**Subject:** Tell the FPSC to support clean energy!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gabriella Passidomo,

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries. I ask you to pave the way for an equitable transition to 100% clean energy in our state.

Solar panels on roofs across Florida provide energy right where it's used. Community solar allows even renters and apartment dwellers to access affordable clean energy. With responsible leadership, we can ensure an energy future that is good for all Floridians.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

Sincerely,

Ms. Patricia McDonald

2348 Summerfield Rd Winter Park, FL 32792-5009 patmcdonald@cfl.rr.com

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries. I ask you to pave the way for an equitable transition to 100% clean energy in our state.

Solar panels on roofs across Florida provide energy right where it's used. Community solar allows even renters and apartment dwellers to access affordable clean energy. With responsible leadership, we can ensure an energy future that is good for all Floridians.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

Sincerely,  
Mr. Nicola Giorgio  
14 Jeff Rd Largo, FL 33774-2036

Dear Commissioner Gabriella Passidomo,

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies block the expansion of low-cost, clean solar power to protect their profits. They also add charges that are exploitative such as minimum billing fees.

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access and remove excess fees from our bills.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries.

Solar panels on roofs across Florida provide energy right where it's used. Community solar allows even renters and apartment dwellers to access affordable clean energy. With responsible leadership, we can ensure an energy future that is good for all Floridians.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

Oddly enough, FPL used to have competitive rates. But as Floridians got solar panels, FPL established a minimum monthly bill, then tripled it, and is now pushing it higher. Clearly, this doesn't happen without PSC approval, which is no doubt backed by the legislature, which gets campaign money from...FPL. And the fact that FPL can pick pockets like this means they don't have to compete, and they have no motivation to modernize and innovate. The red state of Florida is working hard against capitalism. Pretty interesting acrobatics.

Sincerely,

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries. I ask you to pave the way for an equitable transition to 100% clean energy in our state.

Solar panels on roofs across Florida provide energy right where it's used. Community solar allows even renters and apartment dwellers to access affordable clean energy. With responsible leadership, we can ensure an energy future that is good for all Floridians.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

Sincerely,  
Mr. Richard Longley  
719 SW Chiefland Ln Fort White, FL 32038-4243 riplongley@windstream.net

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries. I ask you to pave the way for an equitable transition to 100% clean energy in our state.

Solar panels on roofs across Florida provide energy right where it's used. Community solar allows even renters and apartment dwellers to access affordable clean energy. With responsible leadership, we can ensure an energy future that is good for all Floridians.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

Sincerely,  
Mr. Mike Flatland  
8172 Fort Chiswell Trl Jacksonville, FL 32244-4885 mikejflat@gmail.com

Dear Commissioner Gabriella Passidomo,

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.
