Subject: RE: SUBJECT: Docket #20240032-SU

Good afternoon Kurt A. Plum,

We will be placing your comments below in consumer correspondence in Docket No. 20240032, and forwarding them to the Office of Consumer Assistance and Outreach.

Sincerely,

Yvette Gillespie

Commission Deputy Clerk I
Florida Public Service Commission
2540 Shumard Oak Blvd.
Tallahassee, FL 32399
ygillesp@psc.state.fl.us
Phone: (850) 413-6195

PLEASE NOTE: Florida has a very broad public records law. Most written communications to or from state officials regarding state business are considered to be public records and will be made available to the public and the media upon request. Therefore, your email message may be subject to public disclosure.

Subject: SUBJECT: Docket #20240032-SU

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I am the property owner at 9813 Little Gasparilla island, Placida Florida. I am also a General Contractor that has extensive experience in working in environments such as present on Little Gasparilla Island. I can tell you the attempt to install at a low pressure system will be a failure and a undue hardship on the residents off the island. The cost to install the system will greatly exceed any bid to install, as extreme difficulties will be incurred. The residential equipment will require massive ongoing maintenance, not only for the system pumps but also a generator to run them system when electricity is out, which is frequently. The water service the island currently has was poorly installed due to difficult conditions and a sewer system is much more difficult to install.

You have no information to substantiate any consideration to abandon the current septic systems the island has used for many years. No studies have been performed. I strongly urge you to deny the EU's application for wastewater service on the island.

Respectfully

Kurt R Plum
