CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Duke Energy offers a Time of Use with Demand Plan (TOUD) in North and South Carolina to help customers save money on their electric bills. This type of plan is also offered by Electric Providers in Arizona. The plan does have drawbacks and must be managed by the consumer, but offers a significant discount to those who can manage their usage. Why is this not offered in Florida and can they start offering?
