To whom it may concern,

I was just made aware that Duke Energy is asking for approval to raise rates by 27% over the next three years. This would increase their guaranteed profit (return on equity) to 11.5%, well above the national average of 9.71%. Floridians are struggling to pay their electric bill as it is. Please do not add to the burden of rising costs.

Thank you.

I oppose the rate increase from Duke, they are making living in Florida impossible. These big companies need to be stopped from overcharging just to make shareholders happy.
