Subject: Duke Proposed Rate Hikes

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Fortunately we installed solar panels on our roof several years ago. We generate more electricity than we need and are supposed to get a credit back each year from Duke Energy for the free electricity we provide them. This year Duke greatly reduced the reimbursement rate by 80%. Could you also address this in your discussions regarding rate hikes? This is what happens when one company has a monopoly on energy supply.

Thank you,

Suzanne Bareham
