Subject: Teco Proposed Rate Hike for 2025 and beyond

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

This hike to a basic standard rate is unfair. If they want an increase, put it on usage and hit the ones that use more of the energy than the ones who use less. Why does it have to be a daily base rate increase? For people on fixed incomes, that hits them harder than ones that overuse their electricity. If you put it on volume, you may get where people pay more attention and become more energy efficient. They would look into better ways to upgrade and conserve. Base daily rate does nothing to incentivize these things. It would be the same if they did something or did nothing.

Respectfully,

Steve Lindner
