Comments:

The proposed rate increase from Duke Energy seems extremely high, especially for three consecutive years. Their greed for profits above the national average will put many households in peril. What if anything can be done to alter this course of action?

With the overall inflation we are all experiencing in every aspect of our lives, these proposed increases will be catastrophic. We live on a fixed income and we cannot afford these increases along with everything else. We live a modest life with no extras.

Please stop the increases on our electric bills. We do not need more expenses. Property taxes, cost of living, gas prices, food, insurance and many other things all going up. Social Security not keeping up with increases.

As a resident of Florida, I do not believe Duke Energy should be allowed to raise the rates as predicted. People can not afford to pay more for electricity. You make enough from what the rates have increased to at this time.

We aren't getting enough on our social security to afford to pay more.

Dear sir or madam,
Please do not allow Duke Energy to raise their bills much more. People are struggling to pay their bills with such a rising of housing and food etc costs! Some people will have to move out of Tampa Bay!
Thank you!
Eileen Stoner

This is OUTRAGEOUS!

Duke Energy is seeking approval for an \$820 million increase from the Florida Public Service Commission (PSC) asking:

Raise rates by 27% over the next three years, this is a \$16.48 per month increase in 2025 alone.
Increase their guaranteed profit (return on equity) to 11.5%, well above the national average of 9.71%.
Add \$2.56 more to the \$30 per month fixed customer charge, which is unrelated to electric usage.
This rate hike will burden households already struggling with rising costs.

How much more will you give to the greedy, overpaid, and overstaffed Duke Energy?

Hello.

I'm writing to ask that the current rate increase requested by Duke Energy be denied.

I feel the cost of power has gone up more than needed, putting a lot of households at risk of not being able to pay the bill every month.

Please deny this rate increase. Duke makes enough and I don't believe they should have a "guaranteed profit" while most of the population is struggling with the rising cost of living a decent life.

Thank you,

G. K. Whitewing

Current Duke customer

Please do NOT let Duke raise our electric. Between car insurance, house insurance, and electric—it's killing us older folks —forcing us out of our homes

Comments:

Please reject the greedy requests from Duke Energy for more rate hikes & fees. As someone that invested in solar panels, we already pay \$ 37 month just for the privilege of being a customer !! The requested increases will cause more people to lose their electric service and that will cause human beings & their pets to suffer & die from the sweltering heat we are living with
