CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Commissioners,

We are property owners and residents on Palm Island. The purpose of this correspondence is to formally request that you Deny the wastewater services application submitted to you by Environmental Utilities LLC.

Our reasons for objecting to EU's proposal are numerous and include the following:

There is no reason wastewater services are needed on Palm Island. The costs will be prohibitive for most residents. The impact on landscape and existing habitat will be excessive.

This action will pave the way for unwanted additional building on the island. Traffic congestion will be unacceptable. Our property will be infringed upon and our rights will be taken with no compensation to us. The costs for both initial hook-up as well as monthly costs will be prohibitive and outrageous.

EU has no expertise or skills necessary to initiate or manage such an endeavor.
The risk of environmental catastrophe is enormous including possible sewer spillage into the canals and Gulf.
As property owners we have no confidence that this system or this company will be able to manage this project
in the best of circumstances, not to mention the hazards that will come during unforeseen storms.
We are therefore strongly urging you to DENY the application submitted by Environmental Utilities LLC for
wastewater services.

Respectfully,
John & Debra Malone
