Subject: 20240025 - PR69

Hello Bri,

Hint: verify if duplicate first

Once you have entered the files in CATs, please forward the email to John and state "Please forward to Clerk's office". John will send you an email back. Once you receive the email back from John, please place John's response on CATs.

Thanks

Consina

Please ensure that Duke energy does not raise rates on our electric bills.

I was informed that Duke Energy is requesting a 27% increase in rates. I BEG of you, please do not approve their asks. I can hardly afford my mortgage and bills and I work 7 days a week to stay afloat. With increasing property taxes and everything else, PLEASE REJECT THIS.

This is ridiculous as far as the power companies asking to raise rights again. FL Just approved rate hikes in the last year or two. The power companies are monopoly and how is it That other companies can't be monopolies but yet we let the power companies be one. Then every time the power companies ask for a rate hike it gets approved. This has to stop. Please do not approve another rate hike!

I recently learned of Duke Electric's proposed price increase.

This proposed increase is coming at a time when Americans are already paying astronomical prices for EVERYTHING, illegal aliens are REWARDED with taxpayer dollars for INVADING our country, our PRESIDENT is planning to dole out BILLIONS in tax dollars to buy votes by paying off college loans for people too irresponsible to pay back the money they "borrowed", housing costs are going CRAZY here in Florida, a small package of the CHEAPEST package of eight hotdogs has gone from \$1.00 to over \$3.00, STEAK is too expensive to eat, and the plan is for us to start eating BUGS to "save the planet"!

We don't worry about gas, because we can't afford a car, and PSTA now charges for every trip. A day pass is no longer an option.

I can't afford my electric bill now, and we already keep the temperature at 76° or above in the summer and 72° or lower in the winter, and Duke's proposed changes will increase their guaranteed profit to 11.5%, far above the national average of 9.71%.

Unfortunately, we are STUCK With Duke, and they no longer work with their customers who are already struggling to pay their electric bill and keep a roof over their heads and feed their families. We CANNOT afford the proposed Duke rate hike.

Please don't allow Duke Energy to increase their rates. I'm a mature single woman in a two-bedroom house in St. Petersburg and I can barely pay my bills as it is. I've been living here for four and a half years and every single year, they have increased their rates with no increase in usage. Please stop this madness!
Another struggling resident and frustrated customer,
Helen Genito

Subject: Duke's rising rates

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I'm a 100% disabled veteran living in St Petersburg, FL. I put solar panels on my home both to keep my personal use of electricity affordable and help with long term environmental concerns. Duke managed to mandate solar users be connected to their grid and then slap a monthly minimum charge of \$30 plus fees for this. Now they want to raise rates for all including this minimum charge for those of us that actually produce power with our solar panels for Duke to sell to others. Enough is enough. Duke's profit margin is already higher than the national average. Floridians are being pushed out of their homes with these unreasonable utility hikes. Do not authorize a rate hike for Duke.

Thank you,

SheilaAnne Gantley
