Docket No. 20240018-EG – Commission review of numeric conservation goals (Peoples Gas System, Inc.)

Issue 1: Are the Company's proposed goals based on an adequate assessment of the full technical potential of all available demand-side and supply-side conservation and efficiency measures, including demand-side renewable energy systems?

Recommendation: Yes. PGS has analyzed the maximum system-wide therm savings theoretically possible from implementation of DSM measures available in Florida. As such, staff recommends that the updated technical potential, seen in Table 1-1 of staff's memorandum dated June 27, 2024, is an adequate assessment of the full technical potential, and serves as an acceptable basis for the Company's annual therm savings goals.
