Comments:

Tampa Electric is asking for yet another rate increase. The history of these rate increases has raised FL electric bills 62% over the past 2 years and increased the companies gross profits by more than 150%. Florida utilities

like Tampa Electric and Duke Energy and the GOP Legislature even rolled back energy efficiency goals, and together with Gov. DeSantis, are slow-walking consumer cost savings and rebates from the Inflation Reduction Act (IRA). It is time for the company to be held responsible for cost cutting rather than rate increasing. The FL PSC is supposed to be our watchdog for bad behavior by utilities companies and that simply has not been the case. Please do NOT approve this rate measure. There are other options for TECO to save money rather than to continually increase rates.
