Q.** Witness Kollen proposes to reduce the company's proposed
5 revenue increase by \$1,162,000 to eliminate the company's
6 proposed increase to account 921 office supplies and expenses
7 associated with staffing increases. Do you agree with his
8 proposal?

9
10 **A.** No. As stated above, the company has justified its forecasted
11 staffing increases for 2023 and 2024, and these costs will be
12 necessary to support these new team members.
13

14 **Q.** If the Commission agrees with witness Kollen that some of the
15 office supplies and expenses for employee additions should be
16 reduced in the test year, how do you propose that those
17 adjustments be made?
18

19 **A.** If the Commission decides to remove certain positions from
20 the 2024 test year, then the associated reduction in account
21 921 should be made based on the department the position was
22 budgeted in. In Exhibit RBP-2, Document No. 2, I have
23 calculated by department the per headcount added average
24 increase in 2024 account 921 office supplies and expenses. If
25 the Commission determines that a position identified on MFR

1 G-2, pages 19c-19e should be removed from the company's 2024
2 test year revenue requirements, then the associated pro-rata
3 reduction in account 921 office supplies and expenses can be
4 determined using the average amounts by department provided
5 in Exhibit RBP-2, Document No. 2.

6
7 4. *2023 and 2024 Pay Increases*

8 **Q.** Witness Kollen proposes to reduce payroll and related
9 expenses in the test year to reflect lower wage escalation
10 factors. Do you agree?

11
12 **A.** No. The company's proposed wage escalation factors for 2023
13 and 2024 are reasonable for the reasons explained in the
14 rebuttal testimony of Peoples witness Bluestone; therefore,
15 witness Kollen's proposed adjustment should be rejected.

16
17 5. *Capitalization of A&G Expense*

18 **Q.** In OPC witness Kollen's testimony he asserts the company's
19 forecasted capitalization of administrative and general
20 ("A&G") expenses of \$11.0 million in 2024 is too low of a
21 credit to A&G expenses and should increase with capital
22 expenditures and increases in A&G expenses. Do you agree with
23 his recommendation to have the Commission increase the
24 company's 2024 credit in account 922 to \$13.125 million?

25

1 **A.** No. As stated in response to OPC's Fourth Set of
2 Interrogatories, No. 185 (see Document No. 9 to my Exhibit
3 RBP-2, page 11), the company deemed it reasonable to keep the
4 A&G allocation to capital at \$11.0 million in the 2023 and
5 2024 budgets as it had already increased from \$8.0 million in
6 2020 to \$11.0 million in 2022. Excluding the FGT to
7 Jacksonville Export Facility project, the 2024 capital budget
8 is \$314.2 million, which is lower than the recent history
9 that was considered in the increase to \$11 million already
10 reflected. In fact, the 2024 budgeted capital spend is less
11 than that experienced in 2020 (\$339.0 million), 2022 (\$325.2
12 million) and expected in 2023 (\$364.4 million excluding FGT
13 to Jacksonville Export Facility project). For this reason, I
14 disagree with Kollen's adjustment.

15
16 6. *Storm Expense Accrual*

17 **Q.** In OPC witness Kollen's testimony, he states that the
18 company's methodology for determining the appropriate annual
19 storm reserve accrual is flawed because it includes the costs
20 of Hurricane Michael that was recovered through a surcharge.
21 Do you agree with OPC witness Kollen's assertion?

22
23 **A.** No. As stated in response to OPC's Fourth Set of
24 Interrogatories, Nos. 183 and 184 (see Document No. 9 to my
25 Exhibit RBP-2, page 12 and 13), Hurricane Michael storm costs

1 eligible under the ICCA methodology were included in the storm
2 reserve annual accrual analysis because those costs are
3 reflective of major hurricane events that may occur going
4 forward. In addition, the storm reserve provides the ability
5 to recover storm costs while also maintaining rate stability
6 for customers. With the appropriate annual accrual and
7 target, the storm reserve can provide the ability to recover
8 restoration costs of expected hurricane events and is not
9 meant for just less impactful tropical storms. The company's
10 request for the surcharge to recover Hurricane Michael
11 incremental costs was not only due to the severity of that
12 storm, but also due to the inadequacy of the storm reserve
13 annual accrual of \$57,500 established almost ten years prior
14 to Hurricane Michael. As seen recently with another major
15 storm in 2022, Hurricane Ian, the company has elected not to
16 recover any incremental costs through a surcharge to
17 customers and has instead elected to recover those costs from
18 the annual storm reserve accrual.

19
20 Q. In the storm reserve analysis included in your Exhibit RBP-
21 1, Document No. 7, you used the most recent 10-year history
22 of storm costs to determine an annual average cost. Why is
23 using the most recent 10-year history more appropriate than
24 using the 14-year history as proposed by OPC witness Kollen?
25

1 **A.** As seen in my direct testimony, Exhibit RBP-1, Document No.
2 7, for the years 2009 through 2015, there was no storm
3 activity requiring incremental costs. However, for the next
4 seven years from 2016 through 2022 there were six named storms
5 that occurred with incremental costs to our business.
6 Therefore, the most recent 10-year rolling history of storm
7 costs is a more appropriate period to include in the analysis
8 as it is more representative of current hurricane activity
9 impacting the State of Florida.

10
11 **Q.** In your storm reserve annual accrual recommendation, you
12 conservatively rounded down the \$545,338 10-year average
13 incremental costs down to \$500,000. Is there any other
14 conservatism embedded in your methodology?

15
16 **A.** Yes. The \$545,338 10-year average incremental storm cost
17 amount was calculated using nominal dollars that totaled
18 \$5,453,379 and included costs dating back as far as 2016. If
19 I had accounted for inflation and brought those nominal dollar
20 costs to 2024 test year dollars, the total 10-year history of
21 costs would equate to \$6,402,571 or an annual average of
22 \$640,257 (see my Exhibit RBP-2, Document No. 3). Therefore,
23 foregoing this inflation impact adds almost another \$100,000
24 of conservatism to my recommendation of a \$500,000 annual
25 storm accrual and a \$5.0 million storm reserve target.

1 Q. Is OPC witness Kollen's proposal to reduce the proposed
2 \$500,000 annual storm accrual by \$300,000 appropriate?

3

4 A. No. As discussed above, the company's proposed \$500,000
5 annual storm accrual appropriately considers the historical
6 storm costs over the past 10-year period that are
7 representative of recent storm activity and is very
8 reasonable and conservative considering inflation of those
9 historical storm costs. Therefore, the Commission should
10 reject OPC witness Kollen's proposal to decrease the
11 company's proposed annual storm accrual to \$200,000.

12

13 7. *Three RNG Projects*

14 Q. Do you agree with witness Kollen proposes to "zero out" the
15 revenue requirement impact of the company's three proposed
16 renewable natural gas ("RNG") projects in the test year?

17

18 A. No. All three of the company's proposed RNG projects should
19 be accounted for above-the-line in the test year for the
20 reasons explained by witness Luke A. Buzard in his rebuttal
21 testimony.

22

23 Peoples planned and executed the New River and Brightmark RNG
24 projects consistent with and in reliance on the company's
25 tariff 7.404 Renewable Natural Gas Service and rate schedule

1 RNGS. As shown in Document No. 4 of my Exhibit RBP-2, the
2 company is recovering the total installed cost of these
3 projects, including a reasonable rate of return, from the
4 Customer using a Monthly Services Charge through the term of
5 the RNG services agreement and purchase sale agreement. This
6 will allow the company to recover the revenue requirement for
7 these projects over the life of the projects. As is the case
8 with fixed-rate, long-term customer contracts, the annual
9 contract revenues from the customers will not recover the
10 annual revenue requirement for the project in the early years,
11 but will exceed the annual revenue requirement in the later
12 years. There is nothing remarkable or improper about this
13 phenomenon; it is a function of how depreciation expense
14 reduces the net book value of the assets subject to a fixed-
15 rate, long-term customer contract over the useful life of the
16 assets. The kind of single-asset or project-specific
17 ratemaking inherent in witness Kollen's proposal is
18 inconsistent with the way the Commission has treated the
19 contract revenues and revenue requirement of other long-term
20 customer projects (e.g., pipeline extensions).

21
22 Further, the Alliance RNG project reduces the company's
23 overall test year revenue requirement by \$233,414, because
24 the forecasted revenues from the sale of the environmental
25 attributes from the RNG collected and conditioned at the dairy

1 will exceed the annual revenue requirement associated with
2 the Alliance project assets in the test year.

3
4 The impacts of all three RNG projects should be fully
5 reflected in the test year as proposed by the company and for
6 the reasons explained above and in the direct testimony of
7 witness Rutkin and the rebuttal testimony of Peoples witness
8 Buzard.

9
10 8. *Property Tax Expense*

11 **Q.** Do you agree with witness Kollen's proposal to reduce test
12 year property tax expenses by \$2.562 million?

13
14 **A.** No. Although I agree an adjustment is required for the 2024
15 test year property taxes, I do not agree with the amount of
16 witness Kollen's proposed reduction. The company originally
17 estimated the 2024 test year property tax to be \$24.462
18 million. The company subsequently determined in response to
19 OPC's Ninth Set of Interrogatories, No. 241 (see Document No.
20 9 to my Exhibit RBP-2, page 14), that the 2024 property tax
21 should be adjusted downward by \$2.008 million to \$22.454
22 million following the identification of an error in the
23 forecast workpapers used for the company's 2024 budget.
24 Witness Kollen has asserted that the company's budget for
25 2024 property tax expense is inflated because the company

1 included an "experience trend factor" in the modeling used to
2 derive property values subject to tax. Witness Kollen
3 indicated that he believes the experience trend factor is
4 speculative in nature, and therefore should be disregarded
5 from the forecast analysis completely. He concluded that the
6 downward adjustment in property tax should be \$2.562 million
7 when the experience trend factor is completely removed from
8 the calculation of the 2024 test year property tax expense.

9
10 The experience trend factor is the difference between the
11 taxable values that the company has proposed to county tax
12 jurisdictions with the actual final taxable values derived by
13 taxing authorities. As evidenced in the table below, a review
14 of historical outcomes comparing company proposed taxable
15 values and final taxable values derived by taxing authorities
16 demonstrates that the experience trend factor is a necessary
17 and legitimate factor for consideration in forecasting
18 taxable property values. The experience trend factor shows
19 that the taxing authorities consistently derive higher
20 taxable values than those proposed by the company. The
21 experience trend factor is no more or less speculative than
22 other factors, such as estimated millage rates, which are
23 used in the development of the property tax estimate.

24
25

	A	B	= (B/A) - 1
Tax Year	Proposed Taxable Tangible Property Value on Company Property Tax Return	Final Taxable Tangible Property Value Determined By Tax Authorities	Experience Trend Factor
2022	\$1,043,416,988	\$1,051,943,510	0.8%
2021	\$801,162,648	\$830,522,961	3.7%
2020	\$732,453,468	\$768,385,967	4.9%
2019	\$663,201,815	\$699,092,779	5.4%
2018	\$603,470,017	\$630,687,162	4.5%
Avg.			3.9%

In determining the corrected 2024 test year property tax expense of \$22.454 million, the company used the 2021 experience trend factor of 3.7 percent. As shown in the table above, the average experience trend factor over the past 5 years has been 3.9 percent. Therefore, the 3.7 percent experience trend factor that was used is reasonable, and the company proposes that the original 2024 test year property tax estimate of \$24.462 be decreased by \$2.008 million rather than the \$2.562 million proposed by witness Kollen.

B. Rate Base - Capital Expenditures and Plant Additions

Q. On page 23 of OPC witness Kollen's testimony includes a summary comparison of the company's 2021 O&M expense projections included in the last rate case filing and its

1 actual 2021 O&M expense. Did witness Kollen provide similar
2 evidence for the company's 2021 projected capital
3 expenditures and capital additions in the last rate case
4 filing and its 2021 respective actual amounts?

5
6 **A.** No, witness Kollen did not provide similar evidence to compare
7 actual 2021 results with the rate case forecasted capital
8 expenditures and capital additions. The 2021 forecasted
9 capital expenditures were \$263.8 million (see MFR G-1, page
10 26 in Docket No. 20200051-GU that is included in Document No.
11 9 to my Exhibit RBP-2, page 17) compared to 2021 actual of
12 \$307.4 million (see response to OPC 1st Set of
13 Interrogatories, No. 82 that is included in Document No. 9 to
14 my Exhibit RBP-2, page 18). The 2021 forecasted capital
15 additions were \$232.5 million (see MFR G-1, page 27 in Docket
16 No. 20200051-GU that is included in Document No. 9 to my
17 Exhibit RBP-2, page 19) compared to 2021 actual of \$296.7
18 million (see 2021 Annual Status Report in witness Dane A.
19 Watson's direct testimony, Exhibit DAW-1, Document No. 2,
20 page 142 of 155). For both capital expenditures and capital
21 additions, the company's 2021 actual amounts exceeded the
22 2021 rate case forecast amounts. Therefore, utilizing witness
23 Kollen's logic on 2021 O&M expenses, the company understated
24 its 2024 capital expenditures and capital additions when
25 preparing rate case capital expenditure and capital additions

1 budgets, not overstated it.

2

3 **Q.** Do you agree with witness Kollen's proposal to reduce the
4 company's forecasted capital expenditures and capital
5 additions by 6.5 percent based on a weighted average
6 calculation of budget variances for the years 2018 through
7 2022?

8

9 **A.** No. I disagree for several reasons.

10

11 First, his analysis uses the company's revised 2022 capital
12 expenditure budget of \$338.0 million rather than the original
13 2022 capital expenditure budget of \$299.1 million prepared
14 before 2022 spending started. When the company realized later
15 in 2022 that it was going to exceed its original 2022 capital
16 budget, for corporate governance reasons, the company
17 requested board approval for a higher 2022 capital
18 expenditure budget amount in late October. Therefore, the
19 \$299.1 million original capital expenditure budget is the
20 appropriate budget to use for witness Kollen's analysis. With
21 this change, the company actually overspent by \$26.2 million
22 or 8.8 percent.

23

24 Second, the company's project management group was just being
25 established in 2018 and 2019 and its processes for managing

1 capital projects and forecasting capital expenditures was not
2 fully in place. Therefore, the period that more appropriately
3 reflects the company's current structure and effectiveness in
4 managing its capital expenditure budget is the most current
5 years of 2020 through 2022.

6
7 After adjusting OPC witness Kollen's analysis to properly
8 reflect the original 2022 capital expenditure budget and
9 adjust for the more representative 2020 to 2022 period, the
10 company historically has overspent by 0.7 percent using the
11 same weighted average calculations performed by witness
12 Kollen (see Exhibit RBP-2, Document No. 5).

13
14 For these reasons, and for the reasons explained in the
15 rebuttal testimony of witness Richard, the Commission should
16 reject witness Kollen's recommendation to reduce rate base
17 \$33.331 million and related revenue requirement by \$2.963
18 million.

19
20 **Q.** If the Commission agrees with the logic underlying witness
21 Kollen's rate base adjustment, should the Commission make an
22 adjustment to his proposed amount?

23
24 **A.** Yes. Witness Kollen's calculation of the amount of the
25 adjustment is incorrect for several reasons.

1 First, in his Excel workpaper file "OPCRESP-POD1b-000001 OPC
2 Revenue Requirement Recommendation for PGS.xlsx", tab "CapEx
3 Act vs Bud", cell E53 (also shown in Document No. 9 to my
4 Exhibit RBP-2, page 20), witness Kollen has improperly
5 calculated the test year reduction in accumulated
6 depreciation. The calculation should reflect the full year
7 2023 depreciation expense impacting the 2024 test year
8 balance of accumulated depreciation. Instead, witness Kollen
9 has improperly reflected half of the 2023 depreciation
10 expense impacting the 2024 test year balance of accumulated
11 depreciation.

12
13 Second, on row 70 of the same reference file and tab, OPC
14 witness Kollen makes the following statement, "No Change in
15 ADIT Projected for this Adjustment as both Book and Tax
16 Depreciation Expense Would Decrease". This statement is
17 flawed as ADIT (Accumulated Deferred Income Tax) would be
18 impacted by his proposed adjustment to reduce plant additions
19 in 2023 and 2024 as the removal of tax depreciation expense
20 for these assets would exceed the corresponding amount of
21 book depreciation removed. Therefore, his proposed adjustment
22 incorrectly ignores the impact it would have on the company's
23 ADIT balance in its capital structure.

24
25 C. NOI and Overall Rate of Return: 2023 Transaction

1 Q. Do you agree with witness Kollen's proposal to reduce the
2 company's test year O&M and interest expenses by a total of
3 \$9.7 million to eliminate the recurring incremental costs of
4 the 2023 Transaction?

5
6 A. No. Although witness Kollen correctly identified the
7 incremental costs and their amounts when he calculated his
8 proposed adjustments, his adjustments should be rejected for
9 the reasons explained in the rebuttal testimony witnesses
10 Wesley and Kenneth D. McOnie.

11
12 D. NOI, Rate Base, and Capital Structure: Depreciation
13 Issues

14 Q. Do you agree with the depreciation-related adjustments
15 proposed by witness Kollen?

16
17 A. No. Four of his proposed NOI adjustments, three of his rate
18 base adjustments, and one of his capital structure
19 adjustments reflect OPC's positions on the company's
20 depreciation study, proposed depreciation rates, and test
21 year depreciation expense.

22
23 His first proposed NOI adjustment reduces depreciation
24 expense to reflect his proposed reduction of rate base
25 associated with lower capital expenditures. The Commission

1 should reject his rate base adjustment and the related
2 \$897,000 depreciation adjustment for the reasons I previously
3 explained in my rebuttal testimony.

4
5 His second proposed NOI depreciation adjustment would reduce
6 depreciation expense by \$625,000 to "reflect depreciation
7 study date as of the beginning of the test year." As later
8 discussed in my rebuttal testimony, witness Watson's
9 calculation of depreciation rates using a December 31, 2023
10 study date differs from witness Garrett's. If the Commission
11 decides to use the December 31, 2023 study date, the company
12 believes witness Watson's calculations should be used rather
13 than witness Garrett's.

14
15 His third proposed NOI depreciation adjustment would reduce
16 test year depreciation expense by \$7,257,000 to reflect the
17 depreciation rates with longer lives proposed by witness
18 Garrett. As stated by witness Watson in his rebuttal
19 testimony, witness Garrett's determination of these extended
20 lives is flawed and should be rejected by the Commission.

21
22 Witness Kollen's final proposed NOI depreciation adjustment
23 would reduce test year depreciation expense by \$17,625,000 by
24 amortizing the company's theoretical depreciation reserve
25 surplus as a credit to expense over a ten-year period, rather

1 than over the remaining lives of the assets. As stated later
2 in my testimony, the company believes that any such revenue
3 requirement reduction should not be the result of deviating
4 from normal depreciation study practice but rather should be
5 the result of the Commission's consideration of the use of an
6 amortization method as a matter of policy.

7
8 1. *Study Period*

9 **Q.** In OPC witnesses Kollen's and Garrett's testimony they state
10 that the depreciation study period date used in the company's
11 study should be December 31, 2023 rather than the December
12 31, 2024 study period date used in the filing. What is the
13 company's reasoning for using the December 31, 2024 date?

14
15 **A.** On page 16 of the Stipulation and Settlement Agreement (see
16 Document No. 9 to my Exhibit RBP-2, page 21) approved by the
17 Florida Public Service Commission ("Commission") in Order No.
18 PSC-2020-0485-FOF-GU, issued December 10, 2020, in Docket
19 Nos. 20200051-GU, 20200166-GU, and 20200178-GU ("2020
20 Agreement"), item (d) states "the depreciation study period
21 shall match the test year in the company's MFRs [emphasis
22 added]." Included in the header of the company's MFRs filed
23 for this rate case proceeding (see MFR G-1, page 1 for
24 example) are the following dates:

25

1 Historic Base Year Data: 12/31/2022

2 Historic Base Year +1: 12/31/2023

3 Projected Test Year: 12/31/2024

4
5 Therefore, to comply with the terms of the 2020 Agreement as
6 written on page 16, item (d), the company believes the
7 depreciation study period should match the Projected Test
8 Year date of 12/31/2024 in the company's MFRs rather than
9 match the Historic Base Year +1 date of 12/31/2023 in the
10 company's MFRs. The company believes it is bound to comply
11 with the terms of the 2020 Agreement regardless of the
12 requirements under Rule 25-7.045 Depreciation(4) (d).

13
14 **Q.** In witness Watson's rebuttal testimony, he states that he has
15 calculated depreciation rates using the December 31, 2023
16 study period scenario that differ from witness Garrett's
17 calculated depreciation rates using the same study date and
18 witness Watson's parameters. What is the dollar amount
19 difference in the 2024 test year depreciation and
20 amortization expense between witness Watson's and witness
21 Garrett's rates?

22
23 **A.** As shown in my Exhibit RBP-2, Document No. 6, using witness
24 Watson's calculated depreciation rates, the 2024 test year
25 depreciation and amortization included in the company's NOI

1 calculation is \$373,090 more than the amount using witness
2 Garrett's depreciation rates. As shown on MFR G-1, page 23,
3 the company's 2024 test year depreciation and amortization
4 expense totaled \$87,776,676. As shown on page 1 of my Exhibit
5 RBP-2, Document No. 6, my calculation of the 2024 depreciation
6 and amortization expense using witness Watson's December 31,
7 2023 study period based rates totaled \$87,524,373, which is
8 a reduction of \$252,303 from the amount in the company's MFRs.
9 As shown on page 2 of my Exhibit RBP-2, Document No. 6, OPC
10 witness Kollen's calculation of the 2024 depreciation and
11 amortization expense using witness Garrett's December 31,
12 2023 study period based rates totaled \$87,151,284, which is
13 a reduction of \$625,392 from the amount in the company's MFRs.
14 The difference between the \$252,303 reduction using witness
15 Watson's rates and witness Kollen's reduction of \$625,392 is
16 \$373,090.

17
18 2. *Theoretical Reserve Surplus*

- 19 **Q.** Do you agree with OPC witness Kollen's proposal to amortize
20 all the company's theoretical depreciation reserve surplus as
21 a credit to expense over ten years rather than over the lives
22 of the company's depreciable assets?
23
24 **A.** No. As discussed in witness Watson's rebuttal testimony,
25 using a specified amortization period for theoretical

1 depreciation reserve surplus is not normal depreciation study
2 protocol but rather a policy decision. The company believes
3 that any such revenue requirement reduction should not be the
4 result of deviating from normal depreciation study practice
5 but rather should be the result of the Commission's
6 consideration of the use of an amortization method as a matter
7 of policy.

8
9 **Q.** In witness Kollen's testimony he questions whether the
10 company will place the Dade City Connector project in service
11 by the end of 2023 to allow the company to amortize \$8 million
12 of theoretical depreciation reserve surplus under the 2020
13 Agreement. Does the company still believe the Dade City
14 Connector project will be in service by end of 2023 and the
15 company will be amortizing the \$8 million as allowed under
16 the 2020 Agreement?

17
18 **A.** Yes. As stated in the rebuttal testimony of witness Richard,
19 the company is on track to have the Dade City Connector
20 project in service by the end of 2023, allowing the company
21 to amortize the \$8.0 million of theoretical depreciation
22 reserve surplus as reflected in the 2023 budget.

23
24 **E.** Other Capital Structure and Rate of Return

25 **Q.** Do you agree with OPC's four capital structure and rate of

1 return adjustments reflected in witness Kollen's testimony?

2

3 **A.** No. The company disagrees with all four of witness Kollen's
4 capital structure and rate of return adjustments reflected in
5 his testimony.

6

7 His first proposed adjustment of \$8.898 million includes
8 restating the company's long-term and short-term debt rates
9 to remove the effects of the 2023 Transaction on the test
10 year. Although witness Kollen uses calculations provided by
11 the company in response to OPC's First Set of Interrogatories,
12 No. 100 (see Document No. 9 to my Exhibit RBP-2, pages 22-
13 24), the company in principle opposes this adjustment for the
14 reasons explained in the rebuttal testimony Wesley and
15 McOnie.

16

17 His second proposed adjustment of \$11.402 million includes a
18 reduction of the company's equity component and an increase
19 to its long-term debt component. The company disagrees with
20 reducing its equity ratio from investor sources from the
21 existing 54.7 percent ratio for the reasons explained in the
22 rebuttal testimony of witness McOnie, so it also opposes the
23 related rate of return adjustment.

24

25 Witness Kollen's third adjustment of \$27.115 million reflects

1 OPC's proposal to set the company's mid-point return on equity
2 at 9.0 percent. The company opposes OPC's return on equity
3 proposal for the reasons explained in the rebuttal testimony
4 of Dylan W. D'Ascendis, so it also opposes the related rate
5 of return adjustment.

6
7 The company opposes witness Kollen's proposed fourth
8 adjustment of \$0.532 million associated with Accumulated
9 Deferred Income Tax impacts related to depreciation and
10 amortization adjustments, for the same reasons it opposes the
11 underlying adjustments to depreciation expense.

12
13 **II.**

14 **OPC's Other Issues**

15 **A. Seacoast Cost Allocations**

16 **Q.** What is Seacoast Gas Transmission, LLC ("Seacoast") and what
17 is its relationship to Peoples?

18
19 **A.** Seacoast is a limited liability company that designs,
20 constructs, and operates intrastate natural gas transmission
21 pipelines in Florida, and Seacoast received tariff approval
22 from the FPSC in November 2008 as a non-rate regulated
23 transmission company. Seacoast is a sister company to Peoples
24 in that both entities are wholly-owned subsidiaries of TECO
25 Gas Operations, Inc.

1 Q. Does Seacoast have any employees?

2

3 A. No, rather, it receives certain shared services from Peoples
4 and Tampa Electric.

5

6 Q. How are the costs of the business functions performed by
7 Peoples for Seacoast allocated or attributed to Seacoast?

8

9 A. The costs are attributed to SeaCoast in one of three ways.
10 The first is when affiliate team members direct charge their
11 labor to SeaCoast. The second is through a standard labor
12 distribution where Peoples team members allocate a fixed
13 percentage of their time to Seacoast, which are periodically
14 reviewed and adjusted for any changes in an individual's
15 support of Seacoast. The last is through an overhead
16 allocation using a Modified Massachusetts Method ("MMM.")

17

18 Q. What amount of costs to be incurred by Peoples in 2024 are
19 being attributed or allocated to Seacoast during the test
20 year?

21

22 A. In the 2024 test year budget, the labor, benefits, and payroll
23 tax costs projected to be directly charged or allocated to
24 SeaCoast through a standard labor distribution are
25 \$1,114,451. The projected costs to be allocated to SeaCoast

1 through the MMM in 2024 are \$1,595,205.

2

3 **Q.** Please explain the MMM process of allocating corporate
4 overhead costs to affiliates.

5

6 **A.** The MMM allocates costs to affiliates based on the affiliate's
7 respective ratio of (i) net revenue, (ii) payroll and benefits
8 costs, and (iii) gross property, plant and equipment.

9

10 **Q.** Since the MMM allocates corporate overhead costs using a
11 factor based on payroll costs and SeaCoast does not have any
12 employees, does the MMM under-allocate corporate overhead
13 costs from Peoples to SeaCoast?

14

15 **A.** While the historical approach to allocating costs is
16 reasonable and has increased significantly over the last few
17 years as shown in my Exhibit RBP-2, Document No. 7, an
18 argument could be made that the costs are being under-
19 allocated given SeaCoast's recent growth and lack of
20 employees.

21

22 **Q.** Does the company have a proposal on how to modify the MMM to
23 more fairly allocate corporate overhead costs from Peoples to
24 SeaCoast?

25

1 **A.** Given there are no SeaCoast employees, an alternative
2 approach is to include the directly allocated payroll and
3 benefits costs from affiliates for the last historical year
4 in the MMM calculation.

5
6 **Q.** If the Commission agrees with the company's proposal to modify
7 the MMM for corporate overhead cost allocations from Peoples
8 to SeaCoast, what adjustment should be made to the company's
9 proposed test year revenue requirement?

10
11 **A.** By including the \$1,150,287 of direct labor and benefits sent
12 to SeaCoast by Peoples and Tampa Electric in the MMM
13 calculation, the allocation of corporate overhead costs from
14 Peoples to SeaCoast increases \$189,347 as show in Exhibit
15 RBP-2, Document No. 7 which results in a reduction of the
16 base revenue requirement of \$190,837 after grossing up for
17 regulatory assessment fees and bad debt expense.

18
19 **B.** Projected Customer Growth and Usage After Filing

20 **Q.** Has Peoples experienced unexpected customer growth in 2023
21 after it prepared its 2023 and 2024 budgets and filed its
22 petition in this case?

23
24 **A.** Yes. Through June 2023 the company has on average 3,991 more
25 residential customers than budgeted. Commercial customer

1 growth through June 2023 is on track with the 2023 budget.
2 However, the actual June 2023 year-to-date base revenues are
3 \$460,000 and \$1.725 million lower than the 2023 budget for
4 residential and commercial customers, respectively, which in
5 total is nearly \$2.2 million lower than the 2023 budget.
6

7 **Q.** Should the company's proposed 2024 test year revenue
8 requirement be adjusted to reflect this unexpected growth?
9

10 **A.** No. Overall, the company believes the 2024 test year budgeted
11 base revenues are still reasonable considering the year-to-
12 date June 2023 base revenue shortfall versus the 2023 budget.
13 If the Commission were to adjust the test year base revenue
14 projections for the assumption of additional customers in
15 2024 above those projected by the company in its filing, then
16 the Commission should make commensurate adjustments to the
17 2024 test year O&M and capital expense projections reflecting
18 higher customer growth.
19

20 C. Vehicle Additions and Retirements

21 **Q.** Has the company reflected a reasonable number of vehicles in
22 the 2024 test year rate base?
23

24 **A.** Yes. Peoples witness O'Connor demonstrates the company has
25 forecasted a reasonable number of vehicles in rate base for

1 2024. These vehicle additions were budgeted in account 392.01
2 for years 2023 and 2024 and are reflected on MFR G-2, pages
3 23 and 26.

4
5 **Q.** With the addition of vehicles in account 392.01 included in
6 the company's 2023 and 2024 capital budget, should MFR G-2,
7 pages 23 and 26 have also reflected vehicle retirements for
8 that account? And if so, what is the impact of not including
9 vehicle retirements on the company's test year Net Operating
10 Income ("NOI") and rate base?

11
12 **A.** Yes, as stated in witness O'Connor's Late Filed Exhibit 15
13 (see Document No. 9 to my Exhibit RBP-2, pages 25-26), the
14 company identified \$1,706,817 and \$1,571,627 of retirements
15 in account 392.01 that should have been reflected in 2023 and
16 2024, respectively. As a result, 2024 test year vehicle
17 depreciation expense would have decreased by \$243,046 (see
18 calculation in Exhibit RBP-2, Document No. 8). However, as
19 also stated in witness O'Connor's Late Filed Deposition
20 Exhibit 15, there would be no direct impact on NOI as vehicle
21 depreciation expense is charged through a transportation cost
22 allocation to O&M and capital expenditures and is not included
23 in depreciation expense in determining NOI. In the company's
24 budgeting process, the increase in the 2024 vehicle
25 depreciation expense was not factored into the development of

1 the 2024 detailed O&M budget for transportation cost
2 allocation or FERC O&M budget on MFR G-2, pages 12-19.
3 Instead, the 2024 vehicle transportation allocation costs
4 included in O&M expense were trended forward using 2022
5 vehicle transportation costs plus inflation and customer
6 growth in labor in areas that use vehicles, which is primarily
7 Gas Operations, Engineering and Pipeline Safety. Therefore,
8 any changes in vehicle depreciation expense due to the revised
9 amount of retirements would not have an impact on O&M expense
10 (MFR G-2, page 12-19) or depreciation expense (MFR G-2, page
11 1, line 6) in the determination of the 2024 test year NOI.

12
13 Regarding rate base impacts, adding the retirements to 2023
14 and 2024 would equally reduce the plant in service and
15 accumulated depreciation. Therefore, the 2024 test year rate
16 base amount would not be directly impacted by adding the
17 retirements to account 392.01. If anything, rate base would
18 slightly increase for the 13-month average reduction in
19 accumulated depreciation due to lower vehicle depreciation
20 expense (see calculation in Exhibit RBP-2, Document No. 8).
21 The company did budget salvage in account 392.01 of \$84,798
22 and \$121,995 for 2023 and 2024, respectively. Any further
23 increase in salvage for 2023 and 2024 would partially offset
24 the lower accumulated depreciation due to lower depreciation
25 expense discussed above. Also, when determining the 2023 and

1 2024 capital expenditures, the higher vehicle depreciation
2 expense was not factored into those capital budgets and no
3 impact to overall rate base would occur due to lower vehicle
4 depreciation expense.

5
6 In conclusion, although the company agrees that retirement of
7 vehicles in account 392.01 should have been reflected in the
8 2023 and 2024 plant and accumulated depreciation balances,
9 there would be no impact on the company's determination of
10 NOI and a slight increase in rate base which would have a
11 minor increase in the filed 2024 test year revenue
12 requirement. Therefore, correcting the 2023 and 2024 capital
13 budgets for the identified retirements would slightly
14 increase the company's 2024 test year revenue requirements.
15 Due to the minor amount of an increase in revenue
16 requirements, the company proposes to not make any vehicle
17 retirement related adjustments to the company's filed MFRs.

18
19 D. Lobbying, Charitable Contributions, Sponsorships, and
20 Institutional and Image Advertising

21 Q. Has the company reached an agreement with the OPC on an
22 adjustment to move certain costs associated with lobbying,
23 charitable contributions, sponsorships, and institutional and
24 image advertising below the line?

25

1 **A.** Yes. During discovery and in response to questions posed by
2 OPC, the company identified a total of \$242,173 of costs
3 associated with lobbying, charitable contributions,
4 sponsorships, and institutional and image advertising that
5 were inadvertently recorded above the line contrary to
6 Commission policy.

7
8 **Q.** Has OPC subsequently added more items to the list of 2022
9 base rate recoverable O&M reductions in addition to the
10 originally agreed to \$242,173?

11
12 **A.** Yes. OPC has added \$33,236 of additional transactions above
13 the originally agreed to \$242,173, which totals \$275,409.
14 Although the company does not agree all of the \$33,236 should
15 be reductions to 2022 base rate recoverable O&M expense, the
16 company is willing to reflect the additional \$33,236 as a
17 reduction.

18
19 **Q.** In Staff witness Donna D. Brown's direct testimony, Exhibit
20 DDB-1, she has identified audit findings related to these
21 areas and other items reducing 2022 O&M expense recoverable
22 from base rates. What is the amount of year 2022 reductions
23 to base rate recoverable O&M expense and what is the
24 commensurate reduction to apply to the 2024 test year?

25

1 **A.** In Exhibit DDB-1 to Staff witness Brown's direct testimony,
2 she has identified \$185,606 of audit findings reducing the
3 company's 2022 O&M expense recoverable from base rates.
4 Although the company does not agree with all the audit
5 findings, I have reflected all of the \$185,606 in my revised
6 revenue requirement later in my rebuttal testimony. In the
7 company's 2023 and 2024 budgets, it has applied the inflation
8 assumptions as shown in MFR G2, pages 12 - 19. Factoring in
9 the inflation assumptions, the reduction in the 2024 test
10 year base rate recoverable O&M expense resulting from witness
11 Brown's audit findings is \$195,062.

12
13 **Q.** During the audit conducted by Staff witness Brown, did the
14 company also self-disclose any base rate recoverable O&M
15 reductions that were not included in Staff witness Brown's
16 audit findings?

17
18 **A.** Yes. During the audit the company self-disclosed \$64,483 of
19 year 2022 base rate recoverable O&M reductions. Factoring in
20 the inflation assumptions, the reduction in the 2024 test
21 year base rate recoverable O&M expense resulting from these
22 self-disclosed items is \$72,074.

23
24 **Q.** Are there any double-counted items between the OPC agreement
25 adjustments, Staff witness Brown's audit findings and the

1 company's self-disclosed reductions to year 2022 base rate
2 recoverable O&M?

3
4 **A.** Yes, there are several individual transactions that are
5 redundantly included in the OPC agreed upon reductions, audit
6 findings and the self-disclosed reductions during the audit.
7 Within the OPC amount of \$275,409, there are \$114,408 of
8 redundant transactions. Support for all the redundant
9 transactions is included in the Excel workpapers supporting
10 my Exhibit RPB-2, Document No. 1, which are being provided
11 with my rebuttal testimony. The net incremental amount of
12 2022 OPC agreed upon reductions to base rate recoverable O&M
13 expense is \$161,001. Factoring in the inflation assumptions,
14 the reduction in the 2024 test year base rate recoverable O&M
15 expense resulting from the incremental OPC agreed upon items
16 is \$172,200.

17
18 **Q.** Please summarize the overall adjustment to year 2022 base
19 rate recoverable O&M expense, excluding the redundant items,
20 and the commensurate reduction to the 2024 test year O&M
21 expense.

22
23 **A.** The below table summarizes the year 2022 and 2024 test year
24 base rate recoverable O&M expense adjustments after factoring
25 in the company's inflation assumptions.

	2022 Reduction	2024 Reduction
Audit Findings	\$185,606	\$195,062
Self Disclosed	\$64,483	\$72,074
OPC Non-Redundant	<u>\$161,001</u>	<u>\$172,200</u>
Total	\$411,090	\$439,336

E. Mergers and Acquisitions Activity

Q. Are there any expenses associated with merger and acquisition activity reflected in the company's test year O&M expenses?

A. In 2022, the company received no allocated costs from Emera or any affiliate associated with merger and acquisition activity. In addition, during 2022 the company did not incur any costs for outside services related to any merger and acquisition activity. Any time spent by company personnel to evaluate or consider any merger and acquisition activity during 2022 was incidental. Since 2022 actual costs are the basis for the 2024 budget, there are no merger and acquisition activity costs included.

F. Long-Term Debt Rate True-Up Mechanism

Q. Witness Kollen states that he supports the company's proposed Long-Term Debt Rate ("LTDR") True-Up mechanism. Do you believe this mechanism would function as the company proposed with OPC witness Kollen's cost of capital proposal to base

1 the company's revenue requirements on an allocation of Tampa
2 Electric Company's cost of long-term debt?

3
4 **A.** No. The company's proposed LTDR True-Up mechanism would not
5 function as proposed if the Commission based the company's
6 cost of long-term debt on Tampa Electric Company's long-term
7 debt rates. Witness Kollen states the LTDR True-Up mechanism
8 is "essential;" however, he fails to reconcile how the LTDR
9 True-Up mechanism would function under his cost of capital
10 recommendations using Tampa Electric Company's long-term debt
11 rates.

12
13 **III.**

14 **Quantification of Garrett Adjustments**

15 **Q.** Have you reviewed the adjustments proposed by witness Kollen
16 to reflect positions taken by witness Garrett in his
17 testimony?

18
19 **A.** Yes. The company disagrees with witness Garrett's proposed
20 adjustments and positions, but generally agrees with witness
21 Garrett's calculations other than the errors noted above.

22
23 **IV.**

24 **Updated 2024 Increase Request**

25 **Q.** Has the company revised its proposed revenue requirement

1 increase to reflect updated information on certain expenses,
2 corrections of errors, and reflect areas of agreement with
3 OPC?

4
5 **A.** Yes. As shown in my Exhibit RBP-2, Document No. 1, I have
6 calculated revisions to the company's revenue requirement
7 increase with adjustments netting to a reduction of
8 \$2,681,365 that are individually explained below. With the
9 adjustment, the company's filed \$127,624,042 revenue
10 requirement increase, net of \$11,647,804 Cast Iron Bare Steel
11 Rider revenue requirements, is reduced to \$124,942,677. These
12 referenced amounts can be seen on lines 12, 26 and 28 of my
13 adjustment exhibit.

14
15 **Q.** Please explain your depreciation related adjustment for the
16 July 2023 Study corrections?

17
18 **A.** As discussed earlier in my rebuttal testimony, witness Watson
19 has revised the depreciation study for corrections that were
20 required. The net result of those corrections is a reduction
21 of the Depreciation and Amortization shown on MFR G-2, page
22 1, Line 6 from \$87,776,676 to \$87,742,948, or a decrease of
23 \$33,728 that is shown on line 4 of my adjustment exhibit.
24 After the gross up for Commission assessment fees and bad
25 debt expense, the revenue requirement impact is a decrease of

1 \$33,993. In addition, as shown on line 18 of my adjustment
2 exhibit, there is an additional adjustment related to
3 accumulated depreciation impacts on rate base that increases
4 the revenue requirement by \$1,574.

5
6 **Q.** Please explain your depreciation related adjustment for the
7 Alliance RNG Project?

8
9 **A.** In response to Staff's Interrogatories Nos. 5 and 35 (see
10 Document No. 9 to my Exhibit RBP-2, pages 27-30), the company
11 noted that its filing classified the Alliance RNG Project
12 assets in the wrong accounts. In the filing the assets were
13 classified in account 376.00 Mains Steel, but after further
14 consideration, the company believes that accounts 376.02
15 Mains Plastic and 378.00 Measuring & Reg Station Equip are
16 more appropriate. As shown on line 5 of my adjustment exhibit,
17 the impact to depreciation expense is an increase of \$15,798
18 and an increase to revenue requirements of \$15,922 after the
19 appropriate gross up. In addition, as shown on line 19 of my
20 adjustment exhibit, there is an additional adjustment related
21 to accumulated depreciation impacts on rate base that
22 decreases the revenue requirement by \$2,098.

23
24 **Q.** Please explain your depreciation related adjustment for the
25 New River RNG Project?

1 **A.** In response to Staff's Interrogatory No. 57 (see Document No.
2 9 to my Exhibit RBP-2, page 31), the company noted that its
3 filing classified the New River RNG Project assets in the
4 wrong account. In the filing the assets were classified in
5 account 336.00 RNG Plant, but after further consideration the
6 company believes that accounts 376.00 Mains Steel and 378.00
7 Measuring & Reg Station Equip are more appropriate. As shown
8 on line 6 of my adjustment exhibit, the impact to depreciation
9 expense is a decrease of \$51,505 and a decrease to revenue
10 requirements of \$51,911 after the appropriate gross up. In
11 addition, as shown on line 19 of my adjustment exhibit, there
12 is an additional adjustment related to accumulated
13 depreciation impacts on rate base that increases the revenue
14 requirement by \$9,383.

15
16 **Q.** Please explain your depreciation related adjustment for the
17 Brightmark RNG Project?

18
19 **A.** In response to Staff's Interrogatory No. 34 (see Document No.
20 9 to my Exhibit RBP-2, page 32), the company calculated the
21 impact on depreciation expense, depreciation reserve, rate
22 base and revenue deficiency if the Brightmark RNG Project
23 "pipeline extension" was classified in account 336.01 and
24 fully depreciated over 15 years. As stated in response to
25 Staff's Interrogatory No. 3(a) (see Document No. 9 to my

1 Exhibit RBP-2, page 33), Peoples would not be opposed to fully
2 depreciating the "pipeline extension" during the same 15-year
3 term for which the full installation cost of the "pipeline
4 extension" is recovered through the Monthly Services Charge.
5 As shown on line 7 of my adjustment exhibit, the impact to
6 depreciation expense is an increase of \$321,507 and an
7 increase to revenue requirements of \$324,036 after the
8 appropriate gross up. In addition, as shown on line 19 of my
9 adjustment exhibit, there is an additional adjustment related
10 to accumulated depreciation impacts on rate base that
11 decreases the revenue requirement by \$41,430.

12
13 **Q.** Do you have any other depreciation expense related
14 adjustments?

15
16 **A.** Yes. Due to the net reduction in accumulated depreciation of
17 \$367,131 from the above depreciation expense adjustments,
18 there is a small associated adjustment to Accumulated
19 Deferred Income Taxes in the company's capital structure
20 resulting in a small impact to the overall rate of return.
21 The resulting adjustment is an increase to revenue
22 requirements of \$6,780 that is shown on line 24 of my exhibit.

23
24 **Q.** Please explain your Property Tax correction adjustment?
25

1 **A.** As discussed earlier in my rebuttal testimony, the company
2 discovered and acknowledged an error in its calculation of
3 the projected 2024 test year property tax expense. The company
4 has determined that the property tax expense should be reduced
5 by \$2.008 million or from \$24,462,000 included in the filing
6 to \$22,454,000. As shown on line 8 of my adjustment exhibit,
7 after grossing up for Commission assessment fees and bad debt
8 expense, the revenue requirement impact is a decrease of
9 \$2,023,797.

10
11 **Q.** Please explain your adjustment for 2024 Standalone Audit
12 Fees?

13
14 **A.** As discussed in the revised response to OPC's First Set of
15 Interrogatories, No. 100 (see Document No. 9 to my Exhibit
16 RBP-2, pages 22-24), the company originally budgeted \$346,000
17 for 2024 standalone audit fees. Subsequently, the company was
18 able to negotiate those fees down to \$156,000, which is a
19 \$190,000 reduction to O&M expense that is shown on line 9 of
20 my adjustment exhibit. After gross ups, the revenue
21 requirement impact is a decrease of \$191,495.

22
23 **Q.** Please explain your adjustment to correct for the net cost
24 change in Treasury support?

25

1 **A.** During my deposition with OPC, I acknowledged that
2 adjustments to the 2024 budgeted Treasury support costs were
3 required. The company budgeted for an additional Treasury
4 Analyst position with costs for labor, benefits and payroll
5 taxes totaling \$101,798. With that resource addition plus
6 support from the Emera Treasury team (cost allocation of
7 \$50,000) and Trustee costs of \$40,000 that were not budgeted,
8 the company would be able to remove the 2024 budgeted Tampa
9 Electric Treasury team cost allocation of \$150,234. As shown
10 on line 10 of my adjustment exhibit, the net result is a
11 reduction in the company's 2024 test year O&M expense of
12 \$60,234 and a revenue requirement decrease of \$60,708.

13
14 **Q.** Please explain your adjustment reflecting Commission Staff
15 audit findings reducing 2022 base rate recoverable O&M
16 expense?

17
18 **A.** As discussed earlier in my rebuttal testimony, Staff witness
19 Brown's identified \$185,606 of audit findings that reduce the
20 2022 base rate recoverable O&M. After factoring in the
21 company's inflations assumptions, the commensurate 2024 test
22 year reduction is \$195,062. As shown on line 11 of my
23 adjustment exhibit, after grossing up the revenue requirement
24 decrease in 2024 is \$196,597.

25

1 Q. Please explain your adjustment to reflect the company's self-
2 disclosed reductions to 2022 base rate recoverable O&M
3 expense?

4
5 A. As discussed earlier in my rebuttal testimony, during Staff's
6 audit the company self-disclosed that \$64,483 of transactions
7 should be removed from the 2022 base rate recoverable O&M
8 expense. After factoring in the company's inflation
9 assumptions, the commensurate 2024 test year reduction is
10 \$72,074. As shown on line 12 of my adjustment exhibit, after
11 grossing up the revenue requirement decrease in 2024 is
12 \$72,641.

13
14 Q. Please explain your adjustment to reflect OPC and Peoples
15 agreed to reductions to 2022 base rate recoverable O&M?

16
17 A. As discussed earlier in my rebuttal testimony, the OPC agreed
18 to reductions to 2022 base rate recoverable O&M is \$242,173
19 plus another \$33,236 that OPC subsequently added, which
20 totals \$275,409. After removing \$114,408 of redundant
21 transactions already included in Staff's audit findings and
22 the company self-disclosed items during Staff's audit, the
23 incremental agreed-to reduction with OPC is \$161,001. After
24 factoring in the company's inflations assumptions, the
25 commensurate 2024 test year reduction is \$172,200. As shown

1 on line 13 of my adjustment exhibit, after grossing up the
2 revenue requirement decrease in 2024 is \$173,555.

3
4 **Q.** Please explain your adjustment to increase the overhead cost
5 allocation from Peoples to SeaCoast?

6
7 **A.** As discussed earlier in my testimony, I acknowledge that due
8 to not having any employees at SeaCoast, the company's MMM
9 calculation of the overhead allocation from Peoples to
10 SeaCoast may understate the costs that should be allocated if
11 it had employees. As shown in Document No. 7 to Exhibit RBP-
12 2, after calculating a revised MMM incorporating all directed
13 charged payroll and benefits costs from Peoples and Tampa
14 Electric, Peoples 2022 overhead cost allocation to SeaCoast
15 would increase by \$180,225. Factoring in the company's
16 inflation assumptions brings the 2024 test year reduction to
17 \$189,347. As shown on line 13 of my adjustment exhibit, after
18 grossing up the revenue requirement decrease in 2024 is
19 \$190,837.

20
21 **V.**

22 **SUMMARY**

23 **Q.** Please summarize your rebuttal testimony.

24
25 **A.** My rebuttal testimony has addressed my disagreement with

1 witnesses Kollen's and Garrett's proposals to adjust the
2 company's 2024 test year revenue requirements, and my
3 suggested changes where I agree in concept but not in the
4 quantification. I have provided information on accounting and
5 ratemaking issues arising from the company's responses to
6 OPC's discovery requests and proposed by OPC at the informal
7 issue identification meeting. Finally, I have presented the
8 company's revised revenue increase request that corrects
9 certain errors and includes updated information on the
10 company's test year revenue requirements, including
11 Commission Staff's audit findings. Taking into consideration
12 these adjustments, I have proposed reducing the company's
13 requested net revenue requirement increase from \$127,624,042
14 to \$124,942,677, which is net of the \$11,647,804 of Cast
15 Iron/Bare Steel Rider revenues the company proposed to move
16 from the rider to base rates.

17
18 **Q.** Does this conclude your rebuttal testimony?

19
20 **A.** Yes, it does.
21
22
23
24
25

1 BY MR. WAHLEN:

2 Q Ms. Parsons, did you also prepare and cause to
3 be filed with your direct testimony and exhibit marked
4 RBP-1, consisting of 10 documents?

5 A Yes.

6 Q And did you also prepare and cause to be filed
7 with your rebuttal testimony an exhibit marked RBP-2,
8 consisting of nine documents?

9 A Yes.

10 Q And was document number eight of your rebuttal
11 exhibit updated on August 14th, 2023, when the company
12 revised its answer to staff's 14th set of
13 interrogatories, number 155, which was included in
14 Exhibit 128, as shown on the CEL?

15 A Yes.

16 Q And did document number nine to your rebuttal
17 testimony, Exhibit RBP-2, include the company's answer
18 to staff's first set of interrogatories number five as
19 originally served on May 16th?

20 A Yes.

21 Q And did the company serve a revised answer to
22 that interrogatory on July 28th?

23 A We did.

24 Q And is that revised interrogatory included in
25 Exhibit 110 on the CEL?

1 A I believe so.

2 MR. WAHLEN: Mr. Chairman, Peoples would note
3 for the record that Exhibit RBP-1 and 2 have been
4 identified on the CEL as Exhibits 23 and 33.

5 CHAIRMAN FAY: Okay.

6 MR. WAHLEN: I have one other item, if it's
7 okay with the parties.

8 In the course of the proceeding, Peoples has
9 revised its revenue requirement, once when Ms.
10 Parsons filed her rebuttal testimony, and then in
11 the course of doing the prehearing order, we
12 updated some positions. I circulated a revised
13 calculation of the revenue requirement to the
14 parties about a week ago, and let them review it.
15 We would be happy to put that into the record as an
16 exhibit if the parties think it would be helpful.
17 It if not, we won't, but I think it would be
18 helpful.

19 CHAIRMAN FAY: I would like to go ahead and
20 put it into the record.

21 MR. WAHLEN: Okay.

22 MR. REHWINKEL: We don't have an objection.

23 MR. MOYLE: Given the direction of the revenue
24 requirements, we don't have an objection either.

25 CHAIRMAN FAY: Thank you.

1 And we will mark this as 218.

2 (Whereupon, Exhibit No. 218 was marked for
3 identification.)

4 MR. WAHLEN: It's a lot easier when it goes
5 down, Jon, right?

6 BY MR. WAHLEN:

7 **Q Ms. Parsons, real briefly, does the exhibit**
8 **that's been marked as 218 reflect, to your knowledge,**
9 **the company's revised revenue requirement request in**
10 **this case?**

11 A Yes, it does.

12 **Q Thank you.**

13 **And would you please summarize your prepared**
14 **direct and rebuttal testimony?**

15 A Of course.

16 Good morning, Commissioners. My direct
17 testimony presents the company's original net revenue
18 increase request of 127.7 million, and shows how it was
19 calculated. It summarizes the company's budgeting
20 process, and shows why our proposed 2024 test year is
21 reasonable for setting rates in this proceeding. It
22 explains all of the key elements of the revenue
23 requirement; rate base, depreciation, net operating
24 income and capital structure, and how we develop them.
25 It compiles recommendations from our testifying experts

1 Fox, Watson and D'Ascendis on the revenue forecast,
2 depreciation rates and required return on equity. It
3 also reflects the company's proposed level of operation
4 and maintenance expenses, which is supported by our
5 operating witnesses O'Connor, Richard, Rutkin and
6 Bluestone, and is well below the Commission's O&M
7 expense benchmark.

8 As part of this case, we propose to move
9 recovery of approximately 11.6 million of the revenue
10 requirement for a legacy pipe safety replacement program
11 from our cast iron/bare steel rider to base rates, and a
12 long-term debt true-up mechanism. My direct testimony
13 explains these items as well.

14 My rebuttal testimony responds to the
15 accounting and ratemaking proposals advanced by OPC's
16 witnesses and issues identified by OPC during discovery,
17 and reflected in the issues as presented in the
18 prehearing order.

19 My rebuttal testimony presents the company's
20 revised revenue increase request of approximately 124.9
21 million, which is down 2.7 from our request as filed.
22 This revised increase request corrected mistakes we
23 found in our original filing, and reflects our
24 consideration of OPC's proposals, ideas from staff,
25 results of the staff audit, and updated budgeted expense

1 reporting?

2 A Correct.

3 Q Okay. And you are also responsible for
4 short-term budgeting and forecasting activities within
5 the company, right?

6 A Yes.

7 Q I am going to ask you a series of questions
8 about certain issues that you address in this case, and
9 those would be primarily the A&G, or administrative and
10 general allocation involving a revenue requirement of
11 about \$2.1 million under Issue 27 and 49, do you
12 understand that?

13 A Uh-huh.

14 Q Okay. I am also going to ask you about the
15 capital budget involving a revenue requirement of about
16 \$3.9 million under Issues 21, 23 and 27.

17 A Okay.

18 Q And I am going to ask you about the deferral
19 of revenue -- or the deferral or revenue neutrality in
20 the test year of the RNG projects remaining in the case
21 amounting to about \$1.5 million under various issues
22 that also include the working capital issue, do you
23 understand that?

24 A Yep.

25 Q Okay. Do -- and I am also going to ask you

1 some questions about the SeaCoast allocations that you
2 mentioned in your summary related to Issue 13, okay?

3 A Okay.

4 Q And additionally, I am going to ask you about
5 the nature of your testimony and a variety of other
6 issues, including the largest dollar issue in the Public
7 Counsel's case, which is Issue 9, and the disposition of
8 up to \$221 million in a theoretical depreciation reserve
9 surplus, which the customers have valued as much as \$17
10 million on an annual basis if amortized; do you
11 understand that?

12 A Yeah.

13 Q Okay. So I think I am going to go in reverse
14 order and start first with the theoretical depreciation
15 reserve surplus issue.

16 Isn't it true that you don't really
17 substantively address this issue in your direct
18 testimony?

19 A I don't address the calculation. That is
20 supported by our depreciation.

21 Q Okay. The company does acknowledge that there
22 is a depreciation reserve imbalance, or theoretical
23 depreciation reserve imbalance in this case, right.

24 A Yes.

25 Q Okay. And you agree that it is at least \$119

1 million based on the filed study?

2 A That seems reasonable.

3 Q Okay. If Mr. Garrett's depreciation
4 parameters and rates are utilized, along with a 12/31/23
5 study date, which is now stipulated, the end balance
6 would amount to about \$221 million, do you agree with
7 that?

8 A Sounds reasonable.

9 Q Okay. Did you have any issues with the math
10 in the calculations that Mr. Garrett presented in his
11 various presentations of the reserve imbalances?

12 A I am not an expert as it relates to that
13 calculation. It seemed reasonable from what I saw, but
14 I am definitely not the one to address that.

15 Q Okay. Do you agree that with the now
16 stipulated study date, and using the PGS proposed
17 service lives that were proposed by Mr. Watson, that the
18 imbalance is somewhere in the neighborhood of 153 to
19 \$159 million?

20 A That sounds reasonable.

21 Q Okay. Do you agree that the -- if the
22 imbalance is determined by the Commission to be \$221
23 million, that that's about 33 percent of the total
24 theoretical depreciation reserve?

25 A Subject to check.

1 Q Okay. And Mr. -- using Mr. Watson's rates and
2 his 153, or Mr. Garrett's \$159 million surplus, would
3 you agree that surplus is at least 20 percent -- that
4 that imbalance is 120 percent of the depreciation
5 reserve?

6 A Seems reasonable.

7 Q Okay. If I could ask -- I think I want to
8 push page D15-1661 which is an exhibit to Mr. Kollen's
9 testimony, and is also a response by the company to
10 Interrogatory 99. Are you familiar with -- do you see
11 that yet?

12 A Yes.

13 Q Okay. I believe this is a response that both
14 you and Mr. Watson provided affidavits on, does that
15 sound right?

16 A Yes.

17 Q Are you familiar with this response?

18 A Yes.

19 Q Okay. In this response, I think the Public
20 Counsel asked you about kind of the methodology of how
21 one would go about determining a depreciation reserve
22 surplus in order to amortize it instead of use remaining
23 life technique; is that your understanding?

24 A Yes.

25 Q Okay. And in it, the answer shows the

1 company's response of how the methodology should be
2 undertaken if you were going to do this exercise, do you
3 agree with that?

4 A Yes.

5 Q Okay. And the way that Mr. Garrett and Mr.
6 Kollen presented the surplus, and in order to present
7 the policy issue of returning it faster than remaining
8 life technique would do, does the company agree that we
9 followed the methodology that's set out in this
10 interrogatory, regardless of whether you agree with the
11 numbers?

12 A Can you please restate your question? I am
13 not clear.

14 Q Did the company have -- agree -- have any
15 issue with the way the methodology was applied by Mr.
16 Garrett and Mr. Kollen in determining the surplus in
17 order to recommend to the Commission an amortization
18 amount?

19 A So my understanding is that they are
20 recommending to amortize it over 10 years --

21 Q Yes.

22 A -- and we believe it should be over the life
23 of the asset based on Commission precedence.

24 Q Yes. But in order to determine the amount to
25 amortize, if the Commission were to take that policy

1 path, the company doesn't disagree with the methodology
2 that was applied to determine the amortization amount or
3 the balance to be amortized, is that right?

4 A Correct.

5 Q Okay. In your rebuttal testimony, you address
6 the Issue 9, depreciation reserve imbalance correction
7 issue, at -- starting at D8-513, if we could go to that.
8 I must -- I didn't get the right number here. I
9 apologize.

10 MR. REHWINKEL: Once again, Mr. Chairman, I
11 cleaned out my paper to references to use the Case
12 Center, and I didn't get back on task so --

13 CHAIRMAN FAY: Okay.

14 MR. REHWINKEL: -- let me find --

15 CHAIRMAN FAY: I will give you a second to get
16 realigned.

17 MR. REHWINKEL: -- my reference. Oh, I said
18 D. I mean E8. E8-513, if we could go there.

19 BY MR. REHWINKEL:

20 Q So this is page 26 of your rebuttal testimony?

21 A Yep.

22 Q And starting on line 15 through line 29, this
23 is where you address this issue, right?

24 A Yes.

25 Q Okay. Here, you state that as -- starting on

1 line 18 -- as stated by witness Watson in his rebuttal
2 testimony, witness Garrett's determination of these
3 extended lives is flawed and should be rejected -- I am
4 sorry, that's -- that's the depreciation, your rebuttal
5 to his depreciation, but let me just touch on that for a
6 second.

7 You are really just reflecting what Mr. Watson
8 supports in his testimony, right?

9 A Correct.

10 Q You are not offering a substantive rebuttal to
11 Mr. Garrett's depreciation rate testimony, right?

12 A Correct.

13 Q Okay. And the same would go for the portion
14 that starts on line 22 of page 26, and carries forward
15 to page 27, through line seven, with respect to the
16 flowback of a depreciation reserve surplus, correct?

17 A No, I think that -- I mean, I do have a
18 position that it should be over the life of the asset,
19 but that it's a policy decision for the Commission if
20 they were to choose to do something different than
21 historical.

22 Q Okay. So when I look at this testimony,
23 especially going to page 27, you state that, as stated
24 later in my testimony, the company believes that any
25 such revenue requirement reduction should not be the

1 result of deviating from normal depreciation study
2 practice, but rather, should be the result of the
3 Commission consideration of the use of an amortization
4 method as a matter of policy. Did I say that right?

5 A Yes.

6 Q Okay. And you are basically presenting it, as
7 I read, this the company's position --

8 A That is correct --

9 Q -- right?

10 A Yes.

11 Q Okay. But you are not providing -- well,
12 let's go look at your -- just a couple pages later, on
13 page 29, which is E8-516. Your testimony starts there
14 on-line 18 on this regard, right?

15 A Yes.

16 Q And you were asked if you agree. And you say,
17 no. And then the way I read it is, it says: As
18 discussed in witness Watson's rebuttal testimony, using
19 a specified amortization period for theoretical
20 depreciation reserve surplus is not normal depreciation
21 study protocol, but rather a policy decision. The
22 company believes that any such revenue requirement
23 reduction should not be the result of deviating for
24 normal depreciation study practice but, rather, should
25 be the results of the Commission's consideration of the

1 use of an amortization method as a matter of policy?

2 A Yes.

3 Q That's the sum and substance of your testimony
4 on that, right?

5 A Yes.

6 Q Okay. So you are -- as I read it, you are
7 just basically repeating Mr. Watson's position in your
8 testimony on behalf of the company on the surplus
9 amortization?

10 A Yes, I think that the different context is
11 that he is a depreciation expert, and would always
12 recommend over the life of the asset. Whereas, we are
13 saying there is a time and a place, if the policy -- you
14 know, if a Commission perspective chooses to do
15 something different.

16 Q Okay. So would you agree, based on that
17 language that we just reviewed, on lines -- basically on
18 lines two through seven on page 30, that whatever the
19 Commission's policy is regarding correction of an excess
20 theoretical depreciation reserve balance is what should
21 control?

22 A Can you please repeat your question?

23 Q Yes. I am asking if you are saying that if
24 the Commission has a policy on how to handle a surplus
25 of this magnitude, then that policy could be applied in

1 this case?

2 A Yes.

3 Q Okay. And if the Commission applied whatever
4 policy they had, the company would be fine with that, as
5 long as it was consistent with the Commission's policy?

6 A If it was constructive, and we were able to
7 maintain financial integrity, yes.

8 Q Okay. So would you agree that in the past,
9 the Commission has expressed concerns about reserve
10 imbalances that violate the matching principle, create
11 subsidies and intergenerational inequities?

12 A Yes.

13 Q Okay. And would you agree that, in the past,
14 the Commission has expressed concerns that depreciation
15 of plant that generates significant surpluses can mean
16 that the plant is over-depreciated?

17 A I am not aware of that.

18 Q Okay. Are you aware that in the situations
19 where the Commission has found that there is a
20 significant reserve imbalance, whether it is a deficit
21 or a surplus, that they have ordered that it be
22 corrected shorter than a remaining life technique would
23 do?

24 A More so, my understanding is it's typically
25 over the life of the assets.

1 Q Okay. But are you aware that they have
2 utilized shorter periods to correct an imbalance that's
3 a deficiency, as well as when there has been a surplus?

4 A I think in our last settlement, we had \$34
5 million that they used.

6 Q Okay. But you are talking about the
7 settlement agreement?

8 A Yeah.

9 Q Okay. And that was a settlement agreement
10 among the parties. It wasn't something the Commission
11 did on its own initiative?

12 A True. Yes.

13 Q Okay.

14 MR. REHWINKEL: Mr. Chairman, I would like to
15 pull up J421, which is in the official
16 recognition --

17 CHAIRMAN FAY: Okay.

18 MR. REHWINKEL: -- file. This is an FPL order
19 from 2010.

20 BY MR. REHWINKEL:

21 Q We could go back to the 87 pages earlier and
22 look at the front page if you like, or you can accept my
23 representation that this is the order from the 2009 FPL
24 rate case. Would you like to go back and look at that?

25 A No, I accept it. Yes.

1 Q Okay. All right. Are you familiar with this
2 order in any way?

3 A No, I am not.

4 Q Okay. Are you aware, or you will accept my
5 representation, that FPL filed a case that indicated
6 that they had a \$1.25 billion surplus depreciation
7 reserve, theoretical depreciation reserve?

8 A Yes.

9 Q Okay. And would you further agree that after
10 making corrective reserve adjustments, the Commission
11 had \$894.6 million of depreciation reserve surplus that
12 became a point of contention about how to dispose of it
13 in that case?

14 A It appears so.

15 Q Okay. Had you ever seen the language in that
16 order that states, on page 87 there, we agree with OPC's
17 position that intergenerational unfairness already
18 exists, as witnessed by the existence of such a
19 significant reserve imbalance, therefore, we are of the
20 opinion that amortization -- that amortizing the
21 remainder of the reserve surplus is the most appropriate
22 remedy to eliminate the intergenerational inequity the
23 surplus created. The only question remaining is how
24 long it should be -- it should take to correct the
25 situation --

1 A I see that.

2 Q -- do you see that?

3 Would you agree that in that case, the
4 Commission ordered that \$894.6 million to be amortized
5 to income over four years, and returned to the customers
6 that way?

7 A That's what I read. Yes.

8 Q Okay. In this case, the Public Counsel is
9 regulation -- is recommending 2.5 times longer
10 amortization period, or 10 years, compared to the Gulf
11 -- the FPL situation, would you agree with that?

12 A I would agree. Yes.

13 Q Okay. The company has not filed any testimony
14 in this case demonstrating that it would be unfair to
15 the company if a 10-year amortization period of the
16 surplus, whether it's 153, 159 or \$221 million, is
17 amortized to offset the revenue requirement in this
18 case?

19 A Right. Our testimony is that it should be
20 over the life of the assets, but that to the extent that
21 Commission policies determined something different, then
22 that could apply.

23 Q Okay. So the answer is, no, there is no
24 evidence that there would be a financial hardship or
25 burden to the company if that amortization of 10 years

1 occurred instead of the remaining life technique?

2 A That's correct.

3 Q Okay. So when the Commission stated in the
4 very next paragraph -- I guess when I say the very next
5 paragraph, it would be the second paragraph that starts
6 "accordingly", on that J421 page.

7 Accordingly, we find that the remaining
8 reserve surplus amount of \$894.6 million shall be
9 amortized over a four-year period. This is consistent
10 with our policy with respect to reserve imbalance, which
11 has been to correct them as soon as possible without
12 adversely impacting the company's ability to earn a fair
13 and reasonable return?

14 MR. WAHLEN: Mr. Chairman, at the risk of
15 extending this, this really sounds like legal
16 argument that belongs in a brief. I know Mr.
17 Rehwinkel is trying to make a point here, but we
18 have agreed that it's a matter of Commission
19 policy.

20 If he is going to go through a whole long list
21 of orders and put them in front of the witness and
22 ask her about that, we are going to be here a long
23 time. If he would like to do this in the brief,
24 that's fine. But he is really asking her to
25 comment on Commission orders, and I am not sure why

1 that's particularly relevant for that witness.

2 CHAIRMAN FAY: Mr. Wahlen, I tend to agree
3 with you. I was -- I kind of wanted to see where
4 this went, but, Mr. Rehwinkel, go ahead.

5 MR. REHWINKEL: Yes. As you can see, there
6 was a little qualifier at the end of that very last
7 thing that I read, and I just was factually closing
8 the loop and the policy on that. I think I had one
9 or two more questions, and I certainly would follow
10 the sage advice of Mr. Wahlen and not go through a
11 bunch of orders at this time. So if I could just
12 finish just a couple more questions here on the --

13 CHAIRMAN FAY: Yeah, I think within her
14 expertise. I mean, you haven't -- I don't think
15 you have pushed the legal connection too far, but
16 we are getting close.

17 BY MR. REHWINKEL:

18 **Q So I just want to ask my last question in this**
19 **area, is you would agree that Mr. Kollen and Mr.**
20 **Garrett's recommendation on the corrective amortization**
21 **of the significant reserve imbalance is not in violation**
22 **of the Commission's policy in this area?**

23 A It doesn't appear so.

24 **Q Okay. Thank you.**

25 **So let's go to the A&G allocation capital**

1 issue, which I think is housed in the fallout issues of
2 27 and 49, would you agree with that --

3 A Yes.

4 Q -- rate base and O&M?

5 All right. Although there is not a specific
6 issue asking whether the company has properly allocated
7 administrative and general expense costs from accounts
8 920 and 921 through account 922 to construction costs as
9 contemplated in the Uniform System of Accounts, you
10 would agree with me that the OPC has raised the issue,
11 and you have responded to it, and it's properly
12 addressed in Issues 27 and 29 -- and 49?

13 A That is correct. Yes.

14 Q Okay. And you would agree that the Commission
15 should make a determination about whether PGS forecasts
16 -- PGS's forecasted level of A&G transfer to plant or
17 rate base is reasonable and prudent an amount, would you
18 not?

19 A Yes.

20 Q Now, you have proposed that the correct number
21 is \$11 million, and Mr. Kollen has testified it should
22 be \$13.1 million, right?

23 A Yes.

24 Q Would you agree with me that it has been a
25 practice of PGS in two rate cases now, this one and the

1 2020 case, to propose to transfer an unadjusted or
2 unescalated amount of A&G to construction or plant in
3 the historical test year, base year and test year?

4 A We did keep it consistent with '22. It's not
5 necessarily a policy. It's an accounting estimate. And
6 when we looked at the facts and circumstances of the
7 test year, it felt appropriate to keep it at that \$11
8 million.

9 Q Okay. You did the same thing in the 2020
10 case, you set it at \$8 million based on the 2019 base
11 year, base year plus one was eight million, and then
12 2021 test year was eight million, right?

13 A Subject to check, I can't recall specifically.

14 MR. REHWINKEL: Mr. Chairman, I passed out
15 yesterday an Exhibit 24 that I ended up not moving
16 into the record. It may be laying around.

17 CHAIRMAN FAY: This is nonconfidential?

18 MR. REHWINKEL: Yes.

19 CHAIRMAN FAY: And it's titled what, Mr.
20 Rehwinkel?

21 MR. REHWINKEL: It's -- I think it's G-2, it's
22 OPC 24, but it's an MFR schedule from 2020 case.

23 MS. HELTON: And I think it's already up on
24 Case Center.

25 MS. WESSLING: I would just add that since we

1 did release it, it is available in Case Center
2 which I directed everyone to, it just needs an
3 exhibit number.

4 CHAIRMAN FAY: Okay. We will mark that as
5 219.

6 (Whereupon, Exhibit No. 219 was marked for
7 identification.)

8 CHAIRMAN FAY: PGS, do you have that?

9 BY MR. REHWINKEL:

10 Q Do you have that in front of you?

11 A Yes, I do.

12 Q Okay. So just so we can confirm, what I
13 described with the \$8 million being in the base year,
14 base year plus one and test year, that's what's
15 reflected on line 13, if I have that lined up right?

16 A I believe it's line 14.

17 Q 14, okay. Line 14 of this MFR schedule from
18 the last case, right?

19 A Yes.

20 Q Okay. And a similar phenomenon, if that's the
21 right word, occurred in this case --

22 A Yes.

23 Q -- where there was \$11 million in 2022 that
24 was carried over into '23, and then again into the test
25 year?

1 A Yes.

2 Q You would agree that after rates were set
3 through the stipulation in 2020, based on a 2021 test
4 year, that for the year 2022, PGS increased the transfer
5 from \$8 million to \$9 million in 2021, and then to \$11
6 million in 2022?

7 A That is correct. Our capital program
8 increased more than what we had anticipated in the 2021
9 test year. And so when we do our review of what seems
10 appropriate looking at all of the factors of that
11 estimate, we did increase it based on those facts and
12 circumstances.

13 Q Okay. You increased it in 20 -- in '22 \$1
14 million, to \$9 million -- I am sorry. Actually, in
15 2021, did you increase it to \$9 million?

16 A Yes. We increased it from eight million to
17 nine million in 2021.

18 Q Okay. And then in '22, it went from \$9
19 million to \$2 million more, to 11 million, right?

20 A Yes.

21 Q In this case, you didn't do any special time
22 study that supported the change in the allocation either
23 from the test year amount in the rate case to what you
24 used in your income -- I guess in your income statement
25 for '21, or to go from that \$9 million to \$11 million,

1 did you?

2 A No, we did not.

3 Q Okay. So in this case, after that 2020 filing
4 transfer amount was revised from eight million to \$9
5 million -- and I guess what I am trying to understand is
6 you had \$8 million in the test year filing, but what it
7 appears happened is that, at some point, for financial
8 reporting purposes, that number changed to \$9 million?

9 A It increased based on the higher capital spend
10 program that we had in '21 compared to what was
11 anticipated in the test year, yes.

12 Q Okay. And then that number going to \$11
13 million became the base for determining of the test year
14 income statement and capital amounts as they relate to
15 where A&G costs sit, is that fair?

16 A So when we prepared the budget, we looked at
17 the facts and circumstances around how the 11 million
18 was calculated, which is based on the amount of effort
19 team members spend on capital, the capital program,
20 various different things are in consideration around
21 that estimate. And when we did so, we felt that 11
22 million was appropriate in the test year, yes.

23 Q I would like to turn to Exhibit 206. I don't
24 know if you have that in front of you. That's the
25 budget related -- do you have a copy for her? Yes, 35.

1 And I want you to turn, if you can, to Bates 7 and ask
2 you if you are familiar with this?

3 A Bates seven?

4 Q Yeah. It's OPC Bates 7, which is your Bates
5 341 --

6 A Okay.

7 Q -- and interrogatory number 82.

8 A Yes.

9 Q Okay. You know this document, right?

10 A I do.

11 Q Okay. So this -- in the bottom half of this
12 page, it shows the CAPEX over the capital budget, and
13 then the capital spend. The actual is in the bottom
14 part, right?

15 A Yes.

16 Q Okay. So here we see that in 2018, the
17 capital spend was \$172.4 million; 2019, 201.8; 2020,
18 338.9; 2021, 307.4; and then 2022, 325.2, right?

19 A Yep.

20 Q So 2019, the -- to 2020, subject to check,
21 would you accept that the budget amount increased six
22 percent?

23 A Yes.

24 Q Okay. And then from 2020 to 2021, the budget
25 decreased nine percent, or the CAPEX, I mean?

1 A Yes.

2 Q Okay. And then from 2021 to 2022, it
3 increased 2.6 percent, subject to check?

4 A Subject -- yes, subject to check.

5 Q Okay. In 2022, compared to 2029, the budget
6 increased 52 percent over those three years --

7 A That looks reasonable, yes.

8 Q -- subject to check?

9 A Yep.

10 Q Okay. I meant to compare 2019 and 2022. If I
11 said 2029, I am definitely not a time traveler, so with
12 that correction, you agree a 52-percent change?

13 A Yes, I knew what you meant.

14 Q So in 2021, the CAPEX spend was \$301 million,
15 which was about, as we've discussed, nine percent less
16 than the 2020 CAPEX level, and yet the -- let me strike
17 that question and ask about in 2021.

18 Despite the nine-percent drop in CAPEX spend,
19 you increased the A&G transfer by 12-and-a-half percent,
20 or from eight to nine million, is that right?

21 A That is correct. It's not simply a faction
22 of, you know, related to capital expenditures. It's
23 about the activity within our A&G costs that are
24 supporting that. So there is a handful of factors that
25 we can look at and consider, but yes.

1 Q Okay. So the activity you are talking about
2 is actual construction activity?

3 A So this is meant to reflect the administrative
4 and general costs that are on going to support capital,
5 is what the A&G credit does. Yep.

6 Q Okay. In 2022, when the CAPEX spend increased
7 by 2.6 percent, as we've already discussed, your A&G
8 transfer increased by 22 percent to \$11 million, right?

9 A That is correct. Yes.

10 Q Okay. Wouldn't you agree that these two
11 scenarios are inconsistent with the basis that PGS is
12 presented presenting to the Commission related to why
13 the \$11 million in '22 is not increased or escalated for
14 '23 and '24?

15 A No, I would not. Like I said, this is one of
16 various factors that we look at, and it is something
17 that we review ongoing, and I would not agree with that.

18 Q Okay. But there was no special study or
19 analysis presented in your filing that demonstrated kind
20 of the process that you went through to determine
21 whether -- why 11 -- why '23 and '24 should stay exactly
22 flat compared to '22, right?

23 A No. I believe there was one discovery request
24 that we explained the capital, but, yes, there is
25 nothing more than that.

1 Q Okay. There is no special study, or anything
2 like that, that looks at the construction activities and
3 the supervisory activities that might flow from 920
4 through 922 and over to the plant accounts, right?

5 A Not in the filing, not to my knowledge.

6 Q All right.

7 MR. REHWINKEL: So let's go to OPC 39, if we
8 can, which is -- I will need an exhibit number for
9 this, Mr. Chairman.

10 CHAIRMAN FAY: Okay. 219 -- 220.

11 MR. REHWINKEL: This is a response to OPC
12 Interrogatory 185.

13 (Whereupon, Exhibit No. 220 was marked for
14 identification.)

15 BY MR. REHWINKEL:

16 Q Do you see that?

17 A Yes, this is what I was referring to a minute
18 ago.

19 Q I thought you might.

20 So this is a response that you provided in a
21 response before and know well, right?

22 A That is correct. Yes.

23 Q Okay. Now, you would agree that this response
24 is very consistent, and almost identical to your
25 testimony in rebuttal on this issue, right?

1 A Yes, it is.

2 Q Okay. Now, does this response discuss the
3 relationship between the CAPEX budget and the A&G
4 transfers in the years 2019 through 2021?

5 A Yes.

6 Q Okay. So does it discuss the interim step of
7 going from eight million to \$9 million before you went
8 to 11 million?

9 A No, it does not.

10 Q Okay. You used the phrase -- actually, let me
11 just read it into the record.

12 The last sentence in this response says:
13 Considering the significant increase already made to the
14 A&G capital allocation from 2020 to 2022, as compared to
15 the change in capital expenditures during that period,
16 and the projected capital structure's in 2024, the
17 company deemed it reasonable to keep the A&G allocation
18 to capital at one -- at \$11 million in the 2023 and 2024
19 budgets. Did I read that right?

20 A Yes, you did.

21 Q Okay. Would you agree with me that the
22 standard for whether to capitalize A&G is not whether
23 the company deems it to be reasonable?

24 A Could you please rephrase your question?

25 MR. REHWINKEL: Well, actually, let me just go

1 to a new exhibit, Mr. Chairman. This will be 34.
2 This is some excerpts from the USOA. 221?

3 CHAIRMAN FAY: Okay. Mark this 221.

4 MR. REHWINKEL: The title is USOA A&G
5 Accounting Instructions.

6 (Whereupon, Exhibit No. 221 was marked for
7 identification.)

8 BY MR. REHWINKEL:

9 Q And, Ms. Parsons, in all of the
10 responsibilities that we discussed at the outset of your
11 testimony -- and I think you are a CPA right?

12 A I sure am.

13 Q You are very familiar with these USOA
14 accounts, right?

15 A Give or take, yes.

16 Q Okay. So I copied the latest document that we
17 had in our office, which is April 1, 2022, and even
18 though it's a little bit old, it's exactly the one that
19 would have been in effect in 2022 when you prepared your
20 budget, right?

21 A Yep.

22 Q Okay. So I would like for you to turn, if you
23 can, to Bates 5, which is the excerpt page 794, and have
24 you look at the account definition for account 920,
25 administrative and general salaries, do you see that?

1 A Yes.

2 Q This is the -- this is the significant cost
3 center, if you will, that it's -- that's the issue that
4 we are talking about here today, and in conjunction with
5 921, which were the office supplies that kind of go with
6 those salaries, right?

7 A Yes.

8 Q Okay. So this 920, it says: This account
9 shall include the compensation, parentheses, salaries,
10 bonuses and other consideration for services, but not
11 including directors fees, close parentheses, of
12 officers, executives and other employees of the utility
13 properly chargeable to utility operations and not
14 chargeable directly to a particular operating function.
15 Do you see that?

16 A Yes, I do.

17 Q And this is the kind of guiding instruction as
18 far as what costs you take out of your O&M expenses and
19 move over to construction, right?

20 A Right.

21 Q Then if we go over and look on Bates 6 in 922,
22 administrative expenses transferred credit, this is the
23 mechanism that gets those debits over to the balance
24 sheet, right?

25 A Yes. This is one of the methods. We also

1 have on folks that charge A&G and specifically allocate
2 labor to capital projects.

3 Q Okay. This account says: This account shall
4 be credited with administrative expenses recorded in
5 accounts 920 and 921, which are transferred to
6 construction costs, which are nonutility accounts,
7 parenthesis, see gas plant in instruction four. Do you
8 see that?

9 A Yes.

10 Q Okay. And then instruction four is over here
11 on Bates 3. In the lower right-hand quadrant there in
12 italics, it says four, overhead construction costs. Do
13 you see that?

14 A Yes.

15 Q And these are all the instructions that apply
16 how you treat those expenses to get them on to your
17 balance sheet, right?

18 A Right.

19 Q And if I could point you down to B at the very
20 bottom of that page. It says: As far as practicable,
21 the determination of payroll charges includable in
22 construction overheads shall be based on timecard
23 distribution thereof. Where this procedure is
24 impractical, special studies shall be made periodically
25 of the time and supervisory -- time of supervisory

1 employees devoted to the construction activities to the
2 end that only such overhead costs that have a definite
3 relation to construction shall be capitalized. The
4 addition to direct construction costs of arbitrary
5 percentages or amounts to cover assumed overhead costs
6 is not prohibited -- is not permitted. Do you see that?

7 A I do.

8 Q Okay. So this is really the instruction that
9 governs this -- these allocations, right?

10 A Yes.

11 Q Okay. So this is more than just whether the
12 company deems it reasonable. You kind of have to
13 following the accounting guidelines as far as doing
14 this, right?

15 A Right. And we have performed studies in the
16 past. We just haven't refreshed it as of late given
17 resource constraints.

18 Q Okay. But for purposes of coming to the
19 Commission and asking for rate relief, one of the
20 revenue requirement issues that the Commission has to
21 grapple with and make a decision on is whether O&M
22 expenses should be reduced so that those costs move over
23 to your balance sheet and are properly allocated to
24 plant in service that is then depreciated, right?

25 A Absolutely. Yes.

1 Q Okay. So the fact that there could have done
2 a study, but didn't, that would -- the Commission could
3 evaluate whether that goes to -- whether you meet your
4 burden of proof on this issue, would you agree?

5 A Right. And if we felt that there were
6 material circumstances, we would have ensured that we
7 had somebody to help support that effort, but the facts
8 and circumstances felt that, you know, that the \$11
9 million was still appropriate.

10 Q Okay. One of the things, if we could go back
11 to that Interrogatory 185 and 220, which is exhibit OPC
12 36 -- 39.

13 One of the analyses that you perform in this
14 response is that you suggest that the FGT to
15 Jacksonville Export Facility project should not be
16 considered in evaluating whether these costs should move
17 over, is that right?

18 A Yes.

19 Q Okay. We heard a little testimony from Mr.
20 Richard yesterday about FGT to JEF has been delayed?

21 A Right.

22 Q But I want to ask you if we could go, if you
23 look at Mr. Rutkin's testimony that's been stipulated
24 into the record, and I would direct the Commission and
25 the witness to D4-189, which is page 15 of Mr. Rutkin's

1 testimony, as it relates to this FGT to JEF project.

2 So Mr. Rutkin testifies here, starting on line
3 3 through line 14 that the project is expected to be
4 under contract by the end of the second quarter of 2023,
5 under construction by the third quarter of 2024, and in
6 service by the third quarter of 2025, which is later
7 than the company projected in the '23 -- 2023 and 2024
8 budgets. Do you see that?

9 A I do.

10 Q And he goes on to say: In addition, the cost
11 estimates for the project in the initial budgets have
12 changed. However, due to its size and length of time it
13 will take to build, the project will be eligible to
14 accrue allowance for funds used during construction and
15 the capital costs will not be included in the company's
16 base rate calculation for the 2024 test year, right?

17 A Yes.

18 Q So not including it in rates for rate recovery
19 purposes is different from whether it's an ongoing
20 active construction project, right?

21 A Yes.

22 Q Okay. So you would agree, based on the
23 timeline that he has testified to, that the Commission
24 could conclude that it is entirely reasonable that all
25 kinds of engineering and construction activities are

1 ongoing as we sit here today, to make this project come
2 in on time, right?

3 A Yes. However, I would say that the latest
4 information I am aware of is we have not yet signed that
5 contract, so there may be further delays than what's
6 represented here.

7 Q Okay. But engineering services would be
8 ongoing in this regard, right?

9 A Honest -- I am not the right person on that.
10 I don't recall any cost happening as of yet, so I would
11 suspect no, but Mr. Richard would have been a better
12 witness for that.

13 Q Right. But based on the timeline that the
14 witness that's in the record, and Mr. Rutkin is in here
15 and stipulated to, he is the guy, and he says this is
16 what's going on; right?

17 A As of that point in time, absolutely. Yes.

18 Q So to the extent that activities that would
19 require supervisory salaries to be allocated to a
20 construction project are ongoing, the Commission could
21 determine that it would be appropriate to consider FGT
22 to JEF as far as whether it should -- there should be
23 salaries allocated over the administrative and general,
24 correct?

25 A Yes. And I believe most of Mr. Richard's shop

1 is in the capital -- charges capital directly.

2 Q Okay. But in your response here, and in your
3 testimony, you have told the Commission that this --
4 this should be excluded because of the timing of it, not
5 because of how the salaries flow, right?

6 A Correct. Right.

7 Q Okay. Yesterday, we did -- had some
8 discussion with Mr. Richard about the seven-member
9 capital management team. Do you recall that?

10 A Yes.

11 Q Okay. Now, is it your understanding that that
12 seven-member team would allocate approximately 90
13 percent of its time to capital?

14 A Did you say nine percent or 90.

15 Q 90, nine zero. Yeah.

16 A Yes, I think so.

17 Q Okay. I think there is an MFR somewhere there
18 that actually goes through and shows what dollars are in
19 O&M, and the balance would be in capital, right?

20 A Right.

21 Q Okay. So those costs are, I think as the
22 discussion was, was the lion's share of that team's
23 labor costs would hit your books in the second half of
24 2024, is that roughly correct?

25 A Subject to check. I can't recall.

1 Q Okay. If he testified that mid '24 would be
2 when they would -- they would hire everybody but the
3 director that's already been hired --

4 A Yes.

5 Q -- that would mean that those costs would be
6 in 2024. And if 90 percent of them were going to go to
7 capital, how do you square that with keeping the \$11
8 million flat, not changing it?

9 A Because that goes directly through capital.
10 It does not ever flow through A&G 920. Their charges --
11 basically their standard labor distribution says 90
12 percent is going to get charged to capital. When those
13 projects are ongoing, they charge directly. So it
14 doesn't sit in the initial bucket they were allocating
15 costs from.

16 Q Okay.

17 A You have to be careful not to double allocate.
18 If we then include it in a bucket, that 10 percent, in
19 an allocated bucket, and then send to capital, and then
20 we send to 90, we are over-allocating to capital at that
21 point.

22 Q Okay. Fair point there.

23 So if the person they hired happened to be in
24 the executive pool -- I don't know whether he would or
25 not -- his costs might end up in 920, but by and large

1 what you are saying, the intent there is, from day one,
2 if they are going to be allocated to capital, that
3 doesn't go through this process?

4 A Exactly.

5 Q Okay. Thank you for that.

6 Can you tell me about the circumstances
7 surrounding how a test year allocation of A&G of \$8
8 million that we saw in the MFRs, how and when would that
9 have changed to \$9 million?

10 A So we would have looked at -- done some type
11 of analysis in a study high level around the activities
12 that the capital spend different factors, and when we
13 did that, we felt that nine million was appropriate. It
14 was a subjective review of an accounting estimate.

15 Q When would that have happened?

16 A I believe it would have -- usually Q4 of
17 '20 --

18 Q Okay.

19 A -- yeah.

20 Q Now, I know that that case settled so the
21 Commission didn't make a determination, but would it be
22 appropriate for a test year amount, let's say \$11
23 million in this year, to be considered and approved by
24 the Commission, and then in Q4 this year, the company
25 decide, hey, maybe Mr. Kollen was right, it's \$13.1

1 million. So if you made that kind of a change after the
2 Commission voted, wouldn't this be the scenario, you
3 would have revenues that would be based on expenses that
4 assumed \$11 million went over to capital, but if you
5 then allocated \$13 million, that's \$2 million that would
6 go to your bottom line, but the customers would be
7 paying for that in rates in that hypothetical situation,
8 right?

9 A If we would offset a little bit by the
10 additional costs of carrying capital, correct.

11 Q I am sorry?

12 A Yes. However, we would have additional
13 capital that we would have carrying costs for at that
14 point. So the dollars go from O&M into capital, and
15 then there is cost for that, but that would be the case.
16 However, there is not a plan to do that at this point in
17 time. And the facts and circumstances don't show that
18 that's the path that we are taking.

19 Q Okay. So -- well, I get your point on the
20 capital, but the ratio of revenue requirements is about
21 nine to one, right?

22 A Give or take.

23 Q Okay. And the testing year, \$1 million of
24 expenses is \$100,000 capital on a revenue requirement
25 basis, right?

1 A Yes.

2 Q Okay. Let's just talk quickly, if we can,
3 about the property tax issue.

4 I think we still -- you originally filed for
5 saying that this -- the trend over the past five years
6 was that your property taxes were 3.9 percent higher
7 than what you had budgeted, or what your return said.
8 Do I have that right?

9 A I don't believe so. I think that was the
10 corrected property tax estimate.

11 Q What's that?

12 A That was the corrected. Are you talking about
13 the experience trend factor?

14 Q Yes.

15 A Yeah, so there was an error in our original
16 filing around the experience trend factor. In my
17 rebuttal, we corrected that, and the five-year average
18 was about four percent, I believe.

19 Q Okay. I thought it corrected to 3.7.

20 A 3.7 is the 2022 amount that we use, which is
21 conservative compared to the 3.9 average.

22 Q Okay. Well, I thought 2022 was 0.08?

23 A That was prior to the correction. So in the
24 calculation, when we did it initially, we had picked up
25 a wrong year, and it produced the -- 0.8 was -- I am

1 trying to recall, but yes -- I think it might have been
2 we used 2020 -- you are correct. We used 2021 because
3 2022 was an anomaly due to one particular jurisdiction
4 we spoke about in my deposition.

5 **Q Right. So when you removed the Orange County,**
6 **which you considered an anomaly, there wasn't an error**
7 **on anybody's part there, they just -- they were less**
8 **than what you had proposed, right, and that drove the**
9 **whole average down to 0.08?**

10 A Right. It was a very strange phenomenon,
11 historically, we have seen much closer to four percent.
12 One jurisdiction had a very low amount that caused the
13 entire average to go to 0.8 percent, and so we used a --
14 well, our five-year average, like I said, was over
15 around four percent, and so we used the 3.7 percent of
16 2021 to be conservative.

17 **Q Okay. But wouldn't you agree that the trend**
18 **in the last four years was a declining one in terms of**
19 **the difference?**

20 A No, I would not.

21 **Q Well, do you happen to have those numbers in**
22 **front of you?**

23 A Yeah. So what I have here is our 2018
24 experience trend factor was 4.5 percent. It grew in
25 2019 to 5.4 percent; 2020 it was 4.9 percent; 2021,

1 which is the assumption that we used in our case was 3.7
2 percent; and then 2022 was 0.8 percent, or when you
3 handle the anomaly of Orange County, 3.1 percent. So an
4 average of around four percent, and we used 3.7.

5 **Q Okay. So I said five, I meant four years, the**
6 **last four years with 3.1 percent correction, or the 0.8,**
7 **each year is less, right?**

8 A It has gone down, but like I said, 2022 is
9 quite strange.

10 **Q Okay. But even if you use 3.1, the trend is**
11 **going down, right?**

12 A Yes.

13 **Q Okay. So it wouldn't be unreasonable to use**
14 **3.1, given the trend has been down, and that's your**
15 **latest experience, right?**

16 A I disagree. I think it would be unreasonable.
17 I am not sure what other factors happened at the other
18 taxing authorities, but using one year, one point in
19 time is not really best practice in some cases, and so I
20 think using a five-year average of, you know, the four
21 percent, and we came in at three percent, is extremely
22 reasonable.

23 **Q Okay. Thank you.**

24 MR. REHWINKEL: I would -- do we have 37? I
25 am going to wing this a little bit.

1 BY MR. REHWINKEL:

2 Q We had asked you some discovery responses --
3 requests in OPC 267 and 268 related to TPI, TECO
4 Partners, Inc, and I think you provided the response to
5 it. What we had asked you was, were there any charities
6 additional contributions, political contributions,
7 sports sponsorships, any below-the-line items in there,
8 and you gave -- I think we can put it on the system.

9 CHAIRMAN FAY: Okay. What is that, Mr.
10 Rehwinkel?

11 MR. REHWINKEL: This is 37, and it's
12 interrogatories 267 and 268, I believe. I think we
13 just didn't print a paper copy of it.

14 CHAIRMAN FAY: Okay.

15 MR. REHWINKEL: We are going to try to release
16 it to the world.

17 MR. WAHLEN: Mr. Chairman and Mr. Rehwinkel, I
18 don't know if it will speed things along, but I
19 think the company is prepared to stipulate --

20 MR. REHWINKEL: Yes, I am just -- I want to
21 put that on the record. That's all.

22 MR. WAHLEN: -- yeah, that the stipulation on
23 Issue 44 would cover any lobbying, charitable
24 contributions, sponsorships and institutional and
25 image advertising incurred by TPI that may somehow

1 or another have been charged to Peoples Gas are.

2 BY MR. REHWINKEL:

3 Q And here's my question to the witness, and
4 don't know that we need to get that up there. We
5 will -- I was going to ask her if she would agree that
6 to the extent there were any costs addressed by Issue
7 44, and without conceding that such costs related to TPI
8 are, in fact, be recovered in the TPI billings to PGS,
9 the negotiated resolution between the parties, including
10 the staff's involvement, resolves that dispute
11 consistent with the -- or resolves that dispute, would
12 you agree with that.

13 A Yes.

14 MR. REHWINKEL: Okay. And so I think the
15 stipulation that Mr. Wahlen offered is one that we
16 agree to.

17 We just wanted to put it on the record, since
18 we raised it in this case, that they have made a
19 concession, and a negotiated resolution on
20 resolving these below-the-line items, and we concur
21 that the TPI stuff is --

22 CHAIRMAN FAY: Okay. And the stipulation
23 addresses that, so that's all you have on that
24 issue?

25 MR. REHWINKEL: Yes.

1 CHAIRMAN FAY: Okay. Great. Good.

2 MR. REHWINKEL: All right. I am going to
3 turn, Mr. Chairman, now to an issue that may take a
4 little bit of time. This is the CWIP issue, and I
5 want to -- I passed out a document with Mr. Richard
6 last night. It was OPC 41. I don't know if we
7 gave it a number. 210? So it's in the record, and
8 I want to -- I want to turn to that document.

9 CHAIRMAN FAY: Okay.

10 BY MR. REHWINKEL:

11 Q Do you have this with you?

12 A I do.

13 Q Are you familiar with the response to
14 Interrogatories 227 and 228?

15 A Generally, yes.

16 Q Okay. Would you agree that here, the OPC asks
17 for PGS's monthly balances of budgeted and actual CWIP
18 broken down between blanket CAPEX spends and specific
19 major projects?

20 A Yes.

21 Q Okay. We also asked you for the AFUDC accrual
22 for the month, as well as the closures of blanket work
23 order work and specific projects to plant in service,
24 right?

25 A Yes.

1 Q Okay. And this is a document that's -- that I
2 have put together here, that I kind of spliced together
3 those two responses just so they could be looked at
4 side-by-side. Do you see that?

5 A I do.

6 Q Okay. And I would like to see fallout issues
7 if we can go through the mechanics of how the company
8 keeps track of CWIP, and how you close it to plant using
9 this document.

10 A Okay.

11 Q And I want you to look, if you could, at OPC
12 Bates 5. I don't know. That probably doesn't have the
13 Bates on it. It is the 2022 sheet in there.

14 A Okay.

15 Q Do you have that?

16 A I do.

17 Q Okay. And this is where I left off with Mr.
18 Richard before he vigorously pushed back on responding
19 to this, which I don't blame him.

20 Let me do this, let me go to the 2023 number.
21 I apologize. I have my questions set up a little
22 differently. So I apologize. Let's go to 2023. And
23 budget row is on the bottom of this page, do you see
24 that?

25 A I do.

1 Q And if you go out to the closure to plant
2 total column, the amount is 550,582,923.63, do you see
3 that?

4 A I do.

5 Q Okay. I have a question that asks how you
6 forecast 63 cents in the budget process, but is this
7 because Power Plan does this?

8 A It does, it goes through Power Plan. Yes.

9 Q Okay. It's Power Plan, with no T at the end,
10 right?

11 A Yes. I think power plant might be a module
12 within it. I can't --

13 Q All right. So if one didn't keep an open mind
14 about it, you could get a false sense of the precision
15 about a document like this, right? I mean, there is no
16 intent to budget to that level of precision, is there?

17 A No.

18 Q Okay. So that 550 -- that same number we just
19 looked at is found in the 2023 MFRs in G-1 that we
20 looked at last night with Mr. Richard, do you agree with
21 that?

22 A Yes.

23 Q Okay. And that \$550 million number is used to
24 support the -- it rolls up to the projected plant
25 additions that are in the rate base in this case, right?

1 A Yes.

2 Q Okay. Now let's go over to the 2022 actual --
3 I guess I want to go there now.

4 A Okay.

5 Q In the actual, at the top, there we see the
6 beginning balance of 147,483,849.61, do you see that?

7 A Yes, I do.

8 Q That is an actual number, so that 61 cents is
9 real, right?

10 A It sure is.

11 Q Okay. In this month of January, what happens
12 is that balance -- and this is construction work in
13 progress, and it probably includes both AFUDC earning
14 and non-AFUDC projects, right?

15 A Yes.

16 Q Okay. And then the two lines below that,
17 CAPEX blankets and CAPEX special major, if you add those
18 two together, that's about \$23 million, right, just
19 eyeballing it?

20 A Yes.

21 Q So that \$23 million would be added to the 147,
22 the AFUDC that's accrued on any earning projects is
23 added --

24 A Correct.

25 Q -- and then any items that you complete the

1 work on in close to plant in service, those are
2 deducted?

3 A Yes.

4 Q Okay. And then the remaining balance, the
5 158,111, that carries over to February. And then the
6 process starts all over again. You do the same exact
7 thing --

8 A Yes, sir.

9 Q -- down and up and down and up and over.
10 Okay. So when I look at this actual activity
11 for 2022, it shows that for the year, you closed
12 218,175,544 of CWIP to plant in service, right?

13 A Yes.

14 Q If you go down to the balance -- I mean, the
15 budget below for the year, before that year started, or
16 earlier in that year, you had projected \$308,809,113.47
17 for the -- that would close, right?

18 A Yes, that is correct. We had some timing
19 where items didn't go in quite on plan.

20 Q Okay. But this 308 here would have been a
21 product of you developing your budget for 2022, loading
22 that into Power Plan, putting some assumptions in there
23 about the timing of work --

24 A Uh-huh.

25 Q -- which ones are earning AFUDC, and then

1 Power Plan just spits this out, right?

2 A I believe so.

3 Q Okay. But as we've seen on -- for 2023, that
4 spit out that I called it, that's used to support your
5 revenue requirement request in this case, right, not the
6 '22 one, but the '23 one?

7 A Right. It is used, and, yes, the system spits
8 it out. However, there is ample review and folks are
9 validating the output for that.

10 Q Okay. So this \$90 million, what happens is if
11 you look on the actual row at the top there in December,
12 the 246,108,951, that then carries over, if we can go to
13 2023, that carries over to your actual balance on
14 January 1, right?

15 A Yes, it does.

16 Q Okay. And then we see that process go all
17 over again.

18 Looking on the budget, it looks to me like
19 there was a reforecast, or an adjustment to the CWIP
20 budget that matches the 246, that the same amount is the
21 starting balance for the budget and the actual for '23,
22 right?

23 A That is correct. We had to update our budget
24 for this proceeding. Considering capital can be
25 multiyear, when we closed the books for 2022, we had to

1 update the future to ensure a consistent time period.

2 Q Okay. If we flip back to 2022, we see that
3 the projection for the budget was that you would end at
4 98,443,000 in CWIP balance, but that didn't happen, so
5 you had to kind of reset -- the budget doesn't carry
6 over in this -- in this circumstance, right? You had to
7 readjust your '23 budget for CWIP, right?

8 A Right. And this '22 budget would have been
9 done in the fall of 2021 --

10 Q Right.

11 A -- so it wouldn't have been appropriate to use
12 for the budget in the test year at this point, because
13 we had much better data.

14 Q Okay. So when I look at 2024, the
15 year-to-date closures to plant, if you add the January,
16 February, March and April numbers, it appears that --
17 that the amount closed is about \$67.4 million. Would
18 you agree with that, subject to check?

19 A Yes. I think it's in that total line.

20 Q Okay. Yeah, 60 -- actually, it's 67.4 --

21 A Yep.

22 Q -- at that point in the budget, you were
23 projecting to have closed \$287.8 million of CWIP to
24 plant, right?

25 A Subject to check, yes.

1 Q Okay. So doesn't this indicate that there
2 could be a concern about whether you are going to
3 actually close \$550 million of CWIP to plant?

4 A I think it could, however, there are a handful
5 of timing large projects that are driving this to occur,
6 the WAM project that Mr. Richard spoke about, some of
7 the RNG facilities. So I think there is some real
8 projects that we know are going in service, or have even
9 since this point in time.

10 Q So one could do the math here and see that
11 it's \$220.5 million behind schedule, if you will, to the
12 extent that this CWIP budget is a useful guide for the
13 schedule of plant closures, right?

14 A Yes.

15 Q Okay. You would agree with me that you have
16 about \$24 million of CWIP in your budget for the test
17 year?

18 A Subject to check, that sounds reasonable.

19 Q And you would also agree with me that, in
20 terms of revenue requirements, CWIP dollars in rate base
21 are not the equivalent of plant in service dollars in
22 rate base, right?

23 A Can you please rephrase?

24 Q Well, CWIP doesn't depreciate, it doesn't
25 create depreciation reserve balance, and doesn't create

1 deferred taxes?

2 A That is correct.

3 Q Okay. I think we can put this exhibit aside.

4 A Okay.

5 Q And I want to turn now to issues -- well, I
6 want to talk about the RNG cost deferral issue.

7 A Okay.

8 Q And this is -- we have stipulated to the
9 treatment of the projects in Issues 16, 17 and 18. 18,
10 Alliance, is removed from the case and that's all been
11 buttoned down and that's taken out. 15 and 16, I think
12 as you heard the staff discuss yesterday in their
13 cross-examination, there is an issue of about a
14 million-five in terms of the timing of revenue recovery
15 for the costs as they are accounted for in the test
16 year, right?

17 A Yes.

18 Q Okay. And that -- so in the test year, there
19 is a million-five more costs than there are customer
20 revenues from the RNG customer included in the revenue
21 requirement for that case -- for this case, right?

22 A Right. That is the case.

23 Q Okay. And part of the stipulation among the
24 parties was that the Commission would get to decide the
25 regulatory treatment of that should they just let it

1 fall as it's accounted for, or should there be some kind
2 of deferral mechanism to make it revenue neutral to the
3 general body of customers, right?

4 A Correct.

5 Q Okay. I think the term that the company used
6 is customer-backed. These are two customer-backed
7 projects, which means that they are supposed to be the
8 responsibility of the customer, the dairy farm or the
9 landfill, right?

10 A Yes. Those customers will be paying for the
11 total installed costs for the life of those investments.

12 Q Okay. And these customer-backed projects are
13 generally presented as holding the general body of
14 customers harmless over the life of the project by
15 making sure that the specific RNG customer is paying 100
16 percent of the cost of the project, at least over the
17 life of the project; is that right?

18 A Yes.

19 Q Okay. And in this case, for the test year,
20 the timing of the levelized revenue payments from the
21 customers in the two tariffed projects do not cover the
22 upfront capital and O&M costs that are residing in the
23 test year, is that right?

24 A That is correct. And that's the case with
25 many, you know, fixed long-term contracts.

1 Q Okay. So this million-five deficiency, if you
2 will, in terms of the RNG customer being responsible for
3 100 percent in the test year, that means that, for
4 setting rates, that the general body of customers will
5 pick up a portion -- the lion's share of that
6 million-five deficiency, right?

7 A In the first year, yes. But like we've talked
8 about, the levelized nature is later in the life. As
9 the net book value of those assets depreciate, the
10 ratepayers will actually benefit, because the revenue
11 received from those customers will be more than the cost
12 of those specific projects.

13 Q Unless the Commission -- the company comes in
14 for a rate case and gets rate relief, and that
15 turnaround is recognized, right, or only if that
16 happens?

17 A Right. But it could also serve to fund other,
18 you know, activities as we grow.

19 Q Okay. But if a customer, in 2024 and 2025, if
20 they move away, or otherwise are no longer a customer of
21 PGS before this turnaround occurs, and the revenue is
22 equal to or exceeds the cost of the project, they will
23 have borne some of the costs that only the RNG customers
24 should have borne, right?

25 A Can you please rephrase that?

1 Q Yeah. Let me ask it a different way.

2 If a customer in 20 -- a general body, just an
3 average Joe customer moves away in '25, in November of
4 2025 for 33 months, they will have paid -- they will
5 have borne the cost of this project instead of the RNG
6 customer for their portion of that million-five, right?

7 A Yes.

8 Q Okay. And that customer would not get that
9 offset benefit when it turns around, right?

10 A That is correct.

11 Q Okay. You would agree that Mr. Kollen never
12 recommended that Brightmark and New River be
13 below-the-line, right? He just advocated for revenue
14 neutrality?

15 A Correct.

16 Q Okay. Do you have exhibit -- let's see. I
17 guess my assistant has left me, so I am going to do
18 this.

19 Okay. This is Mr. Kollen's Exhibit LK-23, and
20 it's your response to Interrogatory 199. Do you see
21 that?

22 A Yes.

23 Q Okay. In this response, you say in the answer
24 part: The company has not reflected deferral accounting
25 in the 2024 test year for the RNG projects. The company

1 can only apply deferral accounting with Commission
2 approval. Peoples has no precedent as basis for
3 requesting deferral accounting on a contract with a
4 customer, therefore, it did not propose deferral
5 accounting. If directed by the Commission to apply
6 deferral accounting on these contracts, then the company
7 would not object.

8 Do you see that?

9 A Yes, we did say that.

10 Q Okay. Is that answer no longer correct?

11 A No, it is correct. I think, you know, the
12 concern is just the administrative burden. These are
13 two projects. They are no different than a lot of our
14 other projects, where, in the early years, they are not
15 meeting their revenue requirement, and they are in there
16 later years. And for that reason, the administrative
17 burden is it ideal for two projects and the resources to
18 do that? No. However, if the Commission so chooses, we
19 can do deferral accounting.

20 Q Okay.

21 A It is complete complex, though.

22 Q Okay. But if you did it, it would take some
23 of the burden of the rate increase off of the general
24 body of customers, right?

25 A It would, and they wouldn't benefit in the

1 outer years.

2 Q It what?

3 A It would, but they wouldn't benefit on the
4 back end.

5 Q Okay.

6 MR. REHWINKEL: Okay. Mr. Chairman, I have
7 one last area here, and it is going to be limited
8 cross-examination on the SeaCoast issue.

9 CHAIRMAN FAY: Okay.

10 MR. REHWINKEL: If you --

11 CHAIRMAN FAY: Are you good to keep going?

12 MR. REHWINKEL: Keep going?

13 CHAIRMAN FAY: Yep.

14 MR. REHWINKEL: All right.

15 BY MR. REHWINKEL:

16 Q You are the person in the company testifying
17 who is most directly responsible for the proper
18 accounting for affiliate transactions in this case,
19 right?

20 A Yes.

21 Q And you would agree that SeaCoast is an
22 affiliate of PGS for purposes of the Commission's rules
23 and policies, right?

24 A Yes.

25 Q And if the functions that you described in

1 your direct testimony that we reviewed at the very
2 beginning, you do those same things generally for
3 SeaCoast, right?

4 A Yes.

5 Q At the outset of this case, you did not
6 propose an adjustment in the filing to the costs
7 attributed to SeaCoast, right?

8 A Can you rephrase that?

9 Q You had in your -- in the filing, there were
10 allocations or attributions of costs to SeaCoast that
11 were baked into your budget process?

12 A Yes. That is correct.

13 Q Okay. I didn't ask it the right way.

14 You didn't propose any further adjustments to
15 the costs that are attributed to SeaCoast as a part of
16 your filing, right?

17 A Not in my direct testimony. In my rebuttal, I
18 did, yes.

19 Q All right. So after an issue was raised, you
20 listened to the consumer parties, you went back and did
21 another look, and you are proposing in this case to
22 adjust another \$190,000 out of the revenue requirement
23 to correct for some errors that you at least thought may
24 exist in that process, right?

25 A I don't know that I would say --

1 **Q Put in your words.**

2 A Yeah, I wouldn't say it was a correction of
3 error. I think that there was some information that we
4 discussed that felt reasonable to include the additional
5 \$190 million -- 190,000 adjustment to reflect.

6 **Q Okay. So if we could go to your testimony at**
7 **E8-520. I am looking at line nine.**

8 MR. REHWINKEL: The system doesn't like me,
9 Mr. Chairman. It keeps kicking me out. Maybe it's
10 trying to tell me something.

11 CHAIRMAN FAY: Is that when you manually go
12 there or when you are directed?

13 MR. REHWINKEL: I don't know. It just all of
14 a sudden I found it was gone and then it kicked me
15 out again, so I don't know.

16 CHAIRMAN FAY: We will give you a second to
17 get back there.

18 MR. REHWINKEL: Okay. There we go.

19 BY MR. REHWINKEL:

20 **Q All right. You have -- so I am looking at**
21 **your rebuttal testimony on page 33, which is E8-520, and**
22 **you state here that -- you kind of describe how SeaCoast**
23 **gets costs allocated or attributed to it, starting on**
24 **line six town down through line 16, do you see that?**

25 A Yes.

1 Q And wouldn't you agree that the cost shifting
2 to SeaCoast is based on relying on PGS employees to
3 accurately charge or allocate some of their time to
4 SeaCoast?

5 A Yes. And then we pick up the remainder
6 through the Modified Massachusetts Method.

7 Q Okay. And in here on line 13, you use the
8 word "periodically --

9 A Yes.

10 Q -- with respect to the allocations of time,
11 that they are periodically reviewed and adjusted?

12 A Yes.

13 Q Okay. When was the last time that was done?

14 A So we did a valuation at the end of 2022, and
15 actually increased the allocation to SeaCoast based on
16 some new cost centers that should be sent over --
17 sending costs over to SeaCoast.

18 Q Okay. But the budget was set earlier in 2022,
19 right?

20 A We actually had the opportunity to adjust it,
21 and our 2023 budget was -- the allocation to SeaCoast
22 was increased to reflect that change about \$500,000.

23 Q Okay. So it's, like, 4.8 percent now, for
24 like engineering and construction?

25 A Yes, it was. Prior to the agreement that we

1 have, I think it's a close -- a little over five percent
2 now, and we adjust for the labor.

3 Q Okay. And what was it before?

4 A Hi fours, or 4.8 maybe sounds about right.

5 Q Okay. But you didn't present anything -- you
6 didn't presents a study or any analysis to the
7 Commission in this case related to that process, right?

8 A I don't believe so.

9 Q Okay. Isn't it true that the way SeaCoast --
10 that Peoples identifies whether to shift costs or charge
11 -- directly charge costs to SeaCoast is essentially
12 grounded around whether there is an actual project
13 underway for SeaCoast?

14 A No, the MMM, the Modified Massachusetts
15 Method, works regardless if there is a project going on
16 or not, we do consistently shift costs to SeaCoast.

17 Q Okay. But that's sort of like executive kind
18 of costs, isn't it, the MMM?

19 A No, it includes, like you just mentioned,
20 engineering, safety, there is a handful, customer
21 experience, I believe, you know, it's -- there is a big
22 bucket. It's not just executives that goes in there.

23 Q Okay. But an organization, or a cost center
24 like ECT, their costs are going to get over to SeaCoast
25 primarily based on the amount of work that their

1 engineers are actually doing working on a project for
2 SeaCoast, right?

3 A The majority is going to be directly based on
4 that project, yes.

5 Q Okay. And the modification, I think, that you
6 discussed in your testimony, was kind of taking those
7 costs and treating them like they were payroll, even
8 though there is no SeaCoast payroll, and then plugging
9 that into your MMM formula, and then making it work that
10 way? And I am not trying to be denigrative, it's just
11 that was a surrogate for payroll that you used then to
12 apply the factor, right?

13 A Exactly. There are no SeaCoast employees.
14 And in order to ensure that we are capturing all of the
15 direct labor costs, we have imputed all of the direct
16 labor costs that Tampa Electric and Peoples Gas incur to
17 support SeaCoast into that calculation.

18 MR. REHWINKEL: Okay. I want to look, if we
19 can, at exhibit -- OPC 45. This will be, I
20 believe, my last exhibit, Mr. Chairman. And what
21 number? 222?

22 CHAIRMAN FAY: 222.

23 MR. REHWINKEL: Okay. I am going to give this
24 a short title, CAM, Cost Allocation Manual, but it
25 has a little bit of extra information in it.

1 (Whereupon, Exhibit No. 222 was received into
2 evidence.)

3 BY MR. REHWINKEL:

4 Q This is your late filed deposition exhibit
5 with the CAM attached to it?

6 A Yes.

7 Q Okay. And in this -- you are familiar with
8 this exhibit, right?

9 A I sure am.

10 Q Okay. So would it be fair to say that this --
11 there is a kind of a SeaCoast instruction for cost
12 allocation, and it appears to govern kind of the direct
13 charging of engineering time related to the SeaCoast
14 Seminole-Palatka project?

15 A Yes. It's engineering as well as legal,
16 permitting, you know, other costs as well. Yes.

17 Q Okay. This was all based around the fact that
18 there was an actual project in place and under way and
19 being built, right?

20 A Correct.

21 Q Okay. So the Cost Allocation Manual, this is
22 the public version of it. There is -- I guess it lacks
23 an attachment that had an update to the Tampa Electric
24 debt costs, it's in the confidential version?

25 A I believe so. I am not familiar with that.

1 Q This one is public?

2 A Yes.

3 Q Okay. There is no confidential information in
4 this, okay.

5 If we could turn to page 16 of the exhibit, or
6 Bates 22, OPC Bates 22 -- well, before I ask you about
7 this page. This manual here is, the TECO Energy Cost
8 Allocation Manual, is basically designed to take Tampa
9 Electric costs and push them out to any affiliates, or
10 bring them back from any affiliates for the Tampa
11 Electric Company, right?

12 A Primarily. Yes.

13 Q Okay. Because Tampa Electric Company
14 performed a lot of the services for its affiliates,
15 whether it's Peoples, SeaCoast or New Mexico Gas, right?

16 A Yes.

17 Q Okay. Now, this document, back on Bates 4, is
18 dated January -- effective January 1, 2020 --

19 A Yes.

20 Q -- do you see that?

21 And when you go to Bates 22, or page 16, there
22 is a Roman numeral VII, affiliate supplied services. Do
23 you see that?

24 A I do.

25 Q And under A there, this is the Peoples Gas

1 System segment, right?

2 A Yes.

3 Q And this is sort of, I guess a little mini
4 version of the CAM. This is, like, this little
5 subsidiary pushing costs out to others, correct?

6 A Correct.

7 Q Okay. And it says: Periodically, PGS may
8 provide services -- service to its affiliates. When
9 this occurs, PGS will direct charge that affiliate for
10 these services. Direct charges are expenses directly
11 tied back to services provided to an affiliate. Direct
12 services will be priced at direct labor costs, plus
13 fringe costs, plus payroll tax services purchased by PGS
14 from third-party providers on behalf of affiliates are a
15 cost passed through to those affiliates.

16 Did I read that right?

17 A You did.

18 Q And this is basically the only thing in the
19 CAM that really specifically addresses PGS allocating
20 costs to an affiliate, right?

21 A Yes.

22 Q Okay. And if I go to Bates 27, this is the
23 Tampa Electric Company Modified Massachusetts Method.
24 This is the MMM. And it shows the spread of Tampa
25 Electric costs to among Tampa Electric Company, Peoples

1 **Gas, New Mexico Gas, something called TECO Pipeline,**
2 **which is essentially SeaCoast, right?**

3 A Yeah, I believe I am on the right page.

4 Q **Oh, I am sorry. I am looking at --**

5 A The last page of the handout?

6 Q **Yes. 231.**

7 A Yes.

8 Q **And so this takes these costs and it applies**
9 **the revenue, net income, operating asset, it uses those**
10 **factors to spread costs among these affiliates, this**
11 **pushes costs off of Tampa Electric's books on to**
12 **affiliates, right --**

13 A Correct.

14 Q **-- that's factors?**

15 A Right. Those are the costs that these
16 affiliates incur for the support services that Tampa
17 Electric provides us.

18 Q **Okay. When I look at this, it says: Actual**
19 **as of 12/31/2018. And then it develops a blended actual**
20 **rate of 2019. And would I be mistaken in saying that**
21 **this was looking at what we are going to do for the year**
22 **2019 and beyond based on what has happened in 2018?**

23 A It would be what would be used for 2019, but
24 this exercise is done on an annual basis.

25 Q **Okay. So has this been updated here?**

1 A I am sure it has.

2 Q Okay. But it wasn't -- this wasn't updated in
3 the cost allocation manual, was it?

4 A Right. I think it was probably an example
5 illustrative, but this is done every year.

6 Q Okay. And exhibit -- on Bates 26, Exhibit C,
7 this describes the Modified Massachusetts Method, and
8 the paragraph at the bottom talks about the three-factor
9 formula, and it describes in here the relationship of
10 these -- of these activities to the costs that are
11 pushed out, right?

12 A Yes.

13 Q Like it says, the formula includes asset
14 because the greater value of an affiliate's assets, more
15 focus will be placed on that affiliate's operations due
16 to the relative effect on the consolidated business and
17 balance sheet, et cetera. Do you see that?

18 A Yeah.

19 Q Okay. So these are assumptions that are baked
20 into the way the Modified Massachusetts Method is
21 applied in Tampa Electric Company, right?

22 A Correct.

23 Q You listened to the cross of Ms. Wesley and
24 Mr. Richard related to SeaCoast?

25 A I did.

1 Q Okay. And did you come to an understanding
2 that the PGS and the Public Counsel may have a
3 difference of opinion about what costs should be
4 allocated to SeaCoast, and how they should be
5 attributed?

6 A I did.

7 Q Okay. Would you accept my representation that
8 the Public Counsel does not view Peoples Gas as having
9 intentionally misallocated costs to SeaCoast, even under
10 our view of this issue?

11 A Can you rephrase that?

12 Q Would you accept my representation that the
13 Public Counsel does not believe that Peoples Gas has
14 misallocated costs intentionally to SeaCoast, even under
15 our view of how those costs ought to be treated? In
16 other words, we don't think you are doing -- you have
17 intentionally doing anything wrong, even if our view of
18 the world is correct?

19 A Yes.

20 Q You accept that?

21 A I do.

22 Q Okay. And would you also accept our
23 appreciation that you listened to our concerns in
24 discovery and made the adjustment that's in your
25 testimony of 190,000?

1 A Sure.

2 Q Okay. If the Commission were to direct you to
3 conduct a more comprehensive study of the services and
4 costs that SeaCoast receives from Peoples Gas, and they
5 were to direct you to file that in the next case, would
6 you be willing to do that?

7 A Of course.

8 Q Okay. Thank you.

9 MR. REHWINKEL: Mr. Chairman, those are all
10 the questions I have of Ms. Parsons. I appreciate
11 your time. Thank you.

12 CHAIRMAN FAY: Okay. Thank you.

13 All right. Mr. Moyle.

14 MR. MOYLE: Thank you, Mr. Chair.

15 EXAMINATION

16 BY MR. MOYLE:

17 Q You were handed off a number of questions by
18 prior witnesses, so I am going to start by asking you
19 about the 2023 Transaction cost.

20 A Okay.

21 Q And there is approximately \$10 million in
22 costs, did you hear that testimony?

23 A I did.

24 Q There was a distinction made between
25 nonrecurring costs, which I understood that the company

1 will pick up and not seek to recover any of the
2 nonrecurring costs associated with that transaction, and
3 recurring costs, is that right?

4 A The nonrecurring costs are not being borne by
5 Peoples Gas, and we are seeking recovery of the
6 recurring costs as normal course of business for our
7 utility.

8 Q So who is bearing the nonrecurring costs,
9 Emera?

10 A Yes.

11 Q Okay. And I don't know if you have seen all
12 the documents, but you were here when those documents
13 were explained, and you would agree, those documents
14 speak to advantages largely, almost exclusively, with
15 respect to corporate interests as compared to consumer
16 interests, correct?

17 A I would disagree that.

18 Q So the question is: Do the documents do that?
19 Have you looked at all the documents and done a
20 comparison and said, all these documents, they are
21 talking about good things for the corporation, not for
22 the customer; you disagree with that?

23 A I think the documents -- I believe that the
24 testimony of our other witnesses helped to --

25 Q I understand. I am asking you about the

1 documents.

2 A Yes.

3 Q So you agree that all -- most of the documents
4 speak to the benefits to the company, not the customers,
5 correct?

6 A From what I saw, yes.

7 Q So what's the -- what's the total number? If
8 you could just break down the nonrecurring versus the
9 recurring for me.

10 A I honestly am not aware of the nonrecurring
11 costs because they weren't at Peoples Gas. I didn't
12 stay close to it.

13 Q Okay.

14 A The recurring costs are in line with what you
15 said, there is the ongoing interest cost, which is the
16 market rate that our customers and Peoples Gas would
17 incur for our debt profile. There is also some, you
18 know, recurring costs related to maintaining that debt.
19 So there is a treasury analyst, you know, rating agency
20 cost in the audit. So about \$9.7 million, I think, for
21 all of that.

22 Q And how is the company proposing that those
23 costs be shared between the corporate interest that are
24 benefiting, you know, PGS and the ratepayers? Is it a
25 50-50 split, or what's the proposal as to how those

1 recurring costs should be shared going forward?

2 A We believe that the customers would bear that.
3 That's a normal operating costing of running a utility.

4 Q So the answer to that would be 100 percent the
5 customers should pick up every nickel for those costs?

6 A They should pay for the prudent costs that we
7 incur to run our utility.

8 Q And just to make sure the record is clear,
9 that's 100 percent of the recurring costs of the 2023
10 Transaction?

11 A Yes.

12 Q You were asked some questions about the
13 theoretical depreciation reserve, and you were shown a
14 document with a PSC case. I think it would be clear and
15 helpful for the record if there were a couple of
16 principals mentioned. Intergenerational inequity. Do
17 you have an understanding of what that is?

18 A Generally, yes.

19 Q Could you put that on the record, tell us what
20 your understanding of that is?

21 A It's that the customers of today aren't
22 bearing the burden of the past or the future.

23 Q And that is a regulatory policy that Peoples
24 should pursue, correct --

25 A Generally, yes.

1 Q -- that regulators should try to pursue?

2 A It's reasonable. Yes.

3 Q And the basis of that is, is that the people
4 who are paying bills, natural gas bills or electric
5 bills contemporaneously with the services should pay
6 that, it shouldn't be shifted to either earlier
7 generations or later generations, right?

8 A Ideally, yes.

9 Q And there is also a term that was used, the
10 matching principle. Do you have an understanding of
11 that?

12 A Yes.

13 Q What is your understanding of that?

14 A Generally that your expenses should match the
15 same time period as your revenues.

16 Q And that's something that the regulatory body
17 should strive to achieve?

18 A Yes.

19 Q And are you aware that the Public Service
20 Commission is able to establish policy through its
21 orders?

22 A Yes.

23 Q All right. And are you aware that the
24 decision that was referenced to you by Office of Public
25 Counsel, in which they did not have the amortization

1 recovered over the remaining life of the asset but
2 ordered a shorter period of time, that that was
3 something that was consistent with past orders in which
4 the Commission had authorized reserve imbalances to be
5 shorter than the remaining life?

6 A I saw that order, and it did reference that,
7 yes.

8 Q And as we sit here today, just so the record
9 is clear about the, you know, whose positions are where,
10 that case that you were shown, the Commission acted and
11 said, get that back to the ratepayers in four years, is
12 that right?

13 A Yes.

14 Q And in this case, Public Counsel is saying,
15 no, we are okay with it going back in 10 years, is that
16 right?

17 A Yes.

18 Q And the PGS position is, it should go back
19 greater, over a period of time greater than 10 years, is
20 that right?

21 A Over the life of the asset, which I believe is
22 normal depreciation study protocol, as described by our
23 witness Watson.

24 Q So do you know if that's longer than 10 years?

25 A Yes, it would be.

1 Q How many years is it? Do you know?

2 A I think each asset class has a different
3 depreciation life, so I don't know specifically.

4 Q But you -- okay. But you do know it's longer
5 than the --

6 A Yes.

7 Q -- what's proposed by Public Counsel?

8 A Yes, we have long-lived assets.

9 Q If the Commission wanted to stick closely to
10 the concepts that we talked about, the matching
11 principle and the intergenerational inequity, they --
12 they one way to do that would be to order that the
13 assets be amortized over a shorter period of time. I
14 mean, they could do it over two years if they felt that
15 that would help get money back to ratepayers on the
16 books and not materially harm the company, they would be
17 free do that, would they not, the Commission?

18 A Yeah. I mean the utility has already incurred
19 all those costs, depreciation expense is just how
20 quickly you recover those costs back.

21 Q Right. You do work for SeaCoast?

22 A Yes, I do.

23 Q What -- well, there is three ways that costs
24 are allocated, direct charge, standard labor allocation
25 and the Massachusetts model, right?

1 A Yes.

2 **Q How was the decision made as to which one is**
3 **used in which situation?**

4 A So if there is a specific capital project, we
5 create orders, as Mr. Rehwinkel showed, where we have
6 team members directly charged for those costs. If there
7 are team members, like in gas control, fuel supply,
8 where a significant portion of their time is routinely
9 spent, they set up standard labor distributions to
10 ensure that those costs specifically flow to SeaCoast.
11 And for the remainder of, kind of the overhead type
12 costs, we use the Modified Massachusetts Method to
13 appropriately allocate costs to SeaCoast.

14 **Q The Massachusetts model, has that been**
15 **peer-reviewed by the Commission, if you know, by our**
16 **commission?**

17 A I am not sure.

18 **Q The standard labor allocation model, where**
19 **it's based on a fixed percentage, what's used to**
20 **determine that fixed percentage?**

21 A So each of the team members look at how they
22 spend their time, and they dictate -- you know, if I
23 spend 30 percent of my time routinely on SeaCoast, then
24 they allocate 30 percent of their time.

25 **Q Okay. How much of your time is allocated to**

1 **SeaCoast?**

2 A My time is allocated through the Modified
3 Massachusetts Method, so a little over five percent will
4 be going in the test year.

5 Q **A little over five percent?**

6 A Uh-huh.

7 Q **You were asked the question by Mr. Rehwinkel
8 about RNG projects, and that they are set up in a way
9 that is designed not to put the general body of
10 ratepayers at risk, correct?**

11 A Yes.

12 Q **Okay. Things don't always work out as
13 planned, we know that, right?**

14 A Yes.

15 Q **And so if something happens with an RNG
16 project where it does not work out, are the general body
17 of ratepayers subject to being asked to help with that
18 project from a financial standpoint?**

19 MR. WAHLEN: Mr. Chairman, I am going to
20 object. We have a stipulation on the RNG projects.
21 The only issue that has been reserved for
22 litigation in this case is whether we are going to
23 use deferral accounting. I think this line of
24 questioning is not relevant.

25 CHAIRMAN FAY: Mr. Moyle, it is outside the

1 scope of that stipulation. I mean, do you --

2 MR. MOYLE: I think that may be subject to a
3 little bit of debate. I mean, we do have a
4 stipulation on it, and, you know, Mr. Rehwinkel
5 asked questions about that, the general body of
6 ratepayers. So my question is a follow-up on what
7 the witness already, you know, testified to. You
8 know, with that, I think that would -- given that
9 it's already -- testimony has already gone into the
10 record on that topic, I think I should be allowed
11 to have a question or two about that.

12 MR. WAHLEN: I think there is a distinction.
13 He is trying to ask about what happens if there is
14 a default, or the customer fails, and that hasn't
15 happened in this case, and it may never happen, and
16 it's not relevant for discussion given the
17 stipulation that we have entered into.

18 MR. MOYLE: This whole case is it based on
19 projections, so how is it not fair to ask a
20 question of a projection to say what happens if,
21 you know, it doesn't work out?

22 They do have a couple of projects that they do
23 have in rate base that they are seeking recovery
24 for, as we sit here today. The stipulation says,
25 these two projects stay in, the other ones stay

1 out.

2 CHAIRMAN FAY: I am going to sustain the
3 motion, Mr. Moyle. Move onto your next. Thank
4 you.

5 BY MR. MOYLE:

6 Q You were asked questions about CWIP and AFUDC.
7 Could you, at a high level, draw a distinction between
8 those, particularly as it focuses on whether the company
9 is allowed to earn a return on equity, slash, profit
10 when seeking recovery through CWIP and/or AFUDC?

11 A So CWIP, C-W-I-P, is included in rate base
12 unless it is earning AFUDC. To the extent that the
13 capital project is earning AFUDC while in construction,
14 it is removed from rate base, and we are not seeking
15 rates for that.

16 Q Okay. So do you earn -- with AFUDC, do you
17 earn a profit when you are using AFUDC?

18 A So when we have AFUDC, it's not part of the
19 typical base rates. It's -- we don't actually get
20 return on that until that project goes into service.
21 When the CWIP goes into service, the AFUDC accrued on
22 that project goes into service, at that point, we would
23 earn on that investment.

24 Q You earn interest on these as the project is
25 being constructed?

1 A Correct.

2 MR. MOYLE: All right. Those are all the
3 questions I have.

4 CHAIRMAN FAY: Okay. Staff?

5 MR. SANDY: Yes, Mr. Chair, we just have a
6 very limited line of cross-examination for the
7 witness.

8 EXAMINATION

9 BY MR. SANDY:

10 Q Ms. Parsons, good morning, or I guess
11 afternoon. I would like to discuss with you very
12 briefly the RNG projects that have been the subject of
13 questioning.

14 You stated earlier that the deferral
15 accounting mentioned, I believe by Mr. Rehwinkel, was
16 onerous for the utility, is that right?

17 A Yeah. I mean, it's going to require some
18 effort, for sure.

19 Q Okay. So with that in mind, which adjustments
20 -- which adjustment mechanisms are available to the
21 utility that are the least onerous for the sake of
22 making these projects revenue neutral for ratepayers?
23 It's a bit of a convoluted question, and I am happy to
24 sort of split it up if necessary.

25 A No, I think I understand.

1 I don't know of one that is less onerous. I
2 think this is -- this is the path that I am aware of,
3 and I just can't think of any other ones. I think this
4 is the path, if we were to try to make it revenue
5 neutral, that we would need to undertake.

6 **Q Let me understand. When you say that you**
7 **don't know of a less onerous methodology, what do you**
8 **mean by that? Less onerous than what?**

9 A So I think -- if I understood your question
10 correctly, your question was, is there another way to
11 kind of make those projects revenue neutral in the test
12 year? And to my knowledge, the only path would be to
13 have deferral accounting, and so there is not one that's
14 more or less, I am just not aware if there may be
15 others.

16 MR. SANDY: Okay. No further questions, Mr.
17 Chair.

18 CHAIRMAN FAY: Okay, Commissioners?

19 Okay. Exhibits?

20 MR. WAHLEN: Could I ask just a couple of
21 redirect questions?

22 CHAIRMAN FAY: Sure, Mr. Wahlen. Go ahead.

23 FURTHER EXAMINATION

24 BY MR. WAHLEN:

25 **Q Ms. Parsons, Mr. Rehwinkel showed you an old**

1 FPL order where a four-year period was used for reserve
2 imbalance?

3 A Yes.

4 Q And there is lots of orders out there
5 addressing this issue, correct?

6 A I would assume so, yes.

7 Q Are you familiar with the recent Florida City
8 Gas rate case?

9 A Vaguely. Yes.

10 Q And did you read the filing order in that
11 case?

12 A I probably did --

13 MR. MOYLE: Mr. Chair, aren't we getting back
14 into the very basis upon which an objection was
15 raised, that these are really legal issues, and
16 legal arguments that should be made in the
17 briefing?

18 CHAIRMAN FAY: Mr. Wahlen, would you repeat
19 your question?

20 MR. WAHLEN: I am just going to ask one
21 question about the City Gas rate case and the
22 position that Public Counsel took in the City Gas
23 rate case in the reserve imbalance.

24 CHAIRMAN FAY: Okay. And not for a conclusion
25 based on that?

1 MR. WAHLEN: No.

2 CHAIRMAN FAY: Okay. Go ahead.

3 BY MR. WAHLEN:

4 Q Are you aware that witness Kollen -- I am
5 sorry, witness Garrett, on behalf of Public Counsel in
6 the City Gas rate case, proposed resolving the
7 depreciation reserve differences over the life of the
8 assets?

9 A I do.

10 Q Thank you.

11 Now, the A&G question that you spent time with
12 Mr. Rehwinkel on. Public Counsel's proposed increasing
13 the capitalization of A&G costs by about \$2.1 million,
14 right?

15 A Correct.

16 Q And that would have the affect of increasing
17 rate base, right?

18 A It would. Yes.

19 Q And if the Commission makes that adjustment,
20 it should increase rate base, correct?

21 A Correct.

22 Q And hasn't Public Counsel been complaining
23 about the level of rate base growth in this case?

24 A Yes, they have.

25 Q Thank you.

1 **CHAIRMAN FAY: Okay. Move exhibits?**

2 MR. REHWINKEL: Mr. Chairman, I would --

3 MR. WAHLEN: We would --

4 MR. REHWINKEL: I would like to -- I need to
5 ask one question, one single question on recross
6 within the scope of Mr. Wahlen's first question.

7 CHAIRMAN FAY: Okay. For purposes of
8 consistency, I will allow it. I am not sure what
9 was introduced new on that recross, but go ahead,
10 Mr. Rehwinkel.

11 FURTHER EXAMINATION

12 BY MR. REHWINKEL:

13 **Q So given you have a good memory, you probably**
14 **remember a few seconds ago, Mr. Wahlen asked about the**
15 **City Gas case and the Public Counsel's expert witnesses'**
16 **approach. You don't have any information about what the**
17 **percentage of the theoretical reserve imbalance was to**
18 **the theoretical reserve in that case, do you?**

19 A No, I do not.

20 MR. REHWINKEL: Thank you.

21 CHAIRMAN FAY: Okay. Mr. Wahlen, now I will
22 take exhibits.

23 MR. WAHLEN: Yes, Peoples would move Exhibits
24 23, 33 and 218.

25 CHAIRMAN FAY: Okay. Show 23, 33 without

1 objection, 218, without objection, entered into the
2 record.

3 (Whereupon, Exhibit Nos. 23, 33 & 218 were
4 received into evidence.)

5 MR. SANDY: Excuse me, Mr. Chairman if we may,
6 on Exhibit 218, is that admitting the Excel
7 spreadsheet as well, like the Excel spreadsheet, or
8 merely the printed out copy of this?

9 MR. WAHLEN: Well, I don't have the Excel
10 spreadsheet, but we will be glad to provide it. I
11 think we've provided it by email, but we were just
12 admitting the hard copy, but --

13 CHAIRMAN FAY: Yeah, I think the copy is
14 sufficient.

15 MR. WAHLEN: We will be glad to make the Excel
16 spreadsheet available to the parties.

17 MR. SANDY: We very much appreciate that.
18 Thank you.

19 CHAIRMAN FAY: Okay.

20 MR. REHWINKEL: Public Counsel would move 219
21 through 222, please.

22 CHAIRMAN FAY: Okay. 219 through 222, without
23 objection, show those entered.

24 (Whereupon, Exhibit Nos. 219-222 were received
25 into evidence.)

1 CHAIRMAN FAY: All right. Mr. Wahlen, excuse
2 your witness?

3 MR. WAHLEN: Yes, may Ms. Parsons be excused?

4 CHAIRMAN FAY: Yes, you may. Thank you, Ms.
5 Parsons.

6 (Witness excused.)

7 CHAIRMAN FAY: All right. Commissioners, that
8 concludes the witness testimony portion for the
9 hearing. We will move into other matters with
10 staff to address briefing and then timeline -- oh,
11 sorry.

12 MR. THOMPSON: Mr. Chair, I am sorry, if I
13 could, staff hasn't formally entered in its
14 testimony into the record.

15 Staff asks to move the prefiled testimony of
16 Donna Brown and Angela Calhoun into the record, as
17 well as their respective exhibits identified on the
18 CEL as 105, 106, 107 and 108.

19 CHAIRMAN FAY: Okay. Thank you. Good
20 catching, Mr. Thompson. We will introduce the
21 testimony and exhibits, staff, without any
22 objections, show those entered.

23 (Whereupon, prefiled direct testimony of Donna
24 Brown was inserted.)

25

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DOCKET NO. 20230023-GU – Petition for rate increase by Peoples Gas System, Inc.

DOCKET NO. 20220219-GU – Petition for approval of 2022 depreciation study, by Peoples Gas System, Inc.

DOCKET NO. 20220212-GU – Petition for approval of depreciation rate and subaccount for renewable natural gas facilities leased to others, by Peoples Gas System, Inc.

Witness: Direct Testimony of **Donna D. Brown**, Florida Public Service Commission;
Appearing on Behalf of the Staff of the Florida Public Service Commission.

COMMISSION STAFF
DIRECT TESTIMONY OF DONNA D. BROWN
DOCKET NOS. 20230023-GU, 20220219-GU, and 20220212-GU
JULY 6, 2023

Q. Please state your name and business address.

A. My name is Donna D. Brown. My business address is 2540 Shumard Oak Blvd.; Tallahassee, FL 32399.

Q. By whom are you presently employed and in what capacity?

A. I am employed by the Florida Public Service Commission (FPSC or Commission) as a Regulatory Analyst Supervisor. I have been employed by the Commission since February 2008.

Q. Please give a brief description of your educational background and professional experience.

A. I graduated from Florida A&M University in 2006 with a Bachelor of Science degree in Accounting. In 2018, I received my Masters in Business Administration from Troy University. I have worked for the FPSC for 15 years, and I have varied experience in the electric, gas, and water and wastewater industries. My work experience includes various types of rate cases, cost recovery clauses, and utility audits.

Q. Please describe your current responsibilities.

A. I currently manage the Bureau of Auditing's Financial Review Section within the FPSC's Office of Auditing & Performance Analysis. My responsibilities consist of performing audits, as well as supervising staff during audits, to ensure utility compliance with FPSC rules, policies and procedures.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DOCKET NO. 20230023-GU – Petition for rate increase by Peoples Gas System, Inc.

DOCKET NO. 20220219-GU – Petition for approval of 2022 depreciation study, by Peoples Gas System, Inc.

DOCKET NO. 20220212-GU – Petition for approval of depreciation rate and subaccount for renewable natural gas facilities leased to others, by Peoples Gas System, Inc.

Witness: Direct Testimony of **Angela L. Calhoun**, Florida Public Service Commission;
Appearing on Behalf of the Staff of the Florida Public Service Commission.

DATE FILED: July 6, 2023

1 DIRECT TESTIMONY OF ANGELA L. CALHOUN

2 Q. Please state your name and address.

3 A. My name is Angela L. Calhoun. My address is 2540 Shumard Oak Boulevard;
4 Tallahassee, Florida 32399-0850.

5 Q. By whom are you employed and in what capacity?

6 A. I am employed by the Florida Public Service Commission (FPSC or Commission) as
7 Chief of the Bureau of Consumer Assistance in the Office of Consumer Assistance &
8 Outreach.

9 Q. Please give a brief description of your educational background and professional
10 experience.

11 A. I graduated from Florida State University in 1993 with a Bachelor of Arts degree. I
12 have worked for the Commission for more than 22 years, and I have experience in
13 consumer complaints and consumer outreach. I work in the Bureau of Consumer
14 Assistance within the Office of Consumer Assistance & Outreach where I manage
15 consumer complaints and inquiries.

16 Q. What is the function of the Bureau of Consumer Assistance?

17 A. The Bureau's function is to resolve disputes between regulated companies and their
18 customers as quickly, effectively, and inexpensively as possible.

19 Q. Do all consumers that have a dispute with their regulated company contact the Bureau
20 of Consumer Assistance?

21 A. No. Consumers may initially file their complaint with the regulated company and reach
22 a resolution without the Bureau's intervention. In fact, consumers are encouraged to
23 allow the regulated company the opportunity to resolve the dispute prior to any
24 Commission involvement.

25 Q. What is the purpose of your testimony?

1 A. The purpose of my testimony is to discuss/outline the number of consumer complaints
2 logged with the Commission against Peoples Gas System, Inc. under Rule 25-22. 032,
3 Florida Administrative Code, Consumer Complaints, from June 1, 2018 through May
4 31, 2023. My testimony will also provide information on the type of complaints
5 logged and those complaints that appear to be rule violations.

6 Q. What do your records indicate concerning the number of complaints filed for Peoples
7 Gas System, Inc.?

8 A. From June 1, 2018, through May 31, 2023 the Commission logged 265 complaints
9 against Peoples Gas System, Inc. Of those, 99 were transferred to the company for
10 resolution via Commission's Transfer-Connect (Warm-Transfer) System. This system
11 allows the Commission to directly transfer a customer to Peoples Gas System, Inc.
12 customer service personnel. Once the call is transferred to Peoples Gas System, Inc.,
13 the Company can provide the customer with a proposed resolution.

14 Q. What have been the most common types of complaints logged against Peoples Gas
15 System, Inc. during the period of June 1, 2018, through May 31, 2023?

16 A. During the specified time period, approximately forty-nine (49%) percent of the
17 complaints logged with the Commission concerned billing issues, while approximately
18 fifty-one (51%) percent of the complaints involved quality of service issues.

19 Q. Do you have any exhibits attached to your testimony?

20 A. Yes. I am sponsoring ALC-1 and ALC-2, which are listings of consumer complaints
21 logged with the Commission against Peoples Gas System, Inc. under Rule 25-22.032,
22 Florida Administrative Code. The complaints listed were received between June 1,
23 2018, through May 31, 2023, and were captured in the Commission's Consumer
24 Activity Tracking System (CATS). Exhibit ALC-1 lists quality of service complaints
25 and Exhibit ALC-2 lists billing complaints. Both exhibits group the complaints by

1 Close Type.

2 Q. What is a Close Type?

3 A. A Close Type is an internal categorization code. It is assigned to each complaint once
4 staff completes its investigation, and a proposed resolution is provided to the
5 consumer.

6 Q. Do you have any additional exhibits?

7 A. Yes. Exhibit ALC-3 is a listing of complaints resolved as Close Type GI-02, Courtesy
8 Call/Warm Transfer.

9 Q. Can you explain Close Type GI-02?

10 A. Yes. Peoples Gas System, Inc. participates in the Commission's Transfer-Connect
11 (Warm-Transfer) System. This system allows the Commission to directly transfer a
12 customer to the company's customer service personnel. Once the call is transferred to
13 Peoples Gas Systems, Inc., it provides the customer with a proposed resolution.
14 Customers who are not satisfied with the company's proposed resolution have the
15 option of re-contacting the Commission. While the Commission is able to categorize
16 each of the complaints in the GI-02 category, a specific Close Type is not assigned
17 because the proposed resolution is provided by the company. Consequently, the GI-02
18 Close Type only allows staff to monitor the number of complaints resolved via the
19 Commission's Transfer-Connect System.

20 Q. How many of the complaints summarized on your exhibit has staff determined may be
21 a violation of Commission rules for Peoples Gas System, Inc.?

22 A. Staff determined that, of the 265 complaints logged against Peoples Gas System, Inc.
23 during the period of June 1, 2018, through May 31, 2023, there were no service quality
24 complaints or billing complaints that appear to demonstrate a violation of Commission
25 Rules.

1 Q. Does that conclude your testimony?

2 A. Yes.

2 into evidence.)

3 CHAIRMAN FAY: Anything else, Mr. Thompson,
4 that we are missing before we go to post-hearing?

5 MR. THOMPSON: Not at this time.

6 CHAIRMAN FAY: Okay. All right. For
7 post-hearing, so presuming parties do want to file
8 briefs at this time, staff, do we have recommended
9 structure, I guess, going forward?

10 MR. THOMPSON: Yes. Staff will note that
11 according to the prehearing order, post-hearing
12 briefs due on October 5th, and shall not exceed 50
13 pages.

14 CHAIRMAN FAY: Okay. We have October 5th and
15 do not exceed 50 pages, seeing no issues or
16 objections to that.

17 All right. With that, any other issues from
18 the parties?

19 MR. WAHLEN: I have one question, and it's
20 just for housekeeping. We have the deferral
21 accounting issue to be briefed, and I am not sure
22 we have decided on where a home for that
23 argument would be. I was going to suggest, for
24 purposes of writing the brief, that we address that
25 under Issue 57, which is kind of a general revenue

1 issue. The issue is, is it revenue neutral or not.
2 It could go somewhere else. We just need, I think,
3 to all argue that in the same place in our briefs.
4 So my suggestion would be Issue 57, but if the
5 staff wants to think about it and let us know later
6 on where to put it, that's fine too.

7 CHAIRMAN FAY: I would actually be more
8 curious for the parties consistency makes sense to
9 me. I just want to make sure you don't have any
10 other thoughts as to how you would want that to go
11 forward.

12 MR. REHWINKEL: I think it's a reasonable
13 suggestion. It just needs to have a home.

14 CHAIRMAN FAY: Yeah.

15 MR. REHWINKEL: And nobody disagrees that --
16 nobody is going to object and say it was
17 inobediently argued.

18 CHAIRMAN FAY: Great. Okay, Mr. Moyle?

19 MR. MOYLE: I think so long as it's clearly
20 designated somewhere in the brief --

21 CHAIRMAN FAY: Okay.

22 MR. MOYLE: -- it will work?

23 CHAIRMAN FAY: Let's do that then. We will
24 have that under Issue 57, unless staff has an
25 alternative.

1 MR. SANDY: So there is a working capital
2 component on that, and I believe there is some
3 stipulations there. I just want to get the
4 parties' thoughts on that. I may be mistaken, and
5 if I am, my apologies. I just wanted to make sure
6 we are on the same sheet of music going forward.

7 MR. WAHLEN: I think that it touches a variety
8 of rate base, working capital, lots of things, 57
9 is kind of a fallout issue, talking about the
10 overall revenue increase, we just put it there and
11 handle all of those pieces under 57.

12 MR. SANDY: And out of curiosity, if working
13 capital is stipulated to, how would that this
14 interact with that stipulation?

15 MR. WAHLEN: I think -- I think the working
16 capital stipulation has left room for fallout
17 issues like this.

18 CHAIRMAN FAY: Mr. Sandy, do you have an
19 alternative?

20 MR. SANDY: You know, you are never supposed
21 to raise an issue without a solution, Mr. Chair.
22 At the same time, I just wanted to air that issue
23 out to make sure we are not missing something for
24 the future.

25 CHAIRMAN FAY: I appreciate that. You are

1 ready to run for Congress now.

2 MR. REHWINKEL: Mr. Chairman.

3 CHAIRMAN FAY: Yes, any other issues, Mr.
4 Rehwinkel?

5 MR. REHWINKEL: On the brief due date, October
6 5th was set back when the hearing was two-weeks
7 ago. So we are really less than three-weeks to
8 file a brief in this case. We would ask if there
9 is a compromise time where -- we are not asking for
10 the two-weeks to be restored, but if we could get
11 another week, we would appreciate it.

12 CHAIRMAN FAY: Yeah. Just looking at the
13 timeline, Mr. Rehwinkel, I think that would allow
14 basically three-weeks for briefing and probably
15 less than three-weeks for recommendations, so --

16 MS. HELTON: Mr. Chairman.

17 CHAIRMAN FAY: Yes, Ms. Helton.

18 MS. HELTON: If we could address that. I
19 appreciate where Mr. Rehwinkel is with respect to
20 the fact that we lost two-weeks when we had to
21 change the hearing date because of the storm, but
22 the fact of the matter is that the staff's date has
23 not changed either. And it's my understanding that
24 we are going to need to file a recommendation on
25 October 26th, according to the current schedule,

1 unless that has been changed. And I honestly don't
2 know physically how staff would be able to file a
3 brief with one week less to do it with respect to
4 the briefs from the parties.

5 CHAIRMAN FAY: Yeah. I mean, it's obviously a
6 comprehensive rate case. Let me just look at the
7 calendar and see if there is any alternative to
8 that.

9 So, Ms. Helton, there is no -- I guess, from a
10 staff perspective, there is no reason that it would
11 have to be submitted on -- the briefs would have to
12 be submitted on a Friday. I mean, is that just
13 typical submission? So, like, if we were able to
14 give, you know, the parties potentially some extra
15 days -- and I am not insinuating that that would be
16 their weekend or anything, but at least a little
17 bit of help there -- if we set it, like, on the,
18 you know, the end of the day for the 9th or the
19 10th, or something, at least give them a little bit
20 more time?

21 MS. HELTON: Can we have one minute to kind of
22 gather up, please?

23 CHAIRMAN FAY: Yeah, you can, go ahead.

24 MR. REHWINKEL: The 9th would certainly help.

25 CHAIRMAN FAY: Okay.

1 MS. HELTON: Mr. Chairman, I appreciate your
2 request, but part of the issue is staff was
3 planning on using that weekend to write with the
4 briefs that we receive from the parties.

5 You know, we -- we believe that the issues
6 have been narrowed down in this case, you know, I
7 don't hear any objections to a 50-page brief from
8 the parties, and the court reporter has told us
9 that she's going to have the transcript to us,
10 probably not Monday now since we are going into
11 Friday, but by Tuesday morning I think we should
12 have the transcript. I just -- I honestly don't
13 know how your staff is going to write a brief, I
14 mean, write a recommendation if the briefs are
15 filed after October 5th.

16 CHAIRMAN FAY: And can we ensure an expedited
17 -- I mean, that obviously is very important, can we
18 ensure expedited transcript?

19 MS. HELTON: Yes. We have already talked to
20 Ms. Krick about that.

21 CHAIRMAN FAY: Okay.

22 MR. WAHLEN: Mr. Chairman.

23 CHAIRMAN FAY: Yes, Mr. Wahlen.

24 MR. WAHLEN: It's kind of out of bounds for us
25 to ask that the staff be given permission to file

1 their recommendation a little bit late, but if they
2 had a little bit of room to file their
3 recommendation out of cycle, maybe a few days after
4 the deadline, it might help.

5 CHAIRMAN FAY: Okay. Historically, I haven't
6 supported delaying those recommendations get out.
7 I do recognize this is, I guess, the sort third
8 sort of gas case we've taken up this year, so as a
9 comparable, I am not sure we've seen a lot in our
10 dockets.

11 I -- with an expedited transcript, I don't
12 take issue with the current timeline as it's set.
13 With that said, let's look here --

14 Okay, Ms. Helton, so on the rate case side of
15 it, a delayed recommendation would essentially
16 impact us in our review for our decision is, on a
17 rate case docket, is that abnormal for that time to
18 be potentially shrunken up or is that pretty
19 standard? Because it sounds like it would impact
20 us, the Commission more -- the Commissioners more
21 than anybody else.

22 MS. HELTON: If we were to file our
23 recommendation later than is currently set out,
24 yes, it will impact your ability to review the
25 recommendation, and to meet with staff to discuss

1 it if you so desired.

2 MR. WAHLEN: We are fine with October 5th --

3 CHAIRMAN FAY: Okay.

4 MR. WAHLEN: -- Peoples.

5 MR. REHWINKEL: Can we at least go to Friday
6 the 6th?

7 CHAIRMAN FAY: Okay. Hold on one second.

8 So, yeah, I guess that's my question. So is
9 the 5th a timing issue, if we moved it to the end
10 of the day business on the 6th, is that an issue?
11 Because then still allows for at that weekend work,
12 which you are saying you need for the
13 recommendation, gives OPC a little bit more time.

14 MS. HELTON: In the spirit of cooperation, if
15 we could get it by the end of the day on October
16 6th, but if y'all could also make sure that they
17 are served to staff, emailed to staff, so that they
18 can start working on it, in Word.

19 CHAIRMAN FAY: Gotcha. Okay. So would the
20 parties have any problem submitting the briefs
21 electronically once they are submitted? Perfect.
22 Oaky. Let's do that then.

23 So we will set that briefing date for October
24 6th, and keep the rest of the Agenda on schedule.

25 Ms. Helton, I appreciate you and your team

1 working a little bit to accommodate everybody.
2 Obviously, the storm has challenged a lot for what
3 we've done for this hearing, but, you know, before
4 I close, I would just like to say that I appreciate
5 all the work from the parties and our staff at the
6 Commission.

7 I don't know if this will be the last full
8 hearing I chair or not -- I guess I hope it is
9 probably the last full hearing I chair, but I
10 really do appreciate the candor, and just the
11 quality of work that has been done by the parties.
12 And as I look at other commissions and bodies that
13 operate around the country, I think we have a lot
14 to be really proud of. So this started out a
15 little bit bumpy with the technology side of it,
16 and I think moving forward, everybody recovered
17 pretty strongly to get appropriate due process in,
18 so I appreciate all of that.

19 Commissioners, are there any other comments
20 from you?

21 Showing none, this hearing is adjourned.

22 Thank you.

23 MR. WAHLEN: Thank you.

24 (Proceedings concluded.)

CERTIFICATE OF REPORTER

STATE OF FLORIDA)
COUNTY OF LEON)

I, DEBRA KRICK, Court Reporter, do hereby certify that the foregoing proceeding was heard at the time and place herein stated.

IT IS FURTHER CERTIFIED that I stenographically reported the said proceedings; that the same has been transcribed under my direct supervision; and that this transcript constitutes a true transcription of my notes of said proceedings.

I FURTHER CERTIFY that I am not a relative, employee, attorney or counsel of any of the parties, nor am I a relative or employee of any of the parties' attorney or counsel connected with the action, nor am I financially interested in the action.

DATED this 19th day of September, 2023.

DEBRA R. KRICK
NOTARY PUBLIC
COMMISSION #HH31926
EXPIRES AUGUST 13, 2024
