Subject: Reject Duke Energy Florida's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gabriella Passidomo,

I am writing to express my strong opposition to Duke Energy Florida's proposed rate hike and to urge you to prioritize affordable, clean energy for all Floridians.

Duke's request to increase rates by \$16 per month for the average customer is unacceptable. Floridians already pay some of the highest electricity rates in the nation, with annual bills nearly \$500 above the national average. We simply cannot afford another increase.

I urge you to:

- * Reject Duke's proposed rate hike
- * Lower Duke's requested 11.15% Return on Equity to match the national average of 9.60%
- * Eliminate the unfair \$30 minimum bill that penalizes solar customers
- * Require Duke to accelerate its transition to affordable solar and other renewable energy sources

Duke's continued reliance on fossil fuels exposes Floridians to price volatility and higher long-term costs. Meanwhile, solar investments have already saved other Florida utility customers over \$200 million since 2017.

As our state's utility regulators, you have the power to protect consumers and guide Florida towards a cleaner, more affordable energy future. Please prioritize the interests of Floridians over Duke's profits.

Thank you for your consideration.

Sincerely,
Miss Tracey Dare

- * Require Duke to accelerate its transition to affordable solar and other renewable energy sources

Duke's continued reliance on fossil fuels exposes Floridians to price volatility and higher long-term costs. Meanwhile, solar investments have already saved other Florida utility customers over \$200 million since 2017.

As our state's utility regulators, you have the power to protect consumers and guide Florida towards a cleaner, more affordable energy future. Please prioritize the interests of Floridians over Duke's profits.

Thank you for your consideration.

Sincerely,

Ms. Linda Martin

Subject: Reject Duke Energy Florida's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gabriella Passidomo,

I am writing to express my strong opposition to Duke Energy Florida's proposed rate hike and to urge you to prioritize affordable, clean energy for all Floridians.

Duke's request to increase rates by \$16 per month for the average customer is unacceptable. Floridians already pay some of the highest electricity rates in the nation, with annual bills nearly \$500 above the national average. We simply cannot afford another increase.

I urge you to:

- * Reject Duke's proposed rate hike
- * Lower Duke's requested 11.15% Return on Equity to match the national average of 9.60%
- * Eliminate the unfair \$30 minimum bill that penalizes solar customers
- * Require Duke to accelerate its transition to affordable solar and other renewable energy sources

Duke's continued reliance on fossil fuels exposes Floridians to price volatility and higher long-term costs. Meanwhile, solar investments have already saved other Florida utility customers over \$200 million since 2017.

As our state's utility regulators, you have the power to protect consumers and guide Florida towards a cleaner, more affordable energy future. Please prioritize the interests of Floridians over Duke's profits.

As our state's utility regulators, you have the power to protect consumers and guide Florida towards a cleaner, more affordable energy future. Please prioritize the interests of Floridians over Duke's profits.

You consistently allow providers of electricity to charge a minimum monthly amount in this state. In the middle of 2022, you allowed FPL to triple that amount. I have solar panels, and I produce more electricity than I use essentially every day. But you let FPL charge me every month anyway. My daughter lives in Massachusetts, where the legislature is apparently not for sale to utility companies. She has solar panels, too, and many months, her electric bill is zero. It's clear the PSC and the Florida legislature are in bed with the utility companies, but please know that no Floridians approve of this theft. It doesn't matter if it's FPL or Duke Energy. And not every state legislature is in bed with utility providers. What you do when you allow providers to charge a minimum monthly bill is relieve them of the need to modernize and innovate. You allow them to continue to burn oil, wood, or anything else that damages the environment, the planet, and everything that lives on it. Your only friends are the legislators in bed with you.

Thank you for your consideration.

Sincerely,
Dr. Alfred Jonas

Subject: Reject Duke Energy Florida's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gabriella Passidomo,

I am writing to express my strong opposition to Duke Energy Florida's proposed rate hike and to urge you to prioritize affordable, clean energy for all Floridians.

Duke's request to increase rates by \$16 per month for the average customer is unacceptable. Floridians already pay some of the highest electricity rates in the nation, with annual bills nearly \$500 above the national average. We simply cannot afford another increase.

I urge you to:

- * Reject Duke's proposed rate hike
- * Lower Duke's requested 11.15% Return on Equity to match the national average of 9.60%
- * Eliminate the unfair \$30 minimum bill that penalizes solar customers
- * Require Duke to accelerate its transition to affordable solar and other renewable energy sources

Duke's continued reliance on fossil fuels exposes Floridians to price volatility and higher long-term costs. Meanwhile, solar investments have already saved other Florida utility customers over \$200 million since 2017.

As our state's utility regulators, you have the power to protect consumers and guide Florida towards a cleaner, more affordable energy future. Please prioritize the interests of Floridians over Duke's profits.

Thank you for your consideration.

Sincerely,

Mr. mike elliott
