To: Florida PSC Rate Committee,

Duke Energy has requested a rate hike of 27% over the next three years. That's a ridiculous 9% per year which is double or triple the annual raise the average working person receives in salary and three times higher than social security COLA increases over the next three years. Inflation is killing the average person for food, clothing, gasoline, utilities, insurance, rent and mortgage payments and this request by Duke Energy will simply compound the impact on all low, middle and fixed income families.

As a Duke Energy customer and a family of 2 living on Social Security and a small Pension, we urge you, the Florida PSC, to reject the requested rate increase by Duke Energy. Why can't they subsist on the same level of annual increases the rest of the working class people in Florida have to live on??

Regards,
Fred and Deb Capitosti

Good evening,

This will be short and simple. I understand we all need raises, however, the company should pay for that. As a customer/consumer, I can't afford life as it is. Another increase on yet another bill, for all us, is too much. Cut back on CEO and the likes bonuses over the next 3 years to give back to Duke employees. It's not right to increase rates to line anyone else's pockets. This is getting out of hand.

I appreciate your time.

Why? You really want people leaving florida. You all might get a BIG paycheck, but 75% of Floridians do not! VOTE NO!
