Dear Florida Public Service Commission,

The existing rate structures need to change!

I ask you to pave the way for an equitable transition to 100% clean energy in our state by establishing "Performance Based Regulations" that incentivizing FPL to make decisions that will build a decentralized grid favoring roof top solar, make the grid and transmission more resilient, while fairly compensating their investors.

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Solar panels on roofs across Florida provide energy right where it's used. Community solar allows even renters and apartment dwellers to access affordable clean energy. With responsible leadership, we can ensure an energy future that is good for all Floridians.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

Sincerely,  
Mr. Jack Hahn  
12645 SW 114th Ave Miami, FL 33176-4509 jackdhahn@gmail.com
