Re: Crystal River Unit 3 – DEF Annual Report to NRC; 20190140

Dear Mr. Teitzman:

Pursuant to and in compliance with Rule 25-6.04365(6), F.A.C., please find attached for filing on behalf of Duke Energy Florida, LLC, (“DEF”), recent correspondence to the Nuclear Regulatory Commission (“NRC”) providing DEF’s Annual Decommissioning Financial Status Report, Estimate of Costs to Complete Decommissioning and Financial Assurance Demonstration, and Projected Cash Flow Analysis for Irradiated Fuel Management for 2023.

Thank you for your assistance in this matter. Please feel free to call me at (850) 521-1425 should you have any questions concerning this filing.

Respectfully,

/s/ Stephanie A. Cuello

Dear Sir or Madam:

10 CFR 50.75(f)(1) requires each shutdown power reactor licensee to annually report to the NRC the status of their decommissioning financial assurance by March 31.

10 CFR 50.82(a)(8)(v) & (vii) require that after submitting its site-specific decommissioning cost estimate pursuant to 10 CFR 50.82(a)(4)(i), a licensee must annually submit to the NRC, by March 31, a report on the status of its decommissioning expenditures, remaining costs and funding assurance levels, as well as a report on the status of its funding for managing irradiated fuel.

A change to the spent fuel management strategy was described by Duke Energy Florida, LLC (DEF), ADP CR3, LLC (ADP CR3), and ADP SF1, LLC (ADP SF1) in the application for license transfer and was approved by the NRC in Reference 2. Under the terms of the license transfer, ADP CR3 became the NRC operator licensee responsible for all activities under the Crystal River Unit 3 Nuclear Plant (CR3) license. Under a Purchase and Sale Agreement (PSA) with DEF as part of the license transfer, ADP SF1 acquired the ISFSI, its associated equipment, the high-level radioactive and greater than Class C (GTCC) waste, and title to the spent nuclear fuel. DEF also assigned to ADP SF1 its Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste with the U.S. Department of Energy (DOE). ADP SF1 entered into an operating agreement with ADP CR3, to possess and maintain the ISFSI, its associated equipment, and spent nuclear fuel.

As the NRC owner licensee, DEF continues to own the CR3 facility, with the exception of the assets described above, and its nuclear decommissioning trust (NDT). In addition to maintaining the NDT, DEF is responsible for disbursement of funds to pay for the costs of decommissioning as work is completed.

As a result of the PSA, after October 1, 2020, funding for spent fuel management costs for CR3 is no longer provided by the NDT. Funding for spent fuel management is provided by the ADP SF1 parent companies, NorthStar and Orano. The projected irradiated fuel management costs were submitted with the revised PSDAR in Reference 1, and an updated cash flow analysis was included in last year's Annual Decommissioning and Irradiated Fuel Management Financial Status Report. In addition, ADP updated the Decommissioning Cost Estimate (DCE) in May 2022 – Reference 5. A dedicated ISFSI Decommissioning Trust Fund has been established by ADP SF1 in accordance with the Order approving the license transfer as described in Reference 4.

Accordingly, ADP CR3, LLC, hereby submits the status of its decommissioning financial assurance (Attachment 1), the estimated costs to complete decommissioning and financial assurance demonstration (Attachment 2), and the projected cash flow analysis for irradiated fuel management (Attachment 3) for Crystal River Nuclear Plant. All or most of the spent fuel management costs are a liability of the U.S. Government as a result of its breach of the spent fuel disposal contract.

This letter contains no new regulatory commitments.

Should you have any questions concerning this letter, or require additional information, please contact me at 682.503.2240.

Sincerely,
ADP CR3, LLC

6. Any contracts upon which the licensee is relying pursuant to 10 CFR 50.75(e)(1)(v)	None
7. Modifications occurring to a licensee's current method of providing financial assurance since the last submitted report	None
8. Any material changes to trust agreements	None

Note 1: This amount is based upon total DECON expenditures for radiological remediation and license termination set forth in the updated Decommissioning Funding Assurance Plan and PROMPT DECON analysis provided in Attachment 2. This is the amount of decommissioning funds estimated to be required for remaining License Termination Costs.

Note 2: ISFSI Obligation is funded by the ISFSI Decommissioning Trust Account (See Table 3.1) and based on the ISFSI demolition site-specific cost estimate dated March 30, 2022.

See Notes on the following page.....

Note 1: Cumulative Spending (\$390,498) per report, dated March 30, 2023 (3F0323-02) plus 2023 decommissioning spending \$77,480.

Note 2: Represents the amount actually disbursed from the fund for calendar year 2023.

Note 3: The amount of the decommissioning costs incurred in 2023 (\$82,697) was less than that forecasted (\$95,399) in our previous year annual funding letter. The delta of \$12,702 can be attributed to project timing optimization.

Forecast vs. Actual Decommissioning Costs	2023 Forecast	2023 Actual	2023 Variance
License Termination - ADP	\$92,803	\$80,101	-\$12,702
License Termination - DEF	\$1,541	\$1,541	\$0
Site Restoration	\$1,055	\$1,055	\$0
Totals	\$95,399	\$82,697	-\$12,702

Actual 2023 Payments from NDF \$77,480

Unpaid Invoices at 12.31.2023 \$5,217

The departure from the forecasted to actual spending results in no change to the original total decommissioning costs but does reflect a change in the sequence in which the costs were incurred.

Note 4: NDT Balance - \$382,410 plus Provisional Trust Balance \$40,261.

Note 5: Reflects ADP contributions and distributions pursuant to the terms of the Decommissioning Services Agreement (DSA) dated May 8, 2019, and as amended October 1, 2020.
