Commissioners:

I have been a property owner on Don Pedro or Palm Island for over 20 years and have done alot of yard work during that time.

If you dig a hole down around 4 feet - you hit water. This is the water the drain fields sit it. Drain fields were designed to drain into rock/sand- on this island they drain into the water which seeps

into the canals. As population on the island grows- so will this issue. We are in desperate need of a sewer system.

Please pass the wastewater service plan to get rid of septic tanks and add a centralized sewer system.

Thank you,
Gary Buhler
