Subject: Rate increases

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Every sence you approved the sale of teco to this liberal company out of Canada seems that all they want to do is raise rates and put on all these adders. You are supposed to be on the customers side not electric company and there stockholders. During the last administration the cost of electric in our area was going down now you seem to approve this green new deal thinking and will hopefully be going away after this election. With the power plants going to cheap gas powered fuel there is no reason for all these rate increases and solar/wind which are all made in China. As a retired licensed stationary steam engineer when these solar/wind energy fail you just don't push a button and everything comes back on line. You are pricing struggling families and retirees into a bad situation plus having to deal with Bidenomics. You have not been holding the sewer and water rates down either. You probably need to increase the tap on fees on these new housing developments plus having these developers recoup some if cost and not make everyone else pay. These rate increases are out of line. They cut the fuel cost finally then want to raise rates on everything else. The only thing worse would be a poor Duke energy customer. Do the right thing, you know what that is if your honest. Sincerely, Mary&David Dittmer 1937 east view drive s.c.c.,fla 33573
